160. Mistaken Identities 错误的身份 #041160..... 508

1. Australian export 澳大利亚出口 #041001

配图说明：只是类似真题图片，X 轴年份应从 1985 年开始

澳大利亚一直以来都在担心澳洲的出口是和北美、英国脱离的。	Australian has been worried that it is isolated from North America and UK.
但自从中国成为仅次于日本的澳大利亚第二大出口国，亚洲就成为了澳大利亚的最佳出口目的地。澳大利亚也终于找到了自己的位置。	But since China became the second largest exporter after Japan, Asia became Australia's best export destination. And Australia finally found its own place.
最近中国崛起改变了世界局势，并且影响了澳大利亚	In recent years, the rise of China has changed the world situation, and influenced Australia as well.
澳大利亚要借势利用中国崛起的优势	Australia should take advantage of China's rise.

2. Brain development 大脑发育 #041002

真题图片，信息准确，与原文匹配，因此可以直接照图做DI。

照读标题：主题是人类大脑的发育，主要是语言和认知能力的发育	The lecture talks about human brain development which contains language and cognition.
黄色线：sensing pathways从出生前开始产生，三个月大时到达顶峰	The sensing pathways which include vision and hearing starts when babies were born and peaks at 3 month old, subsides around 4 years old.
蓝色线：语言能力从出生时开始，到九个月大时到达顶峰	The language skill increases from newborn and peaks at 9 month old, and subsides around 4 years old.
橙色线：高等认知功能从出生前就已经存在，一岁时到达顶峰	The higher cognitive function starts the earliest before babies were born, but peaks later at 1 year old, and subsides around 16 years old.

3. Darkness between galaxies 银河系的黑暗 #041003

这是一张银河系的照片，是NASA拍到的一张迄今为止最大的照片	This is a photo of thousands of galaxies, which is the largest photo so far taken by NASA.
没有版权，耗费了一个多月的时间拍摄完成，用了Hubble Ultra-Deep Field。	It is copyright free. It took more than a month to produce this photo by using Hubble Ultra-Deep Field.
银河系最深的秘密，就是银河系的黑暗。银河系其实并不是黑暗无光的。	The deepest mystery of galaxies is the darkness of galaxy, because galaxies are not dark actually.
但为什么晚上的天空是黑色的呢？这是科学家们一直以来试图解答的问题。	But why is the sky dark at night? This is the question that scientists are trying to understand.

4. European Countries' Educational Expenditure 欧洲国家教育经费
#041004

图中展示了欧洲各国对教育产业的支出	The picture shows educational expenditure among different European countries.
英国是垫底的五个国家之一	UK is among the bottom 5 countries with the least funding for education sector.
英国将GDP的1.08%投在教育上，低于OECD各国的教育支出的平均线4.6%	UK spent only 1.08% of GDP on education, which is lower than the OECD countries average line 4.6%.
意大利和墨西哥的教育支出和英国接近	The educational expenditures of Italy and Mexico are close to UK.
丹麦和芬兰是教育投入最多的欧洲国家	Denmark and Finland spent much more on education than other European countries.

5. Bomb calorimeter 弹式测热计 #041005

弹式测热仪用来测量食物中的热量	Bomb calorimeter is used to calculate how much energy is contained in food.
它可以测出食物中所含热量	The thermometer can calculate the energy contained in the food.
弹式测量仪只能测量食物中的热量，但不能测试人体所消化吸收的能量。	Bomb calorimeter can measure the heat of the food but cannot measure the digestible energy that people intake.

6. High LG and Low LG 母鼠对子鼠的舔舐和理毛 #041006

照读标题：成年老鼠的应激反应是由婴幼儿时期母鼠对他们舔舐和理毛的频率所决定的	Differences in stress reactivity of adult rats are determined by maternal licking and grooming (LG) during infancy.
解释HIGH LG和LOW LG的定义	L means licking and G means grooming.
实验目的是为了探究母鼠对于子鼠舔舐和理毛的频率高低是否会影响子鼠长大后的应激反应（Stress Reactivity）	The experiment tested on high and low level of licking and grooming that mother rats give to their children, to test out its effect on the children's stress reactivity.
高频的LG可以带来更好的应激反应，减少患病几率	High LG will bring modest stress reactivity, which can reduce the risk for poor development and diseases.
低频的LG会让子鼠的应激反应增加，导致很多疾病	Low LG will increase the stress reactivity, which can increase the risk for heart disease, type II diabetes, alcoholism, affective disorders and brain aging, etc.

7. Napoleon III Renovation of Paris 拿破仑三世改造巴黎 #041007

讲述了1890年代拿破仑三世授权霍斯曼 指导的巴黎城市改造	This lecture talks about the renovation of Paris in the 1890s, which was a vast public program directed by Haussmann, commissioned by Napoleon The Third.
拿破仑三世让霍斯曼把巴黎市中心变成 一个充满新鲜空气和光明的城市，让巴 黎更安全更美丽	Napoleon the third told Haussmann to bring air and light to the center of to make the city safer and more beautiful.
城市改造拆除了危险建筑，改造了城市 街道、公园、广场，种植了大量树木， 建造了新的基础设施	The renovation removed the unhealthy neighborhood and it includes building roads, parks and squares, planting more trees and the construction of new infrastructure.
改造的原因是巴黎旧城存在许多问题， 例如过度拥挤、疾病传播、犯罪率高	Finally, the speaker mentions that the reason for doing this is that the old Paris had many serious problems such as overcrowding, disease and crime.

8. Pavlov’s Experiment 巴甫洛夫实验 #041008

标题为 *How does the motivation work?*

今天我们来探讨一个非常古老的问题：动机是如何运作的。	Today we are trying to answer the very old question: How does motivation works?
先来回想巴甫洛夫在一个世纪前做过的实验。在实验中，小狗先听到铃铛，然后小狗等着，人给小狗喂食。反复进行	Let's think about Pavlov’s experiment centuries ago. And in this scenario the dog presented with the sound, the dog waits, and then feeds food powder and this happened repeatedly.
在反复的过程中，有趣的事情发生了。以后小狗一旦听到铃铛声，就会自然而然地流口水。	During this process, interesting things start to happen. The salivation will automatically happen once the dog hear the sound.
（待补充）	(More details to be complete.)

9. Wages, consumption and household debt 工资消费债务增长 #041009

在过去的五年中，工资增长5%，涨幅较缓慢	Wage growth has increased for only 5% over the past five years, which is weak.
在过去的五年中，消费增长15%，涨幅较大	While the consumption has increased for 15% over the past five years, which is decent.
在过去的五年中，家庭债务增长40%	And the household debt has increased for 40% over the past five years.
工资的增加完全不够家庭承担消费的增长和家庭债务的增长	The increase in wages is far less sufficient to cover the increase in consumption and household debt.
人们的消费增加，并不是因为收入增加了，只是因为人们的借贷增加了。	The increase in consumption is not becaust of the increase in income, but because people are borrowing more money.

10. Air Pollution 空气污染 #041010

大量的燃烧导致了温室气体排放，这是全球变暖和气候变化的最大元凶	Increasing combustion which leads to greenhouse gases emissions is the major cause of global warming and climate change.
除了温室气体的排放，烟尘排放其实是另一个对人体健康危害更大的威胁	But soot emissions (烟尘排放) is another bigger threat to humans health which makes people live shorter.
并不是说我们可以忽略二氧化碳的排放	It is not to say that we should ignore carbon dioxide emissions and greenhouse gases
但烟尘排放对人体的伤害是二氧化碳的1.25倍	It is that soot emission is one quarter more harmful to health than carbon dioxide is.
并且，降低烟尘排放是目前短期内应对全球变暖的最快最简单的方法	Also, the reduction of soot emission is the quickest and easiest way to tackle global warming in short-term.

11. Monkey and Typewriter 猴子打字 #041011

原文：

Don't worry about it. Yes, it's strange. Yes, it's wonderful. But leave enough matter. Six hundred million years on earth and you will have life. So the monkey sitting in the typewriter and the chances are eventually he produces the complete works of Shakespeare. So what's the problem? He doesn't manage to do it in 600 million years. So what I decided to do is to run the numbers is I instead of saying type the complete works of Shakespeare. I just ran the numbers. For how long would it take a monkey typing at one keystroke of seconds to type "to be or not to be? That is the question", right? On average, how long is it gonna take my monkey friend and one keystroke a second? I don't know how long you think that would be. Maybe you can have a guess. Would it be less or more than six hundred million years, which is the period life on Earth is supposed to have emerged within? And when I ran the numbers to be or not to be, that is the question takes 12.6 Six trillion, trillion, trillion, trillion years to just that phrase. And a DNA string, that complexity emerged by chance undirected within 600 million years. Again, it is mathematically possible, but it's so incredibly unlikely that it would have that it tilts me in favor of the Christian story in which God created life simply a question of saying, let there be, and there was.

有人声称：只要留有足够的时间，比如6亿年，就会有生命出现。	There is a claim: if you leave chance in time long enough, like 600 million years, you will have life.
如果让猴子打出“生存还是毁灭，这是一个问题”这一句话需要多久时间呢？	How long does it take a monkey to type "to be or not be that is the question"?
答案是12.6 trillion trillion trillion trillion年	The answer is 12.6 trillion trillion trillion trillion years.
所以，理论上是可以实现的，但是几乎不可能。	So it's mathematically possible but incredibly unlikely to happen.

12. Frogs 青蛙 #041012

配图：饼图，分为三个地区，分别是青蛙的三个栖息地

一个关于多腿青蛙的研究在南美被发现	A research on frogs with wrong number of limbs has found ...(pie chart)... in North America.
有大量的青蛙患有肢体畸形，或多肢、少肢。	There are large numbers of frogs with limb deformities or wrong numbers of limbs.
这个现象可能是由于饮用水导致的	It might be caused by the exposure of the drinking

	water.
从大众的角度，如果这是真的，人类也可能被同样的水源影响。	From public perspectives, if this is true, the humans might also be affected by the same drinking water resources.

13. Low child birth rate 低出生率 #041013

配图：一条折线,先上升一点,后直线下降, 纵轴: Child birth rates, 横轴: 年份。2000 年的出生率大概是 1.x %

欧洲国家的出生率持续走低	This lecture talks about the decreasing child birth rate in European countries.
欧洲出生率创历史新低，仅有1.1-1.2%	The birth rate has decreased to historical lowest point, to 1.1-1.2%.
不愿意生育的欧洲女性集中在30岁以下	Especially young women under 30 years old are not willing to give birth.
这个现象将会影响男性和女性的家庭生活和失业率	This phenomenon would affect both men and women in terms of family lifestyle and unemployment rate.

14. Thermodynamic theory & kinetic theory 热力学和动力学 #041014

配 PPT 图, 与原文高度匹配, 可照读

这是一堂课的outline, 介绍热力学和动力学	This is a lecture outline of thermodynamics and kinetic theory.
首先讲到动力学，学习物质的运动和反应	In terms of kinetic theory, it is to study the motion and reaction of materials.
然后讲到热力学，热能是通过气温差产生的	In terms of thermodynamics, heat is created by the flow of thermal energy due to the differences in temperatures.

热能永远都是从较热的地方流向较冷的地方	The thermal energy will always flow from warmer areas to cooler areas.
---------------------	--

15. Dimensions 维度 #041015

配图：非常直观的文字ppt，解释了二维、三维、四维的定义，照读即可

维度是指你描述一个位置所需要的变量的数目。	Dimension means how many variables are required to describe a position.
一维：你可以用经度描述赤道上的点	One-dimension means you can describe a position on equator by longitude only.
二维：你可以用经度和纬度来描述地球表面上的点	Two-dimension means you can describe a position on the earth by longitude and latitude.
三维：你可以用经度、纬度和海拔来描述地球上方的点	Three-dimension means you can describe a position over the earth by longitude, latitude and altitude.
四维：你可以用经纬度、海拔加时间来描述宇宙当中的任何点	Four-dimension means you can describe a position in space and take the time into account.

16. Open Border 打开国门（接收移民的好处） #041016

配图：PPT，文字高度贴合，可以直接照读

发达国家应该开放国门，以下四个原因	Developed countries should open borders for other countries, according to four cases:
原则问题，促进自由，减少偏见	In terms of principal, it increases freedom and reduces injustice.
从人道主义来讲，帮助贫穷国家	In terms of humanity, it helps people from poor countries.
从经济角度来看，让我们更富有	In terms of economics, it makes us richer.
从现实问题来看，这是不可避免的进程	In terms of pragmatic, it is inevitable.

开放国门是为了所有人的利益	Opening border is in everyone’s interests.
---------------	--

17. Visual Description 可视化描述二战 #041017

配图：黑白照片，一个繁忙的市集（很像维妈那种）图文完全无关

我所展示的这张图片，里面有很多人在房间里聊天，这种就是一种图像化描述	The comic I show you with lots of people chatting around a room is a form of description.
当我们无法亲眼目睹场景时时，我们需要运用可视化描述	Sometimes we have to use visual description, especially when we cannot witness the scenario.
比如我是出生在二战时期的。我经常让我妈妈给我描述战争时期的样子。我经常问她你说过这个那个，那避难所是什么样子的，你什么时候会去避难所。	I was born during the Second World War. I always asked my mom about the war. I often asked my mom “you have mentioned this or that when talked to me.” I will ask her about what the shelter was like and ‘when did you go to the shelter’.
从妈妈的回答中，我得到了更多可视化的描述，可以让我仿佛见到了那个画面。这就是我能写出这本书的原因。	From her response I could get more visual evidence, so that I can experience as if I were there. This is how I can write my book.

18. The Increasing Productivity 科技提高生产力降低成本 #041018

配图：图文并不太相符

因为现在科技发达，速度提升，缩短了生产时间	The development of technology has shortened the production time and increased productivity.
因此生产的单位成本降低，产品也变得更方便	Thus the unit cost has gone down, so that products are becoming more affordable.
比如电脑零件（如图），过去电脑昂贵是因为生产电脑的零件半导体（semiconductor）很贵。	Take example, in the past, the cost of computer production was relatively high because the price of semiconductors was expensive.
随着科技发展，电脑的零件成本降低，生产量提高，因此单价也就下降了	With increased advance technology, the cost of computer parts (semiconductor) declined, and the productivity has increased, so the single selling price of computer has become cheaper.

19. Poverty in Rural Areas 偏远地区的贫困问题 #041019

表格: 印度 India、越南 Vietnam、津巴布韦 Zimbabwe 三个国家的乡村人口和城市人口

这个讲座讲了城市和郊区的贫困问题。	This lecture talks about the poverty in rural and urban areas.
首先，乡村的贫困率比城市的要高，因为有更多贫困的人口生活在乡村地区。	Firstly, the poverty rate in rural areas are much higher than urban, because most of the poor people live in the rural areas.
偏远地区的婴儿死亡率很高，教育程度很低。	Rural areas also have high infant mortality rate and low education level.
所以，最重要的是一定要让乡村地区的人口可以得到卫生设备和教育服务	So, it is important to make sure that population in rural areas access to sanitation and education.
之后，讲师又提到了城市地区的贫困问题是由贫困人口从乡村迁移到城市造成的。	Then, the lecturer also talked about the poverty in urban areas which is caused by the migration from rural to urban.

20. UK City Population 英国城市人口 #041020

配图: table 表格, London, Wales, Scotland 的人口数

表格上给出了英国各大城市的人口，依次念出人口	The tables shows the population in different cities in UK, ...(依次读出表格中的城市和数字)
伦敦人口700万,是威尔士加苏格兰的总和	London population is 7 million which is almost the total of Wales and Scotland.
英国的大部分人口都住在伦敦，所以伦敦比其他两个城市都更难管理。	Every one of two people lives in London, so it is much harder to manage London than the other cities.
因为英国没有一个全国性的政党来管理城市。	Because Britain doesn't have a national party to manage the city.

21. Mars 火星研究 #041021

配图: PPT, 带有 topic 和 summary 以及三个要点, 与原文高度贴合。可以照读。

介绍火星表面的环境, 和研究目的	The lecture talks about the environment on the Mars and the purpose of this project.
在火星上发现了水和土壤	We have found water and soil on the Mars.
火星上的气候比地球更暖, 更潮湿	The climate on the Mars is warmer and wetter than the earth.
我们在火星上还发现了化学元素, 对未来天文学研究有影响	We also found chemical contains energy on the Mars, which will have an impact on future astrology.

22. Edmund Wilson 艾德蒙·威尔逊 #041022

艾德蒙·威尔逊是一位美国作家和批评家	Edmund Wilson is an American writer and critic.
他研究弗洛伊德学说和马克思主义	He explored Freudian and Marxist themes.
他影响了许多美国作家	He influenced many American authors.
他对美国研究的影响持续至今	His influence on American study is still on.

23. Dissociation of a Personality 多重人格 #041023

莫顿·普林斯是一位美国内科医生和心理学家。他的畅销书《分裂的人格》的主人公Miss Beauchamp患有多重人格。	Morton Prince was an American physician and psychologist, his book “ <u>Dissociation of a Personality</u> ” was the best-seller at that time. It tells a story of Miss Christine <u>Beauchamp</u> , who was suffering from <u>MPD</u> (<u>Multiple Personality Disorder</u>)
Miss Beauchamp有多重人格，分别命名为b1，b2和b3。三种人格当中存在隐性记忆的现象。	Miss Beauchamp have several personalities, namely B1, B2 and B3. There was <u>hidden memory</u> in these 3 personalities.
Miss Beauchamp属于b2. B2 知道b1，b3知道b1和b2，但b1并不知道b2和b3的存在。	Miss Beauchamp was B2. B2 knows about B1, B3 knows both B1 & B2, but B1 knows nothing about B2 or B3.
最强的人格会占据最大多数时间，最终成为主要人格。	The strongest personality account for most of the time and it will take over the others and become the main personality at the end.
这个案例分析为犯罪调查提供了很大的帮助	This case and theory give great help to <u>crime investigation</u> .

24. Children Overweight 儿童肥胖问题 #041024

图文高度相符，可以直接照读做DI

Negative health consequences of obesity.

百分之二十的美国孩子有过度肥胖的问题	There are 20% of children in USA today have overweight problems.
心脏病在孩子中变得越来也常见，最小年纪是5岁	As a result, heart diseases have become more and more common among children. The smallest is 5 years old.
心脏疾病的病例年龄越来越小	Cases of heart attack and other health problems are happening earlier.
必须尽快解决，否则还有更严重的疾病，例如二型糖尿病，中风，肾衰竭等	This has to be solved because overweight will lead to more serious situations, such as Type 2 Diabetes, kidney failure and strokes.

25. Incentives for Sales People 销售人员薪资机制 #041025

Copyright © 2008 Pearson Education Canada

12-8

第一种“固定薪资”，只给销售人员固定的工资，与其他人无异。 这种方案用于禁止直销的行业，并且销售团队较小规模的时候。 但这种方案无法刺激员工的销售动力。	In the Straight Salary plans, you pay the sales people straight salary like normal employees without any bonus or commissions. This type of plan is used when the industry doesn't allow direct sales and when the sales teams are smaller. This plan tends to offer no motivation to work harder.
第二种“纯佣金”方案，只给销售人员佣金，没有底薪。 这种方案对公司来说最省钱，并且可以吸引到最尖端的销售人才，从而制造最大利润。	In the Commission Only plans, you pay your sales people for the sales they bring in and nothing else. There is no guarantee of income. These plans provide better value for your money paid as they are based solely on sales achieved. It can attract the most top-performing sales professionals

但是这种方案会在销售团队中产生恶性竞争，并且因为无法保障收入，最终导致销售人员的高强度工作压力。	and lead up to a high turnover. But it will lead to aggression within the sales team and sales people's stress because of the low income security.
第三种“底薪+佣金”的方案是目前最普遍的方案。销售人员有一个较低的底薪作为基本收入，再加上销售得来的佣金构成总收入中更大的一部分。 这种方案是一个更好的方案，因为和“固定薪资”方案相比，它给销售人员提供了更大的销售动力。同时在特殊时期也可以保障销售人员有一些基本收入。 但是这种方案会加大行政量。	Salary plus commission sales compensation plans are possibly the most common plans used today. Sales people receive a lower base salary along with commission pay that makes up the majority of the total compensation. This type of plan is often the better choice as opposed to straight salary because it offers motivation to increase productivity and to achieve goals. It also offers more stability—sales people will still get some type of pay even if they're in training, when sales are low during certain months, or if market conditions get volatile. However, it can be more complex to administrate.

26. Teaching 老教授谈教学 #041026

图片是一个白头发教授，穿着西装，站在讲台后。

原文：

All my research and that I conducted was my 60 plus graduate students was motivated by their need to learn so that we can teach. Of course, in some inventions happened along the way, but I have always considered that the end result, I always considered this inventions to be byproducts, byproducts of the learning process. The end product for me was always better understanding or when one could really succeed in unifying theory that can help us in teaching the subject. I have also looked at teaching as a vehicle to try new ideas, of new ways of doing things on an intelligent group of learners. That is as a vehicle for the teaching research results and in my experience, this kind of teaching is the most stimulating and motivating to students

我做的研究都是在求知欲的趋势下完成的，只有这样我们才能做好教学。	All my research conducted by 60 plus graduate students were motivated by the need to learn, so that we can teach.
虽然在学习的过程中，会衍生出很多发明，但我觉得发明只是副产品，学习的最终产品是“对知识更深入的理解”。	Although there are some inventions along the way, I’ve always considered that these inventions are the by -products of the learning process. The end product is always the better understanding.
我把教学看做是一个工具,启发新想法,尝试新的途径。	I’ve also looked at teaching as a vehicle, to try new ideas and new ways of doing things.
根据我的经验，教学应该更注重启发、激发、和鼓励学生。	According to my experience, teaching is more stimulating and motivating students.

27. The Large Hadron Collider 大型强子对撞机 #041027

(图中配有大量数据，可照读)

大型强子对撞机（LHC）是世界上最大且最强的例子加速器。科学家们用它来还原大爆炸之后的宇宙初始状态。	The Large Hadron Collider (LHC) is the largest and the most powerful particle accelerator in the world. It is used to recreate the conditions of space after the big bang at the start of the universe.
--	---

LHC在一条长达27公里的隧道中。 可以产生每秒140万次粒子对撞。	LHC is operated in a tunnel of 27km long. It can create 1.4 million times of collisions per second.
每一次粒子对撞都会产生7兆电子伏,是目前人类通过粒子对撞能产生的最强能量。	Each particle beam collision will generate 7 TeV (teraelectron volt), which is the largest energy man-made collision of particle beams.
LHC中央核心的磁铁的操作环境比绝对零度仅仅高出1.9K (开氏度), 比外太空温度2.7K (开氏度) 还要低。	The LHC's main magnets operate at a temperature of 1.9 K (读作 degree Kelvin) over the absolute zero, which is even colder than the temperature of the outer space 2.7 K (读作degree Kelvin).

28. Food Labelling 食品颜色标签 #041028

Red means Stop before you make a choice.

Amber means Caution before you make a choice.

Green means Go ahead and chose

消费者在超市买食品的时候, 包装上会显示不同的颜色, 代表食品的健康程度: 红色red、琥珀色amber、绿色green。	Traffic light colors (red, amber and green) are used to represent food healthy standard.
不同颜色对食品所包含的营养进行了划	Different colors represent different information and categorize food types, so that people would know

分，这样当我们知道自己缺少哪种营养物质的时候，就去吃某种特定颜色的食品。	what to eat when they need some certain type of nutrients.
食品零售商也应该把这些颜色标签打印在食品包装袋上，以便消费者购买他们所需要的食物。	It is the retailer's responsibility to label food properly so that consumers can choose exactly what type of food they need.
建议消费者应该多食用少盐、少脂肪的食品。	In this way, consumers can be aware of food with less salt or less fat.
这个系统可以帮助消费者轻松作出决策。	This system can help the consumer to make decisions easier.

29. Civilization 人类文明进程 #041029

(配图：集装箱的船)

随着贸易的发展，渡轮可以把人们和货物带往更远的地方。	With the development shipping and trade, ships and trades can take people and goods to places that are
----------------------------	--

	very far away.
人类的智慧让地球变得更小，但是这同时也导致了一系列环境问题。	Intelligence can make the world smaller. But this will bring a lot of environmental problems on the planet.
人类文明的进程是一个不断犯错又不断修正的过程。但是保护环境刻不容缓，我们不能再一直这样下去了。	Human civilization is a process of trial and error. But we cannot afford to trail and error anymore. It is the time now to stop damaging the environment.

30. Library Tour 图书馆介绍 #041030

(图片: 黑白照片, 图书馆服务台, 有几台电脑, 无文字)

进了图书馆以后, 你会先看到服务台, 在服务台你可以得到这些服务。	You'll see the service desk after entering the library and you can have these services at the service desk.
图书馆每层楼都有电脑。你可以使用电脑上网、收发邮件、浏览图书馆书目。	There are computers on each floor. You can use computers to access the internet, check emails and library catalogues.
如果想使用打印机, 请跟随橙色指示箭头走。请按照打印机指南来操作打印机。	Follow the orange signs to find printers. Follow the instructions to use the printers.
别忘了随身带着学生卡。你可以给学生卡充值来使用打印机。	Remember to bring student cards. You can charge the card to use printers.

31. 3D Tech on Smartphones 手机 3D 技术 #041031

图片: 双手拿着 iPhone 对着一个足球场的球门 (图文无关)

3D技术日益先进, 现在可以通过3D地图提高手机导航能力	With the advancement of 3D technology, smartphones can now use 3D technology to enhance the navigation accuracy.
------------------------------	--

可以增强游戏性2D变3D	3D tech can also enhance the enjoyment of smartphone games by transforming 2D games into 3D games
可以通过手机相机快速识别identity, 讲了很多例子	Smartphones can also use this technology to recognize users' identity. The speaker also gave lots of example of this technology.

32. Honey bee 蜜蜂的嗡嗡声 #041032

配图: 蜜蜂图

蜜蜂会跳摇摆舞来告知同伴蜜源(nectar)的所在地。	Honey bees do a waggle dance to direct other bees to the sources of nectar.
正如这里所显示, 跳舞的蜜蜂会被另一只蜜蜂用头撞一下(headbutt), 从而停止跳舞。	The dancing bees like this one can be halted by a headbutt from another bee.
现在研究发现, 这个撞头的行为其实是一个警告危险的信号。	Now research has found that this head-butt is actually a warning signal.
实验室里模拟了一个蜜源, 研究者让觅食的蜜蜂发现了危险, 比如来自天敌领地的竞争。当这个觅食回到蜂巢的时候, 会叫停其他蜜蜂的舞蹈。	A feeding was set up in the lab to mimic a source of nectar, then foraging bees were introduced to the dangers at the station, such as competition from rival colonies. When foragers returned to the hive they stopped bees dancing.
科学家们认为这种行为是要警告跳舞的蜜蜂, 蜜源是有危险的。	Scientists think the behavior warns dancers of a dangerous source of nectar.

33. Biomedical Engineering 生物医学工程 #041033

准确原文：

And so this is one picture that probably you all, you all know what it is when you see it. It's a familiar looking image, it's something that probably we all have some personal experience with, right. This is a chest x ray that would be taken in your doctor's office, for example, or a radiologist's office and it is a good example of biomedical engineering and that it takes a physical principle. That is how do x rays interact with the tissues of your body? And it uses that physics, that physical principle, to develop a picture of what's inside your body. So to look inside and see things that you couldn't see without this device and you'll recognize some of the parts of the image. You can see the rib cage here, the bones, you can see the heart is this large, bright object down here. If you're if you're have good eyesight from the distance that you're at you can see the vessels leading out of the out of the heart and into the lungs and the lungs are these darker spaces within the rib cage.

今天我们来聊，什么是生物学工程。	Today we will talk about "what is biomedical engineering".
这张X光的照片就是个很好的例子。	This picture of X-ray will be a good example.
你可以看到X射线是如何与人体组织之间产生反应，从而可以看出我们体内有什么。	You can see how the X-ray interacts with the tissues of your body, and you can also see what is inside your body.

这个明亮的区域是心脏, 旁边还有血管。
黑色的区域是肺部。

The bright area is the heart with some vessels around.
The dark area is the lung.

34. Gene & Protein 基因和蛋白质 #041034

近似原文:

Most genes contain the information needed to make functional molecules called proteins. (A few genes produce other molecules that help the cell assemble proteins.) The journey from gene to protein is complex and tightly controlled within each cell. It consists of two major steps: transcription and translation. Together, transcription and translation are known as gene expression.

During the process of transcription, the information stored in a gene's DNA is transferred to a similar molecule called RNA (ribonucleic acid) in the cell nucleus. Both RNA and DNA are made up of a chain of nucleotide bases, but they have slightly different chemical properties. The type of RNA that contains the information for making a protein is called messenger RNA (mRNA) because it carries the information, or message, from the DNA out of the nucleus into the cytoplasm.

Translation, the second step in getting from a gene to a protein, takes place in the cytoplasm. The mRNA interacts with a specialized complex called a ribosome, which ""reads"" the

sequence of mRNA bases. Each sequence of three bases, called a codon, usually codes for one particular amino acid. (Amino acids are the building blocks of proteins.) A type of RNA called transfer RNA (tRNA) assembles the protein, one amino acid at a time. Protein assembly continues until the ribosome encounters a “stop” codon (a sequence of three bases that does not code for an amino acid).

图中展示了DNA和基因的信息	The lecture is about DNA and genes.
基因决定了细胞中的蛋白质，因为基因产生蛋白质。	Genes decide the protein in the cells. Genes produce and make proteins.
从基因到蛋白质的过程是很复杂的。	The process from genes to protein is complex.
他们是所有生物的基本组成部分。	They are the fundamental building blocks of all organisms.
DNA就像一条链子。	DNA, shown in the picture, is like a chain.

35. Latin America Economic Reform 拉丁美洲经济改革 #041035

配图：一行简单的 *Economic growth percentage* 表格

在全球化进程开始之后的拉丁美洲的经济改革惨遭失败	The Latin American economic reform under the globalization has failed and people were asking why.
经济增长率比改革前更慢了	The growth rate of economy was even slower than that before the reform.
所谓的可持续发展，并没有得到持续	It was not sustainable. It is not sustained at all.
原本每天2元收入的贫困线，如今又增高了	The poverty rate which was at \$2 per day has increased.

36. Freedom of Speech in Britain 英国言论自由 #041036

配图：一张画，穿着欧洲服饰的女人在一个咖啡馆里

十八世纪，英国政策鼓励言论自由	In the 18 th century, the British policy encouraged freedom of speech.
人们可以在任何公开场合讨论政治、军事、政府，比如咖啡馆，或在大街上	People can talk about anything like politics, military, and the government in public space, in a coffee houses or on the streets.
在咖啡馆里，人们读报纸，评论政治	In coffee houses, people can read newspapers, criticize on politics.
那段时期是公众自由的重要标志时期	That period of time marked the significant peak for public freedom.

37. How Human Use Materials 人类如何利用材料 #041037

配图：四幅小图，受伤的手臂、放射科仪器等（图文无关）

人们如何使用身边的材料来提升生活的质量	How humans use materials around us to make our life better.
首先我们用身边的材料来制作简单的仪器治愈伤口，从而提高了人类健康，延长了人类寿命	First we use materials to make simple machines to cure wounds, and so that to improve our health and life expectancy.
当寿命延长，人类就有更多的时间研究和发明更精细的仪器，再次提高生活质量	When life expectancy increases, we have more time to study and invent more complicated machine, and further increase the quality of life.
比如可以扫描和观测大脑活动的仪器	Such as machines to scan and monitor brain activities.

38. Joseph Lister 约瑟夫·李斯特 #041038

约瑟夫·李斯特是一位著名的英国外科医生。	This lecture talked about a great surgeon in Britain, whose name is Joseph Lister.
他提倡将石碳酸作为消毒剂，并成为第一位在手术中使用消毒剂对医疗器械和伤口进行消毒的医生	The reason why he is well known is because he successfully introduced carbolic acid to sterilize surgical instruments and to clean wounds.
从而降低了术后感染的风险，让手术安全系数变得更高	This led to a reduction in infections and made surgery safer for patients.
人们称他为现代手术之父	People call him the father of modern surgery because his great achievement in medicine.

39. Stari Most 石桥 #041039

Stari Most （寓意“古老的桥”）1557年建造，是Mostar这个城市的地标	Stari Most (literally means “Old Bridge”), constructed in 1557, is a landmark in the city of Mostar.
Stari Most 因为战争原因被重修过两次	Stari Most has been reconstructed or twice because of wars.
它的桥跨（span）全世界最大	It is famous for its world largest span.
现在是一处著名旅游景点，还有一个有名的旅游项目 Stari Most Jump	Now it is a well-known tourist attraction, and it has a famous tourist activity called Stari Most Jump.

40. Loggerhead turtles 红海龟迁徙路线 #041040

配图: 美国东海岸的海龟迁徙图，标记了年份和路线

Loggerhead turtle是世界上最大的乌龟，在美国濒临灭绝，头大，脖子短。	The lecture talks about loggerhead turtle, one of the largest turtles in the world, and almost distinct in the USA. They have big heads and short necks.
科学家在一只海龟背上绑上仪器跟踪起，观测海龟冬 天在海里迁徙的路线	Scientists put a tracker on a turtle’s shell, and use satellites to track and locate the migration route of the turtle.

他们在不同的时间抵达不同的地方	They reach different localities in different time.
迁徙路线从南到北，耗时三个月	The migration takes three months, from the south Florida to the north.

41. The Use of Web 2.0 使用 Web 2.0 #041041

配图：与原文高度贴合，可照读

Web 2.0可以帮助政府更好地运作，服务大众	The lecture mainly talks about the use of web 2.0 on helping government functions better and serve the public better. There are 3 steps using web 2.0.
第一，网络可以搜集用户信息	Firstly, the web collects information from users.
第二，政府利用信息来了解公众	Secondly, governments use the info to understand the public.
第三，政府根据信息来回应公众需求，建立良好关系	Then, make better connection with citizens and response to their needs. ^[1]

42. Europe Economic Structure 欧洲经济结构的改变 #041042

十九世纪欧洲经济结构的变化	This lecture talks about the change of economic structure in Europe during the 19 th century.
---------------	--

工业革命之后，欧洲的经济结构经历了巨变	After the industrial revolution, the economic structure of Europe has changed dramatically.
大量机器运用于制造业，商品和服务的流通速度大大增加	Lots of machinery had been used in manufacturing so the circulation for goods and services increased significantly.
使得中产阶级人群增多，累积大量社会财富	These lead to the middle class expansion and further accumulation of social wealth.

43. Government Blogging 政府博客 #041043

配图：图片是张简洁的文字PPT，图文高度相符，可以照读，文章脉络如下

我们通常认为发博是双向互动，其中发博者/作者创造内容，而读者互动或者挑战作者	We normally see blogging as a two-way interaction, in which the blogger/author creates the content and the readers interact or challenge the author.
但是对于政府来说事情可能会特别麻烦，比如白宫	But the case will be much difficult when it comes to government, such as the White House.
因为人们在网络上会变得更加粗鲁或者莽撞，特别是在评论区	Because people will become coarser and ride online, especially in the comment area.
因此政客的博客会变得很乱，很无章法	Hence the governor blog may go wild and chaotic.

44. Superman & Superpower 超人&超能力 #041044

真实考题配图

准确原文：

Today we're going to recount heroic tales of superhuman feats of strength when in the face of disaster some people are said to have summoned up incredible physical power to lift a car off of an accident victim, move giant rocks or like Big John of song, single handedly hold up a collapsing beam to let the other miners escape. Are such stories true? There are many anecdotes supporting the idea, but we're going to take a fact based look at whether or not it truly is possible for an adrenaline charged person to temporarily gain massive strength. In proper terminology, such a temporary boost to fiscal power would be called hysterical strength. The stories are almost always in the form of one person lifting a car off of another. In one case, in Colorado in 1995 a police officer arrived at a single car accident where a Chevy Chevette ended up on top of a baby girl and sank into the mud. The officer lifted the car and the mother pulled the girl out. In 2009 a man in Kansas lifted a Mercury sedan off of a six year old girl who had been trapped underneath when it backed out on top of her. In 1960 a Florida mom lifted a Chevy Impalas that a neighbour could pull out her son who had become trapped when he was working on the car and his jack collapsed. There's even the case where the Indy 500 D helicopter from Magnum P.I. crashed in 1988 pinning the pilot under shallow water and his burly friend, nicknamed Tiny, ran over and lifted the one ton helicopter enough for the pilot to be pulled out. And of course, the list goes on and on and on. In each of these cases some aspect of leverage or buoyancy probably played some role in reducing the magnitude of the feat to something more believable and even lifting many cars by several inches still leaves most of its weight supported by the suspension springs. But our purpose today is not to debunk any of these specific stories. The majority of them are anecdotal and

interestingly not repeatable. In many cases the person who summoned the super strength later tried it again only to find that they couldn't do it. Basically what we have is a respectably large body of anecdotal evidence that suggests that in times of crisis, danger or fear, some people have the ability to temporarily exercise superhuman strength.

我们都听过英雄的传说，有时候人类也可以突然拥有超人类的力量，比如举起一辆车。但是这些故事都是真的吗？	Today we are going to recount some heroic stories. Some human beings can execute super human strength like lifting a car. But are these stories true?
其实这些故事都是真实发生过的。	They are actually anecdotal.
我们称之为“歇斯底里的力量”或“超人类力量”。	This kind of strength is called hysterical strength, or superhuman strength.
从科学的角度，当面临危机、危险或者恐惧时，人会短暂地拥有超人类力量。	From scientific perspectives, humans will temporarily have superhuman strength sometimes, especially when they are facing crisis, danger and fear.
但是在这些特殊时期过去之后，他们就会发现再也无法展现出同样的能力了。	But after that period, they cannot do the same things ever again.

45. Mars and Earth 比较地球和火星 #041045

下图为原图，图文高度相符可以照读

EARTH AND MARS

Similarities

- Polar caps
- Atmospheres
- In water climate (Earth: Ocean; Mars: Ice)

Preparing for the Phoenix Mission

- Antarctica Trial Runs
- Trenches, samples and ice-soil boundary

这个讲座对比了地球和火星的条件，以及火星是否适宜人类居住。	This lecture compares the conditions on the earth and Mars, as well as the habitability of Mars.
火星和地球有一些相同点，比如南北两极，大气层，水中气候。	There are some similarities such as polar caps, atmospheres and water climate.
但是其实火星和地球还是有很大的不同的。即使在地球上最不宜居住的地区跟火星的其他地区也特别不同	But Mars and the earth also have lots of difference. Even the most inhabitable areas on the earth are way different from those on Mars.
这个讲座也描述了在地球和火星上表层和地下不同形式的水（水文学）	The lecture also describes different forms of water (hydrology) on the surface and underground of the earth and Mars.

46. Early Robot 早期机器人 #041046

准确原文：

So this is this is a kind of object that you're probably all familiar with when you when you hear the term robot. But I'm going to show you the very, very first robots. These were the very first robots. They were characters in a play in the 1920s called Rossum's Universal Robots and the the play was written by a Czech writer called Karel Capek and basically, these robots, you know people tend to think of robots as kind of cute, cuddly toys or you know Hollywood depictions kind of devoid of politics. But the first robots were actually created and imagined in a time of absolute political turmoil. You just had the First World War, you know a finish that had a devastating impact across Europe and so people were kinda and people were kind of reflecting on what does it mean to be human, what makes us human? Those kind of questions and this kind of context is what inspired Capek to kind of write this play. And interestingly, these robots being human, they are actually in the play assembled on a production line, a bit like the Ford manufacturing production line. So even though they are human, they are assembled and these robots are designed to labour and that is their primary purpose in society.

“机器人”一词最早是由捷克作家在1935年提出的。（近似意思，不是原句）	The word robot was introduced to the public by the Czech interwar writer Karel Čapek (发音类似 Chapek) in 1935.
受到好莱坞的影响，人们最开始以为机	People first thought robots were cute and like cuddly

机器人很可爱，像洋娃娃。	toys due to the influence of Hollywood.
一战之后，人们开始思考，开始使用机器人模拟人类。	After the First World War, people started to think what makes human. They use robots to portray human beings.
机器人主要作为劳动力使用，之后机器人被赋予了一些政治意味。	Robots were then mainly used as labor force and later also assembled political meanings.

47. Linguistics and Authority of Language 语言学 #041047

下图为原图，图文高度相符可以照读；已经找到原文，内容请以原文为主

准确原文：

Speaker 1

Intellectual property is a big issue but from Vak Lang, Christine Eira says the issue is a deep structural one and goes to the heart of the way linguists themselves are taught.

Speaker 2

I think with our linguistic training we also get all this invisible training to be authorities, to be the people who know. It is part of that process that you come out as a world authority on your chosen subject. But when we move into working with communities, we have to recognise that

英澳新三国（同一国家任意三所院校）

428

免收服务费申请 扫码咨询

the communities have to be the authority in their language.

Actually, a woman in the class I'm teaching at Sydney at the moment, a career woman, expressed this very nicely, although she was talking about something else, she was distinguishing expertise from authority. And certainly linguists because of our training we do have expertise in certain very narrow areas of language, but we don't have the authority over what to do with that knowledge or what to do with other knowledge that the community produces.

I guess for me the bottom line is languages are lost because of the dominance of one people over another. That's not rocket science, it's not hard to work that out. But then what that means is if in working with language revival we continue to hold the authority, we actually haven't done anything towards undoing how languages are lost in the first place, so in a sense the languages are still lost if the authority is still lost.

语言学家通常被看成语言的专家	Linguists are often seen as the expertise of the language.
但是专业实际上跟权威是非常不一样的	But expertise is actually different from authority.
地区保留着自己语言的权威	Communities have always been holding the authority of their language.
语言正在消失，这是因为地区统治	Languages are dying out, which is generally due to the dominance of communities.
对于语言的复兴，地区不应该总是统治	For language revival, communities should not always hold the dominance.

48. Indian HIV Training 印度 HIV 培训 #041048

Community Worker Health

Training: for skill

Quarterly Meeting: experts and agents

Hard to reach: people who need this education live in remote area which is hard to come for the training

这个讲座是关于社区服务者的健康培训	This lecture talks about the health trainings for community service workers
他们会接受培训和咨询来帮助他们了解疾病的范围和如何避免疾病，例如艾滋病	Trainings and consultation will be provided to help them understand the scope and how to prevent diseases such as HIV.
大型的研讨会和讨论会每三个月就会在印度句型。这些培训是由大的医院和专家提供的	Large workshops and seminars are held quarterly in India. These trainings will be provided by big hospitals and professionals.
但是这些目标群体非常难接近或者联系，因为他们在偏远地区居住，研究队需要横跨一条河	But these target groups are hard to reach or contact because they live in remote areas and the team has to cross the river.

49. US Economy 美国经济 #041049

有两张图，图文高度相符，可以照读

关于经济的规模, 美国经济超过了中国, 日本, 英国和德国的总和	In terms of the size of economy, US economy is more than the total amount of China, Japan, UK and Germany.
关于工业产量, 美国的产量是 2.8 万亿, 但是这个只等于中国和日本的总和。	In terms of the industrial output, US output is \$2.8 trillion, but it only equals to the sum of China and Japan.

50. The Best Rice 转基因大米 #041050

确认原文

In 1943, what became known as the Green Revolution began when Mexico, unable to feed its growing population, shouted for help. Within a few years, the Ford and Rockefeller Foundations founded the International Rice Research Institute in Asia, and by 1962, a new strain of rice called IR8 was feeding people all over the world. IR8 was the first really big modified crop to make a real impact on world hunger. In 1962, the technology did not yet exist to directly manipulate the genes of plants, and so IR8 was created by carefully crossing existing varieties: selecting the best from each generation, further modifying them, and finally finding the best. Here is the power of modified crops: IR8, with no fertilizer, straight out of the box, produced five times the yield of traditional rice varieties. In optimal conditions with nitrogen, it produced ten times the yield of traditional varieties. By 1980, IR36 resisted pests and grew fast enough to allow two crops a year instead of just one, doubling the yield. And by 1990, using more advanced genetic manipulation techniques, IR72 was outperforming even IR36. The Green Revolution saw worldwide crop yields explode from 1960 through 2000.

在1943年墨西哥的绿色革命没能成功解决全球饥饿问题。	There is a Green Revolution in Mexico in 1943, bur didn't to feed its growing population.
1962年，一种新型大米IR8问世，大幅度解决了全球饥饿的问题。IR8需要精挑细选各类最上乘的大米，经过基因改良和再次挑选才能培育出来。	And then in 1962, a new strain of rice called IR8 made a real impact on world hunger. IR8 was created by carefully selecting the best from each generation, followed by further modification and selection.
IR8 比传统大米增产5倍，甚至可以在最	IR8 can produced 5 times the yield of traditional rice

佳环境条件中增产10倍。	varieties, and even 10 times in optimal conditions with nitrogen.
1980年, IR36问世, 防虫, 生长速度加快, 将原产量再次翻倍。	By 1980, IR36 was created, resisted pest, grew fast enough to double the yield.
1990年, IR72问世, 运用了更先进的基因控制技术, 打败IR36。	By 1990, IR72 outperformed IR36 because of more advanced genetic manipulation techniques.
自1960年到2000年的绿色革命, 成功地将全世界粮食产量逐步增加。	In conclusion, the Green Revolution saw the global crop yields explode from 1960 to 2000.

51. Language Disorder 语言障碍 #041051

配图: pie chart, 标题为 language disorder in the UK, 无其他文字, 只标了一个 10%

语言是人类智慧的结晶, 也定义了人类的特性。	Language is a human essence that defines human characters.
然而10%的美国人患有语言障碍。	However, 10% of Americans suffer from language disorder.
语言障碍属于儿童残障之一, 但这也是个很复杂的问题, 因为语言障碍还牵涉到儿童心理学。	Language disorder in a children's disability, but it is a philosophical question because it involves in children's psychology as well.
要想提高语言使用能力, 我们需要知道什么是语言? 人是怎么学习语言的? 孩子是怎么学习由文字组成的不同句子的?	To improve their linguistic competency, we should know what language is, how language is learned, and how can children speak different sentences started by words?

52. Survey on media 网上调查 #041052

NEW MEDIA: SURVEY

What's the most common way that you get access to information?

Internet: 62%

www.globalandmail.com

如果我问你们喜欢从哪些渠道获取信息，报纸？收音机？电视？	Let's say if I'm asking which source do you often use to get information. Newspaper? Radio? TV?
调查结果显示有62%的人选择网络	And the survey shows 62% of the people chose internet.
你们可能以为我要说，网络的重要性，或是网络短短几年快速地改变了我们的世界	You might be thinking I am going to say, how important the internet is, or how quickly it has changed the world for a few year.
但如果我告诉你们，这个调查是在网站 globalandmail.com 上做的呢？	But what if I tell you this survey is conducted on the website globalandmail.com ?
我们的结论就不一样了。因为网站上回答问题的人一定是经常使用网络的，这个样本是一个偏性样本，不具有代表性	Our answer will be different. Because the people who did this survey on a website must be frequent users of internet. This sample is a biased sample.
所以我们要注意调查问卷的操作过程	So we have to pay attention to how a survey is conducted.

53. Economic and technological development 经济与科技发展 #041053

富有国家已经到达了国家发展曲线的转折点。	Rich countries have reached the turning point of development.
在工业社会之前，收入增长直接影响人们的幸福指数。	During pre-industrial societies, the increase of income contributed to human's wellbeing.
在此期间，非洲和中国等国家飞速发展，收入水平的增加提高了国民幸福值	Countries such Africa and China has developed a lot recently, and the increase of income has contributed to the improvement of human wellbeing.
但是对于富有国家来说，经济科技的进步与人民幸福感不存在相关关系了。	But for rich countries, it seems that there is no correlation between economic and technological progress and contentment.

54. Cloud Formation 云的形成 #041054

图文高度相符

这个课介绍了什么是云，以及云的形成过程	The lecture introduced what the cloud is and how the cloud is formed.
云的组成部分有可能含有污染颗粒，是降水过程中的重要一环。	Clouds may contain pollutant particles and is one of the precipitation process.
形成云的主要来源，来自于海洋和空气污染（直接照读ppt文字）	Clouds are formed from ocean/sea and airpollution. (Read out the words listed in the Powerpoint Slides.)
云的形成，会带来如下后果：（照着ppt直接读）	The impact of clouds include ... pollution and high level of ... (Read out the words listed in the PPT.)

55. Underwater Antares Detectors for fish 水下鱼群探测器 #041055

配图：展示海面以上和海面以下的装置图，图中写出研究院的名字

水下遥控探测器 Antares 是安装在水下，检测鱼群的摄像头	Underwater remote detector called <u>Antares</u> [æn'tæəri:z] is a camera installed under the water for fish monitoring.
它采用了远程控制的技术，人们可以足不出户地检测鱼群。	It is a remote technology system. Researchers can monitor fishes on their computers in universities.
摄像头可以检测周边环境和鱼群，可以看到鱼群吃什么	The camera can detect surrounding environments and fish. This help find out what they eat and what they don't eat.
因此他们可以在必要时停止喂养，这样可以节省时间和人力	They can stop feeding them if necessary in some situation to save time and labor

56. Warning Label 化学品的警示标签 #041056

配图：一个杀虫剂的罐子，正面是草地，反面是警示信息

危险化学品的罐子标签，正面是一片草地的图片，画面很美好，不会让人觉得危险，仅在反面标注warning label。	When you look at the label on a hazard chemical product, the lovely picture looks nice and won't make people think of dangerous meanings. The warning information is only displayed at the back.
这个设计是不合理的。警告的字体很小，其实很多人都看不清使用注意事项会导致危险。	This design is very concerning. The warning font is small, which makes it even more difficult to read.
60%的人看不清楚10号以下的字体，40%的美国人是不识字的。	60% of Americans cannot recognize fonts smaller than size 10, and 40% of Americans are illiterate.
他们看不懂，因此也会没有注意到这些产品的危险。	While people cannot recognize easily or cannot read, they won't be aware of the hazard of these chemical products.
危险化学品的罐子标签，正面是一片草地的图片，画面很美好，不会让人觉得	When you look at the label on a hazard chemical product, the lovely picture looks nice and won't make

危险，仅在反面标注warning label。	people think of dangerous meanings. The warning information is only displayed at the back.
-------------------------	--

57. Poverty and Health Crisis 贫困与健康危机 #041057

配图：三组柱状图，含三个国家地区

贫困人口在面对健康危机的时候更容易生病	Poor people are more vulnerable to health crisis
两大原因：卫生条件，水资源供应	There are two reasons: sanitation and water supply
受影响的人口将近180万，而其中xx万是五岁以下的儿童	It affects 1.8 million people and xx million of them are children under 5 years old
世界一半的人口.....(待补充)	Half of the world population.....

58. Greenhouse gas 温室气体 #041058

配图：四张图，有风车发电，烟囱冒烟等

温室气体这几年来逐步增长。	Greenhouse gas has increased during these years.
温室气体和气温升高之间的关系是真实存在并且毋庸置疑的。	The correlation between greenhouse gases and the temperature growth is true and undeniable.
我们知道温室气体是不好的，但是我们不知道如何降低二氧化碳排放量。	We know that greenhouse gases are bad, but we don't know what to do to reduce the carbon dioxide.
我们必须竭尽所能去节约能源。	We must try our best to conserve the energy.

59. The Fourth Dimensions 第四维 #041059

我们身处于四维空间。	We are living in a four-dimension space.
四维包括了经度、纬度、海拔和时间。	Four dimensions include longitude, altitude, latitude, and time.
我们可以用这四个维度来表示任何时间任何地点的事情。	We can use the four dimensions to describe anything in space at any time.
如果你想描述一事件，你需要提供纬度、经度、时间和日期。	If you want to describe an event, you need altitude, longitude, time and date.

60. Politics of Happiness 幸福指数与政治 #041060

准确原文：

Despite all this evidence and despite Jeremy Bentham, countries have not fallen all over themselves to use this research as an object of public policy.

As Joanne pointed out, only one country, tiny little Bhutan, wedged between China and India, has adopted the Gross National Happiness as the central index of government policy, and actually has a good deal of success in education and in health and in economic growth and in environmental preservation. They have a rather sophisticated way of measuring the effects of different policies on people's happiness. They are the only country to go that far.

英澳新三国（同一国家任意三所院校）

439

免收服务费申请 扫码咨询

But you are now beginning to get other countries interested enough to do kind of white paper policy analyses of happiness research—what effects would it have if we used it more for public policy? You are beginning to get countries like Australia, France, Great Britain, that are considering publishing regular statistics on happiness. So it is beginning to become a subject of greater interest for policymakers and legislators in different advanced countries.

目前世界上，只有不丹这个位于中国印度之间的弹丸之国，真正采用了国民幸福指数作为衡量政府政绩的核心指标。	There is only one country - the tiny little Bhutan, located between China and India, has adopted the Gross National Happiness as the central index of the government policy.
不丹已经在教育、医疗、经济增长和环境保护等方面取得了很大的成效。	It has been quite successful in education, health, economic growth, and environmental preservation.
针对提高国民幸福指数的一些列政策，不丹有一套完善成熟的评价体系。但不丹是世界上截至目前为止唯一的一个成功做到的国家。	Bhutan has very sophisticated methods of measuring of the effects of different policies on happiness, but Bhutan is the only country in the world who has gone that far.
现在有许多国家，例如澳大利亚，法国，英国，开始对白皮书政策、幸福研究以及公共政策开始感兴趣。	But now some other countries like Australia, France and Great Britain has become interested in white paper policies, happiness research, and the effects of public policies.

所以，幸福生活指数这一议题已经在各国演变成了执政者最感兴趣的议题。	So it has gradually become a subject of great interest for policy makers and legislators in different countries.
-----------------------------------	--

61. Practice and Performance 熟能生巧 #041061

配图：

练习在任何一个领域对于提高表演都是至关重要的。	Labor practice is crucial to improve performance in whatever area.
拿练习小提琴做例子，练习是专业人士每天必做的事情。	Take violin learning as an example. Practice is what the experts do.
练习还可以培养经历，因为练习可以让你认识到自己的不足，所以你可以努力去克服那些弱点。	Labor practice can also help with experience because through practice you can identify the weakness so that you can put most of your effort on that weakness.
比如，当你学习数学的时候，你发现自己不太在行集合，那么你就得多练习几何。	For example, when you learn mathematics and you find you are not good at geometry, then you will have to practice more on geometry.
即使是那些具有很高国际认知度的名人们，他们是通过重复性的练习去拿到了今天的成就的。	Even for those talents with international recognition, they have practiced repeatedly for years before they have any achievement.

62. London Taxi Service 伦敦出租车 #041062

真题原文：

But we can really thank the Great Exhibition of 1851 for giving us the world’s premier taxi service, for it was going to this exhibition, and this fabulous exhibition invention’s from all around the four corners of the Empire that the visitors were appalled, dismayed and vexed by their journeys to this exhibition, because the cabbies of the day, and their horse-drawn carts were absolutely terrible, could not find their way to this exhibition. And, so, a great public outcry, the London Authority sets up Public Carriage Office, which is an organization that still exists. And you can take a short walk to Penton Street up the road. And this Public Carriage office took on the responsibility of licensing all major taxi drivers in London. All taxi drivers from 1851 onwards had to pass what is now known as the London knowledge, was phenomenal knowledge of London. What is the London knowledge? It’s the ability to remember the 25,000 streets, have it all interconnected and all the main arterial roads in and out of London. Cabbies need to know all these plus a thousand points of specific interest cafes, bars, public offices. They need to know them all, as part of their training.

1851年在伦敦举办的万国工业博览会，向世界首次展示了世上最高端的出租车服务。	During the Great Exhibition in 1851, London gave us the world’s premier taxi service.
当时，来自世界各地的人们涌入伦敦，但当时马车系统太落后，无法带客人抵达博览会会场。	At that time, visitors from all around the world wanted to to the exhibition, but their horse-drawn carts were too terrible to find their way to the

	exhibition.
于是伦敦当局设立了公共运输局，这个组织至今还在运行。	So London Authority sets up Public Carriage Office, which is an organization that still exists.
公共运输局负责全伦敦的出租车司机的执照审核与培训。	This office license all taxi drivers in London and provide training.
自1851年开始，所有出租车司机必须通过“伦敦道路交通知识”，包括记住伦敦两万五千条街道以及他们如何相连，记住出入伦敦的所有主要干道，以及一千多家著名景点、政府机关以及餐饮咖啡店	All taxi drivers since 1851 must pass the London Knowledge Test, which means they have to remember 25000 streets in London and have them all interconnected, all the main roads in and out of London, plus 1000 places of interests, public offices and cafes.

63. Image of animals 动物图像 #041063

视频含 ppt, 尽量把 ppt 内容全抄下来作为笔记

怎样去发现动物的图像？	How to find images of animals? (PPT: 6 trillion triangles)
怎样利用电脑构图动物？如果我们能使用更多的三角构图，我们就能看到更多的细节。	How to use computers to image animals. The more triangles we use, the more details we can see.

64. Poetry Rhythm in Shakespeare 莎士比亚的诗歌韵律 #041064

有配图

诗歌艺术帮助读者了解人物的语言和行为。	Poetry helps readers to understand what the characters say and do.
使用节奏韵律是有很大大好处的。	It is a great advantage to use rhythm.

一个句子里边可能是至少有10个音节，但是每个句子的最后一个单词必须要是押韵的。	There has to be at least 10 syllables in one sentence and the last word of the sentence must rhyme.
---	---

65. Melbourne 墨尔本 #041065

图片 Flinders Station; 女声，语速快

墨尔本很美，但它可以变得更好。	Melbourne is a beauty, but it can be better.
对于墨尔本来说，重要的是去做...	It is important for Melbourne to do
多样性对于市场和文化作出了很大的贡献。	Diversity contributes a lot to the market and its culture.

66. Banana 香蕉 #041066

图片：一个篮子里放着苹果香蕉

本文谈论政治和科学之间的关系	This lecture talks about the relationship between politics and science.
以香蕉为例：首先你要知道你想要吃香蕉	First, you need to know that you want a banana.
然后你要知道香蕉摆在篮子里的事实	Then, you need to know the fact that there is a banana in the basket.
然后你可以决定从篮子里拿出香蕉	Then you can make the decision to get the banana from the basket.
(后续还有更多重点尚待补充)	(More details need to be completed.)

67. Globalization in Us 全球化对美国的负面影响 #041067

图片：一个表格（信息基本没用），讲了几个主要的经济指标下降

这个讲座讲的是全球化和美国经济增长之间的关系	This lecture is about the relationship between the globalization and growth rate in US
2000年的经济增长比全球化前的1960年的经济增长要低很多	The growth rate in 2000 is much lower than 1960 before the globalization
但是贫困率确实增长了很多	But the poverty has up to a large degree
贫困人口在总人口中的数量有在提升	The proportion of the poor in the whole population has risen.

68. Measurement 计量 #041068

图里有 时钟、算盘、计算机

回到过去，当人们没有一个国际统一的计量系统的时候	Go back to the early times, when there was no international measurement standard system.
（后面在介绍measurements计量方式，待补充）	(More details need to be completed.)

69. Ecological Footprint 生态足迹 #041069

一张红绿色的数字表格，标题就是 Ecological Footprint

根据WWF的调查显示，大于1/3的地球资源被人们在过去的30年消耗光了	According to the data collected by WWF, more than 1/3 of resources on the earth have been consumed by people during the past three decades.
生态足迹是用于计算每个居民需要多少的土地	Ecological footprint is to calculate how much land does each resident need.
有结果显示7.7全球公顷...2.2全球公顷...所以平均每人需要1.8公顷的全球土	The results showed 7.7 global hectares ... 2.2 global hectares ... So an average of 1.8 global hectares is

地,这意味着总共有11.8十亿全球公顷的土地被需要	needed by an individual, which means a total of 11.8 billion global hectares is required.
如果每个人都像澳大利亚人一样消耗资源,到了2050年,我们将会需要至少两个星球的资源。	If everyone on the earth consumes resources like in Australia, by 2050, we will need at least two planets for resources.

科普: “生态足迹”指人类生存所需的土地, 计算单位是 *global hectares*

70. The Silk Road 丝绸之路 #041070

丝绸之路跟我们的想象不太一样	The Silk Road is not like what we thought it would be.
人们通过丝绸之路到达其他国家, 交换商品, 然后返回家乡。	People travelled in groups to other countries through the Silk Road, exchanged things, and then came back.
丝绸之路还有一些分支路, 可以通向其他国家, 比如说是印度, 这些路叫做“琥珀之路”	There were also some side groups who went to other countries such as India, which was called the “Amber Road”

珀路”	Route”
在那时，丝绸之路上还经常进行着一些礼品交换	At that time, there was also gift changing happened on the Silk Road.

71. Win-win Solutions 双赢局面 #041071

注意：视频中仅有短暂时间显示 ppt，ppt 短暂出现后再次切回老师单独画面。

准确原文：

At the same time, you've got two British social scientists here, Delice Rowe works for the International Institute for Environment and Development in London, and Joe Elliot actually works for wildlife works for the African Wildlife Foundation nowadays. But she's saying here, poor people should not pay the price for biodiversity protection. So you can see the sort of the nature of the debate. What is the what is the impact that they're all talking about? Well, it's about whether you can achieve a win-win solution, whether you can achieve economic growth, which brings wealth in order to cut poverty without damaging biodiversity and the argument is that if you want to protect biodiversity, you have to focus on that as a goal, but if you do that you have you run the risk of hurting the poor and you also run the risk of inconveniencing or reducing economic growth and we're used in developed countries, industrialized countries, to seeing this argument this axis argued about with, let us say, a government wishing to start drilling for oil in place X, which is full of wildlife and the wildlife conservation societies urging them not to on the grounds that it's a wilderness refuge. We're used to that debate. What I'm saying is that in the developing world, there's a third access and it's quite a complex one.

穷人不应为生物多样性的保护工作付出代价	Poor people should not pay the price for the biodiversity protection.
现在的争议是，能否在保障经济发展、摆脱贫困的同时，不损害生物多样性。	There is a debate about whether you can keep economic growth which can solve the poverty issues without damaging biodiversity.
答案是，几乎不可能在环保、经济发展、脱贫这三者之间找到一个双赢的平衡点。	The answer is that it is impossible to reach a win-win solution among conservation, development and poverty.
比如，如果把生物多样性定位目标，那么势必就会牺牲经济发展和穷人的利益。	If you set bio-diversity as your goal, you run the risk of hurting the poor and the economy.
发达国家和工业化国家目前都在权衡左边这条线：生物多样性和经济发展的矛盾和平衡点。	Developed countries and industrialized countries are often concerned about the conflict on the first axis between biodiversity and economic growth.
但是发展中国家面临的还有右边这条线，也就是说他们还要顾虑贫困人口的利益，	But developing countries are the third axis which involves poverty, which will make the situation

因此局面变得更加复杂。

more complex.

72. Interval training 间歇性训练 #041072

视频：类似一个访谈节目的视频

间歇性训练是一种将高强度训练和低强度训练交替进行的运动方式。比如你可以先跑20米的速度，再跑30米的速度。

Interval training is that you work out in a way that alternate periods of high-intensity exercise with low-intensity recovery periods, which means you do the exercise at 20m speed, and then at 30m speed.

间歇性训练经常用于提高运动员的身体素质。

Interval training has been often used for athletes and their sports.

间歇性训练可以很好地提高心肺有氧的练习效果

Interval training can accelerate cardio and aerobic exercises.

73. Sigmund Freud 西格蒙德·弗洛伊德 #041073

准确原文：

For better or worse, we live in a world profoundly affected by Sigmund Freud. If I had to ask you, choose a psycho, you know, name a famous psychologist, dancer, mostly you'd be Freud. He's the most famous psychologist ever and he's had a profound influence on the 20th and 21st century. Some biographical information, he was born in the 1850s, he spent most of his life in Vienna, Austria and, but he died in London and he escaped to London soon after retreating there at the beginning of World War two as the Nazis began to occupy where he lived. He's one of the most famous scholars ever, but he's not known for any single discovery. Instead, he's known for the development of an encompassing theory of mind. One that he developed over the span of many decades.

谁都不能否认，我们生活在一个弗洛伊德影响下的世界。

We live in a world that is profoundly affected by Sigmund Freud.

西格蒙德·弗洛伊德是最著名的心理学家，他的影响力贯穿20世纪和21世纪。	Sigmund Freud is the most famous psychologist ever and he has had a profound influence on the 20 th and the 21 st century.
他1850年代出生于奥地利维也纳。后来纳粹占领了他的家乡，他逃难到伦敦，在二战初期于伦敦去世。	He was born in the 1850s in Vienna, Austria. Then he escaped to London because his homeland was occupied by Nazis. He died in London at the beginning of the Second World War.
弗洛伊德并不是因为他的某一个理论而闻名于世，而是因为他所创建的庞大的心理学理论。	He was not known for any single discovery, but for the development of an encompassing theory of mind over the span of decades.

74. Dog's Growl Distinction 区分狗的低吼声 #041074

准确原文：

When this dog approaches some food, another dog's playful snarls are played back. The dog seems curious but the sound doesn't stop it from taking the bone.

Here a dog hears the growls of a dog being approached by a stranger. But these don't deter it from grabbing the bone either. In another scenario, the sound of a dog protecting its food is played back.

This time the dog backs off.

These experiments suggest the dogs can distinguish between different types of growls.

第一个实验中，研究员播放了一段录好的狗吠声，并没有制止第一只狗叼走食物。	The first dog approaches food when it hears an “alone bark” recorded. The barks didn't stop the dog taking the bone.
第二个实验中，研究员播放了一段录好的防止陌生人靠近的低吠声，也没有制止第二只狗叼走食物。	The second dog approaches food when it hears a “growl to strangers” recorded. The growl didn't stop the dog taking the food, either.
第三个实验中，研究员播放了一段录好的保护食物的低吠声，结果这	The third dog hears the “growl to protect food” and this time the dog backs off.

次狗就不敢叼走食物了。	
这个实验说明狗是可以分辨不同的狗吠、低吼声的。	The experiment suggest that dogs can distinguish different types of growls.

75. Admission Processes in UK Universities 英国大学录取流程 #041075

Student Admission Process in UK 2007

视频描述了英国大学录取学生的步骤	The video is about student admission process in UK.
学生申请会放进pool中，有三种结果：录取，拒绝和待定。	Student applications will go into a student pool, and there are 3 outcomes of students: admit, pool and reject.
你的申请如果成功，将直接被录取；反之，会被拒绝	Your application might be directly admitted, or be rejected.

25%的学生申请需要待定，会重新回到pool中等待进一步审批。

25% of student applications will go back to the pool for further consideration.

76. Multi-Tasking Man 同时进行多项任务的牛人 #041076

一个会议上描述一个可以同时进行多项任务的牛人

一个multi-tasking的人在security council上一直点头听讲	A multitasking man at the security council was found nodding his head all the time. He was actually paying attention.
他听得懂俄语，可以同时听懂英语同传，还能指出同传的错误	He can listen to Russian at the same time while he is listening to the simultaneous interpreting into English, and he can even spot mistakes in the interpreting.
甚至他还在同时画画	What's more, he was also drawing on paper while he was doing all the above.
他画的是台上成员的素描画像	He was drawing sketches of those security council members.

77. Marshmallow Test 棉花糖测试 #041077

视频: Marshmallow Test

这个是针对于4-6岁孩子的棉花糖测试	The lecture is talking about a marshmallow test on 4 to 6 years old.
孩子们被告知：如果可以坚持15分钟不吃棉花糖，那么他们可以被奖励两个棉花糖	The kids are told that they can get two marshmallows if they can wait for 15 minutes without eating the one marshmallow.
实验发现：孩子年龄越大，自控力越强	The result shows that the older the children are, the better they managed not to eat the marshmallow in order to wait for the second one.

孩子们随着年龄的增长，会学习自律自控的能力	It is interesting to conclude that children learn disciplines, as they grow older.
-----------------------	--

78. Black Hole 黑洞 #041078

准确原文：

This simulation shows what you might see if you are orbiting a black hole. The light and position of background stars around the hole are distorted by its gravity and they seem to spin around. On the right the constellation Orion appears to approach the event horizon, the boundary from which nothing can escape. Orion's stars look like they become separated and get spun around. Once the hole has passed by Orion reappears on the left and looks normal again. Users can also experiment with different scenarios. This is what you might see if you were traveling towards a black hole with rocket engines slowing your descent. Another simulation mimics freefall into a hole, in the middle the light of the entire universe appears to be concentrated in a bright ring.

视频描述了宇宙黑洞	This video is about the black hole in the universe.
中间纯黑色部分就是黑洞，周围是行星围绕着黑洞转	In the middle area of the video is totally dark, that is the black hold, and all the planets are spinning around the black hole.
右边我们可以看到一些行星被黑洞吸进去无法逃离	On the right side of the video, it can be observed that some planets can't escape from the black hole and are being drawn to it.
我们还可以看到黑洞周围有光圈，因为那已经是黑洞的边缘，所以光才能逃离黑洞	We can also observe a bright ring around the black hole because that is the edge of the black hole so that the light can escape from it

79. Edmund Wilson 艾德蒙·威尔逊 #041079

准确原文：

But there was no modern lit (literature). Wilson came then from a different world and he became the focal point of a broad mainstream American culture that thought that modern literature and wanted modern literature to be able to be read and appreciated by ordinary people. They were not modernists in an abstract sense and certainly some of them like TS Eliot and Faulkner were too difficult for some of their writings to be read by ordinary people, but this was a world before the division between the brows or between elite or whatever had established itself as part of our consciousness. Wilson was a major player in the successful effort of his generation to establish at the heart of American life and innovative literature that would equal the great cultures of Europe. And he knew that the great cultures of Europe were there he was not a product of a narrow American Studies kind of training at all. He joined a high artistic standard with an openness to all experience and a belief that literature was as much a part of life for everyone as conversation. He thought that Proust and Joyce and Yeats and Eliot could and should be read by ordinary Americans and helped that to happen. Wilson was a very various man over a period of almost 50 years. He was a dedicated a literary journalist, an investigative reporter, a brilliant memoirist and a dedicated journal keeper.

Wilson从一个不同的世界来	Wilson came then from a different world
他变成了一个美国主流文化的焦点，他认为现代文学应该被大众阅读和欣赏	he became the focal point of a broad mainstream American culture that thought that modern literature and wanted modern literature to be able to be read and appreciated by ordinary people.
Wilson是当时在美国人的生活中是一个主要的任务	Wilson was a major player in the successful effort of his generation to establish at the heart of American life
他用他对所有经历的接纳加入了一个高艺术的标准，而且相信文学是人们生活的一部分就像对话一样	He joined a high artistic standard with an openness to all experience and a belief that literature was as much a part of life for everyone as conversation

他是一个奉献的文学记者，一个研究报道者，一个完美的传记和一个专注的账务管理者	He was a dedicated a literary journalist, an investigative reporter, a brilliant memoirist and a dedicated journal keeper.
--	--

80. Venus 金星 #041080

教授课堂视频题，会切到PPT，有描述研究过程和内容

准确原文：

There is a picture, sort of artist's impression, before the space age of what Venus might be like on its surface and so this was looking at the planet Venus, it was science fiction and science fact all the way up to 56 before the start of the space age but it wasn't completely disproved, this idea of a really sort of lush environment on Venus until 1967, which is when the first measurements in detail were done at Venus. So Mariner four and Mariner five confirmed the feeling from an earlier space mission that in fact the surface of Venus was not like this at all, but extremely hot and, and also that the clouds were made of sulfuric acid so there wasn't a nice water cycle like is going on in this picture and so, that it had to wait for these in situ measurements by space craft to actually do that and so Venus turned out not to be quite as Earth like as we thought and I'll sort of tell you about some of the latest results from Venus Express, which, which they actually there are some Earth like features, but to a large extent, it's not like the Earth. Okay, so a brief comparison between.

人们一直在研究金星是否是一个可居住的星球，但是这些研究都还没有定论。	People have been studying on whether Venus was a livable planet, but these studies are not confirmed yet.
直到1867年，终于发现金星表面上的状况和地球大相径庭，与我们以为的样子相距甚远。	Until 1967, they found that Venus is quite different from what we thought it was.
金星表面酷热，没有云，因此也没有水循环。	Venus is extremely hot. There is no cloud so there are no water cycles on Venus.

81. Melatonin 褪黑素 #041081

视频：女老师讲解 Melatonin，视频中有图片

原文文稿：

I’m just going to tak on the stuff where left off. The hormone I want to now talk about it’s called melatonin. The synthesis is in the Pineal Gland, which is very small. It is the size of a pea in your brain. The corpus is the site of the soul, and it is where melatonin is made. And it has a rhythm as well. and in the sense, it is the opposite of the cortisol. It peaks at night. We call it as the “Darkness Hormone.” In every species that we studied, melatonin occurs at night. And it’s the hormone that prepares you for the things, that your species, does at night. So, of course, in humans we sleep, but animals like rodents, they are awake. It’s hormone that is related to darkness behaviour.

老师正在讲解褪黑素。	The speaker is talking about a hormone called melatonin.
褪黑素是在松果体中合成的，非常渺小，小豆子这么大。	The synthesis is in the Pineal Gland, which is very small. Just as a pea in your brain.
褪黑素在夜间活跃，所以也被称为“黑夜激素”。	Melatonin peaks at night. So it’s called darkness hormone.
褪黑素帮助物种完成夜间的活动。对人	So melatonin prepares you for the things that your

类来说，就是睡眠。这个激素与夜间行为相关。

species do at night, such as sleep for humans. It's a hormone that's related to darkness behaviour.

82. The Arctic and the Antarctic 北冰洋和南极洲 #041082

(视频: 女老师讲课, 中途切换到PPT, 如图)

确认原文:

And so when we talk about the polar regions, just to clarify exactly what we mean and we have, first of all, the Arctic at the top of the earth and the Antarctic at the bottom and say the Arctic was named after the Greek word for bear. Not surprisingly, it's not after the polar bears that live in the Antarctic, live in the Arctic but it's after the little and Great Bear Constellation's that can be seen in the sky. Now, the Greeks also hypothesise that there would be an Anti-arctic, which is how we get the name Antarctica and of course, it wasn't discovered until much later on. Now, these regions are opposite in many ways other than just their names and their location on the globe and so if we look at the Arctic first of all and the Arctic is actually ocean surrounded by land and so we can see here, this is the U.K. down here and this is kind of Russia and then America and Canada around here and so there is a bit of land covered in ice in the antark in the Arctic, which is Greenland here and but mostly see all this

area here, surprisingly, a lot of people don't realise that this isn't actually land. The North Pole isn't on land. It's just one big ocean and and so if you were to go to the North Pole, you could stand on it. If you were to drill down through the ice, you would find ocean beneath it and and this is something that wasn't, we haven't really known about for very long and it wasn't until actually the 50s when a submarine, the USS Nautilus, named after the submarine in the Jules Verne novel 20000 Leagues Under the Sea, was actually able to go all the way under the sea ice and and go to the North Pole, below the sea ice and through the ocean.

北冰洋在地球的顶端，而南极洲在地球的底端	Arctic is at the top of the earth, and the Antarctic is at the bottom of the earth.
北冰洋一词出自希腊语的“熊”，想来应该是取自北极熊的意思。	The name “Arctic” comes from Greek, meaning “Bear”. Obviously, it refers to the polar bear living in the Arctic.
希腊人还假想出，应该会有一个北冰洋的反方向，南极洲名字由此而来。但是南极洲是直到很久以后才被人们发现的	The Greeks also hypothesized that there might be an anti-Arctic, so that’s how the “Antarctica” was named. But Antarctic was discovered much much later.
北冰洋和南极洲在许多方面都截然相反	The Arctic and the Antarctica are opposite in many ways.
北冰洋其实是被陆地环绕的一片海洋，中间只有一小块陆地，常年被冰雪覆盖，也就是格陵兰岛。	Arctic is actually oceans surrounded by land. There is only a bit of land covered in ice, which is Greenland.
但其实北极是一块陆地，下面是海洋，所以人是可以站在北极的。人们直到上世纪五十年代才发现了这件事。	But the North Pole is on land, with water beneath it. people can stand on it. People didn't know about this until the 1950s.

83. Book of Learning 新版图书 #041083

(视频: 一个女士在介绍一本书)

这是这本书的第二版。	It is the second edition of this book.
第二个部分是给小孩子读的。	Second part is for younger children.
新增的部分是.....(待补充)	New part is ... (To be completed)

84. Push and Pull 推和拉 #041084

视频: 一个手推车 (trolley) 和一个人物 示意图

推和拉可以产生力	Force is done by either push or pull.
当你推或拉手推车的时候, 手推车会受力	When you push or pull the trolley, it will experience forces.
但是力不一定会让物体移动, 因为物体可以在感受到力的同时保持静止。	But force does not necessarily move the object. Because the object can experience forces but can be stationary at the same time.
即使一个物体被力推动, 也不一定会移动。	Even when an object is pushed by forces, it doesn't mean that the object will move.
因为还有其他因素需要考虑, 例如摩擦力。	Because there is another factor is concerned, which is friction.

85. Technology erodes privacy 科技入侵隐私 #041085

Technology Erodes Physical Privacy

音频文本：

So that creates tensions and that's what I want to talk about. Because I think it's important that we are, as a society, able to have an informed debate about how much privacy is enough but not too much, how much security is enough but not too much. Privacy as a human right, that's simply quoting the Universal Declaration.

In the physical world, we've got all kinds of protections. There is evidence that we care about our privacy. We've got doors, we've got obscured glass, we've got locks, we wear clothes, we put up shutters.

And technology continues to erode the privacy that exists in the real world, in the three spatial dimensions. Security cameras, automatic number plate recognition take away anonymity. Long lenses, paparazzi, take away distance and the privacy that it used to create. And body scanners are increasingly being used to see through clothes, for example.

This process isn't going to slow down and the new quantum technologies are actually being able to do gravitational sensing. And that's advancing at a remarkable rate. And you can't shield gravity. So some of the new quantum technologies are able already to see through walls. And there are technologies also for seeing around corners now using scattered light from lasers.

Technology continues to erode privacy.

我们需要探讨多少的隐私是足够且不过分的，多少的监控是足够且不过分的	We should debate how much privacy is enough but not too much, and how much security is enough but not too much.
隐私是人的权利，世界人权宣言如是说	Privacy is a human right, which was declared in the Universal Declaration.
在现实世界里，我们用门窗、锁、衣服、窗帘等来保护我们的隐私	In the physical world, we've got all kinds of protections such as doors, locks, clothes and shutter to protect our privacy.
但是科技一直在侵犯真实世界的隐私，例如无所不在的监控录像，全身扫描仪，长筒照相机。	However, technology continues to erode the privacy in physical world, such as security cameras, body scanners, long lenses.
而且还远不止于此。已经有最新的科技甚至可以穿墙监控，或监控拐角。	This process is still going on and there has been already new technology to do more than that. Some new technologies can even see through walls or around the corners.
所以，科技一直在侵蚀着隐私。	So, technology continues to erode privacy.

86. Tutorial and Lecture 辅导课和讲座 #041086

视频题，学校环境，英音，讲了 Tutorial 的好处以及与 Lecture 的不同

准确原文：

Before each tutorial we're asked to prepare in advance. We're usually given reading lists which we have to complete before each tutorial. We are given Web sites to look at, E journals to look at and we have to prepare by writing our notes down. In every tutorial there's about 5 to 15 students and these are led by the teachers, which are usually masses of PHD students and then when we come in into the tutorial we are put into small groups and we're asked to discuss our ideas, generate new ideas and then feedback to the class.

During our tutorials there's lots of support given, our teachers are there so that we can ask questions at any time. We also have our peers there which we can also ask questions to. If we

need help before the tutorial we can email in any of the teachers and they'll provide you with help. The difference between lectures and tutorials is that in lectures you usually have about 200 to 300 students, whereas in tutorials there's about 5 to 15 students which allows you to discuss matters, put your hand up and talk to your teachers about any difficulties you may have with the subject. The skills that I have developed through participating in tutorials is time management, critical thinking, being able to work better in a group and improving my confidence to speak up in a group.

At the end of a tutorial each group we'll have to feedback on what they've been discussing throughout the tutorial. So this may consist of having to present to the rest of the students in the class and it allows me to improve my group working skills and also working in a group allows us to generate more ideas and discuss the topic in more depth.

The advice I have for potential University of Edinburgh students to make the most out of your tutorial sessions is to complete the reading that you're given by your teachers beforehand. This will enable you to discuss more in groups and generate more ideas. It's also beneficial to put up your hand and develop your confidence so that you can have better discussions in class.

辅导课之前，我们需要提前做好准备，包括阅读清单，浏览网站，电子期刊，提前写下笔记。	Before each tutorial we're asked to prepare in advance, including a reading list, websites, E-journals and writing notes.
辅导课期间，老师会鼓励我们任何时间多多提问。	During our tutorials there's lots of support given, our teachers are there so that we can ask questions at any time.
辅导课的最后，我们会反馈这节课讨论了什么内容。	At the end of a tutorial each group we'll have to feedback on what they've been discussing throughout the tutorial.
我对新生的建议是，让辅导课体现最大价值的做法就是提前完成老师布置的阅读清单。	My advice is to make the most out of your tutorial sessions is to complete the reading that you're given by your teachers beforehand.

87. Saturn Rings 土星环的形成 #041087

视频题，一位女老师，黑色背景

土星环是太阳系行星的行星环中最突出明显的一个，环中有不计其数的小颗粒，其大小从微米到米都有，其轨道围绕土星运转	Saturn rings is the most distinct planet rings in solar system. The rings, with countless particles whose diameter ranging from micron to meter, are orbiting the Saturn
1610年伽利略通过望远镜第一次观察天空，虽然未能清楚地看出土星环的本质，但他是世上第一个观察土星环的人	Galileo started to observe the universe through telescope in 1610. He found that Saturn has more than ten rings composed of different particles, but still cannot see the nature of the rings
尽管其他星球诸如木星和天王星都有环，但是土星环是最大的行星环	Other planets like Jupiter and Uranus also have rings but not as many as Saturn
科学家们长期致力于研究土星环的形成，最后认为土星环是由土星自身的重力形成的	Scientists have dedicated themselves to study the formation of the Saturn Rings for a long time, and finally suggested that the Saturn Rings are formed by the gravitational field

88. How to write a cover letter 如何写简历介绍信 #041088

检查语法错误	Check grammar errors
做一些关于共奏发展机会的研究	Do research about development opportunities
根据工作描述，展示出你能为工作带来什么	Show what you can offer according to the job descriptions

89. Characters and social community 人格和社会 #041089

男声

这个讲座讲的是一个关于从xx岁到25岁的年轻人的研究，看看他们是如何参与到社会中并形成价值观以及接受人格教育的	The lecture is about a research on young people aged between xx and 25 years old to see how they participate in their communities and how to form values, as well as character education.
这个研究的结果包括了家长，朋友和学校因素。	The <u>outcome</u> includes <u>parents, friends, and school</u> .
我们想弄明白哪个因素是这其中最重要的。	We try to <u>figure out which one is more important than others</u> .

90. Feel nervous in presentation 演讲中容易紧张 #041090

中年男教授，语速适中，逻辑清晰

这个讲座讲的是在演讲中人们为何容易紧张	This lecture is about the presentation and why people feel nervous.
如果人们在演讲中感觉紧张并且说话很快，观众就不会理解讲话者的意思并且导致思维混乱	If people feel nervous and speak quickly, audience would not understand what you said and lead to disorder.
另外一部分就是教我们如何克服紧张	Another part is about how to overcome.
不要放过多的信息点进来，你只需要讲三个要点即可	Do not put too much information, you just keep 3 main points.
提前准备好	Prepare in advance

91. Age Structure 年龄结构 #041091

动态画出三角形

金字塔经常被用来展示年龄结构	Pyramid is often used to show age structure.
底部占据着最大的比例，意味着新生儿和青少年	The bottom has the largest portion, indicating new-born babies and teenagers.
老年人的数量最少	The oldest people has the least number.
之后这个讲座对于了1976年和现在的年龄结构	Then the lecture compared the age structure in 1976 to the age structure now.

92. Bipolar effects of technology on humans 科技对人类的两极影响 #041092

这个讲座讲解了科技对于人类的两级影响	The lecture talks about the bipolar effect of technology on human society.
Robert发现如果工人们在生产线上持续性地做同样的工作，那么工作的时间就会被缩短	Robert has found that if we let workers stay at the production line constantly and keep doing the same job, it will shorten the whole working time.
然而，当科技提高了生产力和生产效率的时候，失业率就会提高	However, while the advance in technology is increasing efficiency and productivity, technology also poses a huge threat on unemployment.

93. Port of Roman London 伦敦港 #041093

准确原文：

What we're going to discuss today is how the the Port of London was discovered and what we discovered about it.

Now, if you look at the historical records of Roman London there's only about 14 actual references to London in antiquity, i.e. contemporary references and of those only one is in the

first century, there are none at all in the second or third century, there's only one in the late third century and there's four in the fourth century. So if you're a historian trying to write a history of Rome in London it's very difficult. You don't really have much data. You're going to depend on the archeological evidence, the material evidence of the port and indeed the town to have any understanding of what happened then and so what we're looking at here is how did we discover about the Port of London? There is no historical documentations, no customs books, no tariffs, no idea of the taxes. We have to understand the port entirely from the archeological evidence. So that's what we're going to do today.

今天我们讲的是伦敦港是怎么被发现的并且我们发现的关于它的哪些历史	What we are going to discuss today is how the port of London discovered and what we discover about it.
如果我们查看一些关于伦敦港的历史事实，我们会发现只有14个关于伦敦的真实可靠的引用	Now, if we look at the historical records of Roman London, there is only about 14 actual references to London
所以如果你是一个历史学家，想去写一下伦敦港的历史，你会因为没有足够的参考信息而感到十分的困难	So if you are a historian try to write the history of Roman in London, it's very difficult because you don't have enough data.
你只能依赖一些考古学上提供的证据，因为伦敦港没有任何直接的历史记载	You can only rely on archaeological evidence of the port and the town because there are no historical documentations.

94. Speed of sound and light 光速和声速 #041094

[Video lecture: A male lecturer standing in front of a screen showing a PowerPoint slide.]

Wave Propagation

The speed of sound (in 20°C)= 343 m/s

The speed of light (in vacuum) = 3×10^8 m/s

今天我们来讲一讲 Wave Propagation	Today we are going to talk about wave propagation.
在气温20度的环境下，音速是343米每秒，在真空状态下的光速是 3×10^8 m/s	The speed of sound in 20°C is 343 meter per second, but the speed of light in vacuum is three times ten to the eighth meter per second.
为什么先看到闪电才听到雷声？因为光速比声音传播速度快。	Why do we always see the lightening before we hear the thunder? It's because the speed of light travels much much faster than sound.
再比如说，当我们在体育馆里看球赛的时候，我们看到球进了，明明已经看到对面的观众也和我们一样站起来欢呼，却好像隔了一两秒才听到对面的欢呼声？这也是因为光速远远大于声音传播的速度。	Another example can be found in a game watching in a stadium. When you see a goal and everyone stand up, cheering, you always find that the audience on the other side stand up at the same time as you do, but you cannot hear them until one or two seconds. That's also because of the different speed of sound and light.

95. Bilingual Parents 双语父母 #041095

现在很多家长在家里和孩子用不止一种语言交流	Many parents now like to use two languages to communicate and educate their children.
因为有些父母本身就会多种语言，或者父母来自不同国家	It might be because the parents know several different languages, or each of them comes from different countries.
大多数这样的父母以为，每个人说两种语言会对孩子的语言学习能力有帮助	Most of these parents thought using two languages with their children can benefit their children's language learning ability.
但其实如果每一个家长都用不同的语言去描述相同的内容，孩子们会觉得很混乱	But actually kids will get confused when each of their parents uses different language to describe the same content.
但如果每一个家长分别只和孩子说一种语言，那么孩子就会清楚很多	But if one parent sticks to one language, and the other one uses another language, their children will not be confused any more.

96. Absolute zero 绝对零度 #041096

在绝对零度的环境中，自然界的所有分子停止一切运动，从而不产生任何动能。	Absolute zero is the point at which the fundamental particles of nature have minimal vibrational motion.
理论上，绝对零度的状态是不存在的。但是科学家们一直致力于设计各种实验，试图无限接近绝对零度。	Absolute zero, theoretically, is not achievable and does not exist. But scientists are putting a lot of efforts in designing experiments trying to achieve or create absolute zero.
他们这样做其实并不是为了那个已知的答案，他们想要的并不是实现绝对零度。	The reason they do so is not for a predetermined end. They are not focusing on the goal of the experiment.
他们的乐趣在于无限地探究和接近真相，证明某个未知事物是否真的	The fun in these experiments is to find and prove whether

存在。	something you don't know does exist or not.
这就是科学家们所爱的科学之美。	And this is the beauty of science that scientists fall in love with.

97. USA cotton subsidy 美国棉花补贴 #041097

细节内容待补充

美国对棉花的补贴是100%补贴。	The US cotton subsidy is over 100%.
只要种棉花就可以得到补贴	You have to grow cotton to earn the subsidy.
世界棉花市场的价格因此大幅下跌	The world cotton price has substantially dropped down because of this.
这对非洲的棉花种植者影响最大	This will influence on cotton farmers in Africa particularly.

98. Globalization 全球化 #041098

主题是全球化的影响	The lecture talks about the impacts of globalization.
发展中国家需要和发达国家竞争	Developing countries will need to compete with developed countries.
发达国家应该为发展中国家敞开国门	Developed countries should open gate for developing countries.
但是许多发展中国家无法提供补贴给农民，导致一些农民每日收入低于2美元	However, many developing countries do not provide subsidy to farmers, which leads to some farmers can only receive no more than \$2 per day.

99. Agriculture and Climate Change 气候变化的影响 #041099

准确原文:

Some adverse effects of climate changes, change agricultural production. Some lands are just merely unsuitable for growing crops. There will be millions of people facing hunger in Africa in the near future. Climate change will result in less production and less food. It is difficult for developing countries to deal with climate change due to their financial status and other issues. There are many people living in hunger especially in Africa. The climate change has devastating effects on world economy. The tropical areas on earth are dry and hot and are originally not suitable for food production. The change of climate leads to extreme weather conditions such as floods and hurricanes which exacerbates the food production issues. As a result it leads to a continuous decline in food supply annually, around 10 to 17 percent and this trend is perceived to be continuing in the future. By 2017 the region suffering the most will be some African countries.

气候变化对农业生产有很大的负面影响，因为气候变化让某些土地变得不适宜农作物生长	Agriculture has been decreasing dramatically due to climate change, because some lands will become unsuitable for growing crops.
气候变化导致极端气候的产生，从而导致产量下降，食物减少	Climate change will result in extreme weather conditions, thus leads to less production and less food.
气候变化也会影响世界经济	Climate change also affect the world economy.
发展中国家和不发达国家由于经济原因，将会承担最大的负面影响	Developing and undeveloped countries will suffer the most because of their financial status.
气候变化导致世界粮食产量每年下降10-17%，并且这个趋势还将持续	Climate change leads to a decline in food supply around 10-17% annually. And this trend will continue in the future.

100. Mega cities 大城市的人口与资源 #041100

主题讲述了城市增长和资源分布	The lecture talks about city growth and resources.
从1900到2000，城市人口从15亿翻了4倍达到60亿	In 1900, city population was about 1.5 billion and it increased 4 folds to 6 billion in 2000. [SEP]
由于全球化和城市化进程，城市仅占全球2%的土地，却拥有全球50%人口，消耗80%资源	Due to the globalization and urbanization, cities only accounts for 2% of land, but takes up 50% of total population and consumed 80% of resources.
能源消耗已经增长了16倍	The increase of energy consumption increased by 16 folds.

101. Welsh 威尔士语 #041101

威尔士语属于凯尔特语，主要在威尔士和英国、苏格兰等西方国家使用	Welsh is a Celtic language spoken in mainly Wales and some other western countries, such as England and Scotland.
在20世纪中，讲威尔士语的人口从50%下滑到20%	During the 20 th century, the proportion of Welsh speaker has fallen from 50% to 20%.
目前，威尔士国家中有75万人在讲威尔士语，占比28%	The number of Welsh speaker in Wales is around 750,000, which is 28% of Wales population.
根据2001人口普查显示，和1991年相比，东南部地区的威尔士语人口有轻微增长	According to the census in 2001, there was only a slight increase in Welsh speaking found in the southeast of Wales compared to that in 1991.

102. Robot 机器人 #041102

想要让机器人做到一些人类轻而易举就能做到的事情，是很困难的。	It's hard to make a robot complete a task that seems extremely simple for a human.
比如说，对我们来讲，眼睛看见一个人是非常容易的事，但是对机器人来说就很难。	For example it is very easy for us to see a person but it's very hard for a robot.
机器人内部安装了一个摄像头来捕捉像素，然后机器人将像素转化为影像。这个过程可没有它看起来的这么容易。	A robot has a camera on it to capture pixels, and then the robot will transform the pixels into an image, which is not as easy as it sounds like.
总之，设计机器人完成某件任务，并不像人类做事那么简单。	In a word: it is not easy to design a robot to do tasks that are simple to humans.

103. Social Identity 社会认同 #041103

主要内容是讲社会认同的概念	The lecture talks about the information of the concept of social identity.
作者研究了社会认同的多个方面，包括社会认同的威胁。	He has studied several aspects of social identity including social identity threats.
对于社会认同来说，它是个人认同的一部分，包含年龄、性别、地域、宗教等	As for the social identity, it is part of the personal identity, including age, sex, region, religion, etc.
他提出了社会认同的两个问题：为什么它很重要，以及它可能会产生什么样的影响。这两个问题的答案都是因具体情况而异的。	He raised two questions about why social identity is important and what influence it will have on us. The answer of the both questions is: it depends.

104. Internal and External Factors 人类行为的内外因素 #041104

人类行为的两大因素：内部因素和外部因素	The lecture talks about two determinants of human's behavior, internal and external factors.
内部因素是人为因素，包括人们的信仰，想法，独立思考	The internal factor is the personal factor, including people's belief and their individual thinking.
外部因素是环境因素，包括气温，气压，别人对自己的看法	The external factor is the environmental factor, including temperature, air pressure and how other people think about them.
人类行为由自己和环境来决定	Human's behaviors are determined by themselves and the environment.

105. Civil society/NGO 民间社会团体/NGO #041105

准确原文：

I marvelled at how often powerful, feel powerless. But in the face of this sense of disempowerment is no decline in involvement in organisations with which seek to share wealth and opportunities, which seek to protect one another's rights and work towards the common good. According to the UN, civil society groups have grown 40 fold since the turn of the last century, sorry, since the turn of the last century. Internationally, the non-profit sector is worth one trillion dollars. There are 700,000 not for profit organisations in Australia alone, 700,000. The UN recognizes thirty seven thousand specifically civil society organisations across the globe working in international relief and gives accreditation to many of them. This profound movement towards harnessing voices and resources from outside the realm of governments and officialdom reflects a growth in trust. The third sector, NGOs, Putnam who discovered in the field of local government in Italy the best predictor of governmental success was the strength and density of the region's civic associations.

民间社会团体在过去一个世纪内增长了40倍	This lecture is about civil society groups. Civil society groups have grown by 40-fold since last century.
----------------------	--

现在，非盈利机构已经有一万亿，其中70万在澳大利亚。	Nowadays, the non-profit sector is worth 1 trillion, and there are 700 thousand such organizations in Australia.
全球被联合国承认的非营利组织有3万7千个。	The UN recognizes 37 thousand organizations across the globe.
强调了非政府组织的重要性，被称之为第三部门	The speaker emphasizes the importance of NGO, which is called "the third sector".

106. CEO survey, IT department 信息技术部门最重要 #041106

准确原文：

And our survey, over 100 CEOs who had recently been through an acquisition or merger were asked which areas of their activities needed the most effort. As you can see, the most frequent response to this question was that information technology requires the most integration effort. According to 58 percent of those we surveyed, IT was the most time consuming and needed the most work. This is understandable as many of the IT issues are extremely complex and the consequences of any change in IT can have a significant impact. The key is how quickly and effectively IT integration can be achieved and there has to be a clear understanding of the consequences there maybe of not getting it right. The two other areas requiring significant attention, sales, marketing and business development on the one hand and financial management on the other, both were selected by forty nine percent of the respondents.

一份调查问卷询问了100位CEO，公司运营中最花精力的是什么部门	The lecture talks about a survey asking 100 CEOs about which department require the most effort in company operation.
超过58%的CEO认为IT是最需要花费精力的部门	Over 58% of the CEOs believed that IT department requires the most effort.
原因是IT的工作最复杂也最耗时间	The reason is that IT department is the most time-consuming and complex.

还有许多其他部门也被提及：销售、市场、财务管理等。

There are also other departments mentioned, including sales, marketing, and financial management.

107. Wind power 风力发电 #041107

准确原文：

A wind turbine is a device that will convert wind into mechanical movement which we can use to power water pump or electricity generator. Now the power that a turbine creates is obviously dependent on the wind speed. It's also dependent obviously, on the number of sails, the area of the sails and the angle that the sails makes to the wind. So if you can imagine if the turbine blades are flat onto the wind, the wind is just going to sort of bend it, but if they're at a slight angle when the wind hits it, it's going to turn the blades and we can use that for powering things. Now we're going to have a go at making some very very simple paper windmills, the sort of things that you can make from the bits and pieces lying around at home and use that to drive a very small generator to power electronic devices.

主题是风力发电	The lecture talks about wind power plant.
这个装置可以将风力变成机械能，用于水力泵或发电装置	It is a device that can convert wind into mechanism energy, which can be used for waterpower pump or electricity generator.
涡轮受风速、帆的数量，帆的区域和帆对风的角度等因素影响	The turbine created depend on the wind speed, the number of sails, the area of sails and the angles that sails make to the wind.
弯曲帆片的角度，风打到帆片上，就会产生风能	As bending the angle of the blades, the wind hits them and could turn the blades, and then you can use it for powering things.
我们可以制作简单的风车装置来驱动电子产品	We could make simple windmills to drive electronic devices.

108. Australia Beauty Contest 澳大利亚选美比赛 #041108

一位选美比赛的选手谈论体重和减肥	The lecture talks about the impact of beauty contest on Australian young women.
其中一位决赛选手说，评委认为她太瘦了，让她增重	One of the finalist of the beauty contest said the judges said she was too skinny and told her to gain weight.
这位穿8号衣服的模特说，现在年轻女性总觉得以瘦为美，因为很多艺人都在减肥	The size 8 model said there is a lot of pressure for young women because many celebrities drop weight.
女孩的家人也一直劝她增重	The girl's family has also told her to put more meat on her bones.

109. Boys and Girls in Math and English 男女生数学英语成绩 #041109

准确原文：

You can see that the two charts each give quite a different picture of the performance of boys and girls in the two key subjects of math and English. It shows that in English girls consistently outperform boys over a period of six years achieving scores about 10 per cent above their male peers. There is quite a different picture when we look at the maths results with no real difference between genders in the results. What is the explanation for these key differences? To answer this question researchers look at biological and cognitive factors and a range of social factors. The interaction between these different components in early childhood development are seen as maintained and reinforced in the school context and this leads to distinct gender patterns of behaviour in skills with direct consequences for school performance and achievement. The argument uses this evidence to show that biological factors, such as patterns of cognitive development, are closely linked to social factors such as learned gender categories. These cognitive skills are learned both preschool and subsequently at school supported by the responses of teachers creating a reinforcement of patterns.

男女生在英语和数学成绩上表现不同	Boys and girls perform differently in English and maths.
------------------	--

女生的英语成绩比男生高6%	For English, girls outperform boys by 6%.
男生女生的数学成绩相差不大	For maths, boys and girls have no real difference.
其中有三个影响因素：生理因素、社会因素、学期教育因素	3 factors affect these differences: biological factor, social factor and pre-school factor.
老师对学生成绩的帮助也非常巨大	Teacher's help is also important to children's performance.

110. Small Languages 小语种 #041110

因为全球化和城市化，很多小语种都正在消亡	Small languages are dying out due to globalization and urbanizations.
全球化语言，如英语，正在取代小语种	Global languages such as English has taken place of many small languages.
人们纷纷从农村搬到城市，然而小语种在大城市无法生存	People have been moving to urban areas where is hard for small languages to survive.
现在有些小语种只能出现在一些偏僻的孤岛上	Some small languages can now only survive in some remote isolated island.

111. Solar Energy 太阳能 #041111

主题是太阳能	The lecture talks about solar energy.
使用太阳能的优点是，资源取之不尽	The advantage of using solar energy is we don't need to worry about the supply.
储存太阳能最好的办法是将其转化成化学燃料	The best way to store solar energy is to transform it into chemical fuel.
太阳能的缺点是低成本，而且我们不能	The drawbacks of solar energy is the high cost, and

全天候使用	we cannot use it 24/7 (twenty-four seven).
科学家正在努力研究怎样可以在晚上使用太阳能	Scientists are working on how to use solar energy even at night.

112. Creativity 创造力 #041112

创造力有三要素：人，过程，产品 这其中最重要的是过程。	There are three elements in creativity: Person, Process, and Product. Out of the three, Process is the most important.
文中还提到了这些词：social, materials, life, brain and build.	The lecture also mentions social, materials, life, brain and build.
人类之所以存活下来就是因为人类的创造力	Human beings can survive because of their creativity.

113. Australian cities, Perth 澳大利亚城市珀斯 #041113

准确原文：

Australia's location is important for the world's exports and its international trade is also very important. Since Australia has a large territory with vast, uninhabitable areas, all towns are scattered around. This leads to huge expenses for transportation when using trains and ferries. The government also have to pay large amounts for its telecommunications to build up the connection between these regions. The Australian people are mainly living in five cities Melbourne, Sydney, Perth, Brisbane and Adelaide. The most special one is Perth, which is one of the most isolated cities in the world. However, this does not affect this state to be one of the largest cities in Australia. Most large companies, like the two leading companies Telstra and Qantas, they are both based in Perth.

澳大利亚的地理位置对于世界出口至关重要。澳大利亚的国际贸易也同样重要。	Australia's location is important for the world's export, and its international trade is also important.
-------------------------------------	--

澳大利亚国土辽阔，所以城镇都成散点式分布，因此境内运输成本还要大于出口成本。	Since Australia has a broad territory and all towns are scattered around, the expenses on interstate transportation are even higher than export costs.
五个人口最大的城市：墨尔本，悉尼，珀斯，布里斯班等等。其中珀斯是最特殊的一个。	Five major cities in Australia: Melbourne, Sydney, Perth and Brisbane and so on. Perth is a special one.
珀斯是世界上最“孤僻”的城市，但它同样也是澳大利亚面积最大的城市。	Perth is one of the most isolated city in the world, but it is also the largest city in Australia.
许多大型企业，例如澳大利亚两个龙头企业 都在珀斯设立总部。	Most large companies, like the two leading company, Telstra and Qantas, they are all based in Perth.

114. Churchill 丘吉尔 #041114

丘吉尔是英国史和世界史上最重要的领导人之一	Churchill was one of the most important leaders in British and world history.
1940年间，他的演讲鼓舞了处于最黑暗时期的一代人	During 1940, his stirring speeches inspired a whole lot of people during their darkest hour.
他是民主进程中的核心人物	He was a champion of democracy who supported the protection of Christian civilization and human progress
丘吉尔是一位伟大的世界领导人	Churchill was a great world leader.

115. Cosmic Civilization 宇宙文明 #041115

宇宙行星中存在宇宙文明的可能性,	The lecture talks about the possibility of existence of other cosmic civilizations.
每年宇宙中诞生 7 个星星，但是不	Every year, there will have 7 stars be created, but most planets around them either too hot or too cold to appear

是太热就是太冷，无法存活生命	life.
大约只有 20%的星球的条件可能有生命	Only 20% of all planets meet all necessary criteria that have chance to have life.
生命迹象的转变的可能性几乎为零	However, the change of appearance of life is very small, which is near 0.
很难再找到另一个宇宙文明了	It is very hard to find other cosmic civilizations.

116. Metal and heat 金属遇热 #041116

金属对于热的反应	This lecture talks about metal's response to the heat.
人们通常认为金属遇热会变形	People used to think that metal should blend under the heat.
但有时候不一定，因为金属原子有随机过程	But sometimes it does not behave so because atoms in the metal have random processes.
热可以加速这个过程，但不会改变随机的本质，所以结果和我们想的不一样	The heat can accelerate the processes but will not change the essence of random, so it could violate what we used to think.

117. Four Learning Levels 学习的 4 个等级 #041117

人类学习新技能的四种学习等级	The Four Levels of Learning describe how a person learns a new skill.
Unconscious Incompetence: 不知道自己不知道	Unconscious Incompetence: you don't know that you don't know something.
Conscious Incompetence: 知道自己做不到	Conscious Incompetence: you are now aware that you can't do the skill.

Conscious Competence: 你学会了一项技能, 但需要慢慢应用	Conscious Competence: you develop a skill in that area but have to think about it.
Unconscious Competence: 已经掌握技能, 并且可以自然应用	Unconscious Competence: you are good at it and it now comes naturally.

118. Tanks 坦克 #041118

两种坦克	This lecture talks about two kinds of tanks.
对比Panzer Tiger和T-34坦克	One is named Panzer Tiger, the other is named T-34.
虽然Panzer Tiger在火力、装甲、移动性能等方面超越T-34	The Panzer Tiger outperformed T-34 in fire power, armor, and mobility.
但最终 T-34 还是通过巨大的数量优势获胜	But in the end, the T-34 defeated the Panzer Tiger because the number of the T-34 is larger than that of the Panzer Tiger.

119. Arbitrary Flipping Coins 随机: 抛硬币 #041119

准确原文:

Flipping a coin may not be the best way to settle disputes. A team of mathematicians claims to have proved that if you start with a coin on your thumb, Heads up, then flip it in the air and catch it in your hand, it's more likely to land heads up than tails. The bias is very, very slight, but as NPR's David Kestenbaum reports, the researchers say it is real.

It's hard to think of anything more iconically random than a coin toss. Coin tosses kickoff football games, they've even been used to settle tied elections. All of which got statistician Percy Diaconus wondering, is the outcome of a coin flip really just a matter of chance? A while ago, he asked some engineers at Harvard to make him a mechanical coin flipper.

And they made a gadget that looks like a real Rube Goldberg device, it's got a ratchet on the right and a coin sits on a spring. When you turn the ratchet, the ratchet depresses the spring, the coin goes ping.

The coin flies through the air and lands in a cup. Diaconus now works at Stanford University. He brought the machine into a studio there to demonstrate. You may be surprised to learn that when flipped in exactly the same way, the coin lands the same way up every time.

I'm turning a ratchet and now the coin is going up... and it lands in a cup and it came up heads side... and it's heads again and I promise it's heads. And when the when the technician demonstrated it to me, I went ballistic cos he did it 50 out of 50 ping bam.

So the randomness is introduced entirely by us sloppy humans. We flip the coin high, low, tumbling faster, slow after lurch to catch it. In fact, even the machine is very touchy. If it's not set up just right, you don't get the run of perfect landings.

抛硬币，字还是画，大多数情况下都是一个随机选择，人类无法控制	Flipping coins with head or tail in most of the time is arbitrary, which is a random selection that cannot be controlled by humans.
但是，只有把抛的力度和旋转的角度都控制得很精准，才不会是随机的	However, it is not random only if the strength and the angle of the flipping is precisely controlled.
如果我们用机器来保证精确度，抛硬币就不再是一个随机概率事件了	If people use machines to assure the preciseness, then flipping coin will not be a random process.

120. Aging 人口老龄化 #041120

现在人口越来越多，人口老龄化严重	As the world population growth, aging population has become more serious.
美国的老龄化程度现在是13%，到了2030年将会是23%	Aging percentage in the US is now 13% and is expected to be 23% in 2030.
日本和欧洲也是如此	The situation is the same in Japan and Germany.
比如德国到了2030年会有大概20%的人超过65岁	There will be more than 20% of German population aged over 65 years old in 2030.
人口老龄化和工业化有关	Aging problem is related to industrialization.

121. Peer-Reviewed Journal 同行评议期刊 #041121

同行评议期刊是指经过专家审查过的期刊	Peer-reviewed journal means journals that are assessed by experts.
期刊分为两种，一种是“同行评议”，另一种是“非同行评议”	There are two types of journal, one is peer-reviewed, the other is not. You can access both types in the library.
但只有同行评议的期刊可以被你们的作业引用	But only peer-reviewed journal can be included in your assignments.
判断是否为同行评议期刊有四个基本要素，其中必须包含参考书目、作者姓名等四大要素	Peer-reviewed journals must have four basic elements, such as bibliography and the author's name.

122. People's confidence level 自信心等级 #041122

调查问卷显示了关于人们自信等级一致的结果。	Surveys conducted have shown consistent patterns in people's confidence level
根据调查，人们的自信等级会根据不同的因素变化。	According to the survey, people's confidence level will vary depending on several factors
因素包括国家，年龄，性别，收入，婚姻状况，环境等等。	The factors include country, age, gender, income, marital status, the environment, and so on.
这些因素的积累结果就会最终影响人的自信等级。	The accumulated outcome of these factors will finally affect people's confidence level.

123. Children watching TV 儿童看电视 #041123

儿童现在花费很多时间在观看电视上	Children are spending plenty of time on watching TV.
0到4岁的儿童，他们每天看平均看2小时	For kids aged 0-4 years old, they would spend about 2

电视	hours per day on TV.
6到18岁的儿童,他们每天平均在屏幕前呆四小时,两小时看电视,两小时玩游戏	For 6-18 years old, they spend 4 hours per day in front of screens; 2 hours for TV and 2 hours for computer games.
专家建议2岁之前儿童最好不要看任何电视节目,因为它会影响大脑发育	Experts suggest that children less than 2 years old better not watch any TV because it will affect brain development.
家长应该引导孩子去做更健康的社交活动	Parents can guide their kids to do some healthier social activities.

124. Hearing loss 听力障碍 #041124

有听力障碍的人他们只能听到O这个音当有人说hope的时候	People with hearing loss they can only hear the O sound when someone say the word 'hope'.
然而,如果给定了一个上下文在一个对话中,他们知道具体的词即使他们还是不能清晰的听到那个词,因为他们可以看到嘴唇的动作	However, if given a context in a conversation, they can know the exact word even though they still can't hear the word clearly because they can see the lips motion.
所以到底一个人可以多频繁的测试听力呢? 无论什么时候别人觉得他有听力问题,都应该去看医生,检查他们的耳朵	So how often should one have a hearing test? Whenever someone feels that he has problems in hearing should see a doctor and have their ear checked.
听觉能力跟听力不一样	The hearing ability is different from listening ability.

125. Cracking sound of knee 膝盖的声音 #041125

The sound of a cracking knee isn't particularly pleasant. But it gets *worse* when you listen up close. "It does for most people. But for me, it just makes me excited." Omer Inan, an electrical engineer at Georgia Tech. "I actually feel like there's some real information in them that can be exploited for the purposes of helping people with rehab."

Inan's experience with cracking knees goes back to his days as an undergrad at Stanford, where he threw discus. "If I had a really hard workout, then the next day of course I'd be sore, but I'd also sometimes feel this catching or popping or creaking every now and then in my knee."

A few years later, he found himself building tiny microphones at a high-end audio company. So when he got to Georgia Tech and heard the Defense Advanced Research Projects Agency, DARPA, wanted better tech for knee injuries, he thought: Why not strap tiny microphones to people's knees, to eavesdrop as their legs bend? "What we think it is, is the cartilage and bone rubbing against each other, the surfaces inside the knee rubbing against each other, during the movements."

He and a team of physiologists and engineers built a prototype with stretchy athletic tape and a few tiny mics and skin sensors. And preliminary tests on athletes suggest the squishy sounds the device picks up are more erratic, and more irregular, in an injured knee than in a healthy one. Which Inan says might allow patients and doctors to track healing after surgery. Details appear in the *IEEE Transactions on Biomedical Engineering*.

"The primary application we're targeting at first is to give people a decision aid during rehabilitation, following an acute knee injury, to help them understand when they can perform particular activities, and when they can move to different intensities of particular activities." A useful thing to take a crack at.

膝盖骨头错位的声音很可怕，但是如果仔细研究，可以找到帮助人们复健的关键信息。	The cracking sound of knees is not pleasant, but there's some real information in them that can be exploited for the purposes of helping people with rehab (rehabilitation).
Omer Inan猜想如果在膝盖里放置一个收音设备，那么我们就可以听到膝盖骨摩擦的声音。	Then Omer Inan thought we could put tiny microphones into people's knees to eavesdrop as their legs bend.
研发团队制造了一个原型，内置麦克风	The team of physiologists and engineers built a

和感应器。	prototype with microphones and sensors.
结果显示，受伤的膝盖骨头之间摩擦的声音，和健康的膝盖骨相比，声音更不稳定、更不规律。这样就可以帮助医生和病人更好地了解术后康复的进度。	The result shows that in an injured knee, the sounds are more erratic and irregular than in a healthy knee, which could help patients and doctors to track the healing process after surgery.

126. Shy Fish and Bold Fish 胆小鱼群实验 #041126

A new study of fish called sticklebacks shows that shy individuals actually prefer to follow fish that are similarly timid.

Researchers had trios of sticklebacks with known personalities play follow the leader. The fish were placed in a tank that had some plastic plants at one end and some food hidden at the other. In some of the groups, a bold fish and a shy fish acted as leaders, while another shy fish followed. And in other groups, it was a bold fish that did the following. The researchers recorded whether the follower sallied forth more frequently with the fish that was behaviorally similar or the one that was different.

What they found is that shy fish were more likely to emerge from under cover when an equally wary fellow was already out there. Bold follower fish did not seem to care which leader they followed.

Of course, no matter which fish a stickleback chose to stick with, the bold fish did lead more expeditions over the course of the experiment than their more retiring friends. That’s because the bold fish initiated more trips, regardless of who might be tailing them. The findings are in the journal *Biology Letters*.

The researchers write that “when offered a choice of leaders, sticklebacks prefer to follow individuals whose personality matches their own, but bolder individuals may, nevertheless, be able to impose their leadership, even among shy followers, simply through greater effort.”

一项针对棘鱼的研究标明，害羞的鱼群会倾向于跟随同样害羞的鱼群。棘鱼喜欢跟随大部队行动。	A new study of fish called sticklebacks shows that shy fish actually prefer to follow fish that are similarly shy, because sticklebacks have a personality of following leaders.
在这个实验中，实验者让鱼群跟随胆大的领队鱼和胆小的领队鱼。	So in the experiment, a bold fish and a shy fish both lead other fish.

实验结果标明：胆小的鱼群喜欢跟着胆小的领队走，而胆大的鱼群不在乎是谁在领队。	The result shows shy follower fish only emerge when there is a shy leader fish out there. But bold follower fish don't care who is leading.
在Biology Letters期刊中，研究者称：棘鱼喜欢追随性格相投的鱼，但胆大的鱼无论在什么样的鱼群中，都更容易成为领队。	So in the journal Biology Letters, researchers said sticklebacks prefer to follow a fish who has a similar personality. But bold fish are always able to impose their leadership whoever they are with.

127. The Springtime Phenomena 早春现象 #041127

原文： The Earth's temperature is rising. And as it does, springtime phenomena—like the first bloom of flowers—are getting earlier and earlier. But rising temperatures aren't the only factor. Urban light pollution is also quickening the coming of spring. "So temperature and light are really contributing to a double whammy of making everything earlier." Richard French-Constant, an entomologist at the University of Exeter.

He and his colleagues compiled 13 years of data from citizen scientists in the U.K., who tracked the first bud burst of four common trees. Turns out, light pollution—from streetlights in cities, and along roads—pushed bud burst a full week earlier. Way beyond what rising temperatures could achieve. This disruptive timing can ripple through the ecosystem.

"The caterpillars that feed on trees are trying to match the hatching of their eggs to the timing of bud burst. Because the caterpillars want to feed on the juiciest and least chemically protected leaves. And it's not just the caterpillars, of course, that are important. But the knock-on effect is on nesting birds, which are also trying to hatch their chicks at the same time that there's the maximum number of caterpillars." So earlier buds could ultimately affect the survival of birds, and beyond. The findings are in the Proceedings of the Royal Society B. [Richard H. French-Constant et al., Light pollution is associated with earlier tree budburst across the United Kingdom]

随着地球气温的暖化，春季现象（例如开花）来临的越来越早了。	As the Earth's temperature is rising, springtime phenomena—like the first bloom of flowers—are getting earlier and earlier.
-------------------------------	---

但是气温升高并不是唯一的元凶。城市的光污染也是让春季现象提早的原因之一。	But rising temperatures aren't the only factor. Urban light pollution is also quickening the coming of spring.
昆虫学家收集了13年来自英国的数据，发现光污染会让早春植物发芽的时间提前整整一个星期。	The entomologist compiled 13 years of data from the UK and found that light pollution pushed bud burst a full week earlier.
而幼虫会根据发芽的时间来对应他们孵卵的时间，鸟类又会根据幼虫的数量来决定它们孵蛋的时间。	Caterpillars are trying to match their hatching to the timing of bud burst, and nesting birds are also trying to match their hatching to the number of caterpillars.
所以会出现连锁反应，光污染最终会影响鸟类的存亡。	So there will be a knock-on effect, and light pollution can ultimately affect the survival of birds.

128. The smell of library 图书馆的味道 #041128

准确原文：

Indeed the library, we've all been to a historic library, we've all enjoyed the smell of a historic library but what is it and what does it mean? When we've recently, when the UCLA Center for Sustainable Heritage, we've recently been asked to assess the environment at another historic library at St. Paul's Cathedral, the Wren library, an incredible place, and it has such an intensive smell of old books and we were also asked for the first time read. I was actually quite taken aback by the brief. We were asked, whatever you do, please preserve the smell, it's so important to our audience, it's so important how people perceive the library. So that that was quite an important message in our research. And indeed, the smell is an important way of how we communicate with the environment. This piece of research was done by an by an advertising company because advertisers are so interested in how we how we interact with each other and the environment and we see that the majority of people use sight, obviously, to to interact with the environment, but on the second place we see that smell is also very very important. It is also a very, very interesting.

我们都去过历史图书馆，也知道图书馆	We've all been to historic library and know the smell
-------------------	---

里有一股书籍的味道。但是这些味道是什么，又意味着什么？	of a library. But what is it and what does it mean?
我们最近评估了一家历史图书馆的环境，图书馆内有股非常浓厚的书籍的气味。	We recently assess the environment of a historic library, and there is an intensive smell of books in that library.
我们被要求一定要保存好书籍的味道，因为这个味道对我们的观众非常重要，也对于人们看待图书馆的方法也非常重要。	We were asked to preserve the smell of books because it is important to our audience and it's important to how people perceive libraries.
嗅觉和气味是我们与外界接触的重要一环。	Smell is an import way of how we can communicate with our environment.
广告专家们曾经做过一次调查，研究人们是如何与外界沟通的。大部分人都是通过视觉和外界沟通，嗅觉是第二位的。	Advertisers have done a research to see how people interact with the environment. The majority people use sight to interact with the environment, and the smell is the second.

129. Thermodynamic and atom movement 热力学和原子运动 #041129

热力学的法则是持续的、统计学的、绝对的。	The laws of thermodynamic are constant, statistical and absolute.
它描述了quantities各种情况下(待确认)	It describes how quantities behave under various circumstances.
这些法则在大部分情况下都会被遵守	The laws are obeyed under most situations.

130. Pursue Happiness 追求幸福 #041130

人们对well-being的定义不同。	People define well-being in different ways.
即时种族、性别、国籍不同，对于well-being的追求都有一致性	People from different races, genders, or nationalities pursue well-being in the same way.
就像是追求财富、健康一样。	It's just like people pursue fortune and health.

131. Eating Behaviors 饮食行为 #041131

女性比男性更注重饮食行为。	Women pay more attention to eating behaviors than men do.
有两大主要原因：	There are two reasons.
第一，是因为女性更关注... (待补充)	One is because female focus more on...
第二，是因为女性的天性... (待补充)	Also it's because of the nature of female ...

132. Truth and Rhetoric 真理和修辞 #041132

根据亚里士多德的理论，人们学习修辞学的目的是合理地使用修辞学。	According to Aristotle, the reason we learn rhetoric is to use it.
修辞学的目的是为了教化民众，引导大众了解真理。	Rhetoric is used to unravel the morons, and to lead them to truth.
修辞学和真理的关系如同躯壳和灵魂。	Rhetoric is like the body, and truth is like the soul.
如果你想告诉某人真理，你需要动用一些技巧，因为大部分人看不到真理。	If you want to tell someone about truth, you need to use some tricks, because most people cannot see truth.
通过运用修辞学，我们可以影响民众，让他们理解真理。	By using rhetoric, we can make an influence on morons and show truth.

133. Cars in Washington 华盛顿汽车尾气污染 #041133

(不完整, 待补充) *To be completed.*

华盛顿出现汽车尾气的污染	Car Pollution in Washington
有人呼吁交通工具的选择可以改善	Change the transportation
人们应该减少汽车的使用, 但是...	The need to reduce the use of cars, but ...

134. Science and Scientists 科学与科学家 #041134

(音频为对话形式, 男声为主) *To be completed.*

在对话中, 男生在谈论一本科幻小说。科学由证据、论证构成。	In this dialog, the male is discussing about a science fiction. Science is all about evidence.
他先探讨了科学和科学家的差别, 他本人更偏向于科学家。	He is talking about the difference between science and scientists, and he said he likes scientists rather than science.
因为科学家可以提出问题、做研究、找出真相。	Because scientists can do research and propose questions to find out what is true.
科学就像是家具..... (待补充)	Science is like furniture. ... (incomplete)

135. Glass Ceiling 玻璃天花板 #041135

附图片: 蓝色外科手术女人的照片

玻璃天花板是指在公司中某些弱势群体 (女性、少数族裔) 在晋升到高级职位时遇到的障碍。	A glass ceiling is a metaphor used to represent an invisible barrier that keeps a given demographic (typically applied to minorities) from rising beyond a certain level in a hierarchy
女性角色	women role
外科手术中占主动地位, 做决策	leadership in surgery, making decisions

136. British Standards Institution (BSI) 英国标准协会 #041136

英国标准协会是一个提供工业产品标准的机构。	The British Standards Institution (BSI) is a service organization that produces standards across a wide variety of industry sectors.
所有产品必须得到BSI 认证才能投放市场。	All products must have a BSI Kitemark license to get access into the market.
有两种标准，强制标准和非强制标准。	There are two types of standard. One is compulsory, and the other one is elective.
需要满足强制标准的产品，必须得到BSI认证，否则视为非法产品。	Under the compulsory standard, the products cannot come into the market unless they meet the requirements. Otherwise, without the Kitemark license, these products will be seen as illegal.
这主要是为了安全因素考虑。以火柴盒为例。	This is for the purpose of safety. Take matchboxes as an example.

137. Overfishing 过度捕捞 #041137

本文讲述了农业和渔业的历史。	The lecture talks about agriculture and fishing history.
鱼、虾和海藻曾是最主要的食物来源，尤其是亚洲地区。	Fish, shrimp, and seaweed were the major sources of food, especially in Asia.
人类三分之一的食物来源是源自海洋与河流。	One thirds of human's food supply were from the ocean and rivers.
但是由于过度捕捞，现在源自海洋的食物已经越来越少了。	But now the food source from the ocean is decreasing, due to overfishing.

138. Doing Research 引用研究 #041138

做研究的最主要目标是在论文中支持你的论点。	The main goal of doing research is to support your own idea in your paper.
如果你只引用来自一个素材的文章，并不是这样不准确，但是必须非常小心。	If you use research paper that from only one source, that does not mean it is not accurate, but you should be careful.
为了节省时间，最好的办法就是确保你所引用的研究来源是可靠的，并且是最近更新的。	To save time, the best way is to make sure the researches you use are reliable, recent and (adj.) at the first time.

139. Education Revolution 教育革命 #041139

老师们如何应对教学方面的改革	The lecture talks about how teachers deal with education revolution.
以前，老师运用教室里的桌椅、纸币等工具，教孩子读书写字。	Traditionally, teachers use tables, chairs, paper and pencils to teach children handwriting and reading from paper.
随着科技的发展，教学的方式也发生了巨大的变化。	With the development of technology, the way of teaching has been radically changed.
老师现在在课堂教学当中运用了很多科技。	Teachers are using new technology in classrooms.
未来的教育将着眼于培养孩子们的独立思考的能力，和xxx其他能力。	Education in the future will be focusing on developing children's critical thinking and ... skills.

140. Taxonomy Chart 分类学 #041140

分类学是一门将生物划分不同组别的科学。	Taxonomy is the science of classifying organisms to different groups.
---------------------	---

分类学就像美国邮政服务一样，从上至下，国家/王国，再到州，城市，街道，街道号码，然后再到公寓楼，和门牌号，最后是他们的姓氏和名字。	Taxonomy is just like the US postal service, which contains the nation or kingdom, and then the State, city, street name and street number, and then to the apartment, followed by their family names and first names.
所以科学家们利用分类学来锁定某一种生物或物种，来解释这个生物体与世界上的其他物种有何联系。	So scientists use taxonomy to pinpoint a living creature or an organism, and to explain how this specific creature is related to everything else in the world.

141. Exam Anxiety 考试焦虑症 #041141

有很多让十年级至十二年级的学生为考试焦虑的原因。	There are many reasons making students between year 10 and year 12 students feel anxious for exams.
有些同学平时太忙，无法按时完成作业，但是同时他们又很希望得到好成绩，因为不想让老师和家长失望。	Some students are too busy to do assignments, but they want to have good scores because they don't want to upset their teachers and parents.
但更主要的原因是，老师们经常向学生们传达一个错误的观念：接下来的两年是至关重要的两年，如果考砸了，你们的人生也砸了。	But more importantly, the teachers often give students wrong messages, telling them that the next 2 years are the most important 2 years; if you fail, your life is fail.
灌输这样的信息是不对的，也正是这些观念导致了学生们的考试焦虑症。	This is not right, and I think this message triggers the anxiety.

142. Happiness & Social Relations 幸福和社会关系 #041142

人的快乐和社交关系的频率和质量呈正相关的关系。	There is a positive correlation between happiness and the frequency and the quality of their social relations.
当人们的社交关系越频繁，快乐幸福的	The higher the frequency of social relations, the more

指数越高。	happiness they will have.
当人们对于他们的社交活动的质量感到满意时，他们会更快乐。	When people feel more satisfied with the quality of their social relations, they will feel happier.
反过来，平时更开心的人，会和亲友有更多的互动。	In turn, happier people tend to be social more with friends and have more interaction between family.
目前并不知道，到底是社交活动导致了快乐，还是快乐的性格让他们更喜欢社交。	It is unsure whether it is the social activities make them happier or their happy personalities drive them to be social more.

143. An innovative musical instrument 新型乐器 #041143

准确原文：

The skoog is a new universally accessible musical instrument. It's designed for use by children or adults with special needs or in fact, for use by anyone. It's soft, it's easy to play, it's robust and it can be customized to suit anyone's abilities. The skoog helps children with special needs by allowing them to get involved in making music themselves. It's it's an instrument that they can play and they can take ownership of and start creating their own sounds and music. Traditionally instruments are the shape and size and made of the materials they are because of the sound that they need to make. If you want to make the sound like a plucked string, you need a string and it needs to be under tension whereas with the skoog because it's a mixture of software and a sensor then the computer can handle making the sound and so we can design an object that's designed to be touched and designed to be played with.

In developing the skoog and actually working with kids in in the schools and in the classroom, it's it's really helped us make the skoog something that's usable by the children themselves. They've informed us massively on how it needs to work and they've given their opinion on on colours and design and and just the feedback that they've given to us has been just marvellous. It's just so enriching and it's really inspiring to actually work with these kids, particularly when you can provide them with an ability to start playing their own music as opposed to just taking part through listening and listening to other musicians and really learning from them.

这个新的发明帮助了那些不能传统乐器演奏的儿童	A new university invention is helping children who cannot use traditional instruments to make music of their own.
这个乐器可以被触摸和玩耍。它很软，很方便，耐用而且还能被个性设计。	It is an object that can be touched and played. It is soft, easy to use, robust and can be customized.
传统的乐器需要有特定的形状和大小，而且这些不能演奏传统乐器的学生是因为他们有运动障碍	Traditional musical instruments are in specific shapes and sizes, and these students cannot play traditional musical instruments because they have difficulties in movements.
但是这个新的发明里面是有软件和感应器的，而且还连接着电脑	But this new invention is designed with software and sensors inside, which is connected to computers.

144. Definition of biology 生物的定义 #041144

准确原文：

Welcome to your very first tutorial in biology. Now, in this video series what I want to do is I want to talk to guys about many different topics concerning biology for example, I want to talk to you guys about DNA and genetics in cells, in bacteria, in life, in a whole bunch of interesting stuff. But since this is the very first video, I think what we should do in this video is just stick with the very basics and the first thing I want to do is talk to you guys about what is biology. So let's go ahead and answer that question and the definition of biology is this, 'the study of life and living organisms'. All right, that makes sense up to a certain point up until organisms, because you may have heard of organisms before and you may have your own definition but the scientific definition of an organism is a living thing. Well, that's easy we know what living things are. I'm a living thing, plants, grass is a living thing, my puppy named old Dan, cutest puppy ever by the way, is a living thing but, whenever we talk about living things, believe it or not things get kind of complicated because then you have to ask yourself, 'what is life'. Well, of course, if you ask your grandma or your best friend or even if you ask a philosopher, 'what is life' everyone is going to give you kind of a different definition

of their outlook on life. However, whenever scientists and biologists were first deciding, you know what, 'what is life', that's the problem that they had, everyone had their own separate definition of life itself. So what they needed to do before biology was even invented, which is of course the study of life, is scientists needed to agree on the definition of life.

关于生物，科学上的定义是它是一门研究生命和有机体的学科。	The scientific definition of biology is the study of lives and organisms.
有机体意味着活着的东西，但是每个人对于活着的事物有着不同的定义，所以这是一件复杂的事情。	Organism means living things, but everyone has different definition of living things, so it can be complicated.
所以在学习生物之前，了解以下其科学含义是很必要的。	Therefore, it is important to understand the scientific definition of biology before we study biology.

145. Parenting 父母教育 #041145

父母不应该教孩子们对于他们来讲太过于高难度的东西。	Parents don't need to teach their children something too difficult for them.
他们只需要去教孩子们一些简单的事情，比如如何安全地过马路，或者如何跟陌生人讲话。	They just need to teach them simple things, such as how to cross roads safely, or how to talk to strangers.

146. Endangered Languages 语言的消亡 #041146

准确原文：

A language dies when the last person who speaks it dies. But, you know, sometimes people say it dies when the second last person who speaks it dies because then the last person has nobody to talk to. Well, of course, languages have come and gone throughout history as communities have come and gone. But what's happening now is something really quite extraordinary. Well, there are about 6000 languages in the world at the moment, more or less. Nobody knows the exact number. And of these people think that

about half of them are so seriously endangered that they're likely to die out in the course of the present century. Now, the present century is 100 years. Half is 3000 languages. So that means one language is dying out somewhere in the world, on average, every two weeks.

There are all kinds of reasons why languages die. One of the physical reasons when people are affected by famine and disease and earthquake; another is genocide when some countries deliberately try and stamp out a small language. But the main reason is globalization. That is, there are some huge languages in the world like English and Arabic and Spanish and French, and these are like steamrollers, crushing the smaller languages that they find in their path.

A great deal can be done to preserve an endangered language. The first thing is that the people themselves must want the language to be preserved. That's very important. The second thing is that the powers that be must want the language to be preserved. They must have a respect for the minority languages that are in their care. The third thing that has to be there, of course, is cash. It costs quite a lot of money to preserve an endangered language. Think about it. You have to train the teachers. You have to write books for the children and all that sort of thing. It doesn't cost an extraordinary amount of money, but it does cost a bit. So without money, endangered languages don't have a positive future.

语言正在消亡，平均每两周就有一个语言消失。	Languages are dying out fast, and one language is dying out every two weeks.
语言的消亡有许多原因：自然原因（民族消亡或天灾），政治原因（大国压过小国），以及全球化的进程让小语种没有存活空间。	There are many reasons of language death: physical reasons, political reasons and globalization.
保护语言的方法有许多：其一，人民自身觉悟；其二：大国尊重小语种的觉悟。	To preserve endangered languages, people themselves must want to preserve language. And the powers to be must respect the minority languages.
其三，筹集经费，因为语言的留存需要培训语言教师、教育下一代、以及书籍出版等等。	The third way is cash, because we need fundings for training, education and publishing books.

147. Wind power 风力发电 #041147

在澳大利亚，风力发电只站发电总量的1%。	In Australia, wind power is just 1% of the whole.
但是在丹麦，风力发电占据了最高的比例。	But in Denmark, wind power has larger proportion.
在其他国家，水力发电占据了较高的比例...	In other countries, hydropower has a larger proportion ...

148. Patent 申请专利 #041148

准确原文：

We're thinking about this and we're trying to say, all right, well, let's file a patent on this clicker. If I were to go to the patent office and say alright I want a patent on a clicker period, the patent office would just laugh. You know, the clickers have been around for a while, presentation clickers have been around for a while and so there'd be a zero percent chance that we would actually get that. We would somehow convince the patent office that we should be able to get a patent on a clicker, period. It would, however, be incredibly valuable. Every single clicker that was made after this point would infringe and when it infringes maybe we take one or two dollars each. Now that would add up to be a decent amount of money. On the other end of the spectrum, let's go to the million word version. I go to the patent office and say I want a patent on this exact thing and those million words describe every single radius, every single material, every single thing about this and the patent office says, yeah, we have never seen that before, go ahead and take it. Almost one hundred percent chance of getting that patent, but the value of that patent would be close to zero.

如果你去申请一个讲座遥控器的专利，你几乎不可能申请得到，因为遥控器这个东西已经存在很多年了。	If you want to file a patent on a presentation clicker, there's zero chance for you to get that patent, because clicker has been around for many years.
--	---

但是如果你真的得到了这个专利，这个专利会非常值钱，因为自从这个专利之后的每一个遥控器都要给你一笔钱。	But if you get this patent, this patent will be incredibly valuable because every single clicker ever after this patent needs to pay you an amount of money.
反过来说，如果你去专利申请局，说我要申请“这个遥控器”的专利，并且用上万字去描述这个遥控器的所有特征，那么你极其有可能成功申请到这个专利。	On the other hand, if you go to the patent office and say “I want to apply for a patent on this exact clicker” with millions of words to describe everything about the clicker, it’s highly possible that you can get that patent.
但是这个专利将一文不值。	But after you get this patent, this patent will be no value at all.

149. Hubble Telescope 哈勃天文望远镜 #041149

世上有许多有用的仪器，天文望远镜就是其中之一。	There are many kinds of equipment, such as telescope.
望远镜被人们放置在沙漠或山上。	Telescope have been placed in deserts and mountains.
望远镜应该被放在更高的地方。	They should be placed as high as possible.
有些天文望远镜被带上了太空，比如哈勃天文望远镜。	Some telescopes are placed into the space, like Hubble Telescope.
哈勃天文望远镜向地球传输了许多关于宇宙的信息，我们由此可以对宇宙有更深入的了解。	They have transmitted much information about the universe so that we can have a better understanding about the universe.

150. Attention Interval 注意力集中的时间 #041150

十年前，在我们还没有智能手机的时候，人们可以保持注意力集中的时间是25分钟，这是一个很好的数字。	10 years ago, before the use of iPhone or iPad, people's attention interval is about 25 minutes. This number is good.
但是现在大家保持注意力集中的时间已经从25分钟降到了只有8秒！金鱼的记忆力就7秒，我们和金鱼差不多了。	However, nowadays the attention interval has dropped from 25min to only 8 seconds, which means our memories are shorter than that of a goldfish.

151. Biological Forgetting 生物遗忘 #041151

人类每天都会忘记一些东西，诸如经历、感受、想法等等，我们称之为生物遗忘。	People forget things every day including experiences, feelings and thoughts, and we call this process biological forgetting.
要记住所有事情是很难的，人类一直以来都在想方设法克服生物遗忘。	Remembering is hard for people, and people try to overcome biological forgetting.
人类的记忆并不是一成不变的，记忆可以被重塑。	Humans' memory is not fixed, but it can be reconstructed and shaped by the past.
自我们祖先开始，人类就一直在尝试着强化我们的记忆力。	From our ancestors, people have always been trying to improve our memory.

152. Animal Behaviors [two questions] #041152

准确原文：

We can ask two fundamental questions about animal behavior. They referred to as proximate and Ultimate. Proximate questions are those concerned with the mechanisms that bring about behavior. Ultimate questions are those concerned with the evolution of behavior. We can

divide the proximate and ultimate questions into two sub questions. For proximate how does the behavior develop and secondly what causes the behavior. For ultimate you can ask how did the behavior evolved and secondly what is the adaptive significance of the behavior, what's its purpose. Together these comprise what are called Tinbergen's four questions about animal behavior. Niko Tinbergen was one of the founding fathers of the study of animal behavior. These questions represent the different ways of studying animal behavior. And understanding the difference between those four questions are fundamental to understanding behavior and indeed the whole of biology. How do we study animal behavior? Well that depends on the type of question we're hoping to answer.

动物行为涉及到两大最基本的问题：最近问题，最终问题。	Two fundamental questions about animal behaviour: proximate questions and ultimate questions.
最近问题：行为产生机制。 细化为两个小问题：1. 行为是怎么发展的；2. 行为是由什么引发的	Proximate questions: mechanisms that bring about behaviour. There are two subquestions: (1) how does the behaviour develop and (2) what causes the behaviour.
最终问题：行为的进化过程。 细化为两个小问题：1. 行为如何进化；2. 行为的目的。	Ultimate questions: the evolution of behaviour. There are two subquestions: (1) how did the behaviour evolved, (2) what's the purpose of the behaviour.
这四个问题构成了“丁伯根关于动物行为学的四个重要问题”。	These are what so-called Tinbergen's four questions about animal behaviours, representing different ways of studying animal behaviour.

153. Animal Behaviors [why] #041153

准确原文：

Why should we bother studying animal behavior? Well, first and foremost, because we are interested in understanding why animals do what they do .There are lots of other reasons for studying animal behavior. Conservation biologist need to know what animals do if they are going to save them. Are those animals social or solitary? How much space do they need and how many mates do they have ?Sometimes you can't predict the outcome of the research.

Fernando N. started out being interested of how birds know what to sing, yet his research eventually led to a complete overhaul of the entire field of neuron biology, a totally unanticipated yet utterly monumental effect.

And this is the course textbook by John. A. The fact that this is in its ninth edition tells you how fast the field animal behavior is (developing). There's lots of new developments.

学习动物行为学，有许多原因。	There are many reasons of why we should study animal behavior.
第一，我们总是很好奇想知道动物为什么要那么做。	First, we are interested in understanding why animals do what they do.
第二，保护动物的生物学家要保护动物，就必须了解动物的行为。	Second, conservation biologists need to know what animals do if they want to save them.
有些时候你甚至无法预料你的研究走向会出现什么结果。	Sometimes you can't predict the outcome of the research.
这本课本已经是第九版了，可见动物行为学这门学科的发展速度有多快，这个领域总在不停地发展。	This course textbook is the ninth edition, which shows you how fast this field is developing with lots of new developments.

154. Oracle #041154 #0411554

考题带有图片，考试时可以直接念图片内单词

Oracle 是全球最大的数据库公司	Oracle is the largest database company in the world.
提供许多服务，比如电子邮件、语音邮件、数据库。	Oracle provides many types of services, such as emails, voice mails, and database.
帮助许多商务人士周游各地，在世界各地都可以随时办公。	It helps businesspeople travel around and do business anywhere they need.

移动电话让人们在路上就可以与人保持联络。	Mobile phones let people communicate on the way.
总的来说，科技为人们提供了方便	In conclusion, technology provides convenience.

155. Leadership and Management #041155

视频题，女人在接受采访

管理能力和领袖力有许多不同。	There are profound differences between management and leadership.
领袖不满意现状，试图挑战现状，打破规则，改变方向。	Leaders often dislike status quo, and they want to make some challenges and change directions.
而管理者遵循现状，遵守规则。	However, management stays in the status quo and follow procedures make sure everything go with the procedures.
所以换句话说，领袖力扰乱管理。	So in other words, leadership disrupts management.

156. Fatherhood 父亲角色 #041156

父亲在养育子女中扮演的角色很重要。	The role of a father in parenting is important.
父亲让孩子感到安全，孩子们才敢于冒险，发展出独立和自主的人格。	Fatherhood makes children feel safe so that they can take risks to develop independence and autonomy.
这样孩子们才能成长为有责任感、有同情心的公民。	So children can grow up into responsible, compassionate citizens.

157. Face Recognition 面部识别技术 #041157

原文：

Last week we talked about how people recognize objects and really how well people recognize objects, given how difficult the problem is, given how objects can be seen in all different sorts of illumination, in different positions, and in different angles. And yet we are able to extract that information, we are able to take the visual stuff out there, interpret it in a way that allows us to recognize all the different things that we can in our environment.

Today we're gonna kind of carry on looking at that, but we gonna look at what's really a special class of objects. That's the human face. So we gonna look at how we recognize human faces and how we do it quite as well as we do. We're really expert at recognizing faces. So again we can think about how do we take that visual information and how do we transform it into a form which allows us to put a name to a face, and to do all the other clever things that we can do with faces. So I'm gonna start off again by just pointing out that it's a hard problem. Face recognition is a hard problem, and it's a clever thing we do. If you think about all the different types of faces you can recognize, and all the different types of information you can get from the face, you kind of start to appreciate how well we can do face recognition.

译文：

上周，我们讨论了人们如何识别物体，以及识别物体的能力有多强。虽然这个问题难度很高，也要考虑到物体是如何在各种不同的光照、不同的位置和不同的角度下如何被看到。但是，我们还是能够提取这些信息，能够把视觉的东西提炼出来，让我们可以辨别环境中的不同事物。

今天我们会继续讨论、研究一个非常特殊的识别对象。就是人脸。所以我们来看看我们是如何识别人脸，以及我们是如何把它做得很好。我们都是很擅长识别人脸的。所以我们可以思考，如何利用视觉上的信息，把它转换成一种形式，这个形式可以把一个人脸对应到一个人名上边。并思考我们可以如何通过脸部识别，做其他有用的事情。首先我要指出这是一个很难的课题。人脸识别是一个很难的课题，但它是我们做的一件聪明的事情。如果你试想一下，实现了人脸识别，我们就可以辨认出所有不同的人脸，并且从人脸上收集到所有不同的信息，你就会开始欣赏我们人脸识别的能力。

上周，我们讨论了人们如何识别物	Last week we talked about how people recognize objects and how well people recognize objects.
-----------------	---

体，以及识别物体的能力有多强。	
今天我们会讨论人脸。	Today we are going to look at the human face.
我们都是很擅长识别人脸的	We're really expert at recognizing faces.
我们要思考：如何利用视觉上的信息，把它转换成一种形式，这个形式可以把一个人脸对应到一个人名上边	We should think about how do we take that visual information and how do we transform it into a form which allows us to put a name to a face.

158. Universal philosophy 普遍哲学 #041158

原文：

Okay. So this is the this is the big benefit of a universal philosophy. It says it applies to everybody. Well, looks that doesn't, you know, 205 or 206 countries in the world. And you've got something that applies to everybody. That's a bit strange, isn't it? No, says liberal theory. There are same value structures that apply to all of us. You couldn't have the United Nations without it. It couldn't tell you that the Universal Declaration of Human Rights without this idea of values that apply to all of us just because we are humans. Now, the idea is to test that as well. Why is sport universal? Why does everybody play football? It's because the values are specified at a very thin level at the top. There are these rules and we all have to abide by just these rules. But there are lots of things about football that aren't rules specified. So Brazilian football is different from Italian football, from British football, from German football, from Spanish football. It's culturally specific, but acknowledges that there are these universal general rules to apply to everybody.

译文：

所以这是普遍哲学的一大好处。它说它适用于每个人。你知道的，世界上有 205 或 206 个国家。 你得到了适用于每个人的东西。这有点奇怪，不是吗？不，自由主义理论说。有同样的价值结构适用于我们所有人。没有它就没有联合国，也就没有《世界人权宣言》。现在，我们的想法也是要测试这一点。为什么体育是全民运动？为什么每个人都踢足球？

这是因为这些价值观是建立在最高层次上的。有这些规则，我们都必须遵守这些规则。但关于足球，有很多事情并没有明确规定。所以巴西足球不同于意大利足球、英国足球、德国足球和西班牙足球。这是特定的文化，但我们承认有些普遍的一般规则是适用于每个人的。

普遍哲学是适用于全世界每个人的。	Universal philosophy applies to everyone in the world.
虽然听起来奇怪，但自由主义认为：有同样的价值结构适用于我们所有人。	It seems strange, but liberal theory says there are same value structures that apply to all of us.
比如，为什么体育运动是全球性的？为什么全球所有人都踢足球？就是因为这其中蕴含着全球统一的所有人都要遵守的规则。	Why is sport universal? Why does everybody play football? It's because the values are specified at the top. We all have to abide by just these rules.
尽管有一些规则不一样，比如巴西足球和意大利足球不一样，但总还是存在一些普遍规则的。	although there are some specific rules that vary among countries, such as Brazil football and Italian football, we acknowledge that there are universal general rules to apply to everybody.

159. Art and culture 艺术与文化 #041159

原文：

I have said before that you can't have a civilization that doesn't have art. When we think about the great civilizations, historically, all of them had great production of culture and art. Because a society has to be able to observe itself and the sophistication of the great civilizations or their ability to look at themselves and what allows a society to do that are the producers of art and culture, what's the mirror back to the core of the society. Exactly what is being produced at that moment, how people are thinking of themselves and how individuals are relating to the social structure at that time. Art is the vehicle to which we understand it. Were you to take away art, what would be that mirror? How would we see what we are about? How would we understand what was going on in Paris at the time of the Impressionists when people were learning to see in a completely different way?

译文：

我之前说过，不可能存在一个没有艺术的文明。当我们想到历史上伟大的文明，它们都有伟大的文化和艺术的生产。因为一个社会必须能够观察自身以及伟大文明的复杂性或者他们审视自身的能力以及是什么让一个社会能够这样做。是艺术和文化的生产者。镜子回到社会的核心？当时生产了什么，人们是如何看待自己的个人是如何与当时的社会结构相联系的。艺术是我们理解它的载体。如果你把艺术拿走，那面镜子会是什么？我们怎么才能知道我们在做什么？我们如何理解印象派时期的巴黎发生了什么当时人们正在学习以完全不同的方式看待事物？

历史上伟大的文明，它们都有伟大的文化和艺术的生产	All of the great civilization have great production of culture and art.
艺术让我们了解当时的人们如何看待个人，如何与当时的社会结构相联系。	Art help us understand how people think of themselves and how people are related to social structure at that time.
艺术是载体。艺术是镜子。	Art is the vehicle. Art is the mirror.

160. Mistaken Identities 错误的身份 #041160

原文：

I want to start with this recently discovered celebrity portrait. It was dragged out of the River Rhone at Earl in 2007, and it has already been the subject of a National Geographic television show, a French television documentary, and it has been the centerpiece of its own special exhibition. The reason for its fame is that it is supposed to be a portrait of Julius Caesar. In fact, the underwater archaeologist who found it shouted as soon as he got back to the surface and took a better look. My God, it's Julius Caesar. Or I think he must have shouted Mon dieu, you know, say Jules Caesar, right? Whoops. It is claimed to be, in other words, one of those holy grails of Roman portrait iconography. It's not just a portrait of Julius Caesar, but actually a portrait of Julius Caesar carved from life in his own lifetime. Now, the fact that it doesn't actually look like any other portraits supposed to be of Caesar I shall come back to, but suffice it to say at this point that that potentially awkward difficulty has been taken to be a sign of this statue's authenticity.

译文：

我想从这幅最近发现的名人肖像开始。它是在 2007 年从罗讷河的厄尔地区打捞出来的，已经成为《国家地理》电视节目、法国电视纪录片的主题，并且成为了一个专题展览的核心。它之所以出名，是因为它被认为是尤利乌斯·凯撒的肖像。事实上，发现它的水下考古学家一上岸就大喊，仔细一看后说：天啊，这是尤利乌斯·凯撒。或者我想他一定大喊的是“天哪”，你知道的，应该说“朱利乌斯·凯撒”，对吧？哎呀。换句话说，它被声称为罗马肖像图像学中的圣杯之一。它不仅仅是尤利乌斯·凯撒的肖像，而实际上是凯撒生前亲自雕刻的肖像。现在，尽管它看起来和任何其他所谓的凯撒肖像都不相像，这一点我稍后会再提，但可以说，正是这种可能的尴尬困难被认为是这座雕像真实性的标志。
