1. Plug-in vehicle 充电车 #091001

Here's a term you're going to hear much more often: plug-in vehicle, and the acronym PEV. It's what you and many other people will drive to work in, ten years and more from now.

At that time, before you drive off in the morning you will first unplug your car - your plug-in vehicle. Its big on board batteries will have been fully charged overnight, with enough power for you to drive 50-100 kilometers through city traffic.

When you arrive at work you'll plug in your car once again, this time into a socket that allows power to flow from your car's batteries to the electricity grid. One of the things you did when you bought your car was to sign a contract with your favorite electricity supplier, allowing them to draw a limited amount of power from your car's batteries should they need to, perhaps because of a blackout, or very high wholesale spot power prices.

The price you get for the power the distributor buys from your car would not only be most attractive to you, it would be a good deal for them too, their alternative being very expensive power from peaking stations.

If, driving home or for some other reason your batteries looked like running flat, a relatively small, but quiet and efficient engine running on petrol, diesel or compressed natural gas, even biofuel, would automatically cut in, driving a generator that supplied the batteries so you could complete your journey.

Concerns over 'peak oil', increasing greenhouse gas emissions, and the likelihood that by the middle of this century there could be five times as many motor vehicles registered world-wide as there are now, mean that the world's almost total dependence on petroleum-based fuels for transport is, in every sense of the word, unsustainable.

原文翻译：

你经常会听到这样一个术语：插电车(plug-in vehicle)，它的缩写是 PEV。它是你和其他许多人从现在起 10 年或更久以后开车去上班会使用的工具。

在那个时候，在你早上开车离开之前，你会先拔掉你的插电车的电源。它车上的大电池将在一夜之间充满电，足够你在城市交通中行驶 50-100 公里。

当你到达工作地点时，你会再次给你的汽车充电，这一次是插入一个插座，它能让电能从汽车的电池流向电网。当你买车的时候，你做的一件事就是和你最喜欢的电力供应商签订合同，允许他们在因为停电，或者是给出非常高的批发价的时候，从你的汽车电池中提取有限的电量。经销商从你的汽车上购买的电力价格不仅对你最有吸引力，而且对他们来说也是一笔好买卖，他们的替代方案是非常昂贵的电力站。

如果在开车回家的路上，或者由于其他原因，你的电池好像没电了，那么一台使用汽油、柴油、压缩天然气、甚至生物燃料的小型但安静而高效的发动机就会自动插电，驱动发电机为电池供电，这样你就可以完成你的旅程了。

现在关于“石油峰值”增加温室气体排放的担忧，和到本世纪中叶，有现在机动车注册数量五倍的车辆的可能性，都意味着不管从哪个方面来看，世界几乎完全依赖石油燃料运输是不可持续的。

参考答案：

While you unplug your plug-in vehicle before you drive off in the morning, you'll plug in your car into a socket that allows power to flow from your car's batteries to the electricity grid when you arrive at work because an efficient engine would automatically cut in if your batteries looked like running flat and you could complete your journey, which means the world's almost total dependence on petroleum-based fuels for transport is unsustainable.

2. The Rosetta stone 印刷石 #091002

When the Rosetta Stone was discovered in 1799, the carved characters that covered its surface were quickly copied. Printer's ink was applied to the Stone and white paper laid over it. When the paper was removed, it revealed an exact copy of the text—but in reverse. Since then, many copies or "facsimiles" have been made using a variety of materials. Inevitably, the surface of the Stone accumulated many layers of material left over from these activities, despite attempts to remove any residue. Once on display, the grease from many thousands of

英澳新三国（同一国家任意三所院校）

human hands eager to touch the Stone added to the problem.

An opportunity for investigation and cleaning the Rosetta Stone arose when this famous object was made the centerpiece of the Cracking Codes exhibition at The British Museum in 1999. When work commenced to remove all but the original, ancient material, the stone was black with white lettering. As treatment progressed, the different substances uncovered were analyzed. Grease from human handling, a coating of carnauba wax from the early 1800s and printer's ink from 1799 were cleaned away using cotton wool swabs and liniment of soap, white spirit, acetone and purified water. Finally, white paint in the text, applied in 1981, which had been left in place until now as a protective coating, was removed with cotton swabs and purified water. A small square at the bottom left corner of the face of the Stone was left untouched to show the darkened wax and the white infill.

原文翻译：

当罗塞塔石碑于 1799 年被发现时，覆盖在石碑表面的雕刻文字很快被复制。打印机的墨水被涂在石头上，白纸覆盖在上面。当这张纸被拿开时，显示出的是一模一样的那篇文章——只不过是倒过来的。从那以后，人们用各种各样的材料制造出了许多复制品或“复制品”。石头的表面不可避免地积累了许多层这些活动留下的物质，尽管人们试图清除任何残留物。一旦展出，成千上万人的手渴望接触到的油脂使问题更加严重。1999 年，大英博物馆将罗塞塔石碑作为破解密码展览的中心展品，这给我们提供了调查和清理罗塞塔石碑的机会。当清理开始时，除了原始的、古老的材料，这块石头是黑色的，上面刻有白色的文字。随着处理的进展，对发现的不同物质进行分析。人类处理产生的油脂、19 世纪早期的巴西棕榈蜡涂层和 1799 年的打印机墨水被用棉签和肥皂、白酒、丙酮和纯净水擦剂清除。最后，文字中的白色油漆，在 1981 年被涂上，直到现在还作为一种保护涂层，用棉签和纯净水去除。石头表面左下角的一个小方块被保留了下来，以显示黑色的蜡和白色的填充。

参考答案：

Since the Rosetta Stone was discovered in 1799, the carved characters that covered its surface

were quickly copied, which leaves the surface of the Stone accumulated many layers of material left over from these activities despite attempts to remove any residue, so the stone was black with white lettering when the work of the Cracking Codes exhibition at The British Museum in 1999 commenced to remove all but the original, ancient materials.

3. Water resource 水资源 #091003

Water is at the core of sustainable development. Water resources, and the range of services they provide, underpin poverty reduction, economic growth and environmental sustainability. From food and energy security to human and environmental health, water contributes to improvements in social well-being and inclusive growth, affecting the livelihoods of billions.

In a sustainable world that is achievable in the near future, water and related resources are managed in support of human well-being and ecosystem integrity in a robust economy. Sufficient and safe water is made available to meet every person's basic needs, with healthy lifestyles and behaviors easily upheld through reliable and affordable water supply and sanitation services, in turn supported by equitably extended and efficiently managed infrastructure. Water resources management, infrastructure and service delivery are sustainably financed. Water is duly valued in all its forms, with wastewater treated as a resource that avails energy, nutrients and freshwater for reuse. Human settlements develop in harmony with the natural water cycle and the ecosystems that support it, with measures in place that reduce vulnerability and improve resilience to water-related disasters. Integrated approaches to water resources development, management and use – and to human rights – are the norm. Water is governed in a participatory way that draws on the full potential of women and men as professionals and citizens, guided by a number of able and knowledgeable organizations, within a just and transparent institutional framework.

影响数十亿人的生计。

在一个可在不久的将来实现的可持续世界中，水资源和相关资源的管理应支持社会福利和蓬勃发展的经济中的生态系统完整性。提供充足和安全的水以满足每个人的基本需求，通过可靠和负担得起的供水和卫生服务，很容易维持健康的生活方式和行为，反过来又得到公平扩展和有效管理的基础设施的支持。水资源管理、基础设施和服务提供的经费得到持续资助。水的各种形式都得到了应有的重视，废水作为一种资源加以处理，可以利用能源、营养和淡水进行再利用。人类住区与自然水循环和支持水循环的生态系统协调发展，并采取措施减少脆弱性和提高对与水有关的灾害的恢复能力。对水资源的开发、管理和利用以及对人权采取综合办法是一种规范。水的管理以参与式方式进行，利用作为专业人员和公民的男女的充分潜力，在一些有能力和有知识的组织的指导下，在公正和透明的体制框架内进行。

参考答案：

While water resources, and the range of services they provide, underpin poverty reduction, economic growth and environmental sustainability, in a sustainable world that is achievable in the near future, water and related resources are managed in support of human well-being and ecosystem integrity in a robust economy and water resources development, management and use is guided by a number of able and knowledgeable organizations, within a just and transparent institutional framework.

4. American English 美语影响力 #091004

American English is, without doubt, the most influential and powerful variety of English in the world today. There are many reasons for this. First, the United States is, at present, the most powerful nation on earth and such power always brings with it influence. Indeed, the distinction between a dialect and a language has frequently been made by reference to power. As has been said, a language is a dialect with an army. Second, America's political influence is extended through American popular culture, in particular through the international reach of American films (movies, of course) and music. As Kahuna has pointed out, the internationally dominant position of a culture results in a forceful expansion of its language... the expansion

英澳新三国（同一国家任意三所院校）

569

of language contributes... to the prestige of the culture behind it. Third, the international prominence of American English is closely associated with the extraordinarily quick development of communications technology. Microsoft is owned by an American, Bill Gates. This means a computer's default setting for language is American English, although of course this can be changed to suit one's own circumstances. In short, the increased influence of American English is caused by political power and the resultant diffusion of American culture and media, technological advance, and the rapid development of communications technology.

原文翻译：

毫无疑问，美国英语是当今世界上最具影响力和影响力的英语变体。原因有很多。首先，美国目前是最强大的国家，这种力量总是伴随着它的影响力。事实上，方言和语言之间的区别常常是通过权力来区分的。如前所述，语言是一种带有军队的方言。其次，美国的政治影响力是通过美国的流行文化，特别是通过美国电影(当然是电影)和音乐的国际传播而扩大的。正如 Kahuna 所指出的，一种文化的国际主导地位导致其语言的强力扩张，语言的扩张有助于其背后文化的威望。第三，美国英语在国际上的突出地位与通信技术的超高速发展密切相关。微软的老板是美国人比尔·盖茨。这意味着电脑的默认语言设置是美式英语，当然也可以根据个人情况进行更改。简而言之，美国英语影响力的增加是由政治权力以及由此产生的美国文化和媒体的扩散、技术进步以及通信技术的快速发展造成的。

参考答案：

While American English is a dialect with an army because the United States is the most powerful nation on the earth and such power brings with it influence, America's political influence is extended through American popular culture resulting in an expansion of its language, and the international prominence of American English is associated with the quick development of communications technology, which suggests American English is the most influential and powerful variety of English.

5. Malaysia Tourism 马来西亚旅游 #091005

Malaysia is launching its biggest-ever tourism campaign in effort to lure 20 million visitors here this year. Malaysia is one of the most pleasant, hassle-free countries to visit in Southeast Asia. Aside from its gleaming 21st century glass towers, it boasts some of the most superb beaches, mountains and national parks in the region.

Any tourist itinerary would have to begin in the capital, [Kuala Lumpur](#), where you will find the [Petronas Twin Towers](#), which once comprised the world tallest buildings and now hold the title of second-tallest. Both the 88-story towers soar 1,480 feet high and are connected by a sky-bridge on the 41st floor. The limestone temple [Batu Caves](#), located 9 miles north of the city, have a 328-foot-high ceiling and feature ornate Hindu shrines, including a 141-foot-tall gold-painted statue of a Hindu deity. To reach the caves, visitors have to climb a steep flight of 272 steps. In [Sabah state on Borneo island](#) not to be confused with Indonesia's Borneo you'll find the small mushroom-shaped Sip Adan island, off the coast of Sabah, rated as one of the top five diving sites in the world. [Sipadan](#) is the only oceanic island in Malaysia, rising from a 2,300-foot abyss in the Celebes Sea. You can also climb [Mount Kinabalu](#), the tallest peak in Southeast Asia, visit the Sepilok Orang Utan Sanctuary, go white-water rafting and catch a glimpse of the bizarre Proboscis monkey, a primate found only in Borneo with a huge pendulous nose, a characteristic pot belly and strange honking sounds.

While you're in Malaysia, consider a trip to [Malacca](#). In its heyday, this southern state was a powerful Malay sultanate and a booming trading port in the region. Facing the Straits of Malacca, this historical state is now a place of intriguing Chinese streets, antique shops, old temples and reminders of European colonial powers. Another interesting destination is [Penang](#), known as the Pearl of the Orient. This island off the northwest coast of Malaysia boasts of a rich Chinese cultural heritage, good food and beautiful beaches.

原文翻译：

为了今年吸引 2000 万游客，马来西亚正在启动其有史以来最大的旅游活动。马来西亚是东南亚最令人愉快、最自由的国家之一。除了闪闪发光的 21 世纪玻璃塔，它还拥有该地区一些最优美的海滩、山脉和国家公园。

任何旅游行程都必须从首都吉隆坡开始，在那里你会找到马来西亚国家石油公司双子塔，它曾经是世界上最高的建筑，现在是第二高的建筑。两座 88 层的塔楼都高达 1480 英尺，由 41 层的天桥连接。巴都石窟位于城市以北 9 英里处，有 328 英尺高的天花板，以华丽的印度教神龛为特色，其中包括一尊 141 英尺高的镀金印度教神像。要到达这些洞穴，游客们必须爬上一段 272 级的陡坡。在婆罗洲岛的沙巴州(Sabah state)，不要把它和印度尼西亚的婆罗洲(Borneo)搞混了，你会发现离沙巴州海岸不远的蘑菇状的小 Sip Adan 岛，被评为世界上五大潜水地点之一。西巴丹岛是马来西亚唯一的海洋岛屿，从西里伯斯海 2300 英尺深的深渊中升起。你也可以爬上东南亚最高的山峰基纳巴卢山，参观 Sepilok Orang Utan 保护区，泛舟激流，一睹奇特的长鼻猴，这是一种只在婆罗洲发现的灵长类动物，有着巨大的垂鼻，典型的壶腹，奇怪的喇叭声。

如果你在马来西亚，可以考虑去马六甲旅行。在它的鼎盛时期，这个南部国家是一个强大的马来苏丹国，也是该地区一个繁荣的贸易港口。面对马六甲海峡，这个历史悠久的国家现在是一个有趣的中国街道，古董店，古老的寺庙和欧洲殖民列强的遗迹。另一个有趣的目的地是槟城，被称为“东方明珠”。这个位于马来西亚西北海岸的岛屿以其丰富的中国文化遗产、美食和美丽的海滩而自豪。

参考答案：

While Malaysia is one of the most pleasant countries to visit in Southeast Asia, it is also launching its biggest-ever tourism campaign to lure more visitors this year, and people can visit lots of places, such as the Petronas Twin Tower in Kuala Lumpur, the limestone temple Batu Caves, the Sipadan island in Sabah, Sipadan, the Mount Kinabalu, Malacca and Penang.

6. World Wide Web 互联网 #091006

He is the man who has changed the world more than anyone else in the past hundred years. Sir Tim Berners-Lee may be a mild-mannered academic who lives modestly in Boston, but as the inventor of the world wide web he is also a revolutionary. He is a scientist who has altered the way people think as well as the way they live.

Since the web went global 20 years ago, the way we shop, listen to music and communicate has been transformed. There are implications for politics, literature, economics — even terrorism — because an individual can now have the same access to information as the elite. Society will never be the same.

The computer scientist from Oxford, who built his own computer from a television screen and spare parts after he was banned from one of the university computers, is a cultural guru as much as a technological one.

“It is amazing how far we’ve come,” he says. “But you’re always wondering what’s the next crazy idea, and working to make sure the web stays one web and that the internet stays open. There isn’t much time to sit back and reflect.”

He invented the web, he says, because he was frustrated that he couldn’t find all the information he wanted in one place. It was an imaginary concept that he realized.

原文翻译：

在过去的一百年里，他是改变世界最多的人。蒂姆·伯纳斯-李爵士(Sir Tim Berners-Lee)或许是一位生活在波士顿、性情温和的学者，但作为万维网的发明者，他也是一位革命者。他是一位科学家，他改变了人们的思维方式和生活方式。

自从20年前网络全球化以来，我们购物、听音乐和交流的方式已经发生了改变。这对政治、文学、经济甚至恐怖主义都有影响，因为现在个人可以与精英拥有同样的获取信息的渠道。社会将永远不会一成不变。

这位来自牛津大学的计算机科学家，在被学校一台计算机禁止使用后，用电视屏幕和

备件打造了自己的计算机。他既是一位文化大师，也是一位技术大师。

他表示：“令人惊讶的是，我们已经取得了长足的进步。”“但你总是想知道下一个疯狂的想法是什么，并确保网络保持一个网络，并保持互联网开放。没有多少时间坐下来反思。”

他发明了网络，他说，因为他无法在一个地方找到他想要的所有信息而感到沮丧。他意识到这只是一个假想的概念。

参考答案：

When Sir Tim Berners-Lee who is a cultural guru as much as a technology one, invented the world wide web because he wanted to find all information in one place, he altered the way people think as well as the way they live, but he is looking for the next crazy idea to ensure the web stay open, which suggests that he is a revolutionary scientist who has realized an imaginary concept.

7. Climate change impact on birds 气候变化影响候鸟迁徙 #091007

As warmer winter temperatures become more common, one way for some animals to adjust is to shift their ranges northward. But a new study of 59 North American bird species indicates that doing so is not easy or quick -- it took about 35 years for many birds to move far enough north for winter temperatures to match where they historically lived.

The researchers used 35 years of data from the North American Christmas Bird Count to match winter temperatures to where birds were seen. They tested 59 bird species individually and found that they responded differently to climate change. When summarized across bird species, there was evidence for a strong delay lasting about 35 years.

For example, black vultures have spread northward in the last 35 years and now winter as far north as Massachusetts, where the minimum winter temperature is similar to what it was in Maryland in 1975. On the other hand, the endangered red-cockaded woodpecker did not alter its range at all despite the warming trend, possibly because its very specific habitat

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

requirements precluded a range shift.

Both of these scenarios could represent problems for birds, La Sorte said. *Species that do not track changes in climate may wind up at the limits of their physiological tolerance, or they may lose important habitat qualities*, such as favored food types, as those species pass them by. But they also can't move their ranges too fast if the habitat conditions they depend on also tend to lag behind climate.

If warming trends weaken, as they did over the past few years, birds may be able to catch up. But *accelerated warming*, which is likely as global carbon emissions continue to increase, may put additional strain on birds. The study highlights these challenges and the high potential climate change has for disrupting natural systems. It also underscores the *challenges ecologists face in predicting the long-term consequences of climate change for many species* simultaneously.

原文翻译：

随着温暖的冬季气温变得越来越普遍，一些动物的一种适应环境方式就是向北转移它们的活动范围。但一项针对北美 59 种鸟类的新研究表明，要做到这一点并不容易，也不会很迅速——许多鸟类花了大约 35 年的时间才向北迁徙到足以让冬季气温与它们历史生活过的地方相匹配的地方。

研究人员使用了 35 年来北美圣诞节鸟类计数的数据来匹配冬季温度和鸟类出现的地点。他们分别测试了 59 种鸟类，发现它们对气候变化的反应不同。当对所有的鸟类进行这种趋势的总结时，有证据表明这种明显的延迟会持续大约 35 年。

例如，黑秃鹫在过去的 35 年里一直向北迁徙，现在在马萨诸塞州过冬，那里冬天的最低温度和 1975 年的马里兰州差不多。另一方面，尽管面临这种变暖的趋势，濒危的红冠啄木鸟的活动范围根本没有改变，这可能是因为它们非常特殊的栖息地要求使得它们无法改变活动范围。

这两种情况都可能给鸟类带来问题，La Sorte 说。那些不根据气候变化而迁徙的物种可

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

575

能最终会达到它们生理耐受极限，或者它们可能会因为不迁徙而失去享受栖息地原有品质的权利，比如那些经过它们的物种所传承下来的某些偏爱的食物类型。但是，如果它们赖以生存的环境变化得落后于气候的变化，它们的活动范围也不能移动得太快。

如果变暖趋势减弱，就像过去几年那样，鸟类的迁徙可能会赶上来。但是，随着全球碳排放的持续增加，加速的气候变暖可能会给鸟类带来额外的压力。该研究强调了这些挑战以及气候变化在于破坏自然系统方面的巨大潜力。它也强调了生态学家在同时预测气候变化对许多物种的长期影响方面所面临的挑战。

参考答案：

While one way for animals to adjust is to shift their ranges northward as warmer winter temperatures become common, doing so is not easy or quick and birds responded differently to climate change, so species that do not track changes in climate may wind up at the limits of their physiological tolerance, or they may lose important habitat qualities, and accelerated warming challenges ecologists in predicting the long-term consequences of climate change for many species.

8. Making Australian Food History 澳洲饮食历史 #091008

In the past two centuries there has been a dramatic change in the role of food and eating in Australian public consciousness. Public discussion of food was largely confined to matters of supply, distribution and price. Towards the end of the nineteenth century some newspapers were offering regular columns of advice on housekeeping topics, including menu planning and recipes. However, eating remained essentially a private activity, even when undertaken in company.

By the late twentieth century, food and eating had become prominent public preoccupations. Evidence of this dramatic cultural revaluation abounds. In bookstores, for example, cookery and all things related to it are often among the larger displays. There are specialty stores selling all manner of cookware, tableware and other paraphernalia associated with food,

eating and drinking.

Perhaps most telling is the extension of the phenomenon of mass media celebrity to include culinary personalities. Scholars, too, have jumped on the commodification bandwagon. Now degrees in gastronomy seem set to emulate the MBA phenomenon of the 1980s and food has become a respectable subject for investigation with philosophers, sociologists, historians, cultural theorists, ecologists and many others all having a go at it.

However, surprisingly, the question seems to have held little fascination for most historians. For the best part of two centuries they have managed to write their accounts of colonization and nationhood with only scant reference to how the settlers and their descendants fed themselves.

原文翻译：

在过去的两个世纪里，澳大利亚公众意识中食物和饮食的角色发生了巨大的变化。公众对食品的讨论很大程度上局限于供应、分配和价格问题。到了 19 世纪末，一些报纸开始提供定期专栏的家政建议，包括菜单规划和食谱。然而，吃饭仍然是一项私人活动，即使是在有同伴的情况下。

到 20 世纪末，食物和饮食已经成为公众关注的重要问题。这种戏剧性的饮食文化翻身抬头的证据比比皆是。例如，在书店里，烹饪和与之相关的所有东西通常都在较大的陈列中。有专营店出售各种各样的炊具、餐具和其他与食物、饮食有关的用具。

也许最能说明问题的是这种潮流在大众媒体名人，包括烹饪名人中的延伸。学者们也跳上了商品化的大车。如今，美食学的学位似乎要效仿上世纪 80 年代的 MBA 现象，美食已成为值得尊敬的研究课题，哲学家、社会学家、历史学家、文化理论家、生态学家和许多其他人都在尝试。

然而，令人惊讶的是，这个问题似乎对大多数历史学家没有什么吸引力。在两个世纪的大部分时间里，他们设法写出了关于殖民和国家地位的描述，而很少提及定居者及其后代如何养活自己。

参考答案：

While there has been a dramatic change in the role of food and eating in Australian public consciousness, eating remained essentially a private activity, whereas food and eating had become prominent public preoccupations by the late twentieth century, and food has become a respectable subject for investigation, but the question seems to have held little fascination for most historians.

9. Overqualified employees 大材小用的员工 #091009

If your recruiting efforts attract job applicants with too much experience—a near certainty in this weak labor market—you should consider a response that runs counter to most hiring managers’ MO: Don’t reject those applicants out of hand. Instead, take a closer look. New research shows that **overqualified workers tend to perform better than other employees, and they don’t quit any sooner**. Furthermore, a simple managerial tactic—empowerment—can mitigate any dissatisfaction they may feel.

The prejudice against too-good employees is pervasive. Companies tend to prefer an applicant who is a “perfect fit” over someone who brings more intelligence, education, or experience than needed. On the surface, this bias makes sense: Studies have consistently shown that **employees who consider themselves overqualified exhibit higher levels of discontent**. For example, over-qualification correlated well with job dissatisfaction in a 2008 study of 156 call-center reps by Israeli researchers Saul Fine and Baruch Nevo. And unlike discrimination based on age or gender, declining to hire overqualified workers is perfectly legal.

But even before the economic downturn, a surplus of overqualified candidates was a global problem, particularly in developing economies, where rising education levels are giving workers more skills than are needed to supply the growing service sectors. If managers can get beyond the conventional wisdom, **the growing pool of too-good applicants is a great opportunity**. Berrin Erdogan and Talya N. Bauer of Portland State University in Oregon found that **overqualified workers’ feelings of dissatisfaction can be dissipated by giving them**

英澳新三国（同一国家任意三所院校）

autonomy in decision making. At stores where employees didn't feel empowered, "overeducated" workers expressed greater dissatisfaction than their colleagues did and were more likely to state an intention to quit. But that difference vanished where self-reported autonomy was high.

原文翻译：

如果你的招聘吸引了很多经验丰富的求职者——在当前疲软的劳动力市场这几乎是肯定的——你应该考虑一种与大多数招聘经理的做法背道而驰的反应：不要立即拒绝这些求职者。相反，仔细看看。新的研究表明，资历过高的员工往往比其他员工表现得更好，而且他们不会很快辞职。此外，一种简单的管理策略——权力下放——可以减轻他们可能感到的任何不满。

对过于优秀的员工的偏见是普遍存在的。公司更青睐“完美契合”的求职者，而不是那些智商、教育程度或经验高于公司需求的人。从表面上看，这种偏见是有道理的：研究一直表明，认为自己资历过高的员工会表现出更大程度的不满。例如，以色列研究人员 Saul Fine 和 Baruch Nevo 在 2008 年对 156 名呼叫中心代表进行的一项研究表明，资历过高与对工作的不满有很大关系。与基于年龄或性别的歧视不同，拒绝聘用资历过高的员工是完全合法。

但即使在经济衰退之前，资历过高的求职者过剩也是一个全球性问题，尤其是在发展中经济体里。在这些经济体中，教育水平不断提高，使工人掌握了更多技能，超出了不断增长的服务业所需的技能。如果经理们能够超越传统观念，那么越来越多的优秀求职者就是一个很好公司发展的机会。俄勒冈州波特兰州立大学的 Berrin Erdogan 和 Talya N. Bauer 发现，给大材小用的员工自主权可以消除他们的不满情绪。在那些员工感觉没有权力的商店里，“受过过度教育”的员工比他们的同事表达了更大的不满，也更有可能表达出辞职的意图。但在自治性较高的公司里，这种差异就消失了。

参考答案：

While overqualified workers tend to perform better than other employees, and they don't quit any sooner, the prejudice against too-good employees is pervasive because employees who consider themselves overqualified exhibit higher levels of discontent, but the growing pool of too-good applicants is a great opportunity because overqualified workers' feelings of dissatisfaction can be dissipated by giving them autonomy in decision making.

10. Nurse Shark 铰口鲨 #091010

Nurse sharks are nocturnal animals, spending the day in large inactive groups of up to 40 individuals. Hidden under submerged ledges or in crevices within the reef, the Nurse sharks seem to prefer specific resting sites and will return to them each day after the nights hunting. By night, the sharks are largely solitary. Nurse sharks spend most of their time foraging through the bottom sediments in search of food.

Their diet consists primarily of crustaceans, mollusks, tunicates and other fish such as spiny lobsters, crabs, shrimps, sea urchins, octopuses, squid, marine snails and bivalves and in particular, stingrays.

Nurse sharks are thought to take advantage of dormant fish which would otherwise be too fast for the sharks to catch, although their small mouths limit the size of prey items, the sharks have large throat cavities which are used as a sort of bellows valve. In this way, Nurse sharks are able to suck in their prey. Nurse sharks are also known to graze algae and coral.

Generally slow and sluggish, Nurse sharks spend much of their time resting on the bottom of the ocean. Nurse sharks have been observed resting on the bottom with their bodies supported on their fins, possibly providing a false shelter for crustaceans which they then ambush and eat. If it must move, the Nurse shark may even use its large front (or pectoral) fins to 'walk' along the ocean floor.

原文翻译：

铰口鲨是夜行性动物，白天的时候，它们回组成有 40 条鲨鱼的一个不活跃游动的大群体。铰口鲨隐藏在水下的岩架或暗礁的缝隙中，它们似乎更喜欢特定的休息地点，并且会在夜间捕猎后每天回到那里。到了晚上，鲨鱼大多是独居的。铰口鲨大部分时间都在海底沉积物中寻找食物。

它们的食物主要是甲壳类、软体动物、被壳动物和其他鱼类，如龙虾、蟹、虾、海胆、章鱼、鱿鱼、海螺和双壳类，特别是黄貂鱼。

铰口鲨利用休眠鱼的静态从而捕猎它们，否则如果鱼游动速度太快，鲨鱼无法捕获。尽管铰口鲨的小嘴巴限制了猎物的大小，但它们有很大的喉咙腔，用作一种风箱阀门。这样，铰口鲨就能把猎物吸进去。铰口鲨也以吃藻类和珊瑚为生。

铰口鲨通常行动迟缓，大部分时间都在海底休息。观察显示，铰口鲨栖息在海底，用鳍支撑着身体，可能是假装为甲壳类动物提供了一个的庇护所，然后它们伏击并吃掉这些甲壳类动物。如果铰口鲨们必须移动，它们甚至可以用它巨大的前(或胸鳍)鳍在海底“行走”。

参考答案：

While nurse sharks are nocturnal animals, spending the day in large inactive groups, the sharks are largely solitary by night, and Nurse sharks are thought to take advantage of dormant fish which would otherwise be too fast for the sharks to catch, so the sharks have large throat cavities which are able to suck in their prey, and nurse sharks spend much of their time resting on the bottom of the ocean.

11. Electric eels 电鳗 #091011

On a field trip to the Amazon in 1807, 19th-century explorer Alexander von Humboldt witnessed a group of horses lead through a muddy pool filled with electric eels, which he described as dramatically leaping up to attack the intruders. But scientists have doubted the

story.

An illustration of Alexander von Humboldt's story of the battle between the horses and electric eels.

“The first time I read von Humboldt's tale, I thought it was completely bizarre,” Catania says. “Why would the eels attack the horses instead of swimming away?” But then he observed the same behavior by accident as he transferred the eels in his lab from one tank to another using a metal-rimmed net. Instead of swimming away, larger eels attacked the net by leaping out of the water.

Catania tracked the strength of the eels' electric shock by attaching a voltmeter to an aluminum plate, or conductive metal strips to “predator” objects such as a crocodile head replica.

The zap a submerged eel distributes through the water is relatively weak when it reaches the target.

But when an eel touches it with its electricity-generating chin, the current travels directly to the target and has to travel through its body before it gets back to the water, Catania reported in Proceedings of the National Academy of Sciences.

“This allows the eels to deliver shocks with a maximum amount of power to partially submerged land animals that invade their territory,” Catania explains. “It also allows them to electrify a much larger portion of the invader's body.”

Catania found the eels leapt to attack, rather than receded, more often when the water in the aquarium was lower. He argues the attack lets electric eels better defend themselves during the Amazonian dry season, when they're cornered in small pools and make easy prey.

穿过一个满是电鳗的泥塘，他说电鳗戏剧性地跳起来攻击这些入侵者。但科学家们对此表示怀疑。

有个插图展现了亚历山大·冯·洪堡的故事之间的马和电鳗的战斗。

卡塔尼亚说：“我第一次读到冯·洪堡的故事时，觉得它非常奇怪。”“为什么鳗鱼会攻击马而不逃走呢？”但后来，当他用金属网把实验室里的鳗鱼从一个水族箱转移到另一个水族箱时，他意外地观察到了同样的行为。较大的那些鳗鱼并没有游开，而是从水里跳出来攻击金属网。

卡塔尼亚通过在铝板上安装电压表，或者在“虚拟捕食者”上安装导电金属条，比如鳄鱼头的复制品，来追踪鳗鱼的电击强度。

当潜入水中的鳗鱼到达目标时，它在水中的攻击强度相对较弱。

但是当鳗鱼用它能发电的下巴接触到猎物时，电流就会直接流到猎物身上，在猎物返回水中之前，电流必须穿过它的身体，卡塔尼亚在《美国国家科学院院刊》(Proceedings of the National Academy of Sciences)上报道称。

卡塔尼亚解释说：“这使得鳗鱼能够发出最大力度的电击，当对付那些侵入其领地的部分在水中的陆地动物之时。”“这也使他们能够给入侵者的大部分身体进行通电。”

卡塔尼亚发现，当水族馆的水温较低时，这些鳗鱼往往会跃起攻击，而不是退却。他认为，这种攻击可以让电鳗在亚马逊干旱季节更好地保护自己，因为在干旱季节，它们被逼到小水池里，很容易成为猎物。

参考答案：

While scientists have doubted the story of 19th-century explorer Alexander von Humboldt because the eels attack the horses instead of swimming away, Catania observed the same behavior by accident, and he find out that the eels leapt to attack rather than receded more often when the water in the aquarium was lower, which means the attack lets electric eels better defend themselves during the Amazonian dry season.

12. Orbital Debris 轨道碎片 #091012

For decades, space experts have worried that a speeding bit of orbital debris might one day smash a large spacecraft into hundreds of pieces and start a chain reaction, a slow cascade of collisions that would expand for centuries, spreading chaos through the heavens.

In the last decade or so, as scientists came to agree that the number of objects in orbit had surpassed a critical mass — or, in their terms, the critical spatial density, the point at which a chain reaction becomes inevitable — they grew more anxious.

Early this year, after a half-century of growth, the federal list of detectable objects (four inches wide or larger) reached 10,000, including dead satellites, spent rocket stages, a camera, a hand tool and junkyards of whirling debris left over from chance explosions and destructive tests. So our billion dollar of satellites are at risk.

原文翻译：

几十年来，太空专家们一直担心，有朝一日，一小块高速飞行的轨道碎片可能会将一个大型航天器撞成数百块碎片，并引发连锁反应，这是一种会持续数个世纪的缓慢级连续碰撞，这会在天空中传播混乱。

在过去的十多年里，科学家们一致认为轨道上的物体数量已经超过了临界质量——或者用他们的术语来说，超过了临界空间密度，也就是连锁反应不可避免的临界点——他们变得更加焦虑。

今年年初，经过半个世纪的发展，联邦政府列出的可探测物体(4英寸或更大)达到了1万件，包括报废的卫星、报废的火箭级、一台照相机、一件手工工具，以及爆炸和破坏性试验遗留下来的旋转碎片垃圾场。所以我们数十亿美元的卫星正处于（碰撞的）危险之中。

that the number of objects in orbit had surpassed the critical spatial density, and a chain reaction becomes inevitable, so our billion dollar of satellites are at risk.

13. Great City Livability 宜居城市 #091013

How can we design **great cities** from scratch if we cannot agree on what makes them great? **None of the cities where people most want to live** — such as London, New York, Paris and Hong Kong — comes near to being at the top of surveys asking which are best to live in.

The top three in the most recent Economist Intelligence Unit's livability ranking, for example, were Melbourne, Vancouver and Vienna. **They are all perfectly pleasant, but great?** The first question to tackle is the **difference between livability and greatness**. Perhaps we cannot aspire to make a great city, but **if we attempt to make a livable one**, can it in time become great?

There are some fundamental elements that you need. The first is **public space**. Whether it is Vienna's Ringstrasse and Prater park, or the beaches of Melbourne and Vancouver, these are places that allow the city to pause and the citizens to mingle and to breathe, regardless of class or wealth. Good cities also seem to be close to nature, and all three have easy access to varied, wonderful landscapes and topographies.

A second crucial factor, says Ricky Burdett, a professor of urban studies at the London School of Economics, is a good transport system. "**Affordable public transport** is the one thing which cuts across all successful cities," he says.

原文翻译：

如果不能就什么能使城市的伟大达成一致，我们如何能从一开始便能设计一座伟大的城市呢？所有人们最希望居住的城市，如伦敦、纽约、巴黎和香港，没有一个在最宜居城市的调查中名列前茅。

例如，在经济学人信息社(Economist Intelligence Unit)最新的宜居排名中，排名前三的城市是墨尔本、温哥华和维也纳。他们都很受人喜欢，但是很伟大吗？第一个需要解决

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

585

的问题是宜居和伟大之间的区别。也许我们无法立志建设一个伟大的城市，但如果我们试尝试打造一个宜居的城市，那么它能否随着时间的推移变得伟大？

你需要一些基本的元素。首先是公共空间。无论是维也纳的环城街和普拉特公园，还是墨尔本和温哥华的海滩，这些地方都能让这座城市停下脚步，让市民们相互交流、自由呼吸，无论阶级和财富。好的城市似乎也都靠近大自然，这三个城市都很容易接触到各种各样美妙的风景和地貌。

伦敦经济学院的城市研究教授 Ricky Burdett 说，第二个关键因素是良好的交通系统。他说：“负担得起的公共交通是贯穿所有成功城市的一个重要因素。”

参考答案：

While none of the great cities were places where people most want to live, the most livable cities are all pleasant but not great because of the difference between livability and greatness, and there are fundamental elements that you need if we attempt to make a livable city great in time, which are public space and affordable transport system.

14. Mini War/Small War 微型战争 #091014

In such an environment, warfare is no longer purely directed against the military potential of adversarial states. It is rather directed at infiltrating all areas of their societies and to threaten their existences. The comparatively easy access to weapons of mass destruction, in particular relatively and low-cost biological agents, is of key concern. Both governmental and non-governmental actors prefer to use force in a war that can be characterized as “unconventional” or also as “small wars.” War waged according to conventions is an interstate phenomenon. The “small war” is the archetype of war, in which the protagonists acknowledge no rules and permanently try to violate what conventions do exist. The protagonists of the “small war” observe neither international standards nor arms control agreements. They make use of territories where they do not have to fear any sanctions because there is no functioning state to assume charge of such sanctions or because the state in question is too weak to impose such

sanctions. This type of war does not provide for any warning time. It challenges not only the external security of the nation states and international community, but also their internal safety.

原文翻译：

在这种环境中，战争不再纯粹针对对抗国家的军事潜力。它的目的是渗透到他们社会的所有领域，并威胁到他们的生存。我们需要考虑到的关键是比较容易获得大规模毁灭性武器，特别是相对廉价的生物武器。政府和非政府决策者都喜欢在一个可被称为“非常规”或“小规模战争”的战争中使用武力。依据国际公约而进行的战争是一种全球现象。“小规模战争”是战争的原型，其中的主角不承认任何规则，并且总是试图违反存在的惯例。“小规模战争”的主角既不遵守国际标准，也不遵守军备控制协议。因为没有强力的国家能承担对其制裁的责任，或者有关国家太软弱而不能实施这种制裁，他们不惧怕任何制裁。这种类型的战争不会有任何通牒。它不仅对民族国家和国际社会的外部安全构成挑战，而且对其内部安全也构成挑战。

参考答案：

Since warfare is directed at infiltrating all areas of society, the easy access to weapons of mass destruction is of key concern, but both governmental and non-governmental actors prefer to use “small wars” in which the protagonists acknowledge no rules and observe neither international standards nor arms control agreements by making use of territories with no sanctions, which challenges both the external security and the internal safety of the nation states and international community.

15. The Year Without Summer 印尼火山 #091015

In 1815 on the island of Sumbawa in Indonesia, a handsome and long-quiescent mountain named **Tambora exploded** spectacularly, killing a hundred thousand people with its blast and associated tsunamis. It was the biggest volcanic explosion in ten thousand years—150 times the size of Mount St. Helens, equivalent to sixty thousand Hiroshima-sized atom bombs.

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

587

News didn't travel terribly fast in those days.

In London, The Times ran a small story— actually a letter from a merchant—seven months after the event. But by this time *Tambora's effects were already being felt*. Thirty-six cubic miles of smoky ash, dust, and grit had diffused through the atmosphere, obscuring the Sun's rays and causing the Earth to cool. Sunsets were unusually but bleakly colorful, an effect memorably captured by the artist J. M. W. Turner, who could not have been happier, but mostly the world existed under an oppressive, dusky pall. It was this deathly dimness that inspired the Byron lines above.

Spring never came and summer never warmed: 1816 became known as the year without summer. *Crops everywhere failed to grow*. In Ireland a famine and associated typhoid epidemic killed sixty-five thousand people. In New England, the year became popularly known as Eighteen Hundred and Froze to Death. Morning frosts continued until June and almost no planted seed would grow. Short of fodder, livestock died or had to be prematurely slaughtered. In every way, *it was a dreadful year—almost certainly the worst for farmers in modern times*. Yet globally the temperature fell by only about 1.5 degrees Fahrenheit. Earth's natural thermostat, as scientists would learn, is an exceedingly delicate instrument.

原文翻译：

1815年，在印度尼西亚的松巴瓦岛上，一座名为坦博拉的美丽而沉寂已久的山发生了惊人的爆发，火山爆发和随之而来的海啸夺去了10万人的生命。这是一万年以来最大的一次火山爆发——是圣海伦斯火山爆发的150倍，相当于6万枚广岛原子弹大小。在那些日子里，消息的传播速度并不快。

事件发生七个月后，伦敦的《泰晤士报》刊登了一篇小故事——实际上是商人的一封信。但此时，坦博拉爆发的影响已经显现。36立方英里的烟尘、灰尘和沙砾散布到大气中，遮蔽了阳光，导致地球降温。日落不同寻常，但却是朦胧的色彩，画家特纳(M. W. Turner)因捕捉到了这令人难忘的现象而感到从所未有的快乐，但这个大部分的世界却都笼罩在一层压抑的昏暗阴影下。正是这种死亡一般的黑暗激发了拜伦在写下上面

这几句话的灵感。

春日从未到来，夏天也未曾变暖：1816 年被称为无夏之年。各地的庄稼都无法生长。在爱尔兰，一场饥荒和与之相关的伤寒疫情导致 6.5 万人死亡。在新英格兰，这一年被普遍称为 1800 冻到冻死。早晨的霜冻一直持续到六月，几乎没有种子生长。由于缺乏饲料，牲畜死亡或不得被过早宰杀。从各个方面来说，这都是可怕的一年，几乎可以肯定是现代农民最糟糕的一年。然而，全球气温仅下降了约 1.5 华氏度。科学家们会发现，地球的天然恒温器是一种极其精密的仪器。

参考答案：

Although the news of the explosion of Tambora didn't travel terribly fast in those days, Tambora's effects were already being felt because spring never came and summer never warmed as crops everywhere failed to grow, which suggests it was a dreadful and certainly the worst year for farmers in modern times, but earth's natural thermostat is an exceedingly delicate instrument since globally the temperature fell by only about 1.5 degrees Fahrenheit.

16. Columbus 哥伦布 #091016

When Christopher Columbus arrived at Hispaniola during his first transatlantic voyage in the year A.D. 1492, the island had already been settled by Native Americans for about 5,000 years. The occupants in Columbus's time were a group of Arawak Indians called Tainos who lived by farming, were organized into five chiefdoms, and numbered around half a million (the estimates range from 100,000 to 2,000,000). Columbus initially found them peaceful and friendly, until he and his Spaniards began mistreating them. Unfortunately for the Tainos, they had gold, which the Spanish coveted but didn't want to go to the work of mining themselves. Hence the conquerors divided up the island and its Indian population among individual Spaniards, who put the Indians to work as virtual slaves, accidentally infected them with Eurasian diseases, and murdered them. By the year 1519, 27 years after Columbus's arrival, that original population of half a million had been reduced to about 11,000, most of whom died that year of smallpox to bring the population down to 3,000.

原文翻译：

当克里斯托弗·哥伦布在公元 1492 年首次跨大西洋航行中到达伊斯帕尼奥拉岛时，土著美洲人已经在这个岛上定居了大约 5000 年。哥伦布时代的居民是一群叫泰诺斯(Tainos)的阿拉瓦克印第安人，他们靠务农为生，分成 5 个部落，人口约 50 万(估计范围从 10 万到 200 万)。最初发现他们和平友好，直到哥伦布和他的西班牙人开始虐待他们。对泰诺人来说不幸的是，他们拥有黄金，西班牙人觊觎这些黄金，但他们不愿意自己去采矿。因此，征服者们把这个岛屿和岛上的印第安人分配给了西班牙人，这些西班牙人让印第安人充当奴隶，无意中让他们感染了欧亚疾病，并杀害了他们。到 1519 年，也就是哥伦布到达后的 27 年，原本 50 万的人口减少到大约 11000 人，这其中大部分人死于之后天花那年，使人口减至 3000。

参考答案：

Although Columbus initially found Tainos, the settler of Hispaniola, peaceful and friendly, the conquerors divided up the island and its Indian population among individual Spaniards, who put the Indians to work as virtual slaves, accidentally infected them with Eurasian diseases, and murdered them because Tainos had gold which the Spanish coveted but didn't want to go to mining themselves, and original population of half a million had been reduced after 27 years since Columbus's arrival.

17. Online teaching & online Learning 网上教学 #091017

What makes teaching online unique is that it uses the internet, especially the World Wide Web, as the primary means of communication. Thus, when you teach online, you don't have to be someplace to teach. You don't have to lug your briefcase full of paper or your laptop to a classroom, stand at a lectern, scribble on a chalkboard (or even use your high-tech, interactive classroom "smart" whiteboard), or grade papers in a stuffy room while your students take a test. You don't even have to sit in your office waiting for students to show up for conferences. You can hold "office hours" on weekends or at night after dinner. You can do all this while living in a small town in Wyoming or a big city like Bangkok, even if you are working for a

college whose administrative office is located in Florida or Dubai. You can attend an important conference in Hawaii on the same day you teach your class in New Jersey, logging on from your laptop via the local café's wireless hotspot or your hotel room's high-speed network. Or you may simply pull out your smartphone to quickly check on the latest postings, email, or text messages from students.

Online learning offers more freedom for students as well. They can search for courses using the Web, scouring their institution or even the world for programs, classes, and instructors that fit their needs. Having found an appropriate course, they can enroll and register, shop for their books, read articles, listen to lectures, submit their homework assignments, confer with their instructors, and receive their final grades-all online.

They can assemble virtual classrooms, joining other students from diverse geographical locales, foraging bonds and friendships not possible in conventional classrooms, which are usually limited to students from a specific geographical area.

原文翻译：

在线教学的独特之处在于，它利用互联网，尤其是万维网，作为主要的交流手段。因此，当你在网上教书时，你不需要在某个地方教书。你不必背着装满纸张的公文包或笔记本电脑去教室，站在讲台上，在黑板上乱写乱画(甚至不使用高科技的交互式课堂“智能”白板)，也不必在闷热的房间让学生参加考试，自己同事批改试卷。你甚至不必坐在办公室里等学生来参加会议。你可以在周末或晚饭后开始“办公时间”。当你住在怀俄明州的一个小镇或者像曼谷这样的大城市时，即使你在为一所行政办公室位于佛罗里达或者迪拜的大学工作，你也可以做到这些。你可以在新泽西州上课的同一天参加夏威夷的一个重要会议，通过当地咖啡馆的无线热点或酒店房间的高速网络，用笔记本电脑登录。或者你也可以简单地拿出你的智能手机来快速查看学生们最新的帖子、邮件或短信。

在线学习也为学生提供了更多的自由。他们可以使用网络从他们所在的机构，甚至整个世界中搜索课程，寻找符合他们需求的项目、课程和教师。找到合适的课程后，他

们可以注册、购买书籍、阅读文章、听课、提交作业、与导师交流以及收到期末成绩——所有这些都是在网上进行的。

他们可以组建虚拟教室，与来自不同地理位置的学生一起学习，建立传统教室中不可能的联系和友谊，传统教室通常只对来自特定地理区域的学生开放。

参考答案：

While what makes teaching online unique is that it uses the internet as the primary means of communications, you don't have to be someplace to teach, and online learning offers more freedom for students because they can search for courses using the Web, scouring their institution or the world for programs, classes and instructors that fit their needs, but they can assemble virtual classrooms, joining other students from diverse geographical locales, foraging bonds and friendships.

18. Oil Price Decline 油价下降 #091018

A plunging oil price has dragged UK inflation to zero over recent months. But analysts say the fall in retail prices cannot solely be attributed to oil.

Discount retailers continue to steal market share from established industry giants, taking an increased chunk of both food and non-food markets. And, as retail analyst Nick Bubb notes, “the big supermarkets have had to respond to this by bringing down their own ‘rip off’ prices”. The result is a sector-wide fall in prices paid at the till.

The growth of online retailers has also brought prices down, in part due to the ease with which customers can compare prices and purchase goods elsewhere if they find an item cheaper on a competitor's site. Retailers are also reluctant to offer different prices in their physical and online stores, according to retail analyst Richard Hyman, which means shops are forced to cut prices on the high street.

An ever-expanding range of shops is also to blame, according to Mr. Hyman. “Overcapacity is

the biggest of the issues affecting prices,” he says. “In the last 10 years, online alone has added the equivalent of 110m square feet of trading space — that’s roughly equal to 65 additional Westfield London shopping malls. **An increase in supply of retailers**, with no increase in demand, has left the industry massively oversupplied.”

原文翻译：

近几个月来，油价的暴跌已将英国通胀率拉低至零。但分析人士表示，零售价格的下跌不能完全归咎于石油。

折扣零售商不断从老牌行业巨头那里抢夺市场份额，在食品和非食品市场中占据越来越大的份额。正如零售分析师尼克·布布指出的那样，“大型超市不得不通过降低自己的‘敲竹杠’价格来应对这一局面。”其结果是整个行业的货品价格下跌。

在线零售商的增长也压低了价格，部分原因在于，如果顾客在竞争对手的网站上发现了更便宜的商品，他们可以很容易地比较价格，然后在其他地方购买。零售分析师理查德·海曼(Richard Hyman)表示，零售商也不愿在实体店和网上商店提供不同的价格，这意味着商家不得不在商业街的实体店里降价。

海曼说，商店种类的不断扩大也是原因之一。他表示：“产能过剩是影响价格的最大问题。”在过去10年里，仅在线交易就增加了相当于1.1万平方英尺的交易空间——这大致相当于伦敦西区增加了65家购物中心。零售商的供应增加，而需求却没有增加，导致整个行业严重供过于求。”

参考答案：

While analysts say the fall in retail prices cannot just be attributed to the plunging oil price, discount retailers continue to steal market share from established industry giants, and the growth of online retailers has also brought prices down due to the ease with which customers can compare prices and purchase goods elsewhere, whereas the increase in supply of retailers is also to blame.

19. Vividness of TV and Newspaper 电视和报纸的区别 #091019

To understand the final reason why the news marketplace of ideas dominated by television is so different from the one that emerged in the world dominated by the printing press, it is important to distinguish the quality of vividness experienced by television viewers from the “vividness” experienced by readers. I believe that the vividness experienced in the reading of words is automatically modulated by the constant activation of the reasoning centers of the brain that are used in the process of concreating the representation of reality the author has intended. By contrast, the visceral vividness portrayed on television has the capacity to trigger instinctual responses similar to those triggered by reality itself—and without being modulated by logic, reason, and reflective thought.

The simulation of reality accomplished in the television medium is so astonishingly vivid and compelling compared with the representations of reality conveyed by printed words that it signifies much more than an incremental change in the way people consume information. Books also convey compelling and vivid representations of reality, of course. But the reader actively participates in the conjuring of the reality the book’s author is attempting to depict. Moreover, the parts of the human brain that are central to the reasoning process are continually activated by the very act of reading printed words: Words are composed of abstract symbols—letters—that have no intrinsic meaning themselves until they are strung together into recognizable sequences.

Television, by contrast, presents to its viewers a much more fully formed representation of reality—without requiring the creative collaboration that words have always demanded.

原文翻译：

为了理解电视为主导的新闻思想市场与以印刷机为主导的新闻思想市场如此不同的最终原因，就必须区分电视观众体验到的生动性与读者体验到的“生动性”的质量。我相信，阅读文字时所经历的生动感是通过大脑推理中心的持续激活自动调节的，而大脑推理中心在构建作者意图的现实再现的过程中发挥作用。相比之下，电视上描绘的生

动形象能引发本能反应，类似于那些由现实本身引发的反应，并不受逻辑、理性和反思思维的调节。

与印刷文字所表达的现实表现相比，电视媒体所完成的现实模拟是如此的生动和引人注目，这意味着人们消费信息方式的增量变化。当然，书籍也传达了令人信服和生动的现实表现。但是，读者却积极参与了本书作者试图描绘的现实中。此外，人类大脑中对推理过程至关重要的部分，在阅读印刷文字的过程中不断被激活：文字是由抽象符号(字母)组成的，它们本身没有内在意义，除非它们被串在一起形成可识别的序列。

相比之下，电视呈现给观众的是一种更加完整的现实表现形式，而不需要与文字所要求的创造性的合作。

参考答案：

The news marketplace of ideas dominated by television is so different from the one that emerged in the world dominated by the printing press, because the quality of vividness experienced by television viewers is different from that by readers, and the simulation of reality accomplished in the television medium is much more compelling and vivid compared with the representation of reality conveyed by printed words.

20. 3D printing 3D 打印 #091020

Madeline Gannon is a researcher, teacher at the Carnegie Mellon University School of Architecture and Ph.D. candidate in Computational Design — but that’s not all. She is on a mission to open up the infinite design possibilities of 3D printing to the world.

“Currently you have to have a lot of technical background in order to participate in creating things for 3D printers,” Gannon says. “There is still a huge knowledge barrier for how we create digital models.”

As the technology has advanced, prices have plummeted, and now anyone can buy a 3D printer for a few hundred dollars, Gannon notes. However, not just anyone can create original designs for 3D-printed artifacts.

英澳新三国（同一国家任意三所院校）

595

To put true creative power into the hands of any ordinary 3D printer owner, Gannon has developed an innovative new system called “Tactum.”

Tactum is a new type of software that lets users create their own unique designs for 3D printers by simply touching a projected image. Using their innate hand gestures, someone using Tactum can poke, rub and otherwise manipulate the projected image that will become their 3D printed object, and see it instantly change shape in response. In keeping with the goal of democratizing the process, Gannon designed her first series of Tactum artifacts on a surface that everyone can access freely and manipulate instinctively, that being the human body.

“My goal was to bring the digital out to the physical world and out onto your body,” says Gannon.

Along with a companion project called Reverb — which translates these user-created designs into printable meshes — that impulse has resulted in a spectacular diversity of bracelet and necklace designs, ranging from smooth landscapes, intricate textures and chaotic free forms to delicate geometries derived from the 19th century art of chronograph.

原文翻译：

Madeline Gannon 是一名研究人员，也是卡内基梅隆大学建筑学院的教师，也是计算机设计博士候选人——但这还不是全部。她的使命是向世界展示 3D 打印设计的无限可能性。

甘农说：“目前，你必须有很多技术背景，才能参与为 3D 打印机创造东西。”“在如何创建数字模型方面，我们仍然存在巨大的知识障碍。”

随着技术的进步，3D 打印机的价格直线下降，现在任何人都可以花几百美元买一台 3D 打印机，甘农指出。然而，并不是每个人都可以为 3d 打印制品创建原创设计。

为了让普通的 3D 打印机拥有者拥有真正的创造力，甘农开发了一种名为“Tactum”的创新系统。

Tactum 是一种新型的软件，它可以让用户通过触摸投影图像来创建自己独特的 3D 打

596

印机设计。使用他们天生的手势，使用 Tactum 的人可以通过点击，摩擦和其他方法操作投影图像，完成他们的 3D 打印设计，并看到作品立即改变形状的反应。为了实现民主化的目标，甘农设计了她的第一批 Tactum 手工艺品，它的表面是每个人都可以自由访问和本能地操纵的，那就是人体。

甘农说：“我的目标是把数码产品带到现实世界，带到你的身体上。”

伴随着一个名为 Reverb 的附属项目-将这些用户创建的设计转换为可打印的网格-这种推动力导致了手镯和项链设计的惊人多样性，从光滑的风景，复杂的纹理和无序的形式到从几何形状衍生而来的精致几何形状十九世纪计时码表艺术。

参考答案：

Although anyone can buy a 3D printer to participate in creating things, not just anyone can create original designs for 3D-printed artifacts, so Madeline Gannon has developed an innovative new system called Tactum, which lets users create their own unique designs for 3D printers by simply touching a projected image, and that impulse has resulted in a spectacular diversity of bracelet and necklace designs with a companion projected called Reverb.

21. Frog amber 青蛙琥珀 #091021

A miner in the state of Chiapas found a tiny tree frog that has been preserved in amber for 25 million years, a researcher said. If authenticated, the preserved frog would be the first of its kind found in Mexico, according to David Grimaldi, a biologist and curator at the American Museum of Natural History, who was not involved in the find.

The chunk of amber containing the frog, less than half an inch long, was uncovered by a miner in Mexico's southern Chiapas state in 2005 and was bought by a private collector, who loaned it to scientists for study. A few other preserved frogs have been found in chunks of amber — a stone formed by ancient tree sap — mostly in the Dominican Republic. Like those, the frog found in Chiapas appears to be of the genus Craugastor, whose descendants still inhabit the region, said biologist Gerardo Carbot of the Chiapas Natural History and Ecology Institute. Carbot announced the discovery this week.

While a miner in Mexico found a tiny tree frog preserved in amber for 25 million years, the preserved frog would be the first of its kind found in Mexico, and a few other preserved frogs have been found in chunks of amber, so Carbot would like to extract a sample from the frog's remains to find DNA that could identify the particular species but doubts the owner would let him drill into the stone.

22. Children Allowance 给孩子零花钱 #091022

Many people who have written on the subject of allowances say it is not a good idea to pay your child for work around the home. These jobs are a normal part of family life. Paying children to do extra work around the house, however, can be useful. It can even provide an understanding of how a business works. Allowances give children a chance to experience the things they can do with money. They can share it in the form of gifts or giving to a good cause. They can spend it by buying things they want. Or they can save and maybe even invest it. Saving helps children understand that costly goals require sacrifice: you have to cut costs and plan for the future. Requiring children to save part of their allowance can also open the door to future saving and investing. Many banks offer services to help children and teenagers learn about personal finance. A savings account is an excellent way to learn about the power of compound interest. Compounding works by paying interest on interest. So, for example, one dollar invested at two percent interest for two years will earn two cents in the first year. The second year, the money will earn two percent of one dollar and two cents, and so on. That may not seem like a lot. But over time it adds up.

原文翻译：

许多写了主题文章分析零用钱的人表示，因为孩子做家务而给他们零用钱不是一个好主意。这些家务是家庭生活的正常组成部分。然而，付钱给孩子让他们在家里做额外的工作是有用的。它甚至可以让孩子了解企业是如何运作的。零用钱给孩子们一个机会去体验用钱可以做的事情。他们可以用零用钱来买礼物或捐赠，从而学会分享。他们可以用它来买他们想要的东西。或者他们可以储蓄甚至投资。储蓄帮助孩子们理解昂贵的目标需要牺牲：你必须削减开支，为未来做打算。要求孩子们把零用钱存起来也可以为将来的储蓄和投资打开大门。许多银行提供帮助儿童和青少年学习个人理财的服务。储蓄存款帐户是了解复利威力的极好方法。复利是通过在利息上支付利息来实现的。例如，一美元以2%的利率投资两年，第一年将得到2美分。第二年，这笔钱将获得1美元2美分的2%，以此类推。这可能看起来并不多，但随着时间的推移，它会积少成多。

参考答案：

Although many people say it is not a good idea to pay your child for work around home, paying children to do extra work around the house can be useful because it can provide an understanding of how a business works, and saving helps children understand that costly goals require sacrifice with compound interest.

23. Cataract Surgery 白内障手术 #091023

Scientists believe they may have found a way to prevent complications that can arise following cataract surgery, the world's leading cause of blindness.

Detailing why complications can occur after surgery, researchers from the University of East Anglia (UEA) explained that while cataract surgery works well to restore vision, a few natural lens cells always remain after the procedure. Over time, the eye's wound-healing response leads these cells to spread across the underside of the artificial lens, which interferes with vision, causing what's known as 'posterior capsule opacification' or secondary cataract.

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

600

UEA's School of Biological Sciences academic, Dr. Michael Wormstone, who led the study, said: "Secondary visual loss responds well to treatment with laser surgery. But as life expectancy increases, the problems of cataract and posterior capsule opacification will become even greater in terms of both patient well being and economic burden. It's essential that we find better ways to manage the condition in future."

As a result, researchers are designing new artificial lenses that can be placed into a capsular bag that stays open, instead of shrink-wrapping closed, which currently occurs. It is believed that, through the new approach, fluid in the eye can flow around the artificial lens, therefore diluting and washing away the cell-signaling molecules that encourage cell re-growth.

原文翻译：

科学家们相信，他们可能已经找到了一种方法来预防白内障手术后可能出现的并发症，白内障手术是世界上导致失明的主要原因。

东安格利亚大学(UEA)的研究人员详细说明了为什么手术后会出现并发症，他们解释说，虽然白内障手术可以很好地恢复视力，但手术后仍会保留一些自然晶状体细胞。随着时间的推移，眼睛的伤口愈合反应导致这些细胞扩散到人工晶状体的底部，干扰视力，导致所谓的“后囊膜混浊”或继发性白内障。

领导这项研究的东英尼亚大学生物科学学院的迈克尔·沃姆斯通博士说：“激光手术治疗对继发性视力丧失反应良好。但随着预期寿命的增加，白内障和后囊膜混浊的问题在患者福祉和经济负担方面将变得更加严重。我们必须找到更好的方法来管理未来的情况。”

因此，研究人员正在设计一种新的人工晶体，它可以被放置在一个胶囊袋中，保持开放，而不是像目前的收缩包装闭合的方式。人们相信，通过这种新方法，眼睛内的液体可以在人工晶状体周围流动，从而稀释和洗去促进细胞再生的细胞信号分子。

参考答案：

As complications following cataract surgery are the world's leading cause of blindness, it will

601

cause secondary cataract which will become even greater in terms of patients' wellbeing and economic burden as life expectancy increases, but researchers are designing new artificial lenses that are proved to be able to prevent complications following cataract surgery.

24. Take-all Disease 全蚀病 #091024

The soil dwelling fungus 'take-all' inflicts devastating stress to the roots of cereals crops worldwide and is a major disease problem in UK wheat crops.

However, recent field trial data from Rothamsted Research, an institute of the BBSRC, has demonstrated that farmers could control this devastating disease by selecting wheat cultivars that reduce take-all build up in the soil when grown as a first wheat.

Wheat is an important staple crop worth 1.6 Billion a year to the UK economy alone. This work funded by the Biotechnology and Biological Sciences Research Council (BBSRC), the Department for the Environment, Food and Rural Affairs (Defra) and the HGCA will help farmers to increase yields, combating global food security and contributing to UK economic growth.

Take-all disease, caused by the fungus, *Gaeumannomyces graminis* var. *tritici*, reduces grain yield and quality and results in an increased amount of residual applied nitrogen fertilizer left in the soil post-harvest. Despite the use of chemical, biological and cultural control methods the take-all fungus is still one of the most difficult pathogens of wheat to control. The risk of take-all infection in second and third wheat crops is directly linked to the amount of fungus remaining in the soil after the first wheat is harvested.

The Rothamsted Research study, published in Plant Pathology, has demonstrated that wheat cultivars differ in their ability to build-up the take-all fungus.

Growing a low building cultivar, such as Cadenza, as a first wheat crop can be used to manipulate take-all inoculum levels in the soil resulting in better yields from the second and

third wheat crops. Yield increases of up to 2 tons per hectare in 2nd wheats have been observed.

原文翻译：

这种寄生在土壤上的真菌“全蚀”对全世界谷类作物的根系造成了毁灭性的打击，是英国小麦作物的主要病害。

然而，英国林业科学研究委员会(BBSRC)下属的洛桑研究所(Rothamsted Research)最近的田间试验数据表明，农民可以通过选择减少首次种植小麦时土壤中全蚀病积累的小麦品种来控制这种毁灭性的疾病。

小麦是一种重要的经济作物，仅在英国每年产生的经济价值就有 16 亿英镑。这项工作由生物技术和生物科学研究委员会(BBSRC)、环境、食品和农村事务部(Defra)和 HGCA 资助，将帮助农民提高产量，解决全球粮食安全问题，并为英国经济增长做出贡献。

全蚀病是由小麦锈菌 *Gaeumannomyces graminis* var. *tritici* 引起的，它降低了粮食产量和品质，导致收割后土壤中残留的氮肥数量增加。尽管采用了化学、生物和培养防治方法，全蚀病菌仍然是小麦最难以控制的病原菌之一。第二和第三种小麦作物发生全蚀病的风险与第一种小麦收获后土壤中残留的真菌数量直接相关。

发表在《植物病理学》(Plant Pathology)上的洛桑研究所(Rothamsted)研究表明，小麦品种在构建全蚀病真菌的能力上存在差异。

种植低矮的栽培品种，例如彩恩扎，作为第一种小麦作物，可以用来控制土壤中的全蚀病携带量，从而提高第二和第三种小麦作物的产量。已观察到第二季小麦每公顷增产达 2 吨。

参考答案：

While 'take-all' inflicts devastating stress to the roots of cereals crops and is a major disease problem in UK wheat crops which are important staple crops, it reduces grain yield and quality, and results in an increased amount of residual applied nitrogen fertilizer left in the soil post-harvest, but it can be controlled because growing a low building cultivar because a first

wheat crop can be used to manipulate take-all inoculum levels in the soil.

25. Autism 自闭症 #091025

Autism is a disorder characterized by impairments in communication, social interaction, and repetitive behaviors. Over the past 40 years, the measured prevalence of autism has multiplied roughly 10-fold. While progress has been made in understanding some of the factors associated with increased risk and rising prevalence, no one knows with certainty what causes autism or what caused autism prevalence to rise so precipitously. There is, however, a growing awareness among scholars that focusing solely on individual risk factors such as exposure toxicants, prenatal complications, or parental education is insufficient to explain why autism prevalence rates have increased so stunningly. Social and institutional processes likely play an important role. For example, changes in diagnostic criteria and an influx of resources dedicated to autism diagnosis may be critical to understanding why prevalence rates have risen. Increased awareness and social influence have been implicated in the rise of autism and a variety of comparable disorders, where social processes mimic the effects of contagion. Studies have examined the contribution of changes in diagnostic criteria and diagnostic substitution to rising autism prevalence rates, but the importance of institutional factors, resources for diagnosis, and greater awareness have not been systematically assessed. The sociological literature on health and inequality, however, provides substantial motivation for exploring how individual- and community-level effects operate to shape the likelihood of an autism diagnosis.

原文翻译：

自闭症是一种以沟通障碍，社交障碍和重复行为为特征的疾病。在过去的 40 年里，自闭症的患病率增加了大约 10 倍。虽然在了解与风险增加和患病率上升有关的一些因素方面取得了进展，但没有人确切地知道是什么原因导致了自闭症，或者是什么导致了自闭症患病率的急剧上升。然而，越来越多的学者开始意识到，仅仅关注个体风险因素，如接触毒物、产前并发症或父母教育，不足以解释自闭症患病率如此惊人地增长

英澳新三国（同一国家任意三所院校）

604

的原因。社会和制度进程可能发挥了重要作用。例如，诊断标准的改变和专门用于自闭症诊断的资源流入可能对理解患病率上升的原因可能是至关重要的。提高意识和社会影响被认为是自闭症和各种类似疾病的增加的原因，在这些疾病中，社会过程模仿了传染病的影响。已有研究调查了诊断标准和诊断替代的变化对自闭症患病率上升的贡献，但机构因素、诊断资源和提高认识的重要性尚未得到系统评估。然而，关于健康和不平等的社会学文献为探索个人和社区层面的影响如何影响自闭症诊断的可能性提供了实质性的动力。

参考答案

While the prevalence of autism has multiplied 10-fold over the past 40 years, there is a growing awareness that focusing on individual risk factors, and social and institutional processes play an important role because studies have examined the contribution of changes in diagnostic criteria and diagnostic substitution to rising autism prevalence rates, but the importance of institutional factors have not been systematically assessed, which means the sociological literature on health and inequality provides substantial motivation.

26. The Great Sphinx 狮身人面像 #091026

The face, though better preserved than most of the statue, has been battered by centuries of weathering and vandalism. In 1402, an Arab historian reported that a Sufi zealot had disfigured it “to remedy some religious errors.” Yet there are clues to what the surface looked like in its prime. Archaeological excavations in the early 19th century found pieces of its carved stone beard and a royal cobra emblem from its headdress. Residues of red pigment are still visible on the face, leading researchers to conclude that at some point, the Sphinx’s entire visage was painted red. Traces of blue and yellow paint elsewhere suggest to Lehner that the Sphinx was once decked out in gaudy comic book colors.

For thousands of years, sand buried the colossus up to its shoulders, creating a vast disembodied head atop the eastern edge of the Sahara. Then, in 1817, a Genoese adventurer, Capt. Giovanni Battista Caviglia, led 160 men in the first modern attempt to dig out the

Sphinx. They could not hold back the sand, which poured into their excavation pits nearly as fast as they could dig it out. The Egyptian archaeologist Selim Hassan finally freed the statue from the sand in the late 1930s. “The Sphinx has thus emerged into the landscape out of shadows of what seemed to be an impenetrable oblivion,” the New York Times declared.

原文翻译：

这张脸虽然比大多数雕像保存得更好，但已被几个世纪的风化和破坏所损坏了。1402年，一位阿拉伯历史学家报告说，一名苏菲狂热分子“为了纠正一些宗教错误”，损毁了雕像的外形。然而，对于溯源雕像在鼎盛时期的样子，还是有一些线索的。19世纪早期的考古发掘发现，它的头饰上刻着石雕胡须和皇家眼镜蛇徽章。在狮身人面像的脸上仍然可以看到残留的红色颜料，这使得研究人员得出结论，在某一时刻，狮身人面像的整个面部都被涂成了红色。雷纳在其他地方发现的蓝色和黄色颜料暗示狮身人面像曾被装饰成漫画书中艳丽的颜色。

几千年来，沙子淹没了这个庞然大物的肩膀，在撒哈拉沙漠的东部边缘形成了一个巨大的、没有实体的头。然后在1817年，热那亚探险家乔瓦尼·巴蒂斯塔·卡维利亚上尉带领160人进行了第一次挖掘狮身人面像的现代尝试。他们挡不住沙子，沙子以几乎和挖出来一样快的速度涌进了他们的挖掘坑。20世纪30年代末，埃及考古学家塞利姆·哈桑(Selim Hassan)终于将雕像从沙子中解救了出来。《纽约时报》宣称：“狮身人面像已经从似乎无法穿透的遗忘阴影中浮现出来。”

参考答案：

While the face has been battered by centuries of weathering and vandalism, there are clues to what the surface looked like in its prime because sand buried the colossus up to its shoulders, and Genoese adventurer led 160 men in the first modern attempt to dig out the Sphinx, but they could not hold back the sand from pouring into his excavation pits, which means the Egyptian archaeologist finally freed the statue from the sand.

27. Benefits of physical activities 锻炼身体的好处 #091027

Promoting active lifestyles can help us address some of the important challenges facing the UK today. Increasing physical activity has the potential to improve the physical and mental health of the nation, reduce all-cause mortality and improve life expectancy. It can also save money by significantly easing the burden of chronic disease on the health and social care services. Increasing cycling and walking will reduce transport costs, save money and help the environment. Fewer car journeys can reduce traffic, congestion and pollution, improving the health of communities.

Other potential benefits linked to physical activity in children and young people include the acquisition of social skills through active play (leadership, teamwork and co-operation), better concentration in school and displacement of anti-social and criminal behavior. The importance of physical activity for health was identified over 50 years ago. During the 1950s, comparisons of bus drivers with more physically active bus conductors and office-based telephonists with more physically active postmen demonstrated lower rates of coronary heart disease and smaller uniform sizes in the more physically active occupations.

This research led the way for further investigation, and evidence now clearly shows the importance of physical activity in preventing ill health. It is important for us to be active throughout our lives. Physical activity is central to a baby's normal growth and development. This continues through school, and into adulthood and older years. Being physically active can bring substantial benefits and there is consistent evidence of a dose-response relationship, i.e. the greater the volume of physical activity undertaken, the greater the health benefits that are obtained.

降低交通成本、省钱并有助于环境保护。减少汽车出行可以减少交通，拥堵和污染，改善社区的健康状况。

与儿童和青年人的体育活动相关的其他潜在好处包括通过积极游戏(领导能力、团队合作和合作)获得社交技能，在学校更好地集中注意力，以及消除反社会和犯罪行为。50多年前，人们就认识到了体育活动对健康的重要性。在20世纪50年代，拿公共汽车司机与体力活动较多的公交车售票员比较，和拿办公室电话接线员与体力活动较多的邮递员比较发现，在更积极运动的职业中，冠心病发病率更低，他们的身材也更健美。

这项研究为进一步的调查开辟了道路，现在有证据清楚地表明，体育活动在预防疾病方面的重要性。对我们来说，在我们的一生中保持活跃是很重要的。身体活动对婴儿的正常生长发育至关重要。这种情况会一直持续到上学，成年和老年。参加体育运动可以带来巨大好处，而且有一致的证据表明剂量-反应关系，即体力活动的量越大，获得的健康益处就越大。

参考答案：

While increasing physical activity has the potential to improve the physical and mental health of the nation and to save money, other potential benefits linked to physical activity in children and young people include the acquisition of social skills, better concentration in school and displacement of anti-social and criminal behavior, which suggests that promoting active lifestyles can help us address some of the important challenges facing the UK today.

28. Is Language Decaying or not 英语在退化吗？ #091028

Let us begin by asking why the conviction that our language is decaying is so much more widespread than the belief that it is progressing, in an intellectual climate where the notion of the survival of the fittest is at least as strong as the belief in inevitable decay, it is strange that so many people are convinced of the decline in the quality of English, a language which is now spoken by an estimated half billion people – a possible hundredfold increase in the number of speakers during the past millennium.

608

One's first reaction is to wonder whether the members of the anti-slovenliness brigade, as we may call them, are subconsciously reacting to the fast-moving world we live in, and consequently resenting change in any area of life. To some extent this is likely to be true. A feeling that 'fings ain't wot they used to be' and an attempt to preserve life unchanged seem to be natural reactions to insecurity, symptoms of growing old. Every generation inevitably believes that the clothes, manners and speech of the following one have deteriorated. We would therefore expect to find a respect for conservative language in every century and every culture and, in literate societies, a reverence for the language of the 'best authors' of the past.

原文翻译：

让我们首先问一问，为什么认为我们的语言正在衰落的信念比认为它正在进步的信念更为普遍，在一个适者生存的观念至少与相信不可避免的衰落一样强烈的知识气氛中，这么多人相信英语的质量在下降，这是奇怪的，因为这种语言现在估计有 5 亿人在使用——在过去的千年中，使用英语的人数可能增加了百倍。

人们的第一反应是想知道，我们可以称之为反斯洛文尼亚旅的成员是否下意识地对我们生活的快节奏的世界做出反应，从而对生活中任何领域的变化感到厌恶。在某种程度上，这可能是真的。一种“事情不在是以前的样子了”的感觉，以及试图保持生活不变的尝试，似乎是对不安全感的自然反应，这是变老的征兆。每一代人都不可避免地认为下一代人的衣着、举止和言谈都已经恶化。因此，我们期望在每一个世纪、每一种文化中，都能找到对保守语言的尊重，在有文化的社会中，也会找到对过去“最优秀作家”语言的尊重。

参考答案：

While English is widely spoken in the world, it is strange that so many people are convinced of the decline in the quality of English, and the reason may be that the members of the anti-slovenliness brigade are subconsciously reacting to the fast-moving world and consequently resenting change in any area of life because every generation inevitably believes that things in the following generation have deteriorated.

29. Twins 双胞胎 #091029

UCLA neurology professor Paul Thompson and his colleagues scanned the brains of 23 sets of identical twins and 23 sets of fraternal twins. Since identical twins share the same genes while fraternal twins share about half their genes, the researchers were able to compare each group to show that myelin integrity was determined genetically in many parts of the brain that are key for intelligence. These include the parietal lobes, which are responsible for spatial reasoning, visual processing and logic, and the corpus callosum, which pulls together information from both sides of the body.

The researchers used a faster version of a type of scanner called a HARDI (high-angular resolution diffusion imaging) — think of an MRI machine on steroids — that takes scans of the brain at a much higher resolution than a standard MRI. While an MRI scan shows the volume of different tissues in the brain by measuring the amount of water present, HARDI tracks how water diffuses through the brain's white matter — a way to measure the quality of its myelin.

"HARDI measures water diffusion," said Thompson, who is also a member of the UCLA Laboratory of Neuro-Imaging. "If the water diffuses rapidly in a specific direction, it tells us that the brain has very fast connections. If it diffuses more broadly, that's an indication of slower signaling, and lower intelligence."

原文翻译：

加州大学洛杉矶分校神经学教授保罗·汤普森和他的同事们扫描了 23 对同卵双胞胎和 23 对异卵双胞胎的大脑。由于同卵双胞胎拥有相同的基因，而异卵双胞胎共享大约一半的基因，因此研究人员能够对两组双胞胎进行比较，从而表明髓磷脂完整性是由大脑中许多对智力至关重要的部位的基因决定的。其中包括负责空间推理、视觉处理和逻辑的顶叶，以及从身体两侧收集信息的胼胝体。

研究人员使用了一种名为 HARDI(高角度分辨率扩散成像)的更快版本的扫描仪——比如类固醇的核磁共振成像仪——它对大脑进行扫描的分辨率比标准的磁共振成像仪高

得多。核磁共振扫描通过测量含水量来显示大脑中不同组织的体积， HARDI 则追踪水在大脑白质中的扩散情况——这是一种测量髓磷脂质量的方法。

“HARDI 测量水的扩散，”汤普森说，他也是加州大学洛杉矶分校神经成像实验室的成员。“如果水在特定方向迅速扩散，这就告诉我们大脑有非常快速的连接。如果它扩散得更广，那就表明信号传递得更慢，智力也更低。”

参考答案：

While researchers scanned the brains of identical twins and fraternal twins by using a type of scanner called a HARDI, the comparison result showed that myelin integrity was determined genetically in many parts of the brain that are key for intelligence, and HARDI tracks how water diffuses to measure the quality of its myelin by indicating fast connections of the brain with the fast water diffusion and lower intelligence with broad water diffusion.

30. Australia-US Alliance 澳美联盟 #091030

Some "moments" seem more important in hindsight than they were at the time. David Day, for example, looks at John Curtin's famous "Australia looks to America" statement of December 1941, a moment remembered as embodying a fundamental shift in Australia's strategic alliance away from Britain towards the US. As Day points out, the shift to the US as our primary ally was a long, drawn-out process which occurred over half a century. Curtin's statement is iconic - it represents and symbolizes the shift - but in and of itself it made almost no difference. Russell McGregor makes similar arguments with regard to the 1967 referendum, falsely hailed in our memories as a huge advance in Aboriginal rights.

There are many other important events which our contributors examine - the campaign to save the Franklin River; the landings at Gallipoli, the discovery of gold in 1851, the disastrous Premiers' Plan designed to cope with the Great Depression, to name just a few.

Taken together, our contributors show that narrative approaches to Australian history are not as simple as might be imagined. There is of course the issue of what should be included and

611

what should not be - what, after all, makes a moment or an event sufficiently important to be included in an official narrative? Just as importantly, the moments and events that are included in narrative histories are open to multiple interpretations.

We hope this collection will provide an important reminder to those wanting to impose a universal history curriculum for our schoolchildren, and indeed a lesson to all Australians wishing to understand their nation's past; History is never simple or straightforward, and it always resists attempts to make it so.

原文翻译：

事后看来，有些“时刻”似乎比当时更重要。例如，戴维·戴研究了约翰·科廷 1941 年 12 月发表的著名的“澳大利亚关注美国”声明。人们记忆中，这一时刻体现了澳大利亚的战略联盟从英国转向美国的根本性转变。正如戴所指出的，美国成为我们主要盟友的转变是一个漫长的过程，这一过程发生在半个多世纪之前。科廷的声明是标志性的——它代表并象征了这种转变——但就其本身而言，几乎没有什么不同。拉塞尔·麦格雷戈对 1967 年的公投也提出了类似的观点，在我们的记忆中，那次公投错误地被奉为土著权利的巨大进步。

我们的撰稿人还研究了许多其他重要事件——拯救富兰克林河的运动；加里波利登陆，1851 年发现黄金，首相为应对大萧条而制定的灾难性计划，等等。

综上所述，我们的撰稿人表明，澳大利亚历史的叙事方法并不像想象的那么简单。当然，有一个问题是什么应该包括，什么不应该包括——究竟是什么使一个时刻或事件变得如此重要，足以列入官方的叙述中？同样重要的是，叙事历史中包含的时刻和事件可以有多种解释。

我们希望，这本集锦能给那些想要为我们的在学儿童设置通用历史课程的人提供一个重要的提醒，并向所有希望了解自己国家历史的澳大利亚人提供一个教训；历史从来都不是简单或直截了当的，它总是抵制使它如此简单或直截了当的企图。

参考答案：

While a moment remembered as embodying a fundamental shift in Australia's strategic alliance away from Britain towards the US, there many other important events which our contributors examine, which suggests that narrative approaches to Australian history are not as simple as might be imagined, and the moments and events that are included in narrative histories are open to multiple interpretations.

31. Fertile farmland 非洲土壤转化 #091031

A farming technique practiced for centuries by villagers in West Africa, which converts nutrient-poor rainforest soil into fertile farmland, could be the answer to mitigating climate change and revolutionizing farming across Africa.

A global study by researchers has for the first-time identified and analyzed rich fertile soils found in Liberia and Ghana. They discovered that the ancient West African method of adding charcoal and kitchen waste to highly weathered, nutrient poor tropical soils can transform the land into enduringly fertile, carbon-rich black soils which the researchers dub 'African Dark Earths'.

Similar soils created by Amazonian people in pre-Columbian eras have recently been discovered in South America — but the techniques people used to create these soils are unknown. Moreover, the activities which led to the creation of these anthropogenic soils were largely disrupted after the European conquest.

Encouragingly researchers in the West Africa study were able to live within communities as they created their fertile soils. This enabled them to learn the techniques used by the women from the indigenous communities who disposed of ash, bones and other organic waste to create the African Dark Earths.

原文翻译：

几个世纪以来，西非的村民一直在使用一种耕作技术，将贫瘠的热带雨林土壤转化为肥沃的农田，这种耕作技术可能是缓解气候变化和使整个非洲农业发生革命性变化的答案。

研究人员进行的一项全球研究首次查明并分析了利比里亚和加纳发现的肥沃土壤。他们发现，在高度风化，营养不良的热带土壤中添加木炭和厨余的古老西非方法，可以将这块土地转化为持久肥沃，富含碳的黑土，研究人员称之为“非洲暗地球”。

类似的土壤由亚马逊人在前哥伦比亚时代创造，最近在南美洲被发现-但是人们用来创造这些土壤的技术是未知的。此外，导致这些人为土壤形成的活动在欧洲征服后基本上被破坏。

令人鼓舞的是，西非研究人员能够在社区内生活，因为他们创造了肥沃的土壤。这使他们能够学习土著社区妇女使用的技术，她们处理灰烬，骨骼和其他有机废物，以创造非洲的黑暗地球。

参考答案：

While a farming technique which converts nutrient-poor rainforest soil into fertile farmlands could be the answer to mitigating climate change and revolutionizing farming across Africa, ancient West African method of adding charcoal and kitchen waste can transform the land into enduringly fertile soils, and similar soils were created by Amazonian people in pre-Columbian eras although with techniques unknown, which enabled researchers to live within communities and learn the techniques used by the indigenous women.

32. Writing system 文字的历史 #091032

The origins of writing are largely unclear. Writing systems were created independently all over the world. The earliest we know of were developed in the Middle East around 5,000 years ago. But other scripts were invented in India, Egypt, China and Central America. It has been suggested that some of these systems may have influenced others, but this has not been proved.

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

614

These forms of writing look completely different, follow different rules and are often read in completely different ways. But they all perform the same basic function. They are all a visual means of recording language.

Knowledge of some early scripts invented in certain regions was picked up by peoples living in surrounding areas. They would then adopt and adapt them to their own needs and language. Chinese, for example, was adopted in Japan and Korea, though it had to be altered to apply to the languages spoken there.

Methods of recording information have varied over time and place. Not all sophisticated societies have developed writing systems and not all methods of recording information require writing.

The Inca empire of South America was at its height in the sixteenth century AD and held power over a huge area that stretched from modern Equador and Peru, to areas of Bolivia and Chile. It was a complex civilisation, but did not develop a writing system.

原文翻译：

写作的起源在很大程度上是不清楚的。书写系统是在世界各地独立创建的。据我们所知，最早是在 5000 年前的中东发展起来的。但是其他的剧本是在印度，埃及，中国和中美洲发明的。有人认为，其中一些制度可能影响了其他制度，但这一点尚未得到证实。

这些形式的写作看起来完全不同，遵循不同的规则，而且常常以完全不同的方式阅读。但它们都执行相同的基本功能。它们都是记录语言的视觉手段。

在某些地区发明的一些早期文字知识被居住在周围地区的人们所掌握。然后，他们将根据自己的需要和语言采用和调整这些标准。例如，汉语在日本和韩国被采用，但为了适用于那里所说的语言，它必须被修改。

记录信息的方法随时间和地点而变化。并不是所有的先进社会都发展了书写系统，也不是所有记录信息的方法都需要书写。

南美洲印加帝国在公元 16 世纪处于鼎盛时期，统治着从现代的厄瓜多尔和秘鲁到玻利维亚和智利的广大地区。这是一个复杂的文明，但没有发展出文字系统。

参考答案：

While writing systems were created independently all over the world, some of these systems may have influenced others and all perform the same basic function as a visual means of recording language, because knowledge of some early scripts invented was picked up by peoples living in surrounding areas, but methods of recording information have varied and not all sophisticated societies have developed writing systems, such as the Inca empire of South America.

33. Grass & Cow 牛和草 #091033

The co-evolutionary relationship between cows and grass is one of nature's underappreciated wonders; it also happens to be the key to understanding just about everything about modern meat. For the grasses, which have evolved to withstand the grazing of ruminants, the cow maintains and expands their habitat by preventing trees and shrubs from gaining a foothold and hogging the sunlight; the animal also spreads grass seed, plants it with his hooves, and then fertilizes it with his manure. In exchange for these services the grasses offer ruminants a plentiful and exclusive supply of lunch. For cows (like sheep, bison, and other ruminants) have evolved the special ability to convert grass – which single-stomached creatures like us can't digest – into high-quality protein. They can do this because they possess what is surely the most highly evolved digestive organ in nature: the rumen. About the size of a medicine ball, the organ is essentially a forty-five-gallon fermentation tank in which a resident population of bacteria dines on grass.

原文翻译：

牛与草的共同进化关系是自然界未被充分认识的奇迹之一；它也恰好是理解现代肉类的关键。对于已经进化成能够抵御反刍动物放牧的草，奶牛通过阻止树木和灌木站稳

脚跟和占据阳光来维持和扩大它们的栖息地；这种动物还播撒草籽，用蹄播种，然后用粪肥施肥。作为这些服务的交换条件，青草为反刍动物提供了丰富而独一无二的午餐。对于奶牛（如羊，野牛和其他反刍动物）来说，已经进化出了一种特殊的能力，可以将像我们这样的单胃动物无法消化的草转化为高质量的蛋白质。它们之所以能做到这一点，是因为它们拥有自然界中进化最快的消化器官：瘤胃。这个器官大约有药球那么大，基本上是一个45加仑的发酵罐，里面的细菌以草为食。

参考答案：

While the cow maintains and expands their habitat because the grasses have evolved to withstand the grazing of ruminants, grasses offer the ruminants a supply of lunch because cows possess the rumen to convert grass into protein, which means that the co-evolutionary relationship between cows and grass is one of the nature's underappreciated wonders.

34. Technology Prediction 预测科技发展 #091034

As far as prediction is concerned, remember that the chairman of IBM predicted in the fifties that the world would need a maximum of around half a dozen computers, that the British Department for Education seemed to think in the eighties that we would all need to be able to code in BASIC and that in the nineties Microsoft failed to foresee the rapid growth of the Internet. Who could have predicted that one major effect of the automobile would be to bankrupt small shops across the nation? Could the early developers of the telephone have foreseen its development as a medium for person to person communication, rather than as a form of broadcasting medium? We all, including the 'experts', seem to be peculiarly inept at predicting the likely development of our technologies, even as far as the next year. We can, of course, try to extrapolate from experience of previous technologies, as I do below by comparing the technology of the Internet with the development of other information and communication technologies and by examining the earlier development of radio and print. But how justified I might be in doing so remains an open question. You might conceivably find the history of the British and French videotext systems, Prestel and Minitel, instructive.

617

However, I am not entirely convinced that they are very **relevant**, nor do I know **where you can find information** about them online, so, rather than take up space here, I've briefly described them in a separate article.

原文翻译：

就预测而言，请记住，IBM 董事长在五十年代曾预测，全世界最多将需要大约六台计算机，英国教育部似乎在八十年代认为，我们都需要能够用 BASIC 语言编写代码，而在九十年代，微软未能预见到互联网的迅速发展。谁能预料到汽车的一个主要后果是使全国各地的小商店破产呢？电话的早期发展商可否预见到它会发展成为人与人之间的沟通媒介，而不是广播媒介的一种形式？我们所有人，包括“专家”，似乎特别不善于预测我们的技术的可能发展，甚至到明年也是如此。我们所有人，包括“专家”，似乎特别不善于预测我们的技术的可能发展，甚至到明年也是如此。不过，我这样做的理据何在，仍是一个悬而未决的问题。你可能会发现英国和法国的视频文字系统 Prestel 和 Minitel 的历史很有启发性。然而，我并不完全相信它们是非常相关的，我也不知道在哪里可以在线找到关于它们的信息，因此，与其占用这里的空间，我已经在 一篇单独的文章中简要描述了它们。

参考答案：

While we all, including the ‘experts’, seem to be peculiarly inept at predicting the likely development of our technologies even as far as the next year, we can try to extrapolate from experience of previous technologies, but how justified I might be in doing so remains an open question, so rather than take up space here, I’ve briefly described them in a separate article.

35. Songbird 鸣鸟 #091035

Males do the singing and females do the listening. This has been the established, even cherished view of courtship in birds, but **now some ornithologists are changing tune.**

Laszlo Garamszegi of the University of Antwerp, Belgium, and colleagues studied the literature on 233 European songbird species. Of the 109 for which information on females

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

618

was available, they found evidence for singing in 101 species. **In only eight species could the team conclude that females did not sing.**

Females that sing have been overlooked, the team say, because their songs are quiet, **they are mistaken for males from their similar plumage or they live in less well studied areas** such as the tropics. Garamszegi blames Charles Darwin for the oversight. “He emphasized the importance of male sexual display, and this is what everyone has been looking at.”

The findings go beyond modern species. After carefully tracing back an evolutionary family tree for their songbirds, Garamszegi’s team discovered that, in at least two bird families, **singing evolved in females first.** They suggest these ancient females may have been using their songs to deter other females from their territories, to coordinate breeding activities with males, or possibly to attract mates. “It leaves us with a perplexing question.”

原文翻译：

雄鸟唱歌，雌鸟听。这已经是鸟类求偶的既定观点，甚至是珍视的观点，但现在一些鸟类学家正在改变论调。

比利时安特卫普大学的 La'szlo'Garamszegi 和他的同事们研究了关于 233 种欧洲鸣禽的文献。在 109 个有关于雌性的资料的物种中，他们发现了 101 个物种有歌唱的证据。研究小组只能在八个物种中得出结论，雌性不唱歌。

研究小组说，唱歌的雌性被忽视了，因为它们的歌声很安静，因为它们的羽毛相似而被误认为雄性，或者它们生活在研究较少的地区，比如热带地区。Garamszegi 指责查尔斯达尔文的疏忽。“他强调了男性性展示的重要性，这也是每个人都在关注的。”

研究结果超越了现代物种。Garamszegi 的研究小组仔细追溯了鸣禽的进化谱系，发现在至少两个鸟类家族中，鸣声首先是在雌鸟身上进化而来的。他们认为这些远古的雌性可能一直在用它们的歌声来阻止其他雌性离开它们的领地，与雄性协调繁殖活动，或者可能是为了吸引配偶。“这给我们留下了一个令人困惑的问题。”

参考答案：

While males do the singing and females do the listening, some ornithologists are changing tune because in only eight species could a research team conclude that females did not sing, which means females that sing have been overlooked since they are mistaken for males from their similar plumage or they live in less well-studied areas, whereas singing actually evolved in females first.

36. Parent's Born Order Affects Their Parenting 出生顺序 #091036

Parents' own born order can become an issue when dynamics in the family they are raising replicate the family in which they were raised.

Agati notes common examples, such as a firstborn parent getting into "raging battles" with a firstborn child. "Both are used to getting the last word. Each has to be right. But the parent has to be the grown up and step out of that battle," he advises.

When youngest children become parents, Agati cautions that because they "may not have had high expectations placed on them, they in turn may not see their kids for their abilities." But he also notes that since youngest children tend to be more social, "youngest parents can be helpful to their firstborn, who may have a harder time with social situations. These parents can help their eldest kids loosen up and not be so hard on themselves.

Mom Susan Ritz says her own birth order didn't seem to affect her parenting until the youngest of her three children, Julie, was born. Julie was nine years younger than Ritz's oldest, Joshua, mirroring the age difference between Susan and her own older brother. "I would see Joshua do to Julie what my brother did to me," she says of the taunting and teasing by a much older sibling. "I had to try not to always take Julie's side."

Biases can surface no matter what your own birth position was, as Lori Silverstone points out.

"As a middle myself, I can be harder on my older daughter. I recall my older sister hitting me," she says of her reactions to her daughters' tussles.

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

620

"My husband is a firstborn. He's always sticking up for the oldest. He feels bad for her that the others came so fast. He helps me to see what that feels like, to have that attention and then lose it." Silverstone sees birth order triggers as "an opportunity to heal parts of ourselves." I've learned to teach my middle daughter to stand up for herself. My mother didn't teach me that. I'm conscious of giving my middle daughter tools, so she has a nice way to protect herself."

Whether or not you subscribe to theories that birth order can affect your child's personality, ultimately, "we all have free will," Agati notes. It's important for both parents and kids to realize that, despite the characteristics often associated with birth order, "you're not locked into any role."

本文有两版，以上是长版完整版，而短版则无最后两段。参考答案给出的是长版参考答案。如遇短版，请做相应删减。

原文翻译：

当父母养育的家庭中的动态复制他们所养育的家庭时，他们自己的出生顺序可能成为一个问题。

Agati 提到了一些常见的例子，比如长子的父母与长子发生了“激烈的争斗”。“两人都习惯于说最后一句话。每个人都必须是对的。但父母必须是成年人，走出这场战争，“他建议。

当最小的孩子成为父母时，Agati 提醒说，因为他们“可能没有对他们寄予很高的期望，所以他们也可能看不到自己的孩子有能力。”

但他也指出，由于最小的孩子往往更善于社交，“最小的父母可以帮助他们的第一个孩子，谁可能有一个更困难的时间与社会情况。这些父母可以帮助他们的大孩子放松，而不是对自己太苛刻。

母亲苏珊·里兹说，直到她三个孩子中最小的一个朱莉出生，她自己的出生顺序似乎并没有影响到她的养育方式。朱莉比丽兹最大的哥哥约书亚小九岁，这反映了苏珊和她哥哥的年龄差异。“我会看到约书亚对朱莉的所作所为，就像我哥哥对我的所作所为为—

样，”她在谈到一年长得多的兄弟姐妹的嘲弄和戏弄时说，“我不得不尽量不要总是站在朱莉一边。”

正如 Lori Silverstone 所指出的，不管你的出生位置是什么，偏见都会浮出水面。“作为一个中间人，我可以对我的大女儿更加严厉。”“我记得我姐姐打我，”她谈到她对女儿们打架的反应时说。

“我丈夫是长子。他总是支持年长的。别人来得这么快，他为她感到难过。他帮助我体会到那种感觉，获得关注，然后又失去关注。”Silverstone 把出生顺序的动机看作是“一个治愈我们部分的机会。”我学会了教我的二女儿捍卫自己。我妈妈没教过我。我很愿意给我的二女儿一些方法，这样她就有了一个很好的方式来保护自己。”

无论你是否认同出生顺序会影响孩子性格的理论，最终，“我们都有自由意志，”Agati 指出。对于父母和孩子来说，重要的是要意识到，尽管孩子的性格特征通常与出生顺序有关，但“你并不局限于任何角色”。

参考答案：

As parents' own born order can become an issue when dynamics in the family they are raising replicate the family in which they were raised, biases can surface no matter what your own birth position was, and birth order triggers as "an opportunity to heal parts of ourselves," but both parents and kids should realize that we all have free will and we are not locked into any role.

37. Tree Rings 年轮 #091037

Here's how tree ring dating, known to scientists as dendrochronology, works. If you cut a tree down today, it's straightforward to count the rings inwards, starting from the tree's outside. Hence the sequence of the rings in a tree cross-section is like a message in Morse code formerly used for sending telegraph messages; dot-dot-dash-dot-dash in the Morse code, wide-wide-narrow-wide-narrow in the tree ring sequence.

Tree ring specialists (known as dendrochronologists) proceed by noting the sequence of wider

and narrower rings in a tree cut down in a known recent year, and also noting the sequences in beams from trees cut down at various times in the past. In that way, dendrochronologists have constructed tree ring records extending back for thousands of years in some parts of the world. A bonus of dendrochronology is that the width and substructure of each ring reflect the amount of rain and the season at which the rain fell during that particular year. Thus, tree ring studies also allow one to reconstruct the past climate.

原文翻译：

以下是树木年轮测定法的原理，即科学家所称的树木年代学。如果你今天砍倒一棵树，从树的外部开始，向内数年轮是很简单的。因此，树横截面上年轮的顺序就像以前用来发送电报信息的莫尔斯电码；莫尔斯电码中的点-点-点-点-破折号，树轮序列中的宽-宽-窄-宽-窄。

年轮专家(被称为树木年代学家)通过记录一棵树在最近几年被砍的年轮的宽度和宽度的顺序，以及记录过去不同时期被砍的树木的横梁的顺序。通过这种方式，树木年代学家已经在世界的一些地方建立了可以追溯到数千年前的年轮记录。树木年代学的一个额外好处是，每个年轮的宽度和亚结构反映了降雨量和该特定年份降雨的季节。因此，树木年轮的研究也可以重建过去的气候。

参考答案：

While the sequence of the rings in a tree cross-section is like a message in Morse code, tree ring specialists proceed by noting the sequence of wider and narrower rings in a tree cut down in a known recent year, and dendrochronologists have constructed tree ring records extending back for thousands of years, which means tree ring studies also allow one to reconstruct the past climate.

38. Comparative advantage 相对优势 #091038

With an abundance of low priced labor relative to the United States, it is no surprise that China, India and other developing countries specialize in the production of labor intensive products. For similar reasons, the United States will specialize in the production of goods that are human and physical capital intensive because of the relative abundance of a highly educated labor force and technically sophisticated equipment in the United States.

This division of global production should yield higher global output of both types of goods than would be the case if each country attempted to produce both of these goods itself. For example, the United States would produce more expensive labor intensive goods because of its more expensive labor and the developing countries would produce more expensive human and physical capital intensive goods because of their relative scarcity of these inputs. This logic implies that the United States is unlikely to be a significant global competitor in the production green technologies that are not relatively intensive in human and physical capital.

Nevertheless, during the early stages of the development of a new technology, the United States has a comparative advantage in the production of the products enabled by this innovation. However, once these technologies become well understood and production processes are designed that can make use of less skilled labor; production will migrate to countries with less expensive labor.

原文翻译：

相对于美国，中国、印度和其他发展中国家拥有大量的廉价劳动力，所以他们专门生产劳动密集型产品也就不足为奇了。由于类似的原因，美国将专门从事人力和物质资本密集的产品生产，因为美国受过高等教育的劳动力和技术先进的设备相对充裕。

这种全球生产分工产生的两种产品的全球产量，应该高于每个国家试图自己生产两种产品的情况。例如，美国将生产更昂贵的劳动密集型产品，因为它的劳动力更昂贵，而发展中国家将生产更昂贵的人力和物质资本密集型产品，因为它们的投入相对稀缺。这一逻辑意味着，美国不太可能成为绿色生产技术的重要全球竞争对手，因为绿色生

产技术在人力和物质资本方面不是相对密集的。

然而，在一项新技术发展的早期阶段，美国在这种创新所带来的产品的生产方面具有比较优势。然而，一旦这些技术被充分理解，生产过程被设计成可以使用低技能的劳动力;生产将转移到劳动力成本较低的国家。

参考答案：

While developing countries specialize in the production of labor intensive products, the United States specialize in the production that is human and physical capital intensive with educated talents and advanced technology, so this division of global production should yield higher global output than the case if each country attempted to produce both goods itself, but production will migrate to developing countries once technologies and production processes developed in the USA become well understood.

39. School Liaison Police NSW 学校联络警察 #091039

Armed police have been brought into NSW schools to reduce crime rates and educate students. The 40 School Liaison Police (SLP) officers have been allocated to public and private high schools across the state.

Organizers say the officers, who began work last week, will build positive relationships between police and students. But parent groups warned of potential dangers of armed police working at schools in communities where police relations were already under strain.

Among their duties, the SLPs will conduct crime prevention workshops, talking to students about issues including shoplifting, offensive behavior, graffiti and drugs and alcohol. They can also advise school principals. One SLP, Constable Ben Purvis, began work in the inner Sydney region last week, including at Alexandria Park Community School's senior campus. Previously stationed as a crime prevention officer at The Rocks, he now has 27 schools under his jurisdiction in areas including The Rocks, Redfern and Kings Cross. Constable Purvis said the full time position would see him working on the broader issues of crime prevention. "I am

英澳新三国（同一国家任意三所院校）

625

not a security guard," he said. "I am not there to patrol the school.

We want to improve relationships between police and schoolchildren, to have positive interaction. We are coming to the school and giving them knowledge to improve their own safety."

Parents' groups responded to the program positively, but said it may spark a range of community reactions. "It is a good thing and an innovative idea and there could be some positive benefits," Council of Catholic School Parents executive officer.

原文翻译：

武装警察已被引入新南威尔士州的学校，以降低犯罪率和教育学生。40 名学校联络警察(SLP)已被分配到全州的公立和私立高中。

组织者说，上周开始工作的警察将在警察和学生之间建立积极的关系。但家长团体警告称，在警察关系本已紧张的社区学校工作的武装警察存在潜在危险。

在他们的职责中，SLPs 将举办预防犯罪研讨会，向学生谈论包括商店扒窃、攻击性行为、涂鸦、毒品和酒精等问题。他们也可以给学校校长提供建议。警察本·珀维斯警官上周开始在悉尼内城区工作，包括亚历山大公园社区学校的高年级校园。他以前是 Rocks 的一名预防犯罪官员，现在在他的管辖下有 27 所学校，包括 Rocks、Redfern 和 Kings Cross。珀维斯警官表示，全职工作可以让他从事更广泛的预防犯罪工作。“我不是保安，”他说。“我不是去学校巡逻的。

我们希望改善警察和学生之间的关系，进行积极的互动。我们来到学校，带给他们知识来改善他们自己的安全。”

家长团体对该项目反应积极，但表示它可能会引发一系列社区反应。“这是一件好事，也是一个创新的想法，可能会有一些积极的好处，”天主教学校家长理事会执行干事。

参考答案：

While armed police have been brought into NSW schools to reduce crime rates and educate students, parents warned of potential dangers of armed police working at schools in

communities where police relations were already under strain, but they responded to the program positively, because the SLPs conduct crime prevention workshops and advise school principals, which improved relationships between police and schoolchildren to have positive interactions and improved children's safety.

40. Computer Programming for America and India 美印 IT 对比#091040

Consider the current situation: like their counterparts in the United States, engineers and technicians in India have the capacity to provide both computer programming and innovative new technologies. Indian programmers and high-tech engineers earn one-quarter of what their counterparts earn in the United States; Consequently, India is able to do both jobs at a lower dollar cost than the United States: **India has absolute advantage in both.** In other words, **it can produce a unit of programming for fewer dollars than the United States, and it can also produce a unit of technology innovation for fewer dollars.** Does that mean that the United States will lose not only programming jobs but innovative technology job, too? Does that mean that our standard of living will fall if the United States and India engage in the international trade?

David Ricardo would have answered no to both questions - as we do today. While India may have an absolute advantage in both activities, that fact is irrelevant in determining what India or the United States will produce. India has a comparative advantage in doing programming in part because of such activity requires little physical capital. The flip side is that **the United States has a comparative advantage in technology innovation partly because it is relatively easy to obtain capital** in this country to undertake such long-run projects. The result is that **Indian programmers will do more and more of what U.S. programmers have been doing in the past.** In contrast, **American firms will shift to more and more innovation.**

原文翻译:

考虑一下目前的情况:与美国的同行一样, 印度的工程师和技术人员有能力提供计算机编程和创新的新技术。印度程序员和高科技工程师的收入只有美国同行的四分之一;因英澳新三国 (同一国家任意三所院校)

此，印度能够以比美国更低的美元成本完成这两项工作：印度在这两方面都有绝对优势。换句话说，它可以用比美国更少的资金创建一套程序，也可以用更少的资金构建一组技术创新。这是否意味着美国不仅会失去编程工作，还会失去创新技术方面的工作？这是否意味着如果美国和印度参与国际贸易，我们的生活水平就会下降？

大卫·里卡多对这两个问题的回答都是否定的——就像我们今天所做的一样。虽然印度可能在这两项活动中都有绝对优势，但这一事实与决定印度或美国将生产什么产品无关。印度在编程方面具有相对优势，部分原因是这类活动不需要什么物质资本。另一方面，美国在技术创新方面具有相对优势，部分原因是在这个国家从事此类长期项目相对容易获得资金。结果是，印度程序员将越来越多地做美国程序员过去一直在做的事情。相比之下，美国企业将转向越来越多的创新。

参考答案：

While India might have an absolute advantage in providing both computer programming and innovative new technologies because of the low cost, the United States has a comparative advantage in technology innovation because of easier capital obtaining, which suggests that Indian programmers will do more and more of what U.S. programmers have been doing in the past and American firms will shift to more and more innovation.

41. Australian Education 澳大利亚教育改革#091041

When Australians engage in debate about educational quality or equity, they often seem to accept that a country cannot achieve both at the same time.

Curriculum reforms intended to improve equity often fail to do so because they increase breadth or differentiation in offerings in a way that increases differences in quality. Further, these differences in quality often reflect differences in students' social backgrounds because the 'new' offerings are typically taken up by relatively disadvantaged students who are not served well them. Evidence from New South Wales will be used to illustrate this point.

The need to improve the quality of education is well accepted across OECD and other 英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

628

countries as they seek to strengthen their human capital to underpin their modern, knowledge economies. Improved equity is also important for this purpose, since the demand for high level skills is widespread and the opportunities for the low skilled are diminishing.

Improved equity in education is also important for social cohesion. There are countries in which the education system seems primarily to reproduce existing social arrangements, conferring privilege where it already exists and denying it where it does not. Even in countries where the diagnosis might be less extreme, the capacity of schooling to build social cohesion is often diminished by the way in which schools separate individuals and groups.

原文翻译：

当澳大利亚人在讨论教育质量或教育公平时，他们似乎常常认为一个国家不可能同时实现这两个目标。

旨在改善公平的课程改革往往无法实现这一点，因为它们增加了课程的广度或差异化，从而增加了质量上的差异。此外，这些质量上的差异往往反映了学生的社会背景的差异，因为“新”课程通常被相对弱势的学生所接受，而这些学生并没有得到很好的服务。新南威尔士州的证据将用来说明这一点。

在经合组织和其他国家普遍认为，提高教育质量是必要的，因为它们正在寻求加强人力资本，以支持其现代知识经济。改善公平对实现这一目标也很重要，因为对高级技能的需求普遍存在，而低技能的机会正在减少。

改善教育公平对社会凝聚力也很重要。有些国家的教育制度似乎主要是复制现有的社会安排，在已经存在的情况下给予特权，在没有存在的情况下予以否认。即使在诊断结果可能不那么极端的国家，学校将个人和群体分开的方式也常常削弱了学校建立社会凝聚力的能力。

参考答案：

While Australians often seem to accept that a country cannot achieve both educational quality and equity at the same time, curriculum reforms intended to improve equity often fail to do so, but the need to improve the quality of and equity education is well accepted to strengthen

human capital to underpin their modern, knowledge economies, and improved equity in education is also important for social cohesion.

42. Diasporas 散居的犹太人#091042

Diasporas – communities which live outside, but maintain links with, their homelands – **are getting larger**, thicker and stronger. They are the human face of globalization. **Diaspora consciousness is on the rise**: diasporas are becoming more interested in their origins, and organizing themselves more effectively; homelands are revising their opinions of their diasporas as the stigma attached to emigration declines, and stepping up their engagement efforts; meanwhile, host countries are witnessing more assertive diasporic groups within their own national communities, worrying about fifth columns and foreign lobbies, and suffering outbreaks of ‘diaspora phobia’.

This trend is the result of five factors, all of them connected with globalization: the growth in international migration; the revolution in transport and communications technology, which is quickening the pace of diasporas’ interactions with their homelands; **a reaction against global homogenized culture**, which is leading people to rethink their identities; **the end of the Cold War**, which increased the salience of ethnicity and nationalism and created new space in which diasporas can operate; **and policy changes by national governments** on issues such as dual citizenship and multiculturalism, which are enabling people to lead transnational lives. Diasporas such as those attaching to China, India, Russia and Mexico are already big, but they will continue to grow; the migration flow which feed them are likely to widen and quicken in the future.

原文翻译：

散居群体——居住在国外但与祖国保持联系的群体——正变得越来越大、越来越密、越来越强。他们是全球化的人类面孔。散居侨民意识正在增强：散居侨民对自己的来源地越来越感兴趣，并更有效地组织起来；随着移民污名的减少，祖国正在改变他们对侨民的看法，并加大与他们的接触努力；与此同时，东道国在其本国社区中目睹了越来越英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

自信的侨民群体，他们担心第五纵队和外国游说团体，并遭受“侨民恐惧症”的爆发。这一趋势是五个因素造成的，它们都与全球化有关：国际移民的增长；交通和通讯技术革命加快了侨民与祖国交流的步伐；一种对全球文化同质化的反应，促使人们重新思考自己的身份；冷战的结束增加了种族和民族主义的冲突，并创造了侨民可以活动的新空间；以及各国政府在双重国籍和多元文化主义等问题上的政策变化，这些问题使人们能够跨国生活。移民到中国、印度、俄罗斯和墨西哥的人数已经很多，但他们还将继续增长；养活他们的移民潮在未来可能会扩大和加快。

参考答案：

While Diasporas are getting larger, thicker and stronger and Diaspora consciousness is on the rise, this trend is the result of five factors, all of which are connected with globalization, including the growth in international migration, the revolution in transport and communications technology, a reaction against global homogenized culture, the end of the Cold War, and policy changes by national governments.

43. Nobel Peace Prize 诺贝尔和平奖 #091043

This year's Nobel Peace Prize justly rewards the thousands of scientists of the United Nations Climate Change Panel (the IPCC). These scientists are engaged in excellent, painstaking work that establishes exactly what the world should expect from climate change.

The other award winner, former US Vice President Al Gore, has spent much more time telling us what to fear. While the IPCC's estimates and conclusions are grounded in careful study, Gore doesn't seem to be similarly restrained.

Gore told the world in his Academy Award winning movie (recently labelled "one sided" and containing "scientific errors" by a British judge) to expect 20-foot sea level rises over this century. He ignores the findings of his Nobel co-winners, the IPCC, who conclude that sea levels will rise between only a half foot and two feet over this century, with their best expectation being about one foot. That's similar to what the world experienced over the past 英澳新三国（同一国家任意三所院校）

150 years.

Likewise, Gore agonizes over the accelerated melting of ice in Greenland and what it means for the planet, but overlooks the IPCC's conclusion that, if sustained, the current rate of melting would add just three inches to the sea level rise by the end of the century. Gore also takes no notice of research showing that Greenland's temperatures were higher in 1941 than they are today.

The politician turned movie maker loses sleep over a predicted rise in heat related deaths. There's another side of the story that's inconvenient to mention: **rising temperatures will reduce the number of cold spells**, which are a much bigger killer than heat. The best study shows that by 2050, heat will claim 400,000 more lives, but 1.8 million fewer will die because of cold. Indeed, according to the first complete survey of the economic effects of climate change for the world, **global warming will actually save lives**.

原文翻译：

今年的诺贝尔和平奖公平地奖励了联合国气候变化专门委员会(IPCC)的数千名科学家。这些科学家从事着出色、艰苦的工作，确定世界应该从气候变化中期待什么。

另一位获奖者是美国前副总统阿尔·戈尔，他花了很多时间告诉我们该害怕什么。政府间气候变化专门委员会的估计和结论是建立在仔细研究的基础上的，戈尔似乎并没有受到类似的限制。

戈尔在他那部获得奥斯卡奖的电影(最近被一名英国法官称为“片面的”，包含“科学错误”)中告诉世人，本世纪海平面将上升 20 英尺。他忽略了与他共同获得诺贝尔奖的联合国气候变化专门委员会的发现，后者得出的结论是本世纪海平面只会上升 0.5 英尺到 2 英尺，他们的最佳预期是大约 1 英尺。这与过去 150 年世界所经历的情况类似。

同样，戈尔也为格陵兰岛冰层加速融化及其对地球的影响感到苦恼，但他却忽视了英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

632

IPCC 的结论，即如果按照目前的融化速度持续下去，到本世纪末，海平面只会上升 3 英寸。戈尔也没有注意到有研究表明格陵兰岛在 1941 年的气温比现在要高。

据预测，与高温相关的死亡人数将上升，这位由政客转型的电影制作人为此辗转难眠。这个故事还有另外一个不好提的方面：气温上升将减少寒冷期的数量，而寒冷期是比炎热更大的杀手。最好的研究表明，到 2050 年，高温将夺走 40 多万人的生命，但因寒冷而死亡的人数将减少 180 万人。事实上，根据第一次关于气候变化对世界经济影响的全面调查，全球变暖实际上会拯救生命。

参考答案：

While the Nobel Peace Prize winner from the United Nations Climate Change Panel (the IPCC) is telling what the world should expect from climate change, the other award winner, Al Gore, is telling us what to fear, which means there will be 20-foot sea level rises over this century, but rising temperatures will reduce the number of cold spells, and global warming will actually save lives.

44. The City of London 伦敦 #091044

Who would have thought back in 1698, as they downed their espressos, that the little band of stockbrokers from Jonathan's Coffee House in Change Alley EC3 would be the founder members of what would become the world's mighty money capital?

Progress was not entirely smooth. The South Sea Bubble burst in 1720 and the coffee house exchanges burned down in 1748. As late as Big Bang in 1986, when bowler hats were finally hung up, you wouldn't have bet the farm on London surpassing New York, Frankfurt and Tokyo as Mammon's international nexus.

Yet the 325,000 souls who operate in the UK capital's financial hub have now overtaken their New York rivals in size of the funds managed (including offshore business); they hold 70% of the global secondary bond market and the City dominates foreign exchange trading. And its

英澳新三国（同一国家任意三所院校）

633

institutions paid out £9 billion in bonuses in December. The Square Mile has now spread both eastwards from EC3 to Canary Wharf and westwards into Mayfair, where many of the private equity 'locusts' and their hedge fund pals now hang out.

For foreigners in finance, London is the place to be. It has no Sarbanes Oxley and no euro to hold it back, yet the fact **that it still flies so high is against the odds**. London is one of the most **expensive cities in the world to live in**, **transport systems groan** and there's an ever present **threat of terrorist attack**. But, for the time being, the deals just keep on getting bigger.

原文翻译：

谁能想到，在 1698 年，当他们喝下浓咖啡时，来自 Change Alley EC3 区乔纳森咖啡馆的一小群股票经纪人会成为后来世界上强大的货币资本的创始人？

进展并不完全顺利。1720 年南海泡沫破裂，1748 年咖啡馆交易所被烧毁。直到 1986 年的大爆炸(Big Bang)，当圆顶礼帽终于挂出时，你都不会打赌伦敦会超过纽约、法兰克福和东京，成为财富的国际联系。

然而，在伦敦这个金融中心经营业务的 32.5 万名员工，如今管理的资金(包括离岸业务)规模已经超过了纽约的竞争对手；它们拥有全球二级债券市场 70% 的份额，伦敦金融城在外汇交易中占据主导地位。它的机构在 12 月支付了 90 亿英镑的奖金。如今，这一平方英里既向东扩展，从 EC3 到金丝雀码头(Canary Wharf)，又向西扩展到梅菲尔区(Mayfair)，那里是许多私募股权“蝗虫”和他们的对冲基金伙伴现在出没的地方。

对于从事金融业的外国人来说，伦敦是值得去的地方。它没有萨班斯·奥克斯利法案(Sarbanes Oxley)，也没有欧元来阻止它，但它仍能飞得如此之高，这是不可能的。伦敦是世界上生活成本最高的城市之一，交通系统不堪重负，而且恐怖袭击的威胁一直存在。但就目前而言，这些交易的规模还在不断扩大。

参考答案：

While London would become the world's mighty money capital although progress was not smooth, the UK capital's financial hub has overtaken its New York rivals in size of the funds managed and holds 70% of the global secondary bond market, and London dominates foreign exchange trading, but that the city still flies high is against the odds because it is expensive to live in with transport system groaning and threat of terrorist attack.

45. Beauty Contest 选美比赛 #091045

Since Australians Jennifer Hawkins and Lauryn Eagle were crowned Miss Universe and Miss Teen International respectively, there has been a dramatic increase in interest in beauty pageants in this country.

In the past few decades, Australia has taken a real step toward treating women with dignity and respect. Young women are being brought up knowing that they can do anything, as shown by inspiring role models in medicine such as 2003 Australian of the Year Professor Fiona Stanley. Almost all of the pageant victors are wafer-thin, reinforcing the message that thin equals beautiful. This ignores the fact that men and women come in all sizes and shapes. In a country where up to 60% of young women are on a diet at any one time and 80% of young girls and boys say they want to lose weight.

原文翻译：

自从澳大利亚人詹妮弗·霍金斯(Jennifer Hawkins)和劳琳·伊格尔(Lauryn Eagle)分别摘得环球小姐和国际 Teen 小姐桂冠后，澳大利亚人对选美的兴趣急剧上升。

在过去几十年里，澳大利亚在尊重和尊重妇女方面迈出了真正的一步。正如医学界鼓舞人心的榜样所显示的那样，年轻女性在成长过程中知道她们可以任何事情，如 2003 年澳大利亚年度人物菲奥娜·斯坦利教授。几乎所有选美获奖者都非常苗条，强化了“瘦就是美”这一信息。这就忽略了一个事实，男人和女人的身材千差万别。在一个高达 60% 的年轻女性在任何时候都在节食的国家，80% 的年轻女孩和男孩说他们想要减肥。

参考答案：

Since two Australian girls won in beauty pageants, there has been a dramatic increase in interest in beauty pageants in this country, and all of the pageant victors are wafer-thin, reinforcing the message that thin equals beautiful, which ignores that people come in all sizes and shapes.

46. Namibia Gained Independence 纳米比亚女孩 #091046

When Namibia gained independence in 1990, teenager Pascolena Florry was herding goats in the country dry, desolate northern savannah. Her job, unpaid and dangerous, was to protect her parents' livestock from preying jackals and leopards. She saw wildlife as the enemy, and many of the other indigenous inhabitants of Namibia's rural communal lands shared her view. Wildlife poaching was commonplace. Fifteen years later, 31-year-old Pascolena's life and outlook are very different. She has built a previously undreamed of career in tourism and is the first black Namibian to be appointed manager of a guest lodge. Her village, and hundreds of others, have directly benefited from government efforts to devolve management and tourism development on communal lands to conservancies run by indigenous peoples. “Now we see the wildlife as our way of creating jobs and opportunities as the tourism industry grows,” she says. “The future is better with wildlife around, not only for jobs, but also for the environment”.

原文翻译：

当纳米比亚 1990 年获得独立时，十几岁的 Pascolena Florry 正在这个干旱、荒芜的北部大草原上放羊。她的工作没有报酬，而且很危险，就是保护父母的牲畜免受豺和豹子的捕食。她视野生动物为敌人，纳米比亚农村公共土地上的许多其他土著居民与她持相同观点。偷猎野生动物是司空见惯的事。15 年后，31 岁的 Pascolena 的生活和前景都大不相同。她在旅游业建立了一个以前做梦也想不到的职业生涯，是纳米比亚第一位被任命为宾馆经理的黑人。她的村庄和其他数百个村庄都直接受益于政府将公有土地的管理和旅游业发展下放给土著民族经营的保护区的努力。“现在，随着旅游业的发

636

展，我们把野生动物视为创造就业和机会的途径，”她说。“野生动物的存在会让未来更美好，这不仅对工作有好处，对环境也有好处。

参考答案：

When Namibia gained independence in 1990, Pascolena Florry and her villagers saw wildlife as the enemy to protect her parents' livestock, but the village now sees the wildlife as their way of creating jobs and opportunities fifteen years later because they have benefited from government's efforts on tourism development.

47. Parent Control Children Watching TV 父母控制孩子看电视 #091047

Why and to what extent should parents control their children's TV watching? There is certainly nothing inherently wrong with TV. The problem is how much television a child watches and what effect it has on his life. Research has shown that as the amount of time spent watching TV goes up, the amount of time devoted not only to homework and study but other important aspects of life such as social development and physical activities decreases.

Television is bound to have it tremendous impact on a child, both in terms of how many hours a week he watches TV and of what he sees. When a parent is concerned about the effects of television, he should consider a number of things: what TV offers the child in terms of information and knowledge, how many hours a week a youngster his age should watch television, the impact of violence and sex, and the influence of commercials.

What about the family as a whole? Is the TV set a central piece of furniture in your home! Is it flicked on the moment someone enters the empty house? Is it on during the daytime? Is it part of the background notice of your family life? Do you demonstrate by your own viewing that television should be watched selectively?

原文翻译：

为什么父母应该控制孩子看电视，控制到什么程度？当然，电视本身并没有什么错。问题是孩子看电视的时间长短，以及电视对孩子生活的影响。研究表明，当孩子观看时，它对他的生活产生了什么影响。研究表明，人们花在看电视上的时间越多，花在家庭作业和学习上的时间就越少，花在社会发展和体育活动等生活其他重要方面的时间也就越少。

电视必然会对孩子产生巨大的影响，无论是孩子每周看电视的时间长短，还是看电视所看到的内容。当父母关心电视的影响，他应该考虑许多事情：什么电视会给孩子提供信息和知识，就一个孩子年龄来说一个星期可以看几个小时电视，暴力和性的影响，广告的影响。

那整个家庭呢？电视机是你家里的重要的家具吗？当有人走进空房子的时候，它会自动打开吗？它在白天会打开的吗？这是你家庭生活背景的一部分吗？你是否通过自己的观看来证明电视应该有选择地观看？

参考答案：

While there is nothing wrong with TV, the problem is how much television a child watches and what effect it has on his life because the increasing amount of time spent on watching TV decreases the amount of time devoted to study and other aspects of life, so a parent should consider the information TV offers, the duration, the impact of violence, sex and commercials, and what TV means to the family as a whole.

48. Sleeping and Napping 午睡 #091048

Could midday nap save your life? If the experience of Greek men is any guide, the answer just may be yes.

In a study released yesterday, researchers at the Harvard School of Public Health and in Athens reported that Greeks who took regular 30-minute napping were 37% less likely to die of heart disease over a six-year period than those who never napped. The scientists tracked

英澳新三国（同一国家任意三所院校）

638

more than 23,000 adults, finding that the benefits of napping were most pronounced for working men.

Researchers have long recognized that Mediterranean adults die of heart disease at a rate lower than Americans and Northern Europeans. Diets rich in olive oil and other heart-healthy foods have received some of the credit, but scientists have been intrigued by the potential role of napping.

The study concluded that napping was more likely than diet or physical activity to lower the incidence of heart attacks and other like-ending heart ailments.

Specialists not involved with the study said there are sound biochemical reasons to believe that a nap may help protect against heart disease. Essentially, they said, sleep at any time of day acts like a valve to release the stress of everyday life.

原文翻译：

午睡能挽救你的生命吗？如果希腊人的经验有任何指导意义的话，答案可能是肯定的。在昨天发布的一项研究中，来自哈佛大学公共卫生学院和雅典的研究人员报告称，有规律地午睡 30 分钟的希腊人在 6 年内死于心脏病的可能性比从不午睡的人低 37%。科学家们对 23000 多名成年人进行了跟踪调查，发现小睡的好处在工作的男性身上体现得最为明显。

研究人员早就认识到地中海地区的成年人死于心脏病的比率低于美国人和北欧人。富含橄榄油的饮食和其他有益心脏健康的食物受到了一些赞扬，但科学家们一直对小睡的潜在作用很感兴趣。

该研究得出的结论是，在降低心脏病和其他类似心脏病发病率方面，打盹比饮食或体育活动更有可能。

没有参与这项研究的专家说，有充分的生化原因让我们相信午睡可能有助于预防心脏病。他们说，从本质上说，一天中任何时候睡觉对释放日常生活压力很有用。

参考答案：

While midday napping could save life, the experience of Greeks showed that people who took napping were less likely to die of heart disease, finding that the benefits of napping were most pronounced for working men, and napping was more likely than diet or physical activity to lower the incidence of heart attacks, because sleep at any time acts as a valve to release the stress of everyday life.

49. Wine Industry 美国禁酒令 #091049

In 1920, the eighteenth Amendment to the United States Constitution created yet another setback for the American wine industry. The National Prohibition Act, also known as the Volstead Act, prohibited the manufacture, sale, transportation, importation, delivery, or possession of intoxicating liquors for beverage purposes.

Perhaps more important, prohibition allowed anyone to produce up to two hundred gallons yearly of fruit juice or cider. The fruit juice, which was sometimes made into concentrate, was ideal for making wine. People would buy grape concentrate from California and have it shipped to the East Coast. The top of the container was stamped in big bold letters: caution: do not add sugar or yeast or else fermentation will take place! Some of this yield found its way to bootleggers throughout America who did just that. But not for long, because the government stepped in and banned the sale of grape juice, preventing illegal wine production. Vineyards stopped being planted, and the American wine industry came to a halt.

原文翻译：

1920 年，美国宪法第十八修正案给美国葡萄酒工业带来了又一次挫折。《国家禁酒法》，也称为禁酒令，禁止为饮料目的制造、销售、运输、进口、交付或拥有酒精饮料。

也许更重要的是，禁酒令允许任何人每年生产 200 加仑的果汁或西打酒。这种果汁有时被制成浓缩物，是酿制葡萄酒的理想原料。人们会从加州购买浓缩葡萄，然后运到东海岸。容器的顶部印有醒目的大字：警告：不要添加糖或酵母，否则会发生发酵！这些英澳新三国（同一国家任意三所院校）

产量中的一部分被美国各地的走私贩所利用。但没过多久，因为政府干预，禁止了葡萄汁的销售，防止了非法葡萄酒生产。葡萄园不再种植，美国的葡萄酒产业也停止了发展。

参考答案：

Although the National Prohibition Act prohibited the manufacture, sale, transportation, importation, delivery, or possession of intoxicating liquors for beverage purposes, fruit juice is allowed which can be made into a concentration that was ideal for making wine, but the government stepped in and banned the sale of grape juice, preventing illegal wine production.

50. Asking Questions 人和动物问问题 #091050

All non-human animals are constrained by the tools that nature has bequeathed them through natural selection. They are not capable of striving towards truth; they simply absorb information, and behave in ways useful for their survival. The kinds of knowledge they require of the world have been largely pre-selected by evolution. No animal is capable of asking questions or generating problems that are irrelevant to its immediate circumstances or its evolutionarily designed needs. When a beaver builds a dam, it doesn't ask itself why it does so or whether there is a better way of doing it. When a swallow flies south, it doesn't wonder why it is hotter in Africa or what would happen if it flew still further south.

Humans do ask themselves these and many other kinds of questions, questions that have no relevance, indeed make little sense, in the context of evolved needs and goals. What marks out humans is our capacity to go beyond our naturally defined goals such as the need to find food, shelter or a mate and to establish human created goals.

原文翻译：

所有非人类的动物都受到工具的限制，这些工具是大自然通过自然选择留给它们的。他们没有能力追求真理；它们只是简单地吸收信息，并以有益于它们生存的方式行事。它们对这个世界所需要的知识在很大程度上是进化预先选择的。没有动物能够提出问

题或产生与当前环境或进化设计的需求无关的问题。当海狸建造水坝时，它不会问自己为什么要这样做，或者是否有更好的方法。当一只燕子往南飞时，它并不奇怪为什么非洲会更热，也不奇怪如果它再往南飞会发生什么。

人类确实会问自己这些和许多其他类型的问题，在进化的需要和目标的背景下，这些问题没有相关性，实际上毫无意义。人类之所以与众不同，是因为我们有能力超越自然设定的目标，比如寻找食物、住所或配偶的需求，以及建立人类设定的目标。

参考答案：

While all non-human animals are constrained by the tools that nature has bequeathed them through natural selection and no animal is capable of asking questions or generating problems that are irrelevant to its evolutionarily designed needs, humans do ask themselves questions which have no relevance in the context of evolved needs and goals, which suggests that what marks out humans is our capacity to go beyond our naturally defined goals.

51. Travel & Tourism Industry 旅游业 #091051

Jobs generated by Travel & Tourism are spread across the economy in retail, construction, manufacturing and telecommunications, as well as directly in Travel & Tourism companies. These jobs employ a large proportion of women, minorities and young people; are predominantly in small and medium sized companies; and offer good training and transferability. Tourism can also be one of the most effective drivers for the development of regional economies. These patterns apply to both developed and emerging economies.

There are numerous good examples of where Travel & Tourism is acting as a catalyst for conservation and improvement of the environment and maintenance of local diversity and culture. Travel & Tourism creates jobs and wealth and has tremendous potential to contribute to economically, environmentally and socially sustainable development in both developed countries and emerging nations. It has a comparative advantage in that its start up and running costs can be low compared to many other forms of industry development.

642

It is also often one of the few realistic options for development in many areas. Therefore, there is a strong likelihood that the Travel & Tourism industry will continue to grow globally over the short to medium term.

原文翻译：

旅游业创造的就业机会遍布整个经济领域，包括零售业、建筑业、制造业和电信业，也包括旅游业公司。这些工作雇用了很大一部分妇女、少数民族和年轻人；主要是中小型企业；并提供良好的培训和可转移性。旅游业也可以成为区域经济发展最有效的驱动力之一。这些模式既适用于发达经济体，也适用于新兴经济体。

有许多很好的例子表明，旅游业在保护和改善环境、维护当地多样性和文化方面起到了催化剂的作用。旅游业创造就业机会和财富，对发达国家和新兴国家的经济、环境和社会可持续发展都具有巨大潜力。它的相对优势在于，与许多其他形式的产业发展相比，它的启动和运行成本较低。

它也往往是许多领域发展的少数现实选择之一。因此，在短期到中期内，旅游业很有可能在全球范围内继续增长。

参考答案：

While jobs generated by Travel & Tourism are spread across the economy, tourism can be one of the most effective drivers for the development of regional economics, and Travel & Tourism is acting as a catalyst for conservation and improvement of the environment and maintenance of local diversity and culture, so there is a strong likelihood that the Travel & Tourism industry will continue to grow globally over the short to medium term.

52. Ageing world 全球老龄化 #091052

We live in an ageing world. While this has been recognized for some time in developed countries, it is only recently that this phenomenon has been fully acknowledged. Global communication is "shrinking" the world, and global ageing is "maturing" it. The increasing presence of older persons in the world is making people of all ages more aware that we live in 英澳新三国（同一国家任意三所院校）

643

a diverse and multigenerational society. It is no longer possible to ignore ageing, regardless of whether one views it positively or negatively.

Demographers note that if current trends in ageing continue as predicted, a demographic revolution, wherein the proportions of the young and the old will undergo a historic crossover, will be felt in just three generations. This portrait of change in the world's population parallels the magnitude of the industrial revolution traditionally considered the most significant social and economic breakthrough in the history of humankind since the Neolithic period. It marked the beginning of a sustained movement towards modern economic growth in much the same way that globalization is today marking an unprecedented and sustained movement toward a "global culture". The demographic revolution, it is envisaged, will be at least as powerful.

While the future effects are not known, a likely scenario is one where both the challenges as well as the opportunities will emerge from a vessel into which exploration and research, dialogue and debate are poured. Challenges arise as social and economic structures try to adjust to the simultaneous phenomenon of diminishing young cohorts with rising older ones, and opportunities present themselves in the sheer number of older individuals and the vast resources societies stand to gain from their contribution.

原文翻译：

我们生活在一个老龄化的世界。虽然发达国家已经认识到这一点有一段时间了，但这一现象只是最近才得到充分认识。全球通信正在“缩小”世界，而全球老龄化正在“成熟”世界。世界上老年人的增多使各年龄层的人更加认识到我们生活在一个多样化和多代人的社会中。无论人们是积极还是消极地看待衰老，都不再可能忽视它。

人口统计学家指出，如果目前的老龄化趋势如预测的那样继续下去，仅仅在三代人的时间里，就能感受到一场人口结构革命，即年轻人和老年人的比例将经历历史性的转变。这幅世界人口变化的画像与传统上被认为是新石器时代以来人类历史上最重要的社会和经济突破的工业革命的规模相当。它标志着一场向现代经济增长的持续运动的开始，就像今天全球化标志着一场前所未有的、持续的向“全球文化”的运动一样。可英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

以预见，人口革命至少将同样强大。

虽然未来的影响尚不可知，但可能出现的情况是，挑战和机遇都将出现在一艘充满探索和研究、对话和辩论的船上。当社会和经济结构试图调整以适应同时出现的青年群体减少和老年群体增加的现象时，挑战就出现了，而机遇出现在数量庞大的老年人中，而庞大的资源社会也将从中受益。

参考答案：

As it is fully acknowledged that we live in an ageing world, a powerful demographic revolution, wherein the proportions of the young and the old will undergo a historic crossover, will be felt in just three generations if current trends in ageing continue as predicted, which will bring not only challenges of adjusting social and economic structures but also opportunities of presenting themselves in older people and vast resources.

53. Written Language 书写语言 #091053

The world engages in improving literacy of reading and writing, but it is not that important now.

What are text/written language anyway? It's an ancient IT for storing and retrieving information. We store information by writing it, and we retrieve it by reading it. Six thousand to 10,000 years ago, many of our ancestors' hunter-gatherer societies settled on the land and began what's known as the agricultural revolution. That new land settlement led to private property and increased production and trade of goods, generating a huge new influx of information. Unable to keep all this information in their memories, our ancestors created systems of written records that evolved over millennia into today's written language.

But this ancient IT is already becoming obsolete. Text has run its historic course and is now rapidly getting replaced in every area of our lives by the ever-increasing array of emerging ITs driven by voice, video, and body movement rather than the written word.

In my view, this is a positive step forward in the evolution of human technology, and it carries

英澳新三国（同一国家任意三所院校）

645

great potential for a total positive redesign of education.

原文翻译：

全世界都在努力提高读写能力，但现在这已经不那么重要了。到底什么是文字/书面语言？这是一个古老的 IT，用来储存和检索信息。我们通过编写来存储信息，通过读来获取信息。6000 到 10000 年前，我们祖先的狩猎采集社会在这片土地上定居下来，开始了所谓的农业革命。新的土地定居导致了私有财产的产生，增加了商品的生产和贸易，产生了大量新的信息流入。由于无法将所有这些信息保存在他们的记忆中，我们的祖先创造了书写记录系统，经过数千年的进化，形成了今天的书写语言。

但是这个古老的 IT 已经过时了。文本已经走过了它的历史历程，现在正在我们生活的各个领域被越来越多的新出现的文本所取代，这些文本是由声音、视频和身体运动而不是文字驱动的。

在我看来，这是人类技术进化中积极的一步，它具有巨大的潜力，可以对教育进行全面积极的重新设计。

参考答案：

While the world engages in improving literacy of reading and writing, text/written language is an ancient IT for storing and retrieving information, but it is not that important now because it is already becoming obsolete, which means Text has run its historic course and is now rapidly getting replaced, so this is a positive step forward in the evolution of human technology, and it carries great potential for a total positive redesign of education.

54. Moving from City back to Countryside 搬回农村 #091054

I knew **it was a good idea because I had been there before**. Born and reared on a farm I had been seduced for a few years by the idea of being a big shot that lived and worked in a city rather than only going for the day to wave at the buses.

True, I was familiar with some of the **minor disadvantages of country living such as an iffy private water supply** sometimes infiltrated by a range of flora and fauna (including, on one memorable occasion, a dead lamb), **the absence of central heating** in farm houses and cottages, and a single track farm road easily blocked by snow, broken down machinery or escaped livestock.

But there were many advantages as I told **my young wife** back in the mid Seventies. Town born and bred, eight months pregnant and **exchanging a warm, substantial Corstorphine terrace for a windswept farm cottage on a much lower income**, persuading her that **country had it over town might have been difficult**.

原文翻译：

我知道这是个好主意，因为我以前去过那里。我在一个农场出生长大，几年来，我一直被一种想法所诱惑，那就是成为一个在城市生活和工作的大人物，而不只是在公共汽车前挥挥手。

真的，我熟悉一些乡村生活的小缺点，例如私人供水不畅，有时被各种动植物所渗透（包括在一个难忘的时刻，有一只死羊），农场没有中央供暖系统在住宅和别墅，以及一条单行农场道路，容易被雪，机械故障或牲畜逃脱所阻塞。

但也有很多优势，就像我在 70 年代中期告诉我年轻的妻子的那样。她在城里出生长大，有八个月的身孕，把一个温暖、坚固的梯形露台换成了一间狂风肆虐的收入低得多的农舍，让她相信乡村胜过了城镇可能是很困难的。

参考答案：

While living in the country has some minor disadvantages including water supply and the absence of central heating, I still think it is a good idea to move back because I had been there before, but persuading my young wife to move from town to country is hard because she would not exchange a warm terrace for a windswept farm cottage on a much lower income.

55. Skip Breakfast 不吃早餐 #091055

Skipping breakfast has drawbacks. However, studies conducted both in the United States and internationally have shown that **skipping breakfast can affect learning, memory and physical well-being.** Students who skip breakfast are not as efficient at selecting critical information for problem-solving as their peers who have had breakfast.

For schoolchildren, skipping breakfast diminishes the ability to recall and use newly acquired information, verbal fluency, and control of attention, according to Ernesto Pollitt, a UC Davis professor of pediatrics whose research focuses on the influence of breakfast on **mental and physical performance.** Skipping breakfast can **impair thinking in adults,** also.

For both children and adults, **a simple bowl of cereal with milk goes a long way toward providing a sufficiently nutritious start to the day.** Green-Burgeson recommends choosing a cereal that's low in sugar — less than five grams per serving — and using nonfat or one percent milk.

Frederick Hirshburg, a pediatrician at UC Davis Medical Group, Carmichael, says that **babies and other preschoolers rarely skip breakfast** because “they’re usually the hungriest at the beginning of the day. Breakfast **then becomes more of a “learned experience”** than a response to a biological need, Hirshburg says.

原文翻译：

不吃早餐也有缺点。然而，在美国和国际上进行的研究表明，不吃早餐会影响学习、记忆和身体健康。不吃早餐的学生在选择解决问题的关键信息时，不如吃过早餐的同龄人有效率。

加州大学戴维斯分校的儿科学教授 Ernesto Pollitt 认为，对学龄儿童来说，不吃早餐会降低他们回忆和使用新获得信息的能力、以及语言流畅性和注意力控制能力。不吃早餐也会影响成年人的思维。

对于儿童和成年人来说，一碗简单的麦片加牛奶就可以为一天提供足够的营养。Green Burgeson 建议选择低糖的谷物（每份少于 5 克），并且使用脱脂或 1% 的牛奶。

英澳新三国（同一国家任意三所院校）

648

位于 Carmichael 的加州大学戴维斯分校医疗集团的儿科医生 Frederick Hirshburg 说，婴儿和其他学龄前儿童很少不吃早餐，因为“他们通常在一天的开始时最饿。”Hirshburg 说，“这样早餐就变成了一种‘学到的体验’，而不是对生理需求的反应。”

参考答案：

While skipping breakfast has drawbacks, skipping breakfast can affect learning, memory and physical wellbeing because it diminishes schoolchildren's mental and physical performance and impairs thinking in adults, but a simple bowl of cereal with milk goes a long way toward providing a sufficiently nutritious start to the day, whereas babies and other pre-schoolers rarely skip breakfast which then becomes more of a "learned experience".

56. Compulsory Voting in Australia 澳洲强制投票 #091056

Whether to vote or not? It is strange that after decades of crawling up the political backside of the US, Australians don't have that right. Being fined for not voting reminds me of the old saying "you can lead a horse to water but you cannot make him drink". The fine is not for failing to vote but for failing to have your name marked off a list!

Forcing people to make a decision just means they'll make the easiest, quickest decision they can, not the best one. You need an informed electorate for compulsory voting to work. However, the reality is that nobody knows anything about the candidates and promotional material is not readily available. I'd rather 80% of people didn't vote than have them all just pick the first recognisable name on the ballot sheet. Then at least the government is elected by the 20% who care and make informed decisions. Otherwise it is largely pot chance who gets elected.

Furthermore, compulsory voting doesn't ensure that the entire electorate is engaged in the democratic process. Those who don't want to vote can simply turn up and get their name marked off, without even putting pencil to paper. But you're seriously deluding yourself if you think that this is what all those who don't care about government do when they turn up to

the polling booth. Voluntary voting at least ensures those who vote are the ones that care enough to do so. Perhaps somebody could enlighten me as to the reason why, to the best of my knowledge, **Australia is the only ‘democracy’ that has compulsory voting.** It is certainly not compulsory in the USA, England, Canada, New Zealand, Philippines or any other European or Asian democracy that I am aware of. Compulsory voting is, however, mandatory in most communist regimes.

原文翻译：

投票还是不投票？奇怪的是，在美国政治背后爬了几十年之后，澳大利亚人却没有选择的权利。不投票被罚款让我想起了一句老话：“牵马到水边，逼马饮水难”。罚款不是因为没投票，而是因为你的名字没有被从名单上划掉！

强迫人们做决定只意味着他们会做出他们所能做出的最简单、最快的决定，而不是最好的决定。你需要一个知情的选民强制投票工作。然而，现实情况是，没有人对候选人有任何了解，宣传材料也不容易获得。我宁愿 80% 的人没有投票，也不愿让他们选票上第一个能认得出来的名字。然后，至少有 20% 关心并做出明智的决定人会选出政府。否则，谁能当选就很大程度上取决于运气了。

此外，强制投票并不能确保全体选民都参与到民主进程中来。那些不想投票的人可以直接去投票，然后把他们的名字划掉，甚至不用动笔。但是，如果你认为所有那些不关心政府的人在投票时都是这么做的，那你就是在欺骗自己。自愿投票至少确保了那些投票的人足够谨慎。也许有人能告诉我为什么，就我所知，澳大利亚是唯一实行强制投票的“民主”国家。当然，在美国、英国、加拿大、新西兰、菲律宾或我所知道的任何其他欧洲或亚洲的民主国家，这都不是强制性的。然而，强制投票在大多数共产主义政权中是强制性的。

参考答案：

While it is strange that Australians don't have that right not to vote, you need an informed electorate for compulsory voting to work and promotional material is not readily available, and compulsory voting doesn't ensure that the entire electorate is engaged in the democratic

process, but Australia is the only 'democracy' that has compulsory voting.

57. Compulsory Voting UK 英国强制投票 #091057

[PARAGRAPH 1] Voting is the most important way to make your voice heard on issues that concerns you, ranging from what you do in local schools, and what recreation facilities you prefer, to national issues like ...

[PARAGRAPH 2] Many countries across the world fought for rights to vote, including UK. People endeavored to let women have equal terms of rights with men in voting. In the last UK General Election, voting rate has dropped substantially because of 'voter apathy'. But reasons of low participate rate in the election are far more complicated, such as the flow of information, untrusted politicians and inconvenience.

[PARAGRAPH 3] So politicians and most media should take concerted effort to encourage people to vote.

原文翻译：

投票是让你的意见在你关心的问题上被听到的最重要的方式，从你在当地学校做什么，你喜欢什么娱乐设施，到全国性的问题，比如...

世界上许多国家都为投票权而战，包括英国。人们努力让妇女享有与男子平等的投票权利。在上次英国大选中，由于“选民的冷漠”，投票率大幅下降。但参选率低的原因要复杂得多，比如信息的流动、不受信任的政客以及投票的不便等。

因此，政治家和大多数媒体应该共同努力鼓励人们投票。

参考答案：

Voting is important to make your voice heard on issues that concern you, but the voting rate has dropped a lot during the last UK general election because of the mistrust of young people to the politicians and the inconvenience of voting, so governments, politicians and media

should make concerted efforts to encourage people to vote.

58. Crime rate 犯罪率 #091058

The Home Office's periodic British Crime Survey estimates that the true level of crime (the sorts, anyway, which inform the official figures) is about four times that which is registered in the annual statistics.

Quite often, especially in the financial services sector, businesses do not report crimes against themselves for fear of lowering their public image. Many citizens today are not insured against car theft or property loss (because they cannot afford the premiums) so they have no incentive to tell the police if they become victims.

A steep statistical rise in crime can sometimes arise not from a real growth in a particular type of conduct but from a new policing policy - offences of "lewd dancing" rose by about 300 per cent during 12 months in the 1980s in Manchester, but only because the zealous Chief Constable James Anderton had deployed a great many officers in gay night clubs.

Sometimes the enactment of a new range of offences or the possibility of committing old offences in a new way (like computer offences involving fraud and deception) can cause an upward jolt in crime levels. The figures just released show a startling jump in street robbery but much of this seems to be a very particular crime: the theft of the now ubiquitous mobile phones.

Conversely, if crimes like joyriding and some assaults are kept out of the categories measured in the annual statistics, as is the case, the official figures do not reflect even what is reported to the police as criminal.

The way that criminal statistics are compiled by the Home Office is also relevant. From April 1998, police forces started to count crime in a way which, according to the government, will give "a more robust statistical measure".

Under the new rules, crime is recorded as one crime per victim. Some crimes, like assaults, have always been recorded in this way, so the main impact of the change will be in the area of property offences. Shop thefts, for example, were the old rules counted offenders, will now count victims. Multiple thefts from cars in a car park with a barrier were previously counted as one offence but are now counted as separate offences.

原文翻译：

英国内政部的定期英国犯罪调查估计，真实的犯罪水平（无论如何，这些种类都是官方数据的依据）大约是年度统计数据中所记录犯罪水平的四倍。

很多时候，尤其是在金融服务领域，企业因为担心降低自己的公众形象而不报告针对自己的犯罪行为。如今，许多公民没有汽车盗窃或财产损失保险(因为他们付不起保险费)，所以如果他们成为受害者，他们没有动机去告诉警察。

统计数字中犯罪的急剧上升有时不是由某种特定行为的实际增长引起的，而是由新的警务政策引起的：在 1980 年代的曼彻斯特，“下流舞蹈”犯罪在 12 个月期间增长了大约 300%，但只是因为热心的局长詹姆斯·安德顿在同性恋夜总会中部署了很多官员。

有时，一系列新的犯罪行为的颁布或者以新的方式进行旧犯罪行为的可能性(如涉及欺诈和欺骗的计算机犯罪)会导致犯罪水平上升。刚刚公布的数据显示，街头抢劫的数量惊人地增加，但其中大部分似乎是非常特殊的犯罪：偷窃现在无处不在的手机。

相反，如果驾车兜风和一些攻击行为被排除在年度统计的范畴之外，就像现在的情况一样，官方数据甚至不能反映出上报给警方的犯罪行为。

内政部编制犯罪统计数据的方式也与此相关。根据政府的说法，从 1998 年 4 月开始，据政府称，警察部队开始以一种“更可靠的统计方法”来计算犯罪。

在新规定下，犯罪记录为每名受害者一项犯罪。有些犯罪，比如袭击，一直都是这样记录的，所以这个变化的主要影响将是在财产犯罪方面。比如，过去的规定把商店盗窃犯算为罪犯，现在则算受害者。在设有护栏的停车场内多次盗窃汽车，以前被视为一次犯罪，但现在被视为单独的犯罪。

参考答案：

While the true level of crime is about four times than which is registered, the reasons include business not reporting crimes against themselves for fear of lowering their public image, citizens having no incentive to tell the police if they become victims, a new policing policy, the enactment of a new range of offences or committing old offences in a new way, and the way that criminal statistics are compiled by the Home Office.

59. Plants research 植物研究 #091059

Plants serve as the conduit of energy into the biosphere, provide food and materials used by humans, and they shape our environment. According to Ehrhardt and Frommer, the three major challenges facing humanity in our time are food, energy, and environmental degradation. All three are plant related.

All of our food is produced by plants, either directly or indirectly via animals that eat them. Plants are a source of energy production. And they are intimately involved in climate change and a major factor in a variety of environmental concerns, including agricultural expansion and its impact on habitat destruction and waterway pollution.

What's more, none of these issues are independent of each other. Climate change places additional stresses on the food supply and on various habitats. So, plant research is instrumental in addressing all of these problems and moving into the future. For plant research to move significantly forward, Ehrhardt and Former say technological development is critical, both to test existing hypotheses and to gain new information and generate fresh hypotheses. If we are to make headway in understanding how these essential organisms function and build the foundation for a sustainable future, then we need to apply the most advanced technologies available to the study of plant life, they say.

原文翻译：

植物作为能量进入生物圈的管道，为人类提供食物和材料，并塑造我们的环境。根据

Ehrhardt 和 Former 的观点，我们这个时代人类面临的三大挑战是食物、能源和环境退化。这三个都是与植物相关的。

我们所有的食物都是由植物产生，直接或间接地通过食用植物的动物生产出来的。植物是能源生产的一种来源。它们与气候变化密切相关，也是各种环境问题的主要因素，包括农业扩张及其对栖息地破坏和航道污染的影响。

更重要的是，这些问题都不是相互独立的。气候变化对粮食供应和各种栖息地造成了额外的压力。因此，植物研究有助于解决所有这些问题并走向未来。Ehrhardt 和 Former 认为，要想让植物研究取得重大进展，技术发展是至关重要的，它不仅可以检验现有的假设，还可以获得新的信息并生成新的假设。他们说，如果我们想要在理解这些重要生物体的功能方面取得进展，并为可持续发展的未来打下基础，那么我们就需要将最先进的技术应用到植物生命的研究中。

参考答案：

While plants are a source of energy production, they are intimately involved in climate change and a major factor in a variety of environmental concerns, but none of these issues are independent of each other, so plant research is instrumental in addressing problems and moving into the future and we need to apply the most advanced technologies available to the study of plant life.

60. Museology 博物馆学 #091060

What is **museology**? A simple definition might be that it is **the study of museums, their history and underlying philosophy**, the various ways in which they have, in the course of time, been established and developed, their avowed or unspoken aims and policies, their educative or political or social role. More broadly conceived, such a study might also **embrace the bewildering variety of audiences** — visitors, scholars, art lovers, children -at whom the efforts of museum staff are supposedly directed, as well as related **topics** such as the legal duties and responsibilities placed upon (or incurred by) museums, perhaps even some thought as to their future. Seen in this light, museology might appear at first sight a subject so **specialized as to**

655

concern only museum professionals, who by virtue of their occupation are more or less obliged to take an interest in it. In reality, since museums are almost, if not quite as old as civilization itself, and since the plethora of present-day museums embraces virtually every field of human endeavor - not just art, or craft, or science, but entertainment, agriculture, rural life, childhood, fisheries, antiquities, automobiles: the list is endless - it is a field of enquiry so broad as to be a matter of concern to almost everybody.

原文翻译：

什么是博物馆学？一个简单的定义可能是，它是对博物馆、博物馆的历史和基本哲学、博物馆在一段时间内建立和发展的各种方式、博物馆公开或不公开的目标和政策、博物馆的教育、政治或社会角色的研究。从更广泛的角度出发，这种研究也可能包括各种各样的观众——游客、学者、艺术爱好者、孩子——这些都是博物馆工作人员所需要努力的对象，以及相关的话题，例如博物馆的（或者由它们引起的）法律赋予的职责和责任，甚至可能是一些关于它们的未来的想法。从这个角度来看，博物馆学乍一看可能是一门专门到只涉及博物馆专业人员的学科，这些专业人员由于他们的职业或多或少有义务对它感兴趣。但在现实中，由于博物馆其实并没有像文明一样古老，而且由于当今众多的博物馆几乎涵盖了人类活动的每个领域——不只是艺术，或工艺，或科学，还包括娱乐、农业、农村生活，童年，渔业、文物、汽车：这个清单是无止境的，这是一个广泛的调查领域，几乎是所有人都关注的问题。

参考答案：

Museology which is a study of museums, their history and underlying philosophy not only embraces the bewildering variety of audiences and different topics but also specializes as to concern museum professionals, and it is a field of enquiry so broad as to be a matter of concern to almost everybody because it embraces every field of human endeavor.

61. 2014 Olympics 2014 年奥林匹克 #091061

Major athletic events around the globe – from the 2014 Sochi Olympics to an annual powerboat race in Norwegian fjords – are striving to neutralize their carbon footprint as part of a world-wide climate network, the United Nations Environment Programme (UNEP) said today.

The sporting events are the latest participants to join the network, and are particularly important for inspiring further global action on the environment, said Achim Steiner, UNEP Executive Director.

“Whether carried out on track and field or on ice and snow, sporting events ignite the spirit of achievement in thousands of competitors and billions of spectators worldwide,” Mr. Steiner said.

“It is, therefore, heartening that this passion for excellence increasingly encompasses environmental performance, with sporting organizations raising the bar ever higher at each and every tournament,” he added.

Organizers of the 2014 Sochi Olympic and Paralympic Winter Games – to be held in a unique natural setting between the shores of the Black Sea and the soaring snow-capped Caucasus Mountains – say they will put an estimated \$1.75 billion into energy conservation and renewable energy.

That investment will be dedicated to improving transport infrastructure, offsetting greenhouse gas emissions from the use of electricity, air travel and ground transportation, the reforestation of Sochi National Park and the development of green belts in the city.

原文翻译：

联合国环境规划署(UNEP)今天表示，世界各地的重大体育赛事——从2014年索契奥运会到每年在挪威峡湾举行的摩托艇比赛——都在努力中和它们的碳足迹，作为全球气候网络的一部分。

联合国环境规划署执行主任阿希姆·施泰纳(Achim Steiner)表示，体育赛事是该网络的最新参与者，对激励进一步的全球环境行动尤为重要。

施泰纳说，“无论是在田径场上还是在冰雪上，体育赛事都能点燃全球数千名选手和数十亿观众的成就精神。”

“因此，令人振奋的是，随着体育组织在每一场比赛中不断提高标准，追求卓越的热情越来越多地包含了环保表现，”他补充道。

2014年索契冬奥会和残奥会将在黑海海岸和高耸的白雪皑皑的高加索山脉之间一个独特的自然环境中举行。主办方说，他们将在能源节约和可再生能源方面投入大约17.5亿美元。

这些投资将专门用于改善交通基础设施，抵消电力使用、空中旅行和地面交通造成的温室气体排放，重新造林索契国家公园，以及城市绿化带的发展。

参考答案：

While major athletic events are striving to neutralize their carbon footprint as part of a world-wide climate network, they are also the latest participants to join the network and are important for the environment, and they will put a huge investment into energy conservation and renewable energy to improve transport infrastructure, offsetting greenhouse gas, air travel and ground transportation, the reforestation of Sochi National Park and the development of green belts in the city.

62. Development of Africa 非洲发展潜力 #091062

1. Africa is a continent with vast natural resources, and the resources are mainly unexploited. If the resources are exploited properly, it will ... Thus, the generalization of negative image of Africa is unfair.
2. Africa is not a homogeneous country. There are 50 countries in Africa.
3. Hardworking Africans are struggling to address food, poverty and disease issues, but it requires international support.

658

4. Africa is an attractive place for business but needs assistance.
5. Africans are capable to identify their own needs, but require concerted support from international organizations and communities.
6. Wars are ongoing in many countries in Africa.
7. Africa is a place rich in culture and diversity. It's a heaven for tourists, archeologists, etc.

原文翻译：

1. 非洲是一个自然资源丰富的大陆，资源主要未开发利用。因此，概括非洲的负面形象是不公平的。
2. 非洲不是一个同质的国家。非洲有 50 个国家。
3. 努力工作的非洲人正在努力解决粮食、贫困和疾病问题，但这需要国际支持。
4. 非洲是一个有吸引力的商业场所，但需要援助。
5. 非洲人有能力确定自己的需要，但需要国际组织和社区的一致支持。
6. 非洲许多国家正在进行战争。
7. 非洲是一个文化丰富、多样性丰富的地方。它是游客、考古学家等的天堂。

参考答案：

The generalization of the negative image of Africa is unfair because the 50 countries in Africa are rich in natural resources and cultural diversity, and hardworking Africans are struggling to address poverty, diseases and war issues, but wars are ongoing in many countries in Africa, so Africa can be an attractive place for business development and tourism if international concerted support and assistance are provided.

63. Double Blind 双盲关系 #091063

The feature of being “double blind”, where neither patients nor physicians are aware of who receives the experimental treatment, is almost universally trumpeted as being a virtue of clinical trials. Hence, trials that fail to remain successfully double blind are regarded as providing inferior evidential support. The rationale for this view is unobjectionable: double

blinding rules out the potential confounding influences of patient and physician beliefs.

Nonetheless, viewing double blind trial as necessarily superior is problematic. For one, it leads to the paradox that very effective experimental treatments will not be supportable by best evidence. If a new drug were to make even the most severe symptoms of the common cold disappear within seconds, most participants and investigators would correctly identify it as the latest wonder drug and not the control (i.e. placebo) treatment. Any trial testing the effectiveness of this wonder drug will therefore fail to remain double blind. Similar problems arise for treatments, such as exercise and most surgical techniques, whose nature makes them resistant to being tested in double blind conditions. It seems strange that an account of evidence should make priori judgments that certain claims can never be supported by ‘best evidence’. It would be different if the claims at issue were pseudoscientific – untestable. But so far as treatments with large effects go, the claim that they are effective is highly testable and intuitively they should receive greater support from the evidence than do claims about treatments with moderate effects.

原文翻译：

“双盲”的特点，即病人和医生都不知道谁接受了实验治疗，它几乎被普遍吹捧为临床试验的优点。因此，未能成功保持双盲的审判被认为提供了较差的证据支持。这一观点的基本原理是无可非议的：双重盲法排除了病人和医生信念的潜在混淆影响。

尽管如此，将双盲试验视为必然优越是有问题的。首先，它导致了一个悖论：非常有效的实验性治疗并不会得到最佳证据的支持。如果一种新药能使普通感冒最严重的症状在几秒钟内消失，大多数参与者和研究人员会正确地将其识别为最新的特效药，而不是对照组（即安慰剂）治疗。因此，任何测试这种神奇药物有效性的试验都不能保持双盲状态。类似的问题也出现在治疗中，如锻炼和大多数外科手术技术，它们的性质使它们无法在双盲条件下进行测试。这似乎很奇怪，证据的叙述应该做出先验判断，某些主张永远不可能得到“最佳证据”的支持。如果争论中的主张是伪科学——无法验证——那就不同了。但是到目前为止，有较大影响的治疗，声称他们是有效的是高度可检验的，直觉上，他们应该从证据中得到更多的支持比声称有中等影响的治疗。

参考答案：

While trials that fail to remain double blind are regarded as providing inferior evidential support, viewing double blind trial as superior is problematic because it leads to the paradox that very effective experimental treatments will not be supportable by best evidence, but as treatments with large effects go, the claim that they are effective is highly testable, and they should receive support from the evidence than do claims about treatments with moderate effects.

64. Ageing Australia 澳洲老龄化 #091064

In 2005 Japan had the highest median age of all countries in the world, while Australia's population was only moderately aged. Some 50 years ago the demographic situation was quite different, with the median age of Australia's population being seven years older than Japan's.

The ageing of the population is a major issue for Australian policy makers, particularly in regard to the long-term implications for reduced economic growth and the increasing demand for Age Pensions, and health and aged care services. As the population ages, growth in the number of people of working age will slow, while the proportion of people of retirement age will increase.

Sustained population ageing also leads to slowing or negative population growth. While declining population growth in developed countries is welcomed by some environmentalist and social scientists, (EndNote 3) economists tend to agree that population decline brings gloomy economic prospects. In addition to the decrease in the labor supply, the demand side of the economy may be affected through shrinking markets for goods and services.

How quickly this occurs depends on the dynamics of fertility, mortality and overseas migration. While a moderate pace of demographic change allows for gradual adjustment of the economy and policies to the changing population demographics, rapid changes are more difficult to manage. As a result, governments and society as a whole may need to take actions

to address these issues.

One way of applying a degree of perspective to the ageing debate is to compare ageing in Australia with that of other countries. This article examines the population structures in Australia and Japan and the demographic forces that shape the respective populations, both historically and projections for the future.

原文翻译：

2005 年，日本是世界上年龄中值最高的国家，而澳大利亚的人口只有中等年龄。大约 50 年前，澳大利亚的人口状况与日本大不相同，澳大利亚人口的年龄中位数比日本大 7 岁。

人口老龄化是澳大利亚决策者面临的一个重大问题，特别是在对经济增长放缓和对老年养老金、保健和老年护理服务需求增加的长期影响方面。随着人口老龄化，劳动年龄人口的增长将放缓，而退休年龄人口的比例将增加。

持续的人口老龄化也会导致人口增长放缓或负增长。虽然发达国家人口增长下降受到一些环境学家和社会科学家的欢迎，但经济学家倾向于认为人口下降带来黯淡的经济前景。除了劳动力供应的减少，商品和服务市场的萎缩也可能影响到经济的需求方。

这种情况发生的速度取决于生育率、死亡率和海外移民的动态。虽然适度的人口变化可以使经济和政策逐步调整以适应不断变化的人口结构，但迅速的人口变化则比较难以管理。因此，政府和整个社会可能需要采取行动来解决这些问题。

将澳大利亚的老龄化问题与其他国家的老龄化问题进行比较是对老龄化问题进行一定程度的分析的一种方法。这篇文章检视了澳大利亚和日本的人口结构，以及塑造各自人口的人口力量，包括历史和未来的预测。

参考答案：

The aging of the population is still a major issue for Australian policy makers because the growth of working age population will slow but the population of retirement age will increase, and sustained population ageing also leads to slowing or negative population growth, but how quickly this occurs depends on the dynamics of fertility, mortality and overseas migration, so

this article examines the population structures in Australia and Japan and the demographic forces.

65. Greenhouse Gases (Individual Behaviors) 人类行为影响温室气体 #091065

When an individual drives a car, heats a house, or uses an aerosol hair spray, greenhouse gases are produced. In economic terms, this creates a classic negative externality. Most of the cost (in this case, those arising from global warming) are borne by individuals other than the one making the decision about how many miles to drive or how much hair spray to use. Because the driver (or sprayer) enjoys all the benefits of the activities but suffers only part of the cost, that individual engages in more than the economically efficient amount of the activity. In this sense, the problem of greenhouse gases parallels the problem that occurs when someone smokes a cigarette in an enclosed space or litters the countryside with fast-food wrappers. If we are to get individuals to reduce production of greenhouse gases to the efficient rate, we must somehow induce them to act as though they bear all the costs of their actions. The two most widely accepted means of doing this are government regulation and taxation, both of which have been proposed to deal with greenhouse gases.

原文翻译：

当一个人开车、加热房屋或使用气溶胶发胶时，就会产生温室气体。在经济术语中，这造成了典型的负外部性。大部分成本(在这种情况下，由全球变暖引起的成本)是由个人承担的，而不是由决定开车多少英里或使用多少发胶的人来承担。因为司机(或喷雾器)享受活动的所有好处，但只承受部分成本，个人参与的活动超过了经济有效的数量。从这个意义上说，温室气体排放的问题与人们在封闭空间吸烟或在乡村乱扔快餐包装纸的问题类似。如果我们要让人们把温室气体的排放量减少到有效水平，我们必须以某种方式促使他们采取行动，就好像他们要为自己的行动承担所有代价一样。最被广泛接受的两种方式是政府监管和征税，这两种方式都被提议用来处理温室气体。

参考答案：

While an individual's behaviors produce greenhouse gases, this individual enjoys all the benefits but suffers only part of the costs, so we must induce individuals to act as though they bear all the costs of their actions if we want individuals to reduce production of greenhouse gases to the efficient rate, and the two most widely accepted means to deal with greenhouse gases are government regulations and taxation.

66. Greenhouse Gases (Carbon Dioxide) 二氧化碳与温室气体 #091066

1. Carbon dioxide is the most significant of greenhouse gases, and is mostly produced by human activities
2. Carbon dioxide has caused the rise of the global temperature and the sea level
3. Business should take responsibilities to tackle the problems inherited in the business model
4. World Wildlife Fund partners with companies to ensure the entire market move towards a more sustainable future.

原文翻译：

1. 二氧化碳是温室气体中最主要的成分，绝大部分由人类活动产生
2. 二氧化碳造成了地球气温上升和海平面上升等气候现象
3. 企业应该肩负起责任，从改变经营模式做起，应对温室效应
4. 世界野生动物基金会将与企业们合作，确保市场的可持续发展

参考答案：

Mostly produced by human activities, carbon dioxide is the most significant of greenhouse gases and has caused the rise of the global temperature and the sea level, so business should take responsibilities to tackle the problems inherited in the business model, and World Wildlife Fund partners with companies to ensure the sustainability of the entire market.

67. RAS (Royal Agricultural Society) 皇家农业协会 (RAS) #091067

The evolution of the RAS (Royal Agricultural Society) fits into the wider Western trend of promoting nationalism, progress and technology through exhibitory venues, which first became popular in the 1850s. Various types of fairs, from local agricultural shows to Worlds Fairs, were used as instruments of hegemony to support imperialism, to promote burgeoning capitalist endeavors, and to shape class identities, social spaces and public spaces. Visual culture and the art of display became essential in defining aspects of national distinction. Colonial nations in particular, such as Canada and Australia, were attempting to develop distinct national identities to differentiate themselves from British imperial power. Agricultural fairs in North America originated at the beginning of the nineteenth century and were devoted to educating practicing farmers in ways of improving their cultivation of livestock and crops through the use of various technologies.

In 1822, the RAS was created on the premise that was a dire need in Australia for the development of improved farming skills to better support growing urban populations and export markets. Organizations based on agricultural improvement, which were popular in Britain, provided camaraderie as well as political and financial support for their members. Once transferred to the colonies, in this case Australia, they played an integral part in converting and organizing land for colonial purposes.

原文翻译：

皇家农业协会(RAS)的发展符合通过展览场所促进民族主义、进步和技术的更广泛的西方趋势，这在 19 世纪 50 年代首次流行。各种各样的博览会，从当地的农业博览会到世界博览会，都被用作霸权的工具来支持帝国主义，发扬蓬勃发展的资本主义，塑造阶级身份、社会空间和公共空间。视觉文化和展示艺术在定义民族差异方面变得至关重要。特别是殖民国家，如加拿大和澳大利亚，正试图发展独特的民族身份，以区别于英国帝国势力。北美的农业博览会起源于 19 世纪初，致力于教育农民如何通过实践使用各种技术来提高他们的牲畜养殖和农作物种植。

RAS 于 1822 年成立，前提是澳大利亚迫切需要改进农业技术，以更好地支持不断增长的城市人口和出口市场。基于农业发展的组织在英国很受欢迎，为其成员提供了友情支持以及政治和财政支持。一旦这种组织转移到殖民地(比如澳大利亚)，它们就可以为殖民目的土地改造和组织方面发挥综合的作用。

参考答案：

While the evolution of the RAS fits into the wider Western trend of promoting nationalism, progress and technology through exhibitory venues, various types of fairs were used as instruments of hegemony to support imperialism, to promote burgeoning capitalist endeavors, and to shape class identities, social spaces and public spaces, so the RAS was created for the development of improved farming skills to better support growing urban populations and export markets.

68. Primary Carers 主要照顾者 #091068

Slightly less than one in five carers (19%) were primary carers (475,000 people). That is, they were the main carer of a person who was limited in carrying out the core everyday activities of mobility, communication or self-care. Both **primary carers** and the larger group of other carers (close to 2 million) **contribute to the wellbeing of older people and people with disabilities**. However, because they care for people who otherwise would have difficulty carrying out basic everyday activities, there is particular interest in primary carers: in the contribution they make, their wellbeing, labor force experiences, motivations and the support they receive in caring.

Primary carers were more likely than other carers **to be assisting someone who lived in the same household** (81% compared with 76%). As with caring as a whole, the likelihood of being a primary carer increased with age to peak at age 55-64 years, where one in twenty people were primary carers. However, rather than then declining, the likelihood of being a primary carer remained at around this level among the older age groups. Consequently, **primary carers had a somewhat older age profile than other carers**. The median age of primary

666

carers was 52 years, compared with 47 years for other carers.

Primary carers were more likely than other carers to be female (71% compared with 50%) and less likely to be in the labor force (39% compared with 60%). Women not in the labor force were by far the largest single group among primary carers (44%). In contrast, men employed full-time were the largest single group among other carers (25%).

原文翻译：

略低于五分之一的护理员(19%)是初级护理员(47.5 万人)。也就是说，他们是一个人的主要照顾者，而这个人在从事移动、交流或自我照顾等核心日常活动方面受到限制。初级护理员和更多的其他护理员(接近 200 万)都对老年人和残疾人的福祉做出了贡献。然而，因为初级护理员照顾的是那些在其他情况下难以进行基本日常活动的人，初级护理员特别感兴趣的有以下几点：他们所做的贡献、他们的福利、劳动力经验、动机和他们在护理中得到的支持。

初级护理员比其他护理员更有可能帮助住在同一户人家的人(81%，76%)。就整体护理而言，成为初级护理人员的可能性随着年龄的增长而增加，在 55-64 岁时达到峰值，20 人中就有 1 人是初级护理人员。然而，在年龄较大的群体中，成为初级照顾者的可能性并没有下降，而是保持在这一水平。因此，初级护理员的年龄比其他护理员大一些。初级护理员的平均年龄为 52 岁，而其他护理员的平均年龄为 47 岁。

初级护理员中女性的比例高于其他护理员(71%对 50%)，而女性进入劳动力市场的比例低于其他护理员(39%对 60%)。没有工作的女性是目前初级护理人员中最大的单一群体(44%)。相比之下，全职男性是其他护理人员中最大的单一群体(25%)。

参考答案：

While primary carers contribute to the wellbeing of older people and people with disabilities, they were more likely to be assisting someone who lived in the same household, and they had an older age profile than other carers, and they were more likely to be female and less likely to be in the labor force.

69. The Booksellers of Hookham and Carpenter 胡卡姆书店 #091069

THE BOOKSELLERS OF HOOKHAM AND CARPENTER (hereafter referred to only as 'Hookham') were located on New Bond Street in London, and their records span the most politically turbulent decade of the eighteenth-century – the 1790s. Clients who frequented Hookham were primarily from the aristocratic or gentry classes. In fact, of Hookham's total buyers, 22% were aristocracy and 35% (214 customers) of the aristocracy purchased novels. We can also confidently assume that untitled female customers were of gentry income, because their addresses were primarily in London's fashionable 'West End'.

Hookham's ledgers not only reveal a dramatic increase in the proportion of female purchasers of novels by comparison to earlier studies of provincial women, but they also reveal a remarkable increase in the proportion of female purchases of novels authored by females.

Such a marked increase illustrates that Hookham's leisured female customers were able to buy more novels. Furthermore, the fact that these female aristocrats and gentry have accounts under their own name, not their husbands', demonstrates the greater degree of agency and independence that these urban, moneyed women had relative to provincial women. However, because our study does not include an examination of male customers, we are very limited in what claims we can make about whether or not these women behaved according to the cliché that women were the predominant consumers of novels in the eighteenth-century.

Moreover, while more disposable income and leisure time certainly accounts for the significant increase in female purchases of novels authored by women in the 1790s, this increase also strongly suggests a desire on the part of women readers to engage in this politically charged decade. Thus, novel-reading provided women readers with the means through which they were able to participate in the male-dominated world of politics.

原文翻译：

HOOKHAM AND CARPENTER 书店(以下简称“HOOKHAM”)位于伦敦的新邦德街，他们的书店记录跨越了 18 世纪政治最动荡的十年——18 世纪 90 年代。经常光顾 Hookham 的顾客主要来自贵族或绅士阶层。事实上，在 Hookham 的全部买家中，22% 是贵族，并且 35%(214 名客户)的贵族购买了小说。我们也可以很有把握地假设，这些收入颇丰的贵族都是无名的女顾客，因为她们的住址主要是在伦敦时尚的“西区”。

Hookham 的分类帐不仅显示出女性小说购买者的比例与早期对地方女性的研究相比有显著增加，而且还显示出女性购买女性小说的比例显著增加。

如此显著的增长表明，Hookham 悠闲的女性顾客能够购买更多的小说。此外，这些女性贵族和绅士在她们自己的名下而不是在她们丈夫的名下开户的事实表明，这些城市有钱的女性相对于农村女性具有更大程度的自主权和独立性。然而，由于我们的研究没有包括对男性读者的调查，我们所能提出的主张非常有限，因为这是基于“十八世纪女性是小说的主要消费者”的陈词滥调而推断当时女性的行为的。

此外，尽管女性可支配收入和闲暇时间的增加肯定是 18 世纪 90 年代女性小说销量大幅增长的原因，但这种增长也强烈表明，部分女性读者希望参与到这个充满政治色彩的年代。因此，小说阅读为女性读者提供了参与男性主导的政治世界的方法。

参考答案：

While Hookham reveals a remarkable increase in the proportion of female purchases of novels authored by females, the fact that these female aristocrats and gentry have accounts under their own name demonstrates the greater degree of agency and independence that urban women had, and more disposable income and leisure time certainly accounts for the significant increase in female purchases of novels, which suggests a desire on women readers to engage in this politically charged decade.

70. Wright brothers 怀特兄弟 #091070

Orville and Wilbur Wright were brothers living in Dayton, Ohio. The two had started making bicycles during the 1890s and had a successful small business selling their Wright Specials for \$18 each (\$475 in today's green). This experience with building light, strong machines would prove valuable in the coming years after the brothers' interest turned to flight.

Others in the United States were also developing aircraft at the time the Wright brothers started turning their curiosity skyward. Samuel Langley had flown an unmanned steam-powered aircraft in 1896. Octave Chanute and others were flying gliders near Chicago late in the decade as well. But it wasn't until the Wright brothers started working on the matter that the "flying problem" would finally be solved.

Beginning in 1899, the brothers designed and built a series of gliders to test their various ideas on a flying machine. They constructed a wind tunnel that allowed them to test designs without having to build a full-size model. They even built their own gasoline-powered motor for their aircraft.

原文翻译:

奥维尔·赖特和威尔伯·赖特是住在俄亥俄州代顿市的兄弟。他们两人在 19 世纪 90 年代开始生产自行车，并以每辆 18 美元(折合现在的绿色为 475 美元)的价格成功地经营了一家小公司。在兄弟俩的兴趣转向飞行后的几年里，这种制造轻巧、坚固机器的经验将被证明是有价值的。

当莱特兄弟开始将好奇推向天空时，美国的其他人也在开发飞机。Samuel Langley 在 1896 年试飞了一架蒸汽动力的无人驾驶飞机。Octave Chanute 和其他人在这十年后期也曾在芝加哥附近驾驶滑翔机飞行。但直到莱特兄弟开始研究飞机，“飞行问题”才最终得到解决。

从 1899 年开始，兄弟俩设计并制造了一系列滑翔机，以在飞行器上测试他们的各种想法。他们建造了一个风洞，允许他们不建立一个全尺寸模型的情况下测试设计。他们甚至为他们的飞机制造了自己的汽油发动机。

参考答案：

While Wright brothers had started making bicycles and had a successful small business, this experience would prove valuable after their interest turned to flight, and others in the United States were also developing aircraft, but it wasn't until they started working on the matter that the "flying problem" would finally be solved because they designed and built a series of gliders, wind tunnels and gasoline-powered motors to test their various ideas on a flying machine.

71. House Mice 家鼠 #091071

According to new research, house mice (*Mus musculus*) are ideal biomarkers of human settlement as they tend to stow away in crates or on ships that end up going where people go. Using mice as a proxy for human movement can add to what is already known through archaeological data and answer important questions in areas where there is a lack of artifacts, Searle said.

Where people go, so do mice, often stowing away in carts of hay or on ships. Despite a natural range of just 100 meters (109 yards) and an evolutionary base near Pakistan, the house mouse has managed to colonize every continent, which makes it a useful tool for researchers like Searle.

Previous research conducted by Searle at the University of York supported the theory that Australian mice originated in the British Isles and probably came over with convicts shipped there to colonize the continent in the late 18th and 19th centuries.

In the Viking study, he and his fellow researchers in Iceland, Denmark and Sweden took it a step further, using ancient mouse DNA collected from archaeological sites dating from the 10th to 12th centuries, as well as modern mice.

He is hoping to do just that in his next project, which involves tracking the migration of mice and other species, including plants, across the Indian Ocean, from South Asia to East Africa.

原文翻译：

根据一项新的研究，家鼠(小家鼠)是人类定居的理想标志生物，因为它们往往会被藏在板条箱或船上，最终人们去哪里，它们就去哪里。

Searle 说，用老鼠作为人类活动的标志物可以增加通过考古数据已经知道的东西，并回答那些缺乏考古数据的重要问题。

人们走到哪里，老鼠就到哪里，它们经常藏在干草车或船上。尽管家鼠的自然活动范围只有 100 米(109 码)，而且其进化基地在巴基斯坦附近，但家鼠已经成功地在每一个大陆上进行殖民活动，这使得它成为 Searle 等研究人员的有用工具。

约克大学的 Searle 先前进行的研究支持这样一种理论，即澳大利亚老鼠起源于不列颠群岛，可能是在 18 世纪末和 19 世纪随流放犯一起来到澳大利亚殖民这块大陆的。

在维京研究中，Searle 和来自冰岛、丹麦和瑞典的同事们把实验推进得更进了一步，他们使用了从 10 世纪到 12 世纪的考古遗址中收集的古代老鼠 DNA，以及现代老鼠的 DNA。

他希望在他的下一个项目中做到这一点，这个项目包括追踪老鼠和包括植物在内的其他物种从南亚穿越印度洋到东非的迁徙。

参考答案：

House mice can be used as ideal biomarkers of human settlement to add to archaeological data and answer important questions where there is lack of artifacts, and the house mouse has managed to colonize every continent, so previous research supported the theory that Australian mice originated in the British Isles, and using ancient mouse DNA collected from archaeological sites as well as modern mice can track the migration of mice.

72. The History of the Khoikhoi in South Africa 南非部落 #091072

In around 2300 BP (Before Present), hunter gatherers called the San acquired domestic stock in what is now modern day Botswana. Their population grew, and spread throughout the Western half of South Africa. They were the first pastoralists in southern Africa, and called themselves Khoikhoi (or Khoe), which means 'men of men' or 'the real people'. This name was chosen to show pride in their past and culture. The Khoikhoi brought a new way of life to South Africa and to the San, who were hunter gatherers as opposed to herders. This led to misunderstandings and subsequent conflict between the two groups.

The Khoikhoi were the first native people to come into contact with the Dutch settlers in the mid-17th century. As the Dutch took over land for farms, the Khoikhoi were dispossessed, exterminated, or enslaved and therefore their numbers dwindled. The Khoikhoi were called the 'Hottentots' by European settlers because the sound of their language was so different from any European language, and they could not pronounce many of the words and sounds.

原文翻译:

大约在距今 2300 年之前，被称为 San 的狩猎者们在现在的博茨瓦纳安顿了下来。他们的人口不断增长，遍布南非的西半部。他们是非洲南部最早的游牧民族，自称为 Khoikhoi(或 Khoe)，意思是“人中之人”或“真正的人”。选择这个名字是为了显示他们对历史和文化的自豪感。Khoikhoi 人给南非和 San 带来了一种新的生活方式，San 是狩猎采集者，而不是牧人。这导致了两个群体之间的误解和随后的冲突。

Khoikhoi 是 17 世纪中期第一批接触荷兰殖民者的土著居民。随着荷兰人接管了他们的土地用做农场，Khoikhoi 被驱逐、消灭或奴役，因此他们的人数减少了很多。Khoikhoi 被欧洲殖民者称为“霍顿托特人”，因为 Khoikhoi 的语言发音与任何欧洲语言都不同，很多单词和发音欧洲人都不会发音。

参考答案:

While hunter gatherers called the San acquired domestic stock in Botswana, their population grew and spread throughout the Western half of South Africa and called themselves Khoikhoi,

673

and the Khoikhoi brought a new way of life to South Africa and to the San, so this led to misunderstandings and subsequent conflict between the two groups, but the Khoikhoi were dispossessed, exterminated, or enslaved and their numbers dwindled as the Dutch took over land for farms.

73. Compulsory Reburial of Human Remains 残骸掩埋 #091073

In April 2008 the British government announced that, henceforth, all human remains archaeologically excavated in England and Wales should be reburied after a two-year period of scientific analysis. Not only would internationally important prehistoric remains have to be returned to the ground, removing them from public view, but also there would no longer be any possibility of long-term scientific investigation as new techniques and methods emerged and developed in the future. Thus, while faunal remains, potsherds, artefacts and environmental samples could be analyzed and re-analyzed in future years, human remains were to be effectively removed from the curation process. Archaeologists and other scientists were also concerned that this might be the first step towards a policy of reburying all human remains held in museum collections in England and Wales including prehistoric, Roman, Saxon, Viking and Medieval as well as more recent remains.

原文翻译：

2008年4月，英国政府宣布，从今以后，所有在英格兰和威尔士出土的人类遗骸将在经过两年的科学分析后重新埋葬。不仅国际上重要的史前遗迹必须从公众视野中移除并埋入土地里，而且随着未来新技术和方法的出现和发展，也不再有任何对这些遗迹有任何长期科学调查的可能性。因此，虽然动物遗骸、陶器碎片、人工制品和环境样本可以在未来几年进行反复分析，但人类遗骸将有效地从保护过程中移除。考古学家和其他科学家也担心，这可能只是重新埋葬英格兰和威尔士博物馆收藏的所有人类遗骸政策的第一步，包括史前的、罗马的、撒克逊的、维京人的、中世纪的以及更近期的遗骸。

参考答案：

While the British government announced that all human remains archaeologically excavated in England and Wales should be reburied after a two-year period of scientific analysis, human remains were to be effectively removed from the curation process, and archaeologists and other scientists were also concerned that this might be the first step towards a policy of reburying all human remains held in museum collections.

74. South Euclid (Ohio) School Bullying Project 反霸凌 #091074

Spurred by the sense that disorderly behavior among students in South Euclid was increasing, the school resource officer (SRO) reviewed data regarding referrals to the principal's office. He found that the high school reported thousands of referrals a year for bullying and that the junior high school had recently experienced a 30 percent increase in bullying referrals. Police data showed that juvenile complaints about disturbances, bullying, and assaults after school hours had increased 90 percent in the past 10 years.

The SRO worked in close collaboration with a social worker and the university researcher. They coordinated a Response Planning Team comprising many stakeholders that was intended to respond to each of the areas identified in the initial analysis. Environmental changes included modifying the school schedule and increasing teacher supervision of hotspots. Counsellors and social workers conducted teacher training courses in conflict resolution and bullying prevention. Parent education included mailings with information about bullying, an explanation of the new school policy, and a discussion about what could be done at home to address the problems. Finally, student education included classroom discussions between homeroom teachers and students, as well as assemblies conducted by the SRO. The SRO also opened a substation next to a primary hotspot. The Ohio Department of Education contributed by opening a new training center to provide a non-traditional setting for specialized help.

The results from the various responses were dramatic. School suspensions decreased 40 percent. Bullying incidents dropped 60 percent in the hallways and 80 percent in the gym area.

Follow-up surveys indicated that there were positive attitudinal changes among students about bullying and that more students felt confident that teachers would take action when a problem arose. Teachers indicated that training sessions were helpful and that they were more likely to talk about bullying as a serious issue. Parents responded positively, asking for more information about the problem in future mailings. The overall results suggest that **the school environments were not only safer; but that early intervention was helping at-risk students succeed in school** (South Euclid (Ohio) Police Department, 2001).

原文翻译：

由于意识到南欧几里得地区学生的无序行为正在增加，学校资源官员(SRO)审查了有关转到校长办公室的数据。他发现，这所高中每年报告了数千起欺凌事件，而这所初中最近被报告的欺凌事件增加了 30%。警方数据显示，在过去 10 年里，青少年对骚扰、欺凌和课外袭击的投诉增加了 90%。

SRO 与一名社会工作者和大学研究人员密切合作。他们协调了一个反应规划小组，该小组由许多利益攸关方组成，旨在对最初分析中确定的每个领域作出反应。环境变化包括修改课程表和增加热点地区的教师监督。顾问和社会工作者举办了解决冲突和预防欺凌的教师培训班。家长教育包括邮寄有关欺凌的信息，解释新的学校政策，以及讨论如何在家里解决这些问题。最后，学生教育包括班主任和学生之间的课堂讨论，以及 SRO 组织的集会。SRO 还在主要热点地区附近开放了一个分部。俄亥俄州教育部的贡献是开设了一个新的培训中心，为不寻常的情况提供专门的帮助。

这些应对的效果是巨大的。学校停课率下降了 40%。走廊里的欺凌事件减少了 60%，体育馆区域的欺凌时间减少了 80%。后续调查显示，学生对欺凌行为的态度发生了积极的变化，更多的学生对教师在问题出现后会采取行动感到有信心。老师们表示，培训课程是有帮助的，他们更倾向于把恃强凌弱作为一个严重的问题来讨论。家长们积极回应，要求在以后的邮件中提供更多关于这个问题的信息。总体结果表明，学校环境不仅更安全；但是这种早期干预帮助了有危险的学生在学校取得成功(南欧几里德(俄亥俄州)警察局，2001 年)。

参考答案:

While the school resource officer (SRO) found that the high school reported thousands of referrals a year for bullying, the SRO worked in close collaboration with a social worker and the university researcher, so they coordinated a Response Planning Team comprising many stakeholders that was intended to respond to each of the areas identified, which means the school environments were not only safer; but that early intervention was helping at-risk students succeed in school

75. Geothermal Energy 地热能 #091075

What is the solution for nations with increasing energy demands, hindered by frequent power cuts and an inability to compete in the international oil market? For East Africa at least, experts think geothermal energy is the answer. More promising still, the Kenyan government and international investors seem to be listening. This is just in time according to many, as claims of an acute energy crisis are afoot due to high oil prices, population spikes and droughts.

Geothermal energy works by pumping water into bedrock, where it is heated and returns to the surface as steam which is used directly as a heat source or to drive electricity production.

Source: Energy Information Administration, Geothermal Energy in the Western United States and Hawaii.

Currently over 60% of Kenya's power comes from hydroelectric sources but these are proving increasingly unreliable as the issue of seasonal variation is intensified by erratic rain patterns. Alternative energy sources are needed; and the leading energy supplier in Kenya, Kenya Electricity Generating Company (KenGen), hopes to expand its geothermal energy supply from 13% to 25 % of its total usage by 2020. The potential of geothermal energy in the region was first realized internationally by the United Nations Development Program, when geologists observed thermal anomalies below the East African Rift system. Locals have been utilizing this resource for centuries; using steam vents to create the perfect humidity for

greenhouses, or simply to enjoy a swim in the many natural hot lakes.

Along the 6000 km of the rift from the Red Sea to Mozambique, geochemical, geophysical and heat flow measurements were made to identify areas suitable for geothermal wells. One area lies next to the extinct Olkaria volcano, within the Hell's Gate National Park, and sits over some of the thinnest continental crust on Earth.

This is a result of the thinning of the crust by tectonic stretching, causing hotter material below the Earth's surface to rise, resulting in higher temperatures. This thin crust was ideal for the drilling of geothermal wells, reaching depths of around 3000 m, where temperatures get up to 342°C, far higher than the usual temperature of 90°C at this depth. Water in the surrounding rocks is converted to steam by the heat. The steam can be used to drive turbines and produce electricity.

原文翻译：

对于那些能源需求不断增加、频繁断电、无力在国际石油市场竞争的国家，该如何解决？至少对东非来说，专家们认为地热能是解决问题的答案。更有希望的是，肯尼亚政府和国际投资者似乎都在倾听。许多人认为，这正是时候采用这个解决方案，因为高油价、人口激增和干旱正导致严重的能源危机。

地热能的工作原理是把水抽到基岩中，在那里加热后以蒸汽的形式返回地表，直接用作热源或驱动电力生产。来源：能源信息管理局，美国西部和夏威夷地热能。

目前，肯尼亚超过 60% 的电力来自水力发电，但随着降雨模式的不稳定加剧了季节性变化，水力发电越来越不可靠。（我们）需要替代能源；肯尼亚的主要能源供应商，肯尼亚发电公司(KenGen)希望到 2020 年将其地热能供应从占总使用量的 13% 增加到 25%。当地质学家观测到东非裂谷系统下的地热异常时，联合国开发计划署在国际上第一次认识到该地区地热能的潜力。几个世纪以来，当地人一直在利用这种资源；使用蒸汽出口为温室创造完美的湿度，或简单地享受在许多天然的热湖游泳。

沿着从红海到莫桑比克的 6000 公里裂谷，进行了地球化学、地球物理和热流测量，以英澳新三国（同一国家任意三所院校）

确定适合地热井的地区。在地狱之门国家公园内，其中一个地区紧邻已熄灭的奥卡利亚火山，位于地球上最薄的大陆地壳上。

这是由于构造拉伸使地壳变薄，导致地表以下较热的物质上升，导致温度升高的结果。这种薄地壳是钻地热井的理想材料，地热井深达 3000 米，温度高达 342°C，远高于该深度通常的 90°C 温度。岩石周围的水经过加热就变成了蒸汽。蒸汽可以用来驱动涡轮机和发电。

参考答案：

With increasing energy demands in East Africa, experts think geothermal energy is the answer, which works by pumping water into bedrock where it is heated and returns to the surface as steam which is used directly as a heat source or to drive electricity production, and Kenya hopes to expand its geothermal energy supply by 2020, while one area sits over some of the thinnest continental crust on Earth.

76. Australian indigenous food 澳洲本地食物 #091076

In its periodic quest for culinary identity, Australia automatically looks to its indigenous ingredients, the foods that are native to this country. 'There can be little doubt that using an indigenous product must qualify a dish as Australian notes Stephanie Alexander. Similarly, and without qualification, states that 'a uniquely Australian food culture can only be based upon foods indigenous to this country', although, as Craw remarks, proposing Australian native foods as national symbols relies more upon their association with 'nature' and geographic origin than on common usage. Notwithstanding the lack of justification for the premise that national dishes are, of necessity, founded on ingredients native to the country—after all, Italy's gastronomic identity is tied to the non-indigenous tomato, Thailand^ to then on-indigenous chili—the reality is that Australians do not eat indigenous foods in significant quantities. The exceptions are fish, crustaceans and shellfish from oceans, rivers and lakes, most of which are unarguably unique to this country. Despite valiant and well-intentioned

679

efforts today at promoting and encouraging the consumption of native resources, bush foods are not harvested or produced in sufficient quantities for them to be a standard component of Australian diets, nor are they generally accessible. Indigenous foods are less relevant to Australian identity today than lamb and passionfruit, both initially imported and now naturalized.

原文翻译：

澳大利亚在不断寻求烹饪特色的过程中，自然而然地就会去寻找本国的食材，也就是本国的食物。斯蒂芬妮·亚历山大说：“毫无疑问，一道菜必须使用本土产品才能称得上是澳大利亚风味。”同样地，没有任何限定，他写道“澳大利亚独特的饮食文化只能建立在本国本土食物的基础上”，尽管，正如 Craw 所说，“澳大利亚本土食物作为国家的象征更多的是依赖于它们与‘自然’和地理起源的联系，而不是通用用法。”尽管缺乏足够的理由认为，国菜必然是建立在本土食材的基础上的——毕竟，意大利的美食特征是与非本土的泰国番茄和当时的本土辣椒联系在一起的——但事实是，澳大利亚人并不会吃很多本土食物。除了来自海洋、河流和湖泊的鱼类、甲壳纲动物和贝类，其中大多数无疑是这个国家所独有的。尽管今天英勇而善意的努力促进和鼓励对本土资源的消费，丛林食物并没有收获或生产足够的数量使它们成为澳大利亚饮食的标准组成部分，而且他们也很难获得。如今，相比羊肉和百香果这两种最初进口现在已经归化的食物来说，澳大利亚本土的食物反而没有和与澳大利亚身份相关有太大关联。

参考答案：

While a uniquely Australian food culture can only be based upon foods indigenous to this country, there is lack of justification for the premise that national dishes are founded on ingredients native to the country, and Australians do not eat indigenous foods in significant quantities because bush foods are not harvested or produced in sufficient quantities, so indigenous foods are less relevant to Australian identity than lamb and passionfruit, both initially imported and now naturalized.

77. Office environment 工作环境 #091077

The notion that office space has a role in promoting or inhibiting performance is backed up by solid research. A recent study conducted by Harvard University and Massachusetts General Hospital showed that improvements to the physical surroundings of workers impacted on productivity not just because the working environment was more attractive, but because the changes made employees feel cared for. A Swedish research paper revealed a strong link between the type of office an employee worked in and their overall job satisfaction and health. Various findings have emerged as a result of studies such as this. Pot plants and greenery can apparently have a real impact on psychological well-being. Those who work in a private room tend to be in better health than workers based in open-plan offices.

Sufficient light can reduce sickness among workers and increase productivity, and an attractive office can make workers feel more cared for and therefore more loyal to their company. Most of these points make good rational sense. But some companies aren't content simply to increase the health, productivity and contentment of their employees. Pioneers such as Google, Walt Disney and Dyson have tried to create offices that will do everything from promoting collaboration between workers to stimulating their creative juices. "Environment, both physical and cultural, can make or break creativity," says Kursty Groves, author of I Wish I Worked There! A look inside the most creative spaces in business. Stimulating spaces expose the mind to a variety of stimuli - planned or random - In order to encourage people to think differently. Reflective spaces promote the filtering of information into the brain slowing it to make connections. An environment which encourages a team to build trust and to play freely is an essential ingredient for innovation.

原文翻译：

办公空间在促进或抑制绩效方面发挥作用的观点得到了可靠研究的支持。哈佛大学(Harvard University)和马萨诸塞州综合医院(Massachusetts General Hospital)最近进行的一项研究表明, 员工周围的物理环境的改善对生产率的影响不仅是因为这样的工作环境更有吸引力, 还因为这种改变让员工感到受到了关心。一份瑞典的研究报告显示,

681

员工工作的办公室类型与他们的整体工作满意度和健康状况有密切关系。各种各样的发现都是这样的研究的结果。盆栽植物和绿色植物显然对心理健康有真正的影响。那些在私人办公室工作的人往往比在开放式办公室工作的人更健康。

充足的光线可以减少员工的疾病，提高工作效率，一个有吸引力的办公室可以让员工感到更受关心，从而对公司更忠诚。这些观点中的大多数都很有道理。但有些公司并不仅仅满足于提高员工的健康水平、工作效率和满意度。谷歌、华特·迪士尼和戴森等先锋公司已尝试创建能够发挥各种作用的办公室，从促进员工之间的合作到激发他们的创造力。《我希望我在那里工作》的作者 Kursty Groves 说：“物理和文化环境，可以成就或摧毁创造力。看看最有创意的商业空间。刺激空间将大脑暴露于各种刺激——计划的或随机的——以鼓励人们以不同的方式思考。反射性空间促进信息过滤进入大脑，减缓大脑建立联系的速度。一个鼓励团队建立信任和自由发挥的环境是创新的基本要素。

参考答案：

While the notion that office space has a role in promoting or inhibiting performance is backed up by solid research, improvements to the physical surroundings of workers impacted on productivity, but some companies aren't content simply to increase the health, productivity and contentment of their employees because pioneers have tried to create offices that will do everything from promoting collaboration between workers to stimulating their creative juices.

78. Paleolithic people 旧石器时代祖先 #091078

The ways of life Upper Paleolithic people are known through the remains of meals scattered around their hearths, together with many tools and weapons and the debris left over from their making. The people were hunter-gathers who lived exclusively from what they could find in nature without practicing either agriculture or herding. They hunted the bigger herbivores, while berries, leaves, roots, wild fruit and mushrooms probably played a major role in their diet. Their hunting was indiscriminate; perhaps because so many animals were about they did not need to spare pregnant females or the young. In the cave of Enlène, for example, many

bones of reindeer and bison fetuses were found. Apparently, upper Paleolithic people hunted like other predators and killed the weakest prey first. They did, however, sometimes concentrate on salmon runs and migrating herds of reindeer. Contrary to popular beliefs about cave man, **upper Paleolithic people did not live deep inside caves**. They rather **chose the foot of cliffs**, especially when an overhang provided good shelter. On the plains and in the valleys, they used tents made from hides of the animals they killed. At times, on the great Russian plains, they built huts with huge bones and tusks collected from skeletons of mammals.

Men hunted mostly with spears, the bow and arrow were probably not invented until the Magdalenian period that came at the end of the Upper Paleolithic. **Tools and weapons**, made out of wood or reindeer antlers, **often had flint cutting edges**. Flint knappers were skillful and traditions in flint knapping were passed on for thousands of years. This continuity means that **they must have been carefully thought how to find good flint modules and how to knap them** in order to make knives, burins (chisel-like tools) or scrapers, which could be used for various purposes.

原文翻译：

我们是通过散落在旧石器时代晚期人的炉边的食物残渣，以及许多工具和武器，以及他们制造的残骸来了解他们的生活方式的。这些人是狩猎聚集者，他们只生活在他们能在大自然中找到的东西上，不从事农业或放牧。它们捕食较大的食草动物，浆果、树叶、树根、野生水果和蘑菇可能是它们的主要食物。它们不分青红皂白地捕猎；也许是因为有这么多的动物在附近，所以它们不需要放过怀孕的雌性或幼仔。例如，在 Enlène 的洞穴里发现了许多驯鹿和野牛胎儿的骨头。显然，旧石器时代晚期的人们像其他掠食者一样狩猎，首先杀死最弱小的猎物。然而，他们有时也会专注于鲑鱼的洄游和驯鹿的迁徙。与人们普遍认为的穴居人相反，旧石器时代晚期的人们并没有生活在洞穴深处。它们靠近悬崖的山脚，特别是当悬垂处提供了很好的庇护时。在平原和山谷里，他们用他们杀死的动物的毛皮做帐篷。当时，在俄罗斯大平原上，他们用从哺乳动物骨骼中采集的巨大骨骼和象牙建造小屋。

男人大多用长矛狩猎，弓箭可能是直到旧石器时代晚期的马格达莱纳纪才发明出来的。用木头或驯鹿的鹿角制作的工具和武器通常都有燧石切割的边缘。燧石使用者有熟练的技艺，而且和燧石的使用延续千年。这种连续性意味着他们必须仔细考虑如何找到好的燧石模块和如何折断他们，以制造刀具，bruins (凿子一样的工具)或刮刀，可用于各种目的。

参考答案：

While the people were hunter-gathers who lived exclusively from what they could find in nature without practicing either agriculture or herding, Upper Paleolithic people did not live deep inside caves but chose the foot of cliffs, and men hunted mostly with spears and tools and weapons often had flint cutting edges, which means they must have been carefully thought how to find good flint modules and how to nap them for various purposes.

79. At-risk Students 边缘学生 #091079

参考答案：(Based on students' recall.)

While it may be too late to save those students who have dropped out of school, it is possible to save those at-risk students who may fail to get their high school diplomas, and online teaching makes it possible for them.

80. 100-year Life Expectancy 100 年寿命 #091080

1. Our life expectancy has expanded at a steady rate of over two years every decade which means that if you are 20 years old today, you have a 50% chance of reaching 100.
2. With the expanding life span, it is becoming impossible for people's savings to fund years of decent retirement.
3. Gratton and Scott bring up some new ideas. People should keep updating their knowledge after retirement or develop a new social circle.
4. We should make recreation into "re-creation."

原文翻译：

1. 我们的预期寿命每十年就会有两年以上的稳定速度增长，这意味着如果你现在 20 岁，你有 50% 的机会活到 100 岁。
2. 随着寿命的延长，人们的储蓄越来越不可能支撑体面的退休生活。
3. Gratton 和 Scott 提出了一些新的想法。人们应该在退休后不断更新自己的知识或发展新的社交圈。
4. 我们应该把娱乐变成“再创造”。

参考答案：

As our life expectancy has expanded, it is becoming impossible for people's savings to fund years of decent retirement, and Gratton and Scott bring up some new ideas that people should keep updating their knowledge after retirement or develop a new social circle, so we should make recreation into "re-creation."

81. Nutrition science 营养科学 #091081

Most of the time when I embark on such an investigation, it quickly becomes clear that matters are much more complicated and ambiguous — several shades grayer — than I thought going in. Not this time. The deeper I delved into the confused and confusing thicket of nutritional science, sorting through the long-running fats versus carb wars, the fiber skirmishes and the raging dietary supplement debates, the simpler the picture gradually became. I learned that in fact **science knows a lot less about nutrition than you would expect** — that in fact **nutrition science is**, to put it charitably, **a very young science. It's still trying to figure out exactly what happens in your body** when you sip a soda, or what is going on deep in the soul of a carrot to make it so good for you, or why in the world you have so many neurons — brain cells! — in your stomach, of all places. It's a fascinating subject, and someday the field may produce definitive answers to the nutritional questions that concern us, but — as nutritionists themselves will tell you — they're not there yet. Not even close. **Nutrition science**, which after all only got started less than two hundred years ago, is today

approximately where surgery was in the year 1650 – very promising, and very interesting to watch, but are you ready to let them operate on you? I think I'll wait awhile.

原文翻译：

大多数时候，当我着手进行这样的调查时，很快就会发现事情比我当初想象的要复杂得多、模棱两可得多——不是非黑即白的。这次则不同。我对营养科学这个令人困惑的错综复杂的领域钻研得越深，对脂肪与碳水化合物的长期争论、纤维之争和膳食补充剂的激烈争论进行梳理后，情况变得简单。我了解到，事实上科学对营养的了解比你想象的要少得多——事实上，说得好听点，营养科学是一门非常年轻的科学。它仍然在试图弄清楚当你喝苏打水时，你身体里究竟发生了什么，或者胡萝卜的灵魂深处发生了什么使它对你这么有好处，或者为什么世界上有这么多神经元——脑细胞！-在你的胃里，而不是其他地方。这是一个令人着迷的话题，某天这个领域可能会对我们所关心的营养问题给出明确的答案，但是——正如营养学家自己会告诉你的那样——他们还没到那个地步。甚至没有接近。营养科学毕竟只有不到两百年的发展历史，今天的营养科学差不多相当于1650年的外科手术——很有前途，也很有趣，但你准备好让他们给你做手术了吗？我想我还是等一会儿吧。

参考答案：

Science knows a lot less about nutrition than we would expect, and nutritionists are still trying to figure out exactly what happens in your body because nutrition science is a very young science, but nutrition science is very promising and interesting to watch.

82. Pre-service teachers 预备教师 #091082

1. Each course has a specific syllabus that highlights specific technologies required.
2. Some teachers know how to integrate technologies while some others don't.
3. There will be instructors helping pre-service teachers learn how to integrate technology and experiences in class, and to encourage pre-service teachers to think about the integration, which always allows them to learn online anytime.

686

原文翻译：

- 1.每门课程都有一个特定的教学大纲，强调了所需的特定技术。
- 2.一些老师知道如何整合技术，而另一些则不知道。
- 3.将会有导师帮助预备教师学习如何在课堂上整合技术和经验，并鼓励预备教师思考如何整合，这始终使他们可以随时在线学习。

参考答案：(Based on students' recall.)

While each course has a specific syllabus to highlight specific technologies required, some teachers know how to integrate technologies while some others don't, but there will be instructors helping pre-service teachers learn how to integrate technology and experiences in class, which allows them to learn online anytime.

83. Benefit of Honey to athletes 蜂蜜对运动员的好处 #091083

[PARAGRAPH 1] In order to have a competitive edge, athletes often use drugs with high athletic performance.

[PARAGRAPH 2] The National Honey Board recently found that honey has the same functions but less negative impact. This clinical trial is the third in a series of studies focusing on the use of honey by athletes. The first study (involving 71 subjects) determined that honey has a milder effect on blood sugar than other popular forms of carbohydrate gel.

[PARAGRAPH 3] The second study in the series (with 39 weight trained subjects) investigated the combination of honey with a protein supplement and suggested that honey speeds muscle recovery after a workout.

原文翻译：

[第1段]为了获得竞争优势，运动员经常使用运动性能高的药物。

[第2段]国家蜂蜜委员会最近发现，蜂蜜具有相同的功能，但负面影响较小。这项临床试验是一系列关注运动员使用蜂蜜的研究中的第三项。第一项研究(涉及71名受试者)

687

确定蜂蜜对血糖的影响比其他常见形式的碳水化合物凝胶更温和。

[第3段]该系列的第二项研究(39名体重训练对象)调查了蜂蜜与蛋白质补充剂的组合,并提出蜂蜜能加速锻炼后肌肉的恢复。

参考答案:

While many athletes often use drugs with high athletic performance to have a competitive edge, the National Honey Board recently found that honey can enhance performance with a milder effect on blood sugar than other popular forms of carbohydrate gel, and honey can speed up the muscle recovery after a workout when combined with a protein supplement.

84. 婴儿模仿行为 #091084

Contrary to popular belief, babies under a few months don't grin at you because they're copying your own smile, according to new research.

Many studies have indicated that from birth, infants imitate the behaviors and facial expressions of the adults around them. However, a team of Australian, South African and British researchers have released a study this week that refutes this widespread belief.

"Numerous studies from the 1980s and 90s indicated no imitation by newborns, while others claimed it was there," says Virginia Slaughter, a biologist at the University of Queensland and co-author of the study.

"We wanted to clear up the confusion because the 'fact' that newborns imitate is widely cited, not just in the fields of psychology, neuroscience and pediatrics, but also in popular sources for parents."

The international research team, led by Janine Ostenbroek, a psychologist at the University of York in the UK, exposed more than 100 infants to a broad range of gestures and recorded their responses at one, two, six and nine weeks of age.

The gestures included social cues like adults poking their tongues out, frowning or grinning, as well as non-social cues such as pointing or opening a box.

The findings showed **no link between behaviors exhibited by babies in their first few months and the gestures they were exposed to. The babies were just as likely to exhibit gestures they had never seen before as repeat ones they had.**

For instance, babies stuck their tongues out just as frequently if they were being exposed to pointing or opening a box, rather than anything to do with mouths or tongues.

原文翻译：

一项最新研究表明，几个月以下的宝宝不会对你开怀大笑，因为他们在模仿自己的笑容，这与之前人们普遍认为的相反。

许多研究表明，婴儿从出生起就会模仿周围成年人的行为和面部表情。然而，一个由澳大利亚、南非和英国研究人员组成的研究小组本周发表的一项研究驳斥了这一普遍看法。

“20 世纪 80 年代和 90 年代的大量研究表明新生儿没有模仿行为，而其他人则声称新生儿确实有模仿行为，”该研究的合著者、昆士兰大学生物学家弗吉尼亚·斯劳特(Virginia Slaughter)说。

“我们想要澄清这种困惑，因为新生儿模仿的‘事实’被广泛引用，不仅在心理学、神经科学和儿科学领域，也在父母们的流行资料中被广泛引用。”

由英国约克大学(University of York)心理学家简宁·斯特布罗克(Janine Ostenbroek)领导的国际研究小组，让 100 多名婴儿接触各种手势，并记录他们在 1 周、2 周、6 周和 9 周大的时候的反应。

这些手势包括社交暗示，如成年人伸出舌头、皱眉或露齿而笑，以及非社交暗示，如指向或打开盒子。

研究结果显示，婴儿在头几个月所表现出的行为与他们所接触到的手势之间没有联系。这些婴儿表现出他们以前从未见过的手势的可能性和重复出现的手势的可能性一样大。

例如，当婴儿指向或打开盒子时，他们伸出舌头的频率是一样的，而不是与嘴或舌头有关的任何事情。

参考答案：

While many studies have indicated that infants imitate the behaviors and facial expressions of the adults around them, a study this week refutes this widespread belief, stating that there is no link between behaviors exhibited by babies in their first few months and the gestures they were exposed to, and the babies were just likely to exhibit gestures they had never seen before as repeat ones they had.

85. Teacher's planning 备课 #091085

1. Planning is the key aspects of effective teaching, even though some experienced teachers may appear to deliver flawless classes without detailed preparation, it is in fact the result of planning from previous years...
2. There are two major reasons for planning: confidence developed in teachers help them deal with difficult or unexpected situation...
3. Another reason is that the desirable teaching approach actually occurs ...

691

derived from the picture of an object whose name starts with the relevant sound. The alphabetic script is simple enough to learn quickly, without the years of dedicated training required to master writing systems such as cuneiform or Egyptian hieroglyphs. Specialized schooling was unnecessary, and literacy was therefore disengaged from the institutional context of palaces and temples where the traditional scripts continued to be used. The alphabet suited the needs of long-distance merchants who needed to be able to record their business affairs on the go and who, for reasons of confidentiality and money, often preferred to write themselves rather than employ a specialist scribe. As the script could easily be used to record any language, it was, in the course of the first millennium BC, adapted for Aramaic, Hebrew, Greek, Phrygian, Lydian, Etruscan and Latin, to name but a few.

原文翻译：

他们的贸易网络使腓尼基人富有，但也使东西方之间的文化交流和转移以一种前所未有的方式进行：最重要的是字母表的传播，它被广泛采用在整个地中海。腓尼基字母是一种由 22 个符号组成的书写系统，每个符号只代表一个声音(音素)。“字母表”一词源于字母表中前两个符号的名称，aleph (“牛”) beit (“房子”)：这些名称也反映了字母的形状，每个名称都来自于一个物体的图片，该物体的名称以相关的声音开头。字母书写很简单，学起来很快，不需要经过多年的专门训练就能掌握楔形文字或埃及象形文字等书写系统。专业教育是不必要的，因此，读写能力与宫殿和寺庙的制度环境脱节，在那里，传统的文字继续使用。这种字母表适合长途商人的需要，他们需要能够记录他们在路上的商业事务，而且出于保密和金钱的原因，他们通常更愿意自己书写，而不是聘请专业的抄写员。由于这种文字可以很容易地用来记录任何语言，在公元前一千年，它被改编为亚拉姆语、希伯来语、希腊语、弗里吉亚语、吕底亚语、伊特鲁里亚语和拉丁语，仅列举了几个例子。

参考答案：

The most significant was the spread of the alphabetic script which was adopted all over the Mediterranean, and the Phoenician alphabet is a writing system consisting of only 22 signs

representing exactly one sound (phoneme) each, but the alphabetic script is simple enough to learn quickly, which means that the alphabet suited the needs of long-distance merchants.

91. Modern Art 现代艺术 #091091

Broadly speaking, there are two different ways of thinking about modern art, or two different versions of the story. One way is to view art as something that can be practiced (And though of) as an activity radically separate from everyday life or worldly concerns. From this point of view, art is said to be “autonomous” from society – that is, it is believed to be self-sustaining and self-referring. One particularly influential versions of this story suggest that modern art should be viewed as process by which features extraneous to a particular branch of art would be progressively eliminated, and painters or sculptors would come to concentrate on problems specific to their domain. Another way of thinking about modern art is to view it as responding to the modern world, and to see modern artists immersing themselves in the conflicts and challenges of society. That is to say, some modern artists sought ways of conveying the changing experiences generated in European by the twin processes of commercialization (the commodification of everyday life) and urbanization. From this point of view, modern art is a way of reflecting on the transformation that created what we call, in a sort of shorthand, “modernity”.

原文翻译：

推而广之，对现代艺术有两种不同的思考方式，或者说有两种不同的故事版本。一种方法是把艺术看作是一种可以实践的东西（尽管是），一种与日常生活或世俗事务完全分离的活动。从这一点来看，艺术被说成是脱离社会而“自主”的--也就是说，它被认为是自我维持和自我指涉的。这个故事的一个特别有影响力的版本提出，现代艺术应该被看作是一个过程，在这个过程中，与某一特定艺术分支无关的特征将逐渐被消除，画家或雕塑家将开始专注于他们领域特有的问题。对现代艺术的另一种思考方式是把它看作是对现代世界的回应，看到现代艺术家沉浸在社会的冲突和挑战中。也就是说，一些现代艺术家试图通过商业化（日常生活的商品化）和城市化这两个过程来传达欧

洲不断变化的经验。从这个角度来看，现代艺术是一种反思变革的方式，这种变革创造了我们所说的，用某种速记来说，“现代性”。

参考答案：

One way of thinking about modern art is to view art as something that can be practiced when art is said to be “autonomous” from society, and another way is to view it as responding to the modern world and to see modern artists immersing themselves in the conflicts and challenges of society, which means there are two different ways of thinking about modern art or two different versions of the story.

92. Academic Networking 学术届人际网络 #091092

Getting to know fellow academics, especially more senior ones, can be very daunting. Lecturers and researchers are used to spending a lot of time in isolation working independently. The thought of going public and ‘selling yourself’ does not seem enticing. However, it is easier than you think to begin to develop your own career-enhancing networks. Your PhD supervisor and examiners or if you are already in post, your mentor, are a great place to start. They will have been chosen to guide you because they are more experienced and in most cases they will work close to your field of interest. Ask their advice for ways of building up your own network of contacts. Also it is easier to approach someone unknown to you if you can mention the name of a mutual acquaintance.

If you are a postgraduate who is serious about a career in academia, or a more senior scholar wanting to develop one, you will surely be attending conferences on a fairly regular basis. There is no right or wrong number of these, some scholars stick to one or two a year, others seem to attend one a month! Conferences are the main way that academics network with each other, so do not miss out on these opportunities. If you are presenting a paper it gives others a chance to see what you are working on, and the informal sections of the programmed (such as food and drink breaks) encourage mingling and further discussion.

原文翻译：

结识其他学者，尤其是更资深的学者，可能非常困难。讲师和研究人员习惯于花很多时间单独工作。上市和“推销自己”的想法似乎并不诱人。然而，开始建立自己的职业提升网络比你想象的要容易得多。你的博士生导师和考官，或者如果你已经在岗位上，你的导师，是一个很好的开始。他们将被选择来指导你，因为他们更有经验，在大多数情况下，他们将在你感兴趣的领域附近工作。征求他们的意见，寻找建立你自己的关系网的方法。此外，如果你能提到一个共同熟人的名字，你就更容易接近一个你不认识的人。

如果你是一个对学术生涯很认真的研究生，或者是一个想要发展学术生涯的资深学者，你肯定会定期参加会议。这些数字没有对错之分，有些学者坚持一年一两次，有些人似乎一个月上一次学！会议是学术交流的主要方式，所以不要错过这些机会。如果你在提交一篇论文，别人就有机会看到你在做什么，节目的非正式部分（如餐饮休息）鼓励大家相互交流和进一步讨论。

参考答案：

Although getting to know fellow academics can be very daunting, it is easier to begin to develop your own career-enhancing networks because your supervisor and examiners or your mentor will be a great place to start as they are more experienced and know more people, and conferences are the main way that academics network with each other.

93. Continental Drift 大陆版块漂移 #091093

According to the theory of continental drift, the world was made up of a single continent through most of geologic time. That continent eventually separated and drifted apart, forming into the seven continents we have today. The first comprehensive theory of continental drift was suggested by the German meteorologist Alfred Wegener in 1912. The hypothesis asserts that the continents consist of lighter rocks that rest on heavier crustal material—similar to the manner in which icebergs float on water. Wegener contended that the relative positions of the continents are not rigidly fixed but are slowly moving—at a rate of about one yard per century. 英澳新三国（同一国家任意三所院校）

695

According to the generally accepted **plate-tectonics theory**, scientists believe that **Earth's surface is broken into a number of shifting slabs or plates**, which average about 50 miles in thickness. These plates **move relative to one another above a hotter, deeper, more mobile zone** at average rates as great as a few inches per year. Most of the world's active volcanoes are located along or near the boundaries between shifting plates and are called plate-boundary volcanoes.

The peripheral areas of the Pacific Ocean Basin, containing the boundaries of several plates, **are dotted with many active volcanoes** that form the so-called Ring of Fire. The Ring provides excellent examples of plate-boundary volcanoes, including Mount St. Helens.

However, **some active volcanoes are not associated with plate boundaries**, and many of these so-called intra-plate volcanoes form roughly linear chains in the interior of some oceanic plates. The Hawaiian Islands provide perhaps the best example of an intra-plate volcanic chain, developed by the northwest-moving Pacific plate passing over an inferred "hot spot" that initiates the magma-generation and volcano-formation process.

原文翻译：

根据大陆漂移理论，在大多数地质时期，世界是由一个大陆组成的。该大陆最终分离并漂移，形成了我们今天拥有的七个大陆。1912年，德国气象学家阿尔弗雷德·韦格纳提出了大陆漂移的第一个综合理论。该假说认为，大陆由较轻的岩石组成，这些岩石位于较重的地壳物质上--类似于冰山漂浮在水面上的方式。韦格纳认为，大陆的相对位置并不是固定不变的，而是在缓慢移动，速度大约为每世纪一码。

根据公认的板块构造理论，科学家们认为地球表面被分成许多移动的板块，平均厚度约为50英里。这些板块相对于彼此在一个更热，更深，更流动的区域上方移动，平均速度高达每年几英寸。世界上大多数活火山位于移动板块之间的边界或边界附近，被称为板块边界火山。

太平洋盆地的周边地区，包括几个板块的边界，点缀着许多活火山，形成所谓的火环。火环提供了板块边界火山的极好例子，包括圣海伦火山。

然而，一些活火山与板块边界没有联系，许多所谓的板块内火山在一些海洋板块内部形成大致线性的链。夏威夷群岛也许是板块内火山链的最佳例子，它是由向西北移动的太平洋板块经过一个推定的“热点”而形成的，该“热点”启动了岩浆生成和火山形成过程。

参考答案：

While continental drift theory suggests that the world was made up of a single continent that eventually separated and formed into seven continents, the plate-tectonics theory suggests that Earth's surface is broken into a number of shifting plates that move above a hotter, deeper, more mobile zone, and the peripheral areas of the Pacific Ocean Basin are dotted with many active volcanoes, but some active volcanoes are not associated with plate boundaries.

94. Logged Forest 丛林砍伐 #091094

Mammals can be one of the hardest-hit groups by habitat loss, and a lot of research has been carried out to find the best ways to conserve mammal diversity.

Much of this research has focussed on very large-scale changes in land use and the impacts this will have on overall mammal diversity. However, many important decisions about land use are made at much more local scales, for example at the level of individual landowners.

Now, in a detailed study led by Imperial College London that looked at mammal diversity across different small-scale landscapes in Borneo, researchers have identified previously logged forests as an overlooked source of refuge for mammals.

These ‘selectively logged’ forests, where only certain tree species are removed, are often considered to be degraded and are frequently cleared to make way for plantations. The new results, published in the journal Ecological Applications, suggest they should be better protected.

The team recorded mammals using trap-and-release techniques and motion-sensing cameras over three years, creating an unprecedented 20,000 records of species in three land-use types:

old-growth forest, logged forest and oil palm plantation. This is one of the most intensive studies of rainforest mammal diversity ever undertaken.

To their surprise, they found that mammal diversity for large mammals, like the clouded leopard and civets, was similar for both old-growth forests and logged forests. For small mammals, such as squirrels and rodents, the diversity was actually higher in logged forests.

原文翻译：

哺乳动物可能是受栖息地丧失影响最严重的群体之一，为了找到保护哺乳动物多样性的最佳方法，人们进行了大量的研究。

这项研究的重点是土地利用的大规模变化及其对哺乳动物总体多样性的影响。然而，许多关于土地使用的重要决定是在更多的地方范围内作出的，例如在个别土地所有者一级。

现在，在伦敦帝国理工学院领导的一项详细研究中，研究人员观察了婆罗洲不同小规模景观中的哺乳动物多样性，他们发现以前被砍伐的森林是哺乳动物被忽视的避难所。这些“选择性砍伐”的森林，只有某些树种被砍伐，往往被认为已经退化，常常被砍伐，以便为种植园让路。发表在“生态应用”杂志上的新结果表明，它们应该得到更好的保护。

该研究小组在三年多的时间里使用捕获和释放技术和运动感应摄像机记录了哺乳动物，创造了史无前例的三种土地利用类型的 20000 种物种记录：老林，伐木林和油棕榈种植园。这是有史以来对雨林哺乳动物多样性进行的最深入的研究之一。

令他们惊讶的是，他们发现大型哺乳动物，如云豹和果子狸的哺乳动物多样性，在古老森林和原木森林中都是相似的。对于小型哺乳动物，如松鼠和啮齿动物，伐木森林的多样性实际上更高。

参考答案：

As a study that looked at mammal diversity across different small-scale landscapes has identified previously logged forests as an overlooked source of refuge for mammals that should be better protected, the scientists found that mammal diversity for large mammals was

similar for both old-growth forests and logged forests whereas the diversity was actually higher in logged forests for small mammals, which is one of the most intensive studies of rainforest mammal diversity ever undertaken.

95. Micro-plastics 微型塑料 #091095

Fish are being killed, and prevented from reaching maturity, by the litter of plastic particles finding their way into the world's oceans, new research has proved.

Some young fish have been found to prefer tiny particles of plastic to their natural food sources, effectively starving them before they can reproduce. The growing problem of microplastics – tiny particles of polymer-type materials from modern industry – has been thought for several years to be a peril for fish, but the study published on Thursday is the first to prove the damage in trials.

Microplastics are near-indestructible in natural environments. They enter the oceans through litter, when waste such as plastic bags, packaging and other convenience materials are discarded. Vast amounts of these end up in the sea, through inadequate waste disposal systems and sewage outfall.

Another growing source is microbeads, tiny particles of hard plastics that are used in cosmetics, for instance as an abrasive in modern skin cleaners. These easily enter waterways as they are washed off as they are used, flushed down drains and forgotten, but can last for decades in our oceans.

The impact of these materials has been hard to measure, despite being a growing source of concern. Small particles of plastics have been found in seabirds, fish and whales, which swallow the materials but cannot digest them, leading to a build up in their digestive tracts.

For the first time, scientists have demonstrated that fish exposed to such materials during their development show stunted growth and increased mortality rates, as well as changed behavior that could endanger their survival.

一项新的研究证明，由于塑料颗粒散落到世界海洋中，鱼类正在被杀死，并无法成熟。一些幼鱼被发现更喜欢微小的塑料颗粒，而不是它们的天然食物来源，在它们繁殖之前就已经饿死了。几年来，人们一直认为微塑料（现代工业中聚合物类材料的微小颗粒）的问题日益严重对鱼类构成威胁，但周四公布的这项研究首次在试验中证明了这种危害。

微塑料在自然环境中几乎是坚不可摧的。当塑料袋，包装和其他便利材料等废物被丢弃时，它们通过垃圾进入海洋。由于废物处理系统和排污口不足，大量废物最终流入海洋。

另一个不断增长的来源是微珠，这是硬塑料的微小颗粒，用于化妆品，例如现代皮肤清洁剂中的磨料。它们很容易进入水道，因为它们在使用时被冲走，冲下排水沟并被遗忘，但在我们的海洋中可以持续几十年。

这些材料的影响难以衡量，尽管日益引起人们的关注。在海鸟，鱼类和鲸鱼体内发现了塑料小颗粒，它们吞食这些物质，但不能消化，导致消化道积聚。

科学家首次证明，在鱼的发育过程中接触到这种物质，鱼的生长发育受阻，死亡率上升，行为改变可能危及鱼的生存。

参考答案：

As fish exposed to microplastics and microbeads show stunted growth and increased mortality rates, as well as changed behavior that could endanger their survival, new research has proved that fish are being killed and prevented from reaching maturity by the litter of plastic particles because young fish prefer tiny particles of plastic to their natural food sources, but the impact of these materials has been hard to measure.

96. Presidential Election 总统选举 #091096

According to the United States Constitution, a presidential election is to be held once every fourth year. The process of electing a President and Vice-President begins long before Election Day. Candidates from both major and minor political parties and independent candidates begin to raise money and campaign at least one year in advance of the general

700

presidential election. In order to officially represent a political party, a candidate must be nominated by that party.

This primary nomination process is a contest that often produces factions within political parties. These divisions impact the policy stances and agendas of the candidates running for nomination as they attempt to garner the support of party leaders and activists. The nominating process officially begins with the first state primaries and caucuses, which usually occur in the month of February of the election year. It is at these local events that voters are given their first chance to participate in electing the nation's next President.

There are many factors that influence who will ultimately become the candidate for a party. The public's perception of the candidates is influenced by such things as media reports, public opinion polls, candidate preference surveys, and advertising. These factors will help determine the perceived strengths and weaknesses of the candidates in the months leading up to the caucuses and primaries.

原文翻译：

根据美国宪法，总统选举每四年举行一次。选举总统和副总统的过程早在选举日之前就开始了。主要和次要政党的候选人以及独立候选人至少在总统大选前一年开始筹款和竞选。为了正式代表一个政党，候选人必须由该党提名。

这一初选提名过程是一场常常在政党内产生派系的竞赛。这些分歧影响了候选人的政策立场和议程，因为他们试图赢得政党领导人和活动分子的支持。提名过程正式开始于第一次州初选和党团会议，通常在选举年的2月份举行。正是在这些地方活动中，选民第一次有机会参与选举国家的下一任总统。

有许多因素影响谁最终会成为一个政党的候选人。公众对候选人的看法受到媒体报道，民意调查，候选人偏好调查和广告等因素的影响。这些因素将有助于确定候选人在党团会议和初选之前的几个月中的优势和劣势。

参考答案：

Although a presidential election is to be held once every fourth year, candidates of President and Vice-President begin to raise money and campaign long before Election Day in order to be nominated by their parties, and this primary nomination process is a contest that often produces factions within political parties, but there are many factors such as media reports and public surveys that influence who will ultimately become the candidate for a party.

97. International Trade 国际贸易 #091097

The world is shrinking rapidly with the advent of faster communication, transportation, and financial flows. Products developed in one country—Gucci purses, Sony electronics, McDonald's hamburgers, Japanese sushi, German BMWs—have found enthusiastic acceptance in other countries. It would not be surprising to hear about a German businessman wearing an Italian suit meeting an English friend at a Japanese restaurant who later returns home to drink Russian vodka and watch Dancing with the Stars on TV.

International trade has boomed over the past three decades. Since 1990, the number of multinational corporations in the world has grown from 30,000 to more than 63,000. Some of these multinationals are true giants. In fact, of the largest 150 “economies” in the world, only 81 are countries. The remaining 69 are multinational corporations. Walmart, the world's largest company, has annual revenues greater than the GDP of all but the world's 21 largest countries.

Between 2000 and 2008, total world trade grew more than 7 percent per year, easily outstripping GDP output, which was about 3 percent. Despite a dip in world trade caused by the recent worldwide recession, the world trade of products and services last year was valued at more than \$12 trillion, about 17 percent of GDP worldwide.

Many U.S. companies have long been successful at international marketing: McDonald's, Coca-Cola, Starbucks, GE, IBM, Colgate, Caterpillar, Boeing, and dozens of other American

firms have made the world their market. In the United States, names such as Sony, Toyota, Nestlé, IKEA, Canon, and Nokia have become household words. Other products and services that appear to be American are, in fact, produced or owned by foreign companies.

原文翻译：

随着通讯、交通和资金流动的加快，世界正在迅速缩小。在一个国家开发的产品——古驰钱包、索尼电子、麦当劳汉堡、日本寿司、德国宝马——在其他国家得到了热情的接受。如果一个穿着意大利西装的德国商人和一个英国朋友在一家日本餐厅见面，朋友随后回家喝俄罗斯伏特加，看电视上的《与星共舞》(Dancing with the Stars)，这一点也不奇怪。

国际贸易在过去三十年里蓬勃发展。1990 年以来，全球跨国公司的数量从 3 万家增加到 6.3 万家以上。这些跨国公司中有一些是真正的巨头。事实上，在全球最大的 150 个“经济体”中，只有 81 个国家。其余 69 家为跨国公司。沃尔玛，世界上最大的公司，年收入超过了世界上最大的 21 个国家的 GDP。

2000 年至 2008 年间，世界贸易总额每年增长超过 7%，轻松超过约 3% 的国内生产总值 (GDP)。尽管最近全球经济衰退导致世界贸易下降，去年世界产品和服务贸易价值超过 12 万亿美元，约占全球 GDP 的 17%。

许多美国公司长期以来在国际市场营销方面取得了成功：麦当劳、可口可乐、星巴克、通用电气、IBM、高露洁、卡特彼勒、波音和其他数十家美国公司已经把世界变成了他们的市场。在美国，索尼、丰田、雀巢、宜家、佳能和诺基亚等品牌已经成为家喻户晓的名字。其他看似美国的产品和服务实际上是由外国公司生产或拥有的。

参考答案：

As international trade has boomed over the past three decades, the world is shrinking rapidly with the advent of faster communication, transportation and financial flows, despite a dip in world trade caused by the recent worldwide recession, so many U.S. brands have long been

successful at international marketing but some products and services produced or owned by foreign companies have also become household words in the United States.

98. Psychology 心理学 #091098

参考答案: (Based on students' recall.)

Psychology is to study human behaviours and psychologists adopt multiple methods to study it, but biopsychosocial model is a better way because humans' thoughts and behaviors are influenced by biological influences and various social situations, so people should incorporate various perspectives to understand psychology.

99. Energy Demand 能源需求 (Outline Only) #091099

[Paragraph 1] With the population growth, the demand for resources has been growing as well.

[Paragraph 2] The increase of demand also happened in non-renewable resources, such as metal.

[Paragraph 3] The demand for petrol, diesel and crude oil is also huge to cope with the demand for manufacturing plastics.

原文翻译:

[第 1 段]随着人口的增长, 对资源的需求也在增加。

[第 2 段]非再生资源(如金属)的需求也在增加。

[第 3 段]对汽油、柴油和原油的需求也是巨大的, 以应对制造塑料的需求。

参考答案: (Based on students' recall.)

There is an expected increase in demand for various alternative resources, but people should ensure natural world can still work well to earn the future well-being because the world

population rises.

100. Guinness World Record 吉尼斯世界纪录最精准钟表 #091100

One of Guinness World Records' more unusual awards was presented at the National Maritime Museum yesterday. After a 100-day trial, the timepiece known as Clock B – which had been sealed in a clear plastic box to prevent tampering – was officially declared, by Guinness, to be the world's “most accurate mechanical clock with a pendulum swinging in free air”.

It was an intriguing enough award. But what is really astonishing is that the clock was designed more than 250 years ago by a man who was derided at the time for “an incoherence and absurdity that was little short of the symptoms of insanity”, and whose plans for the clock lay ignored for two centuries.

The derision was poured on John Harrison, the British clockmaker whose marine chronometers had revolutionized seafaring in the 18th century (and who was the subject of Longitude by Dava Sobel). His subsequent claim – that he would go on to make a pendulum timepiece that was accurate to within a second over a 100-day period – triggered widespread ridicule. The task was simply impossible, it was declared.

But now the last laugh lies with Harrison. At a conference, Harrison Decoded: Towards a Perfect Pendulum Clock, held at Greenwich yesterday, observatory scientists revealed that a clock that had been built to the clockmaker's exact specifications had run for 100 days during official tests and had lost only five-eighths of a second in that period.

原文翻译：

昨天，一项吉尼斯世界纪录中比较不寻常的奖项在国家海事博物馆举行颁奖仪式。经过 100 天的测试，名为 Clock B 的钟表终于被吉尼斯正式宣布为世界上“最精确的自由

705

摆动机械钟”。它被密封在一个透明的塑料盒子里，以防止有人来破坏它。

这是一个足够吸引人的奖项。但真正令人惊讶的是，这座钟是 250 多年前由一个人设计的，当时他被嘲笑为“毫无条理、荒谬得近乎疯狂”，他的钟表设计计划被忽视了两个世纪。

人们纷纷嘲笑英国钟表匠约翰·哈里森(John Harrison)，他的航海天文钟在 18 世纪给航海带来了革命性的变化(达瓦·索贝尔(Dava Sobel)的《经度》(Longitude)一书就是以他为主题的)。他随后的声明——他将继续制造一种能够在 100 天内精确到一秒的钟摆计时器——引发了广泛的嘲笑。他们宣布，这项任务根本不可能完成。

但现在笑到最后的是哈里森。在昨天格林威治举行的一次会议上，哈里森解释道：向着完美的摆钟前进，天文台的科学家们透露，一个按照钟表制造商的精确规格制作的钟，在官方测试中运行了 100 天，在这段时间内只损失了八分之五秒。

参考答案：

After a 100-day trial, the timepiece known as Clock B was officially declared by Guinness to be the world's "most accurate mechanical clock with a pendulum swinging in free air", but what is really astonishing is that the clock was designed more than 250 years ago by a British clockmaker John Harrison who was derided at the time, and whose plans for the clock lay ignored for two centuries.

101. Online Safety for Children 儿童网上安全 #091101

When Tim Berners-Lee invented the world wide web, he surely didn't anticipate that children would end up becoming some of its main users. Most start using the internet at the average age of three – and as recent research shows, children now spend more time playing and socializing online than watching television programs.

Given this change in habits, it is not surprising that a recent House of Lords report has raised

online safety and behavior as an important issue. The report said that for children, learning to survive in a world dominated by the internet should be as important as reading and writing.

The House of Lords Communications Committee also warned that children should not be leaving school without “a well-rounded understanding of the digital world”. It also suggested that the government should think about implementing new legal requirements and a code of conduct companies would have to adhere to, which would help to bring the internet up to “child-friendly standards”.

Of course, trying to rectify this lack of child-centered design is not an easy task, but one that requires the cooperation and goodwill of many sectors. It will need to involve consultation with technology, education, legal and policy experts. And it would also be a good idea to make children and young people part of the process.

原文翻译：

当 Tim Berners-Lee 发明万维网时，他肯定没有预料到儿童最终会成为万维网的主要用户之一。大多数人平均从 3 岁开始使用互联网，而且最近的研究表明，孩子们现在花更多的时间在网上玩和社交，而不是看电视节目。

鉴于这种习惯的改变，上议院最近的一份报告将网络安全和行为作为一个重要问题提出也就不足为奇了。报告称，对于儿童来说，学习如何在互联网主导的世界中生存，应该与阅读和写作同等重要。

英国上议院通信委员会还警告说，孩子们不应该在“对数字世界没有全面了解”的情况下离开学校。它还建议政府应该考虑实施新的法律要求和公司必须遵守的行为准则，这将有助于把互联网提升到“儿童友好型标准”。

当然，试图纠正这种以儿童为中心的设计的缺失并不是一件容易的任务，而是需要许多部门的合作和善意。它需要咨询技术、教育、法律和政策专家。让儿童和年轻人参与到这个过程中来也是一个好主意。

参考答案：

As children have become the main users of the world wide web, a recent report has raised that online safety and behavior is an important issue, stating that children should not be leaving school without “a well-rounded understanding of the digital world” and that the government should also think about implementing new legal requirements and a code of conduct, which requires the cooperation and good will of many sectors.

102. The Importance of Soil 土壤的重要性 #091102

It's very easy to forget about what's in the ground beneath our feet and why it's so important to protect it. One tablespoon of soil contains more organisms than there are people on Earth; billions of bacteria, fungi and other microorganisms combine with minerals, water, air and organic matter to create a living system that supports plants and, in turn, all life.

Healthy soil can store as much as 3,750 tons of water per hectare, reducing the risk of flooding, and the International Panel on Climate Change (IPCC) has said that 89% of all agricultural emissions could be mitigated if we improved the health of our soil.

Good soil management also increases disease resistance in livestock and ultimately drives profits for farmers – yet soil and its impact on the health of our animals has, over recent decades, been one of the most neglected links in UK agriculture.

Over the last 50 years' agriculture has become increasingly dependent on chemical fertilizers, with applications today around 10 times higher than in the 1950s. Farmers often think the chemical fertilizer NPK (nitrogen, phosphorous and potassium) provides all the nutrition a plant requires, but it also has a detrimental effect on the long-term health of the land: research suggests there are fewer than 100 harvests left in many of the world's soils.

原文翻译：

我们很容易忘记我们脚下的土地有什么，以及为什么保护它是如此重要。一汤匙土壤所含的微生物比地球上的人口还多;数以十亿计的细菌、真菌和其他微生物与矿物质、英澳新三国（同一国家任意三所院校）

708

水、空气和有机物结合，创造了一个支持植物的生命系统，进而支持所有生命。

健康的土壤每公顷可以储存 3,750 吨水，减少洪水的风险。国际气候变化专门委员会 (IPCC) 表示，如果我们改善土壤的健康状况，可以减少 89% 的农业排放。

良好的土壤管理还能提高牲畜的疾病抵抗力，并最终为农民带来利润——然而，近几十年来，土壤及其对动物健康的影响一直是英国农业中最被忽视的环节之一。

在过去的 50 年里，农业对化肥的依赖越来越大，今天化肥的使用量大约是 20 世纪 50 年代的 10 倍。农民们通常认为化肥 NPK(氮、磷、钾) 提供了一株植物所需的全部营养，但它也对土地的长期健康有不利影响：研究表明，世界上许多土壤只剩下不到 100 的收成了。

参考答案：

While soil contains organisms to create a living system that supports all life, healthy soil can store water to reduce the risk of flooding and mitigate agricultural emissions, so it increases disease resistance and drives profits for farmers, but soil and its impact on the health of animals has been neglected in UK agriculture and agriculture has become increasingly dependent on chemical fertilizers although they have a detrimental effect on the long-term health of the land.

103. Asda 阿斯达超市 #091103

Asda has become the first food retailer in the country to measure how much customers can save by cutting back on food waste, thanks to a Knowledge Transfer Partnership (KTP) with the University of Leeds. The idea behind the KTP was for the University, using Asda's customer insight data, to apply its research to identify, investigate and implement ways of helping customers to reduce their food waste. This was one of the first times that a major retailer had tried to deliver large-scale sustainability changes, with the two-year project seen as a way for Asda to position themselves as true innovators in this area.

英澳新三国（同一国家任意三所院校）

709

The campaign focused on providing customers with advice on everything from food storage and labelling, to creative recipes for leftovers. Meanwhile, in-store events encouraged customers to make changes in their own homes. In fact, two million customers have said they will make changes to how they deal with food waste in their own homes, leading to an average saving of 57 pounds per customer, as well as a reduction in waste.

A key aspect of a KTP is that an associate is employed by the University to work in the firm and help deliver the desired outcomes of the KTP. As a part of the collaboration with Asda, Laura Babbs was given the task of driving forward the sustainability changes in the retailer. As a result of the success of her work, Laura eventually became a permanent member of the team at Asda.

原文翻译：

由于与利兹大学建立了知识转移伙伴关系(KTP)，阿斯达成为英国第一家衡量消费者通过减少食物浪费可以节省多少钱的食品零售商。KTP 背后的想法是，该大学利用阿斯达的客户洞察数据，将其研究应用于确定、调查和实施帮助客户减少食物浪费的方法。这是大型零售商首次尝试进行大规模的可持续发展变革，这个为期两年的项目被视为阿斯达将自己定位为这一领域真正创新者的一种方式。

这项活动的重点是为顾客提供各种建议，从食物储存和标签，到剩菜的创意食谱。与此同时，店内活动鼓励顾客在自己的家中做出改变。事实上，200 万名消费者表示，他们将改变在自己家中处理食物浪费的方式，从而平均为每位消费者节省 57 英镑，并减少浪费。

KTP 的一个关键方面是大学雇佣一名助理在公司工作，帮助实现 KTP 的预期成果。作为与阿斯达合作的一部分，劳拉·巴布斯(Laura Babbs)的任务是推动零售商的可持续发展变化。由于她工作的成功，劳拉最终成为阿斯达团队的一名永久成员。

参考答案：

While Asda has become the first food retailer to measure how much customers can save by cutting back on food waste and tried to deliver large-scale sustainability changes, the campaign focused on providing customers with advice on everything from food storage and labelling, to creative recipes for leftovers, and in-store events encouraged customers to make changes, and an associate is employed to work and help deliver the desired outcomes.

104. Giant Panda 大熊猫 #091104

The worldwide population of wild giant pandas increased by 268 over the last decade according to a new survey conducted by the government of China. The increase in population brings the total number of wild giant pandas to 1,864.

The population increase represents 16.8% rise compared to the last panda survey in 2003. Wild giant pandas, a global symbol of wildlife conservation, are found only in China's Sichuan, Shaanxi and Gansu provinces.

According to the report, formally known as the Fourth National Giant Panda Survey, the geographic range of pandas throughout China also increased. The total area inhabited by wild giant pandas in China now equals 2,577,000 hectares, an expansion of 11.8% since 2003.

“These results are a testament to the conservation achievements of the Chinese government,” said Xiaohai Liu, executive director of programs, WWF-China. “A lot of good work is being done around wild giant panda conservation, and the government has done well to integrate these efforts and partner with conservation organizations including WWF.”

The report, the fourth in a series of decadal (10 year) surveys conducted by the State Forestry Administration of China, began in 2011 with financial and technical support from WWF.

Much of the success in increasing the panda population comes as a result of conservation policies implemented by the Chinese government, including the Natural Forest Protection Project and Grain for Green.

原文翻译：

根据中国政府的一项最新调查显示，全球野生大熊猫数量在过去十年中增加了 268 只。人口的增长使野生大熊猫的总数达到 1864 只。

与 2003 年的上次调查相比，大熊猫的数量增长了 16.8%。野生大熊猫是全球野生动物保护的象征，目前只在中国的四川、陕西和甘肃三省发现。

根据这份正式被称为第四次全国大熊猫调查的报告，中国各地大熊猫的地理范围也在扩大。目前，中国野生大熊猫的栖息地面积达 257.7 万公顷，比 2003 年扩大了 11.8%。

“这些结果证明了中国政府的保护成就，”世界自然基金会中国项目执行总监刘晓海说。

“围绕野生大熊猫的保护，我们做了很多有益的工作，政府在整合这些努力，并与包括世界自然基金会在内的保护组织合作方面做得很好。”

这份报告始于 2011 年，在世界自然基金会(WWF)的资金和技术支持下，是中国国家林业局进行的一系列十年(10 年)调查中的第四份。

大熊猫数量增加的成功很大程度上要归功于中国政府实施的保护政策，包括天然林保护工程和退耕还林等。

参考答案：

According to the report conducted by China with support from WWF, the worldwide population of wild giant pandas increased, and the geographic range of pandas throughout China also increased, which is a testament to the conservation achievements of the Chinese government as a result of conservation policies implemented by the Chinese government.

105. Fallow Fields: Resting the Lands 休耕期 #091105

With a good system of crop rotation, and especially with the addition of any sort of fertilizer you may be able to come up with, it's possible to grow crops on a plot of land for upwards of 2 – 3 years at a time with good results. Ultimately, though, you must let the land rest if you hope to continue farming there in the long-run. Allowing a plot of land to rest for a period of time is known as letting the field go fallow, and there are several reasons for this.

Allowing a field or plot to lie fallow means that you don't grow anything new on it, don't harvest anything and don't graze any animals on the land for at least a year. Sometimes a field will lay fallow for two, three or even four years, but the traditional standard on many farms was to let a field lie fallow once every 2 – 3 years.

This fallow period allows the land to replenish many of its nutrients. The root networks of various grasses or groundcovers (like clover) have a chance to expand and grow, which further strengthens the soil and protects it from erosion.

During the fallow period, there are many beneficial flora and micro-fauna, including cyanobacteria, which live in the soil. These microorganisms continue to be active at the root level, steadily improving the quality of the soil so that when you come back in a year or two, you can begin planting food or cash crops anew.

原文翻译：

有了良好的轮作系统，特别是加上你能找到的任何肥料，在一块土地上种植作物一次超过 2 - 3 年，效果很好。不过，如果你希望长期在那里继续耕作，最终你必须让土地休息。让一块土地休息一段时间，就是让这块土地休耕，这有几个原因。

允许一块田地或一块地块闲置意味着你在这片土地上不种植任何新作物，不收获任何东西，也不在这片土地上放牧任何动物至少一年。有时一块地休耕两年、三年甚至四年，但许多农场的传统标准是每 2 - 3 年休耕一次。

这段休耕期可以让土地补充许多养分。各种草类或地被植物(如三叶草)的根系网络有机

会扩展和生长，这进一步加强土壤，保护它不受侵蚀。

休耕期间，土壤中有许多有益的植物区系和微型动物，其中包括蓝藻。这些微生物继续活跃在根部，稳定地改善土壤质量，这样一两年后你回来时，你就可以开始种植新的食物或经济作物。

参考答案:

With a good system of crop rotation, it's possible to grow crops on a plot of land in the long-run by allowing a plot of land to rest for a period of time, which is called letting the field go fallow, because it allows the land to replenish many of its nutrients, and there are many beneficial flora and micro-fauna in the soil to improve the quality of the soil.

106. People-watching Observation 暗中观察 #091106

According to researchers, the invisibility cloak illusion stems from the belief that we are much more socially observant than the people around us. This means that, while we watch and wonder about other people as much as possible, we often think that people around us are less aware. This illusion occurs because, while we are fully aware of our own impressions and speculations about other people, we have no idea about what those other people are thinking unless they choose to share with us, something that rarely happens except in exceptional circumstances.

To better understand what is happening, it is important to consider the groundbreaking research by Amos Tversky and Daniel Kahneman on cognitive biases. When people make judgments about other people in social situations, they often depend on specific biases such as the availability heuristic, i.e., that we attach more significance to thoughts that come to mind easily. This is why we consider thoughts about other people as being more important than thoughts about inanimate objects. And so, as we look around us, we tend to focus our thoughts on the people we see and what they happen to be doing. Which is why people-

watching can be so addictive.

What adds to the sense that we are relatively invisible to others is that **people tend to be as discreet as possible about their people-watching**. Just because other people aren't sharing their observations with us, **it's easy to pretend that they are not as observant as we are**. Of course, people may share their people-watching observations with anyone they happen to be with but, for the most part, that only applies to something remarkable enough to comment on. For most of us, what we are seeing tends to be extremely private and not to be shared with others.

原文翻译：

研究人员称，“隐形衣错觉”源于人们认为自己比周围的人更善于观察社会。这意味着，当我们尽可能多地观察他人并对他人感到好奇时，我们常常认为我们周围的人意识不到这一点。产生这种错觉的原因是，当我们完全意识到自己对他人的印象和猜测时，我们不知道其他人在想什么，除非他们选择与我们分享，而这很少发生，除非在特殊情况下。

为了更好地理解正在发生的事情，我们必须考虑阿莫斯·特沃斯基(Amos Tversky)和丹尼尔·卡尼曼(Daniel Kahneman)关于认知偏见的开创性研究。当人们在社会情境中对他人做出判断时，他们往往依赖于特定的偏见，如可得性启发式(availability heuristic)，即我们更重视容易浮现在脑海中的想法。这就是为什么我们认为对他人的思考比对无生命物体的思考更重要。所以，当我们环顾四周时，我们倾向于把注意力集中在我们看到的人和他們正在做的事情上。这就是为什么观察人会如此上瘾。

更让人觉得我们相对来说是被别人看不见的是，人们在观察别人的时候往往会尽可能谨慎。仅仅因为别人不与我们分享他们的观察结果，我们就很容易假装他们不像我们一样善于观察。当然，人们可能会把他们观察行人的观察结果与任何碰巧与他们在一起的人分享，但在大多数情况下，这只适用于值得评论的事情。对我们大多数人来说，我们看到的東西往往是极其私密的，不愿与他人分享。

参考答案:

According to the groundbreaking research on cognitive biases, the invisibility cloak illusion means that we often think that people around us are less aware while we observe other people because we have no idea about what other people are thinking unless they choose to share with us, and it's easy to pretend others are less observant as we are because people tend to be discreet about their people-watching observations.

107. Women's Institutes 女权运动 (Outline Only) #091107

[Paragraph 1] WI was established more than 100 years ago, but gender equality has not yet achieved. Even with the equality law, the gender pay gap is still there and women are still earning much less than men.

[Paragraph 2] Women need to improve themselves, in areas such as

[Paragraph 3] So we can see that there are still a lot more that we need to do, such as STEM. And governments should take actions.

原文翻译:

[第 1 段] WI 成立于 100 多年前，但性别平等尚未实现。即使有了平等法，男女工资差距仍然存在，女性的收入仍然远远低于男性。

[第 2 段] 女性需要提高自己，在诸如.....等领域

[第 3 段] 因此，我们可以看到，我们仍然有很多事情需要做，如 STEM。政府应该采取行动。

108. Right Brain Hemisphere 人类右脑 #091108

In a study in the current issue of the journal PLoS One, a team of scientists in Germany showed experts and novices simple geometric objects and simple chess positions and asked the subjects to identify them.

Reaction times were measured and brain activity was monitored using functional M.R.I. scans. On the identification of the geometric objects, the subjects performed the same, showing that the chess experts had no special visualization skills. When the subjects were shown the chess positions, the experts identified them faster.

Focusing on an element of an earlier study on pattern and object recognition by chess experts, the researchers had expected to see parts of the left hemispheres of the experts' brains — which are involved in object recognition — react more quickly than those of the novices when they performed the chess tasks. But the reaction times were the same.

What set the experts apart was that parts of their right brain hemispheres — which are more involved in pattern recognition — also lit up with activity. The experts were processing the information in two places at once.

The researchers also found that when the subjects were shown the chess diagrams, the novices looked directly at the pieces to recognize them, while the experts looked on the middle of the boards and took everything in with their peripheral vision.

原文翻译：

在最新一期的《公共科学图书馆·综合》(PLOS One)杂志上发表的一项研究中，德国的一组科学家向专家和新手展示了简单的几何物体和简单的国际象棋位置，并要求受试者识别它们。

研究人员测量了受试者的反应时间，并使用功能性核磁共振成像(fmri)扫描来监测大脑活动。在几何物体的识别上，被试表现相同，说明象棋专家并没有特殊的视觉技能。当研究对象看到国际象棋的位置时，专家能更快地识别出它们。

一门课一起上的。当校长去新西兰旅行时，

[第3段]以历史为反面例子。在实践中存在一些问题。它有时与艺术或___结合在一起

参考答案：

Although [paragraph 2] the cross curriculum of geography was successful in ..., [paragraph 3] the practice of history sometimes failed because it was combined with art or ____, which shows that [paragraph 1] there are both successful and failed cases of cross curriculum.

110. Disabled people & computers 残疾人使用电脑 #091110

Disabled people were among the early adopters of personal computers. They were quick to appreciate that word processing programs and printers gave them freedom from dependence on others to read and write for them. Some of these disabled early adopters became very knowledgeable about what could be achieved and used their knowledge to become independent students at a high level. They also gained the confidence to ask that providers of education make adjustments so that disabled students could make better use of course software and the web, rather than just word processing.

For some disability groups, information in electronic format (whether computer-based or web-based) can be more accessible than printed information. For example, people who have limited mobility or limited manual skills can find it difficult to obtain or hold printed material; visually impaired people can find it difficult or impossible to read print, but both these groups can be enabled to use a computer and, therefore, access the information electronically.

Online communication can enable disabled students to communicate with their peers on an equal basis. For example, a deaf student or a student with Asperger's syndrome may find it difficult to interact in a face-to-face tutorial, but may have less difficulty interacting when using a text conferencing system in which everyone types and reads text. In addition, people's disabilities are not necessarily visible in online communication systems; so disabled people do not have to declare their disability and are not perceived as being different.

719

原文翻译：

残疾人是最早使用个人电脑的人之一。他们很快就意识到文字处理程序和打印机让他们摆脱了依赖他人为他们读写，这给了他们自由。其中一些残疾的早期电脑采用者非常了解这可以实现什么，并利用他们的知识成为高水平的独立学生。他们也获得了信心，要求教育提供者做出调整，使残疾学生能够更好地使用课程软件和网络，而不仅仅是文字处理。

对一些残疾群体来说，电子格式的信息(无论是基于计算机的还是基于网络的)比印刷信息更容易获得。例如，行动不便或手工技能有限的人很难获得或持有印刷材料;视觉受损的人很难或不可能阅读印刷品，但这两类人都可以使用电脑，从而通过电子方式获取信息。

在线交流可以使残疾学生在平等的基础上与同龄人进行交流。例如，聋哑学生或患有阿斯伯格综合症的学生可能会发现在面对面的辅导中很难与人交流，但在使用人人都打字和阅读文本的文本会议系统时，互动的困难可能会小一些。此外，人们的残疾不一定在在线通信系统中可见;所以残疾人不需要声明他们的残疾，并且不会被视为不同的。

参考答案：

Since disabled people were among the early adopters of personal computers, they became very knowledgeable and independent at a high level as well as confident to ask providers of education to make adjustments for them because the information in electronic format can be more accessible than printed information for some disability groups, and online communication can enable disabled students to communicate with their peers on an equal basis.

111. Different ways of learning languages 学语言的不同途径 #091111

Over the years, language teachers have alternated between favoring teaching approaches that focus primarily on language use and those that focus on language forms or analysis. The alternation has been due to a fundamental disagreement concerning whether one learns to

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

communicate in a second language by communicating in that language (such as in an immersion experience) or whether one learns to communicate in a second language by learning the lexicogrammar – the words and grammatical structures – of the target language. In other words, the argument has been about two different means of achieving the same end.

As with any enduring controversy, the matter is not easily resolved. For one thing, there is evidence to support both points of view. It is not uncommon to find learners who, for whatever reason, find themselves in a new country or a new region of their own country, who need to learn a new language, and who do so without the benefit of formal instruction. If they are postpubescent, they may well retain an accent of some kind, but they can pick up enough language to satisfy their communicative needs. In fact, some are natural acquirers who become highly proficient in this manner. In contrast, there are learners whose entire exposure to the new language comes in the form of classroom instruction in lexicogrammar. Yet they too achieve a measure of communicative proficiency, and certain of these learners become highly proficient as well. What we can infer from this is that humans are amazingly versatile learners and that some people have a natural aptitude for acquiring languages and will succeed no matter what the circumstances.

原文翻译：

多年来，语言教师一直在侧重于语言使用和侧重于语言形式或分析的教学方法之间交替。之所以发生这种交替，是因为人们对于，是否通过学习以第二种语言进行交流(比如在一个沉浸式经验中)，或者是否通过学习词典技术——目标语言的词汇和语法结构——来学习第二语言进行交流，进行了根本性的争论。换句话说，争论是关于达到同一目的的两种不同方法。

与任何持久的争议一样，这个问题也不容易解决。一方面，有证据支持这两种观点。我们经常会遇到这样的情况：无论出于何种原因，学习者来到了自己国家的一个新的国家或地区，他们需要学习一门新的语言，而且他们在没有得到正式指导的情况下学习这门语言。如果他们处于青春期之后，他们很可能会保留某种口音，但他们可以学会足够的语言来满足他们的交流需要。事实上，有些人自然而然地以这种方式变得精通。

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

721

相比之下，有些学习者完全通过词汇语法课堂教学来接触新语言。然而，他们也达到了一定程度的交流能力，并且这些学习者中的某些也成为高度精通的人。由此我们可以推断出，人类是一个多才多艺的学习者，有些人具有学习语言的天赋，无论在什么情况下都能成功。

参考答案：

As language teachers have alternated between favoring teaching approaches that focus primarily on language use and those that focus on language forms or analysis, some learners can pick up enough language to satisfy their communication needs in a new country without formal instruction, whereas some learners who learn English only in the form of classroom instruction in lexicogrammar can also achieve communicative proficiency, which means some humans can acquire languages in whatever circumstances.

112. The Greenland Sharks 格陵兰鲨鱼 #091112

An international team of scientists, including a physiologist from The University of Manchester, will head to the largest island in the world later this month to investigate the Greenland shark – believed to be the longest-lived vertebrate animal. Dr Holly Shiels, who is also a trustee of the Physiological Society, will be the only UK-based scientist on the expedition aboard the research vessel Sanna commissioned by the Greenland government. The purpose of the mission is to understand more about the Greenland shark, a top predator in the Arctic, which lives for more than 272 years - possibly more than 400. This extreme age was only revealed by scientists from Copenhagen last year and published in the journal Science. Little else is known about how the shark survives in the deep seas around the Arctic Circle. It is both a hunter and a scavenger and has been seen to feed on seals and been found with the remains of polar bears and whales in its stomach. It is also one of the largest species of shark – growing to about five-and-a-half metres, just a bit smaller than the great white. However, more information is required to ensure the species is adequately protected, as Dr Shiels explained: "Greenland sharks are classified as data deficient," she said. "This means

英澳新三国（同一国家任意三所院校）

722

that we don't know enough to put measures in place to protect them from over-fishing, pollution or climate change. This expedition has a broad range of expertise which means that we'll be able to take full advantage of any sharks that we discover."

原文翻译：

一个国际科学家团队，包括曼彻斯特大学的一名生理学家，将在本月早些时候前往世界上最大的岛屿，对格陵兰鲨鱼进行调查。格陵兰鲨鱼被认为是世界上最长寿的脊椎动物。霍利·谢尔斯（Holly Shields）博士同时也是生理学会的理事，他将是这次由格陵兰政府委托的“桑娜”（Sanna）号研究船探险中唯一一位英国科学家。此次任务的目的是为了进一步了解格陵兰鲨鱼，它是一种生活在北极的顶级掠食者，它的寿命超过 272 年，甚至可能超过 400 年。这一极端的年龄是哥本哈根的科学家用去年才发现的，并发表在《科学》杂志上。至于鲨鱼如何在北极圈的深海中生存，我们所知甚少。它既是猎人又是食腐动物。人们曾看到它以海豹为食，还发现它的胃里还有北极熊和鲸鱼的遗骸。它也是最大的鲨鱼种类之一，能长到大约 5.5 米，只比大白鲨小一点点。然而，需要更多的信息来确保该物种得到充分的保护，谢尔斯博士解释说：“格陵兰鲨被归类为数据不足的物种。”她说“这意味着我们没有足够的知识来采取措施保护它们免受过度捕捞、污染或气候变化的影响。”这次探险具有广泛的专业知识，这意味着我们将能够充分利用任何我们发现的任何鲨鱼。”

参考答案：

As Greenland shark is the longest-lived animal and one of the largest species of shark, who feeds on seals, polar bears and whales, but more information is required to ensure the species is protected from over-fishing, pollution or climate change, so an international team of scientists will head to the largest island in the world to investigate the Greenland shark to take full advantage of any sharks that we discover.

113. Solar Power 太阳能 #091113

The advantages and disadvantages of solar power compared to other forms of renewable energy have been greatly debated. While obviously superior to some forms of energy, solar power's high cost and efficiency dependent on geography have limited its appeal. However, a large number of advantages also merit further development and even possible adaptation for residences.

Solar energy remains popular because it is both a renewable and clean source of energy. These advantages along with the hope that eventually nations can use solar power to decrease global warming ensure its popularity.

Renewable

Solar energy is a true renewable resource. All areas of the world have the ability to collect some amount of solar power and solar power is available for collection each day.

Clean

Solar energy is non-polluting. It does not create greenhouse gases, such as oil based energy does, nor does it create waste that must be stored, such as nuclear energy. It is also far more quiet to create and harness, drastically reducing the noise pollution required to convert energy to a useful form. Residential size solar energy systems also have very little impact on the surrounding environment, in contrast with other renewable energy sources such as wind and hydro electric power.

Low Maintenance

Solar panels have no moving parts and require very little maintenance beyond regular cleaning. Without moving parts to break and replace, after the initial costs of installing the panels, maintenance and repair costs are very reasonable.

原文翻译：

与其他形式的可再生能源相比，太阳能的优点和缺点已经引起了广泛的争论。虽然太阳能明显优于某些形式的能源，但其高昂的成本和依赖于地理位置的效率限制了它的吸引力。然而，它的许多优势也值得进一步发展，甚至可能适用于住宅。

太阳能仍然很受欢迎，因为它是一种既可再生又清洁的能源。这些优势，加上各国最终能够利用太阳能来减少全球变暖的希望，确保了太阳能的普及。

可再生

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

724

太阳能是一种真正的可再生资源。世界上所有地区都有能力收集一定数量的太阳能，并且每天都可以收集太阳能。

清洁

太阳能是无污染的。它不会像石油能源那样产生温室气体，也不会像核能那样产生必须储存的废物。它的制造和利用更加安静，大大减少了将能源转化为有用形式所需的噪音污染。与风能和水力发电等其他可再生能源相比，住宅规模的太阳能系统对周围环境的影响也很小。

低维护成本

太阳能电池板没有活动部件，除了定期清洁外，几乎不需要维护。无需破坏和更换活动部件，经过安装面板的初期费用，维护和维修费用非常合理。

参考答案：

Although solar power's high cost and efficiency dependent on geography have limited its appeal, a large number of advantages also merit further development and even possible adaptation for residences because it is both a renewable and clean source of energy, and nations can use solar power to decrease global warming ensure its popularity, as maintenance and repair costs are very reasonable.

114. Ecology and Climatology 生态学和气候学 #091114

Ecology is the study of interactions of organisms among themselves and with their environment. It seeks to understand patterns in nature (e.g., the spatial and temporal distribution of organisms) and the processes governing those patterns. Climatology is the study of the physical state of the atmosphere – its instantaneous state or weather, its seasonal-to-interannual variability, its long-term average condition or climate, and how climate changes over time. These two fields of scientific study are distinctly different. Ecology is a discipline within the biological sciences and has as its core the principle of natural selection. Climatology is a discipline within the geophysical sciences based on applied physics and fluid dynamics. Both, however, share a common history.

英澳新三国（同一国家任意三所院校）

725

The origin of these sciences is attributed to Aristotle and Theophrastus and their books Meteorological and Enquiry into Plants, respectively, but their modern beginnings trace back to natural history and plant geography. Seventeenth, eighteenth, and nineteenth century naturalists and geographers saw changes in vegetation as they explored new regions and laid the foundation for the development of ecology and climatology as they sought explanations for these geographic patterns. Alexander von Humboldt, in the early 1800s, observed that widely separated regions have structurally and functionally similar vegetation if their climates are similar. Alphonse de Candolle hypothesized that latitudinal zones of tropical, temperate, and arctic vegetation are caused by temperature and in 1874 proposed formal vegetation zones with associated temperature limits.

原文翻译：

生态学是一门研究生物之间以及它们与环境之间相互作用的学科。它试图理解自然界的模式(例如生物体的空间和时间分布)和控制这些模式的过程。气候学是研究大气的物理状态——比如它的瞬时状态或天气，它的季节到年际变化，它的长期平均状况或气候，以及气候如何随时间变化。这两个科学研究领域截然不同。生态学是生物科学中的一门学科，其核心是自然选择原理。气候学是地球物理科学中的一门学科，以应用物理学和流体动力学为基础。然而，两者有着共同的历史。

这两门科学的起源分别归功于亚里斯多德和泰奥弗拉斯都及其著作《气象学》和《植物探究》，但它们的现代起源可追溯到自然史和植物地理学。17世纪、18世纪和19世纪，自然学家和地理学家在探索新地区的过程中看到了植被的变化，并为生态学和气候学的发展奠定了基础，同时也为这些地理模式寻求解释。亚历山大·冯·洪堡(Alexander von Humboldt)在1800年代早期观察到，如果气候相似，那么广泛分布的地区在结构和功能上都有相似的植被。Alphonse de Candolle假设热带、温带和北极植被的纬向带是由温度引起的，并在1874年提出了有相关温度限制的正式植被带。

参考答案：

Ecology is the study of interactions of organisms among themselves and with their environment, a discipline within the biological sciences, whereas climatology is the study of the physical state of the atmosphere, a discipline within the geophysical sciences, but these two disciplines share a common history because both their modern beginnings trace back to natural history and plant geography although the origin of these sciences is attributed to Aristotle and Theophrastus.

115. Raw Honey Health Benefits 原蜜对健康的好处 #091115

According to Dr. Ron Fessenden, MD, MPH, the average American consumes more than 150 pounds of refined sugar, plus an additional 62 pounds of high fructose corn syrup every year. In comparison, we consume only around 1.3 pounds of honey per year on average in the U.S.

According to new research, if you can switch out your intake of refined sugar and use pure raw honey instead, the health benefits can be enormous.

What is raw honey? It's a pure, unfiltered and unpasteurized sweetener made by bees from the nectar of flowers. Most of the honey consumed today is processed honey that's been heated and filtered since it was gathered from the hive. Unlike processed honey, raw honey does not get robbed of its incredible nutritional value and health powers.

What are some of the benefits of raw honey? It can help with everything from low energy to sleep problems to seasonal allergies. Switching to raw honey may even help weight-loss efforts when compared to diets containing sugar or high fructose corn syrup. I'm excited to tell you more about one of my all-time favorite natural sweeteners today, which I hope will convince you to eat honey more and sugar less.

原文翻译：

根据医学博士罗恩·费森登(Dr. Ron Fessenden)的说法，美国人平均每年消耗 150 多磅的精制糖，外加 62 磅的高果糖玉米糖浆。相比之下，美国人每年平均只消耗 1.3 磅蜂蜜。英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

根据一项新的研究，如果你能改变你对精制糖的摄入，而使用纯蜂蜜，健康的好处是巨大的。

什么是生蜂蜜？它是由蜜蜂从花蜜中提取的，未经过滤且未经巴氏杀菌的甜味剂。如今人们消费的大部分蜂蜜都是经过加工的蜂蜜，它们都是从蜂箱中采集的，经过加热和过滤。与加工过的蜂蜜不同，生蜂蜜不会失去其难以置信的营养价值和健康功效。

生蜂蜜有哪些好处？它可以帮助解决从低能量、睡眠问题到季节性过敏的所有问题。与含糖或高果糖玉米糖浆的饮食相比，食用生蜂蜜甚至有助于减肥。很高兴告诉你关于我一直以来最喜欢的天然甜味剂之一的信息，我希望它能说服你多吃蜂蜜，少吃糖。

参考答案：

If you can switch out your intake of refined sugar and use pure raw honey instead, the health benefits can be enormous because raw honey does not get robbed of its incredible nutritional value and health powers, and the benefits of raw honey can help with everything from low energy to sleep problems to seasonal allergies, while switching to raw honey may even help weight-loss efforts.

116. Social media in libraries 社交媒体与图书馆 #091116

Ten years ago, Barsky and Purdon (2006) discovered that social networks that are expanding communication through social media are becoming popular and the costs involved are getting further reduced. Yet, library executives did not see how such a phenomenon could become a part of library and information services. They felt that the users should be left to their social media while the library carried on with its traditional roles (De Rosa et al., 2007). This was also the case when Charnigo and Barnett-Ellis (2007) conducted a survey of 126 academic librarians and concluded that 54% of the librarians surveyed did not believe that there was an academic purpose for Facebook. The rationale behind these librarians' belief was that social media was a space where students interact with each other. Hence, the librarian was not welcome as their coming in might be viewed as an invasion of space. But time has proved that as the technology of social media became more popular, users and librarians acquired digital

728

literacy, and libraries, seeing an explosion of social media around it, were forced to reconsider their stance. In a survey involving 497 international librarians, Taylor & Francis (2014) discovered that over 70% of librarians now feel that the use of social media is important. Though the wave began with public libraries (Mon, 2015), today, libraries of every type either have a social media presence or they are seriously considering it. Hence, the use of social media by libraries has become mainstream.

原文翻译：

十年前，Barsky 和 Purdon(2006)发现，通过社交媒体扩大交流的社交网络正变得越来越流行，所涉及的成本也在进一步降低。然而，图书馆的管理者们并不认为这种现象会成为图书馆和信息服务的一部分。他们认为，用户应该留给他们的社交媒体，而图书馆继续其传统角色(De Rosa 等人，2007)。Charnigo 和 Barnett-Ellis(2007)对 126 位学术图书馆员进行了调查，结果显示 54%的馆员不认为 Facebook 有学术目的。这些图书馆员相信社交媒体是一个学生相互交流的空间。因此，图书管理员不受欢迎，因为他们的到来可能被视为对空间的侵犯。但时间证明，随着社交媒体技术变得越来越流行，用户和图书管理员获得了数字素养，而看到社交媒体的爆炸式增长，图书馆不得不重新考虑自己的立场。Taylor & Francis(2014)在一项涉及 497 名国际图书馆员的调查中发现，超过 70%的图书馆员觉得使用社交媒体很重要。虽然这股浪潮始于公共图书馆(Mon, 2015)，但今天，各种类型的图书馆要么有社交媒体存在，要么正在认真考虑它。因此，图书馆使用社交媒体已经成为主流。

参考答案：

While social networks are becoming popular, library executives did not see how such a phenomenon could become a part of library and information services, because social media was a space where students interact with each other, so the librarian coming in might be viewed as an invasion of space, but users and librarians acquired digital literacy and libraries were forced to reconsider their stance, so the use of social media by libraries has become mainstream.

117. Legumes 豆科植物 #091117

Gardeners can feed their families and enrich the soil by growing legumes, such as green beans, soybeans, lentils and peas. Legume roots produce their own nitrogen, which is a major fertilizer nutrient needed by all plants for growth. Nitrogen is produced in nodules that form on the roots of legumes, which contain Rhizobium bacteria. The bacteria take nitrogen from the air and convert it into a form the plants can use.

When legumes are pulled up in the fall, excess nitrogen from the nodules is left in the soil. The excess organic nitrogen can be used by other plants the following growing season. It's considered organic nitrogen because it was produced naturally, making green beans or peas great rotational crops in an organic crop production system.

Organic growers prefer organic nitrogen because of its natural origins and because it breaks down slowly in the soil, thus slowly feeding plants throughout the growing season. Synthetic nitrogen fertilizers tend to release nitrogen quickly and are harsher on the environment. Synthetic nitrogen fertilizers are generally applied in split applications during the season to mimic the slow release of organic nitrogen sources.

Each specific legume generally requires a specific type of Rhizobium bacteria to produce nodules on their roots. Gardeners who have never grown green beans before can purchase small bags of inoculum or bacteria from most popular vegetable seed catalogs. Before planting beans, open the package and pour in the dust-like bacteria among the seed. Shake the package and then plant. Nodules will form on the roots as they develop. The bacteria will remain in the soil, making it unnecessary to inoculate the seed next year.

Do not apply extra nitrogen fertilizer to bean crops. Doing so makes bacteria in the nodules lazy, encouraging them to stop producing their own nitrogen. Legumes that are particularly popular in the home vegetable garden include lima beans, peas, edible soybeans, lentils and fava beans. In a recent survey, 44 percent of gardeners trained through New Mexico State University's Master Gardener Program said they grew green beans and other legumes in their home gardens. When planting, be sure to purchase appropriate strains of Rhizobium bacteria for each type of legume.

原文翻译：

园丁可以种植豆类，如绿豆、黄豆、扁豆和豌豆，让家人吃饱，让土壤肥沃。豆科植物的根自己产生氮，这是所有植物生长所需的主要肥料养分。氮素在豆科植物根部形成的根瘤中产生，根瘤中含有根瘤菌。细菌从空气中吸收氮，并将其转化为植物可以利用的一种形式。

当豆类作物在秋天被拔起时，根瘤中多余的氮残留在土壤中。多余的有机氮可以被其他植物在下一个生长季节使用。它被认为是有机氮，因为它是自然产生的，从而使绿豆或豌豆成为有机作物生产系统中很好的轮作作物。

有机种植者更喜欢有机氮，因为它的自然来源，也因为它在土壤中分解缓慢，因此在整个生长季节都缓慢地为植物提供养分。合成氮肥倾向于快速释放氮，对环境的影响更大。合成氮肥一般在季节中分次施用，以模拟有机氮源的缓慢释放。

每一种特定的豆科植物通常需要一种特定类型的根瘤菌在其根部产生根瘤。从未种植过绿豆的园丁可以从最受欢迎的蔬菜种子目录中购买小袋的疫苗或细菌。种植豆子之前，打开包装，在种子中倒入灰尘状的细菌。摇动包装，然后种植。随着发育，根瘤会在根部形成。细菌会留在土壤里，因此明年就没有不需要再给种子接种了。

不要对豆类作物施用额外的氮肥。这样做会使结核中的细菌变得懒惰，促使它们停止产生自己的氮。在家庭菜园中特别受欢迎的豆类包括利马豆、豌豆、可食用大豆、扁豆和蚕豆。在最近的一项调查中，44%接受过新墨西哥州立大学园艺硕士课程培训的园丁说，他们在自家花园里种植绿豆和其他豆类。种植时，一定要为每种豆类购买合适的根瘤菌菌株。

参考答案：

Gardeners can feed their families and enrich the soil by growing legumes because excess nitrogen from the nodules is left in the soil when legumes are pulled up, which can be used by other plants in the following growing season, but each specific legume generally requires a specific type of Rhizobium bacteria, so do not apply extra nitrogen fertilizer to bean crops.

118. United Nations Volunteers Program 联合国志愿者计划 #091118

准确原文:

If you are inspired to take concrete action for global peace and development, take a look at [the United Nations Volunteers \(UNV\) program](#). Every year, up to 8,000 [qualified and experienced women and men of some 160 different nationalities volunteer at least six months](#) of their lives to help others. These UN Volunteers work in some 130 countries promoting peace, responding to disasters, empowering communities and helping to build sustainable livelihoods and lasting development. UN Volunteers come from dozens of professional backgrounds but all of them are catalysts of positive change. [They are encouraged to be creative and entrepreneurial](#), and [foster volunteerism for peace and development](#) both within and beyond their assignments. [They work at the heart of communities in partnership with governments](#), United Nations entities and civil society. [Being a UN Volunteer](#) is not a career (you are currently limited to four years of service), but it [is rich with opportunities and experience and offers huge personal rewards](#). As a UN Volunteer you receive a Volunteer Living Allowance (VLA) which covers basic needs, housing and utilities. Additionally, UNV will provide a settling-in-grant, life, health, and permanent disability insurance, return airfares and a nominal resettlement allowance.

原文翻译:

如果你受到鼓舞，想为全球和平与发展采取具体行动，不妨看看联合国志愿者(UNV)计划。

每年，多达 8000 名来自 160 个不同国籍的合格和有经验的男女志愿者至少在他们生命的六个月里帮助他人。

这些联合国志愿人员在约 130 个国家开展工作，促进和平、应对灾害、增强社区能力并帮助建立可持续生计和持久发展。

联合国志愿者有数十种专业背景，但他们都是积极变化的催化剂。

他们被鼓励具有创造性和企业家精神，并在其任务内外促进和平与发展的志愿精神。

它们与各国政府、联合国实体和民间社会结成伙伴关系，在社区的核心开展工作。

成为一名联合国志愿者并不是一种职业(你目前只能服务四年)，但它拥有丰富的机会和经验，并提供了巨大的个人回报。

作为一名联合国志愿者，你会得到一份志愿者生活津贴(VLA)，包括基本需求、住房和公用事业。

此外，志愿人员方案将提供定居补助金、生命、健康和永久残疾保险、回程机票和象征性的重新安置津贴。

参考答案：

In the United Nations Volunteers program, qualified and experienced women and men of different nationalities volunteer at least six months, and they are encouraged to be creative and entrepreneurial to foster volunteerism for peace and development because they work at the heart of communities in partnership with governments, United Nations entities and civil society, so being a UN Volunteer is rich with opportunities and experience and offers huge personal rewards.

119. Reading Aloud 大声朗读 #091119

It might seem a little eccentric but reviewing your work by reading it aloud can help to identify the woolliest areas. This works best if you perform your reading in a theatrical way, pausing at the commas and ends of sentences. If you run out of breath during a sentence, it is probably too long. You ought to be able to convert your writing into a speech in this way if it sounds too stilted and convoluted, perhaps you could rework these parts until they sound fluid. It is unlikely that your reader will be fooled by the idea that long words make you sound clever. Cluttering a sentence with too many complicated words can prevent its meaning from being understood at all. A short word is always preferable to a long one. Why should anyone choose the word erroneous over the word wrong in an essay? Usually, writers who employ more obscure words are trying to sound impressive but can appear pretentious. Direct words enable you to control what you are saying, and are not necessarily babyish, but the most appropriate ones for the job. When you read your writing aloud, you will notice that the key stress comes at the end of your sentence. It is, therefore, most effective to end with a short and emphatic word to secure our point. Try to resist the impulse to waffle at the end of your sentence by trailing off into qualifying clauses. It might be worth relocating the clause to the beginning of the sentence or losing it altogether if you feel that it adds little to its meaning.

Your sentences might be the most grammatically perfect in the world, but still, cause your

writing to sound wrong if you have misjudged its tone. A colloquial style, which uses slang and exclamations, is an inappropriately chatty tone for an essay. However, style can be equally jarring if your vocabulary is too formal or ambitious for its context. **It is much more impressive to make complicated points using simple language and grammar.**

原文翻译：

这可能看起来有点古怪，但大声读出来回顾你的作品可以帮助你找出最模糊的地方。如果你用一种戏剧化的方式来进行阅读，在逗号和句子结尾停一下，这种方法效果最好。如果你在一个句子中喘不过气来，那可能是太长了。如果你的文章听起来太呆板和复杂，你应该能够把它转换成演讲，也许你可以修改这些部分，直到它们听起来流畅。你的读者不会被“长词使你听起来很聪明”这种想法所愚弄。把一个句子用太多复杂的词弄得乱七八糟，会使人根本无法理解它的意思。短词总是比长词更可取。为什么在一篇文章中，每个人都要选择“erroneous”这个词，而不是“wrong”这个词呢？通常，作家使用更多的隐晦词汇是为了让自己听起来令人印象深刻，但可能会显得做作。直接的话语能让你控制自己说的话，不一定幼稚，但却是最适合这份工作的语言。当你大声朗读你写的东西时，你会注意到重音出现在句子的末尾。因此，最有效的方式是用一个简短而强调的词来结束我们的观点。试着克制住在句尾废话连篇的冲动，不要在句子末尾使用修饰语。如果你觉得这样做对句子的意思没有什么帮助，可以把从句移到句子的开头，或者干脆把它丢掉。

你的句子可能是世界上语法最完美的，但是，如果你错误判断了你的语气，你的文章听起来还是错误的。口语化的风格，使用俚语和感叹词，这种闲聊语气是不适合一篇文章的。然而，如果你的词汇过于正式或过于夸张，风格也会同样令人不快。用简单的语言和语法来阐述复杂的观点会让人印象深刻得多。

参考答案：

much more impressive to make complicated points using simple language and grammar.

120. New Women 新女性 #091120

原文大意（不完整）：

About New Women in Britain and North America. This was a concept brought forward by a writer named Sarah, who wrote a book which triggered dispute between two kinds of commentators. The book mainly talks about women's position in the middle class, including a few aspects, such as finance, employment, marriage, etc.. The write advocated protecting women's position. Although the idea did not go well, it was still commemorated as women's movement.

原文翻译：

关于英国和北美的新女性。

这是一个叫 Sarah 的作家提出的概念，她写的一本书引发了两种评论家之间的争论。

这本书主要讲述了女性在中产阶级中的地位，包括一些方面，如金融、就业、婚姻等。

他提倡保护妇女地位。

尽管这个想法并不顺利，但它仍然以妇女运动的形式被纪念。

参考答案：

The concept of new women in Britain and North America was brought forward by a writer named Sarah, which triggered a dispute between two groups of commentators because the book advocated protecting women's position in finance, employment, and marriage, which was commemorated as women's movement although the idea did not go well.

121. How do dogs understand human emotions? 狗能读懂人类情绪 #091121

By living in close contact with humans, dogs have developed specific skills that enable them to interact and communicate effectively with people.

Recent studies have shown that the canine brain can pick up on emotional cues contained in a person's voice, body odor and posture, and read their faces. In this study, the authors observed what happened when they presented photographs of the same two adults' faces, a man and a

735

woman, to 26 feeding dogs. The images were placed strategically to the sides of the animals' line of sight and the photos showed a human face expressing one of the six basic human emotions: anger, fear, happiness, sadness, surprise, disgust or being neutral.

The dogs showed greater response and cardiac activity when shown photographs that expressed arousing emotional states such as anger, fear and happiness. They also took longer to resume feeding after seeing these images. The dogs' increased heart rate indicated that in these cases they experienced higher levels of stress. In addition, dogs turned their heads to the left when they saw human faces expressing anger, fear or happiness. The reverse happened when the faces looked surprised, possibly because dogs view it as a non-threatening, relaxed expression. These findings, therefore, support the existence of an asymmetrical emotional modulation of dogs' brains to process basic human emotions.

原文翻译：

通过与人类的密切接触，狗已经发展了特定的技能，使它们能够与人类有效地互动和交流。

最近的研究表明，犬类大脑可以从一个人的声音、体味和姿势中获取情感线索，并解读他们的面部表情。在这项研究中，作者观察了当他们把同样的两个成年人的照片，一男一女，给 26 只喂食的狗看时发生了什么。这些图片被策略性地放置在动物视线的两侧，照片展示了一张人类的脸，表达了人类六种基本情绪中的一种：愤怒、恐惧、快乐、悲伤、惊讶、厌恶和中立。

当狗狗看到表达愤怒、恐惧和快乐等情绪状态的照片时，它们的反应和心脏活动都更强烈。在看到这些图像后，他们恢复进食的时间也更长。狗的心率加快表明它们承受了更大的压力。此外，当狗看到人类脸上表达愤怒、恐惧或快乐时，它们会把头转向左边。当这些表情看起来很惊讶时，情况就相反了，可能是因为狗狗认为这是一种没有威胁、放松的表情。因此，这些发现支持了狗的大脑在处理人类基本情绪时存在一种不对称的情绪调节。

参考答案：

Recent studies have shown that the canine brain can pick up on emotional cues contained in a person's voice, body odor and posture, and read their faces because the dogs showed greater response and cardiac activity when shown photographs that expressed arousing emotional states, so dogs have developed specific skills that enable them to interact and communicate

effectively with people and there is an asymmetrical emotional modulation of dogs' brains to process basic human emotions.

122. Silent Movie 默片 #091122

The 1920's movie goers experience was largely dominated by silent movies but saw the introduction of synchronized sound. In the 1920's movie stars were really stars - with huge salaries, the fashions and activities of the Hollywood greats echoed around the world and 100,000 people would gather in cities all over the world, including such diverse cities as London and Moscow, to greet Mary Pickford and Douglas Fairbanks when they toured of Europe. Early silent movies were often accompanied by live piano or organ music and provided enormous entertainment value to audiences captivated by the experience of watching moving pictures on the silver screen.

Although there had been previous attempts to introduce sound, it wasn't until 1923 that a synchronized soundtrack was photographically recorded and printed on to the side of the strip of motion picture film and made it on to a commercially distributed movie. It would still be seven long years before talking pictures gained total supremacy and finally replaced the silent film era.

The first movie theatres were called Nickelodeons, and were very basic compared the luxurious picture palaces that followed but what an aura of excitement, of laughter, fun and tears surrounded them! Before the introduction of movie soundtracks, movies were often accompanied by scripted music from a piano.

原文翻译：

20 世纪 20 年代的电影观众的体验主要是无声电影，但看到了同步声音的引入。在 1920 年代电影明星真的明星——高薪、好莱坞伟大的时尚和活动呼应世界各地,100000 人聚集在世界各地的城市,包括伦敦和莫斯科等多样化的城市,迎接玛丽·皮克福德。道格拉斯费尔班克斯,当他们参观了欧洲。早期的无声电影通常伴有现场钢琴或管风琴音乐,为观众提供了巨大的娱乐价值,观众被观看银幕上的电影所吸引。虽然之前也有引入声音的尝试,但直到 1923 年,同步音轨才被照相记录下来,印在电影胶片的侧面,并制成了商业发行的电影。直到 7 年之后,有声电影才获得了绝对的霸权,最终取代了无声电影的时代。第一个电影院被称为 nickelodeon, 和随后的豪华电影宫殿相比是非常基础的,但是兴奋,欢笑,乐趣和眼泪包围着他们!在引入电影原声之前,电影通英澳新三国(同一国家任意三所院校)

常伴随着由钢琴伴奏的脚本音乐。

参考答案：

The 1920's movie goers experience was largely dominated by silent movies but saw the introduction of synchronized sound because movies were often accompanied by scripted music from a piano before the introduction of movie soundtracks, but in 1923 a synchronized soundtrack was photographically recorded and made it on to a commercially distributed movie, and seven years later talking pictures gained total supremacy and finally replaced the silent film era.

123. Humans get little sleep 人类缺乏睡眠 #091123

If it seems like you're not getting enough sleep, you're not alone. People have evolved to sleep much less than chimps, baboons or any other primates studied so far, a new study finds. Charles Nunn and David Samson are evolutionary anthropologists. They study how humans have evolved to behave the way we do. Nunn works at Duke University in Durham, N.C. Samson works at the University of Toronto Mississauga in Canada. In their new study, the two compared sleep patterns in 30 different species of primates, including humans. Most species slept between nine and 15 hours daily. Humans averaged just seven hours of shut-eye. Based on lifestyle and biological factors, however, people should get 9.55 hours, Nunn and Samson calculate. Most other primates in the study typically sleep as much as the scientists predicted they should. Nunn and Samson shared their findings online February 14 in the American Journal of Physical Anthropology.

The researchers argue that two long-standing features of human life may play into our short sleep times. The first stems from when humans' ancestors descended from the trees to sleep on the ground. At that point, people probably had to spend more time awake to guard against predators. The second may reflect the intense pressure humans face to learn and teach new skills and to make social connections. That has left less time for sleep.

As sleep declined, rapid-eye movement — or REM — sleep took on an outsize role in humans, Nunn and Samson propose. REM sleep is when we dream. And it has been linked to learning and memory.

英澳新三国（同一国家任意三所院校）

738

“It’s pretty surprising that non-REM sleep time is so low in humans,” Nunn says. “But something had to give as we slept less.”

原文翻译：

如果你睡眠不足，你不是一个人。一项新的研究发现，人类在进化过程中比黑猩猩、狒狒或其他灵长类动物的睡眠时间要少得多。查尔斯·纳恩和大卫·萨姆森是进化人类学家。

他们研究人类是如何进化成我们的行为方式的。纳恩在北卡罗来纳州达勒姆的杜克大学工作，萨姆森在加拿大多伦多大学米西索加分校工作。在他们的新研究中，两人比较了包括人类在内的 30 种灵长类动物的睡眠模式。大多数物种每天睡 9 到 15 个小时。人类的平均睡眠时间只有 7 小时。然而，根据纳恩和萨姆森的计算，基于生活方式和生物因素，人们应该每天睡 9.55 小时。在这项研究中，大多数其他灵长类动物的睡眠时间通常和科学家预测的一样多。Nunn 和 Samson 在 2 月 14 日的《美国体质人类学杂志》上分享了他们的发现。

研究人员认为，人类生活中两个长期存在的特征可能导致我们的短睡眠时间。第一个起源于人类祖先从树上下来睡在地上的时候。在这种情况下，人们可能不得不花更多的时间保持清醒来防范捕食者。第二种可能反映了人类在学习和传授新技能以及建立社会联系方面所面临的巨大压力。这使得睡眠时间减少。

纳恩和萨姆森提出，随着睡眠时间的减少，快速眼动睡眠(REM)在人类中扮演了非常重要的角色。快速眼动睡眠是我们做梦的时候。它与学习和记忆有关。

纳恩说：“人类的非快速眼动睡眠时间如此之短，这很令人惊讶。”

“但由于我们睡得越来越少，有些东西不得不放弃。”

参考答案：

People have evolved to sleep much less than any other primates, because humans’ ancestors had to spend more time awake to guard against predators and it may also reflect the intense pressure humans face to learn and teach new skills and to make social connections, which left less time for sleep, so rapid-eye movement (REM) sleep, linked to learning and memory when we dream, took on an outsize role in humans.

124. Negotiation and compromise 谈判与妥协 #091124

Negotiation is a common process in business to mainly solve business conflicts between both parties. Compromise is a basic negotiation state in which both parties give up something that they want in order to get something else they want more. Compromise usually occurs in unfair parties when there is a fixed pie to be divided up, and whatever on one side gets, the other side loses.

In compromise situations, neither side gets all of what they really want, but they each make concessions in order to reach an agreement that is acceptable to both. Both parties usually can reach a win-win concept through compromise. However, negotiation cannot resolve all the conflict if one party is unwilling to resolve the problem.

原文翻译：

谈判是业务中常见的过程，主要是为了解决双方的业务冲突。妥协是一种基本的谈判状态，双方为了得到他们更想要的东西而放弃自己想要的东西。妥协通常发生在不公平的一方，当有一个固定的馅饼要分，无论一方得到什么，另一方就会失去。在妥协的情况下，双方都不能得到他们真正想要的所有东西，但他们都会做出让步，以达成一个双方都能接受的协议。双方通常可以通过妥协达成双赢的理念。但是，如果一方不愿意解决问题，谈判就不能解决所有的冲突。

参考答案：

Negotiation is a common process in business to mainly solve business conflicts between both parties and compromise is a basic negotiation state that usually occurs in unfair parties, so neither side gets all of what they really want in compromise situations but both parties usually can reach a win-win concept through compromise, but negotiation cannot resolve all the conflict if one party is unwilling to resolve the problem.

125. Eater of animal flesh 肉食者 #091125

A day would come, Percy Shelley predicted in 1813, when "the monopolizing eater of animal flesh would no longer destroy his constitution by eating an acre at a meal". He explained: "The quantity of nutritious vegetable matter consumed in fattening the carcass of an ox would afford 10 times the sustenance if gathered immediately from the bosom of the earth." Two hundred years later, mainstream agronomists and dietitians have caught up with the poet. A 英澳新三国（同一国家任意三所院校）

growing scientific consensus agrees that feeding cereals and beans to animals is an inefficient and extravagant way to produce human food, that there is a limited amount of grazing land, that the world will be hard-pressed to supply a predicted population of 9 billion people with a diet as rich in meat as the industrialized world currently enjoys, and that it's not a very healthy diet anyway. On top of this, livestock contribute significantly towards global warming, generating 14.5% of all manmade greenhouse gas emissions, according to one much-quoted estimate from the United Nations. Now that the problem has been identified, the challenge is to persuade people in wealthy countries to eat less meat. That might seem a tall order, but governments have successfully persuaded people to quit smoking through a combination of public information, regulation and taxation.

原文翻译：

珀西·雪莱(Percy Shelley)在 1813 年曾预言，有一天，“垄断吃肉者将不再因一顿吃一英亩肉而破坏他的体质”。他解释说：“养肥一头牛的尸体所消耗的有营养的植物物质的数量，可以提供 10 倍于立即从土壤中采集的营养物质。”两百年后，主流的农学家和营养学家已经赶上了这位诗人。越来越多的科学共识认为，给动物喂食谷物和豆类是一种低效和奢侈的生产人类食物的方式。牧场的数量是有限的，世界将很难向预计的 90 亿人口提供像工业化国家目前所享受的那样富含肉类的饮食，而且这并不是一种非常健康的饮食。此外，据联合国一项广为引用的估计，畜牧业对全球变暖的贡献很大，产生了 14.5% 的人为温室气体排放。既然问题已经被发现了，现在的挑战是说服富裕国家的人们少吃肉。这似乎是一项艰巨的任务，但政府通过公共信息、监管和税收的结合成功地说服了人们戒烟。

参考答案：

A growing scientific consensus agrees that feeding cereals and beans to animals is an inefficient and extravagant way to produce human food, so the world will be hard-pressed to supply people with an unhealthy diet that is rich in meat, and livestock contribute significantly towards global warming, but the challenge is to persuade people in wealthy countries to eat less meat.

126. Muggy weather 闷热潮湿的天气 #091126

What Makes It Muggy? Like the heat index, **muggy is a "feels-like" condition**, except it has to do more with **how "breathable" the air feels** than how hot it feels. **The muggier the weather, the less chance you'll feel cool because of decreased evaporation rates**, which is why the following weather conditions are notoriously **linked to** the muggiest of days and nights: **Warm air temperatures**, generally of 70°F or above (the warmer the air, the more moisture it's able to hold); **High moisture** (the more moisture there is in the air, the "heavier" it feels); **and Low winds** (the less wind there is, the fewer air molecules there are passing over your skin evaporating and cooling you off). Since mugginess expresses how moist the air feels, you might think that **relative humidity** would be a good indicator of how muggy it feels outside. However, **dewpoint temperature is actually a better measure of mugginess**. Why? **Dewpoint not only gives you an indication of how moist air is, but how warm it is as well** (since dew point temperature can go as high as, but never higher than the actual air temperature). So **if the dew point is high, it means both air moisture and temperature probably are, too**.

原文翻译：

是什么让天气闷热？和炎热指数一样，闷热也是一种“体感”状态，只不过它更多地与空气有多“可呼吸”的程度有关，而不是感觉有多热。天气越闷热，你越不可能觉得凉爽，因为蒸发率下降。这就是为什么下面的这几种天气总是跟最闷热的昼夜关联在一起：热空气的温度，一般的 70°F 或以上（空气越温暖，空气中所能承载的水分就越多）；高湿度（空气中水分越多，感觉越“重”）；和低风（风越少，通过你皮肤蒸发和冷却的空气分子就越少）。既然闷热表达了空气的湿润程度，你可能会认为“相对湿度”可以很好地反映室外的闷热程度。然而，露点温度实际上是一个更好的衡量闷热的方法。为什么？露点不仅能告诉你空气有多潮湿，还能告诉你空气有多温暖（因为露点温度可以高达实际空气温度，但永远不会高于实际空气温度）。因此，如果露点很高，就意味着空气湿度和温度可能也很高。

参考答案：

While muggy is a "feels-like" condition about how "breathable" the air feels, the muggier the weather the less chance you'll feel cool because of decreased evaporation rates, which is related to warm air temperatures, high moisture and low winds, but dewpoint temperature is a better measure of mugginess than relative humidity because dewpoint indicates both how

英澳新三国（同一国家任意三所院校）

moist and how warm air is, so a high dew point means high air moisture and high temperature.

127. Brand loyalty 品牌忠诚度 #091127

Brand Loyalty

Brand loyalty exists when consumers repeat-purchase your brand rather than swapping and switching between brands. It is widely agreed that it is far more expensive to have to find a new customer than to keep existing ones happy, so brand loyalty is crucial for achieving high-profit margins. For charities, it is important to set a marketing objective of improving brand loyalty. If existing donors can be persuaded to set up a direct debit to the charity, its cash flow will improve significantly.

To enhance, or reposition a brand's image

Although some brands stay fresh for generations (Marmite is over 100 years old) others become jaded due to changes in consumer tastes and lifestyles. At this point, the firms need to refresh the brand image to keep the products relevant to the target market. A clear objective must be set. For instance: what brand attributes do we want to create? What do we want the brand to stand for?

Repositioning

This occurs when a firm aims to change a brand's image, so that the brand appeals to a new target market. Twelve years into its life cycle, McVitie's decided to reposition its Hobnobs biscuit brand. Hobnobs had been positioned as a homely, quite healthy biscuit for middle-aged consumers. Research pointed McVitie's in a new direction: younger, more male, and less dull. So new packaging was designed and then launched in conjunction with a new, brighter advertising campaign. In 2013 Hobnobs sales were worth 36 million pounds, 9 percent up on the previous year.

原文翻译：

品牌忠诚度

当消费者重复购买你的品牌，而不是在不同品牌之间交换时，就会产生品牌忠诚度。人们普遍认为，寻找新客户比取悦现有客户要昂贵得多，因此品牌忠诚度是实现高利润的关键。对于慈善机构来说，设立一个提高品牌忠诚度的营销目标是很重要的。如果能说服现有的捐赠者设立一个直接借记慈善机构的账户，该机构的现金流将显著改善。

743

提升或重新定位品牌形象

虽然有些品牌能保持世代新鲜(马麦酱有超过 100 年的历史), 但其他品牌会因为消费者口味和生活方式的变化而变得厌倦。在这一点上, 公司需要更新品牌形象, 以保持产品与目标市场相关。必须设定一个明确的目标。例如: 我们想要创造什么样的品牌属性? 我们希望这个品牌代表什么?

重新定位

当公司想要改变品牌形象, 以吸引新的目标市场时, 就会出现这种情况。进入生命周期 12 年后, 麦维他决定重新定位其 Hobnobs 饼干品牌。Hobnobs 被定位为一种适合中年消费者的家庭、相当健康的饼干。研究为麦维他指明了一个新方向: 更年轻, 更男性化, 不那么乏味。因此, 新的包装被设计出来, 然后与一个新的、更明亮的广告活动一起推出。2013 年, Hobnobs 的销售额为 3600 万英镑, 比前一年增长了 9%。

参考答案:

As brand loyalty exists when consumers repeat-purchase your brand, brand loyalty is crucial for achieving high-profit margins, but the firms need to refresh the brand image to keep the products relevant to the target market, so a clear objective must be set and repositioning occurs when a firm aims to a change a brand's image to appeal to a new target market.

128. Ethics 道德 #091128

Ethics is a set of moral obligations that define right and wrong in our practices and decisions. Many professions have a formalized system of ethical practices that help guide professionals in the field. For example, doctors commonly take the Hippocratic Oath, which, among other things, states that doctors do no harm "to their patients. Engineers follow an ethical guide that states that they "hold paramount the safety, health, and welfare of the public." Within these professions as well as within science, the principles become so ingrained that practitioners rarely have to think about adhering to the ethic - it's part of the way they practice.

And a breach of ethics is considered very serious, punishable at least within the profession (by revocation of a license, for example, and sometimes by the law as well). Scientific ethics calls for honesty and integrity in all stages of scientific practice, from reporting results regardless to properly attributing collaborators. This system of ethics guides the practice of science, from

英澳新三国 (同一国家任意三所院校)

data collection to publication and beyond. As in other professions, **the scientific ethic is deeply integrated into the way scientists work**, and they are aware that the reliability of their work and scientific knowledge in general depends upon adhering to that ethic. Many of the ethical principles in science relate to the production of unbiased scientific knowledge which is critical when others try to build upon or extend research findings. The open publication of data, peer review, replication, and collaboration required by the scientific ethic all help to keep science moving forward by validating research findings and confirming or raising questions about results.

原文翻译：

伦理学是一套道德义务，它定义了我们在实践和决策中的对错。许多职业都有一个正式的道德实践体系，帮助指导该领域的专业人士。例如，医生通常会遵循希波克拉底誓言(Hippocratic Oath)，该誓言声明医生不会“伤害”他们的病人。工程师遵循的道德准则是，他们“把公众的安全、健康和福利放在首位”。在这些专业领域和科学领域，这些原则变得如此根深蒂固，以至于从业者很少需要考虑是否要遵守伦理——这是他们实践的一部分方式。违反职业道德被认为是非常严重的，至少在职业范围内会受到惩罚(例如吊销执照，有时也会受到法律制裁)。科学伦理要求在科学实践的各个阶段都要诚实和正直，从不计后果地报告结果到恰当地确定合作者的身份。这一伦理体系指导着科学实践，从数据收集到出版以及其他方面。和其他职业一样，科学伦理深深融入了科学家的工作方式，他们意识到，他们的工作和科学知识的可靠性一般取决于坚持这种伦理。科学中的许多伦理原则都与公正的科学知识的产生有关，当其他人试图建立或扩展研究成果时，公正的科学知识是至关重要的。科学伦理所要求的数据公开发表、同行评审、复制和合作，都有助于通过验证研究发现、确认或提出对结果的疑问来推动科学前进。

参考答案：

While ethics is a set of moral obligations that define right and wrong in our practices and decisions, many professions have a formalized system of ethical practices that help guide professionals in the field, but a breach of ethics is considered very serious, punishable at least within the profession because scientific ethics calls for honesty and integrity in all stages of scientific practice, and the scientific ethic is deeply integrated into the way scientists work

129. Electric car 电动汽车 #091129

Although we tend to think of electric cars as being something completely modern, **they were in fact some of the earliest types of motorized vehicle.**

At the beginning of the twentieth century electric cars were actually more popular than cars with an internal combustion engine as they were more comfortable to ride in. However, as cars fueled by petrol increased in importance, electric cars declined. The situation became such that electric vehicles were only used for certain specific purposes - as fork-lift trucks, ambulances and urban delivery vehicles, for example.

Although **electricity** declined in use in road vehicles, it **steadily grew in importance as a means of powering trains.** Switzerland, for example, was quick to develop an electrified train system, encouraged in this no doubt by the fact that it had no coal or oil resources of its own.

Nowadays **there is renewed interest in electricity as a means of powering road vehicles.** Why is this the case? Well, undoubtedly **economic reasons** are of considerable importance. The cost of oil has risen so sharply that there is a strong financial imperative to look for an alternative. However, there are also **environmental motivations.** Emissions from cars are blamed in large part for - among other things - the destruction of the ozone layer and the resultant rise in temperatures in the polar regions. A desire not to let things get any worse is also encouraging research into designing effective electric transport.

原文翻译：

虽然我们倾向于认为电动汽车是一种完全现代的东西，但它们实际上是最早的机动车辆。

在 20 世纪初，电动汽车实际上比内燃机汽车更受欢迎，因为乘坐起来更舒服。然而，随着汽油驱动的汽车越来越重要，电动汽车下降了。情况变得如此，电动汽车只用于某些特定用途，例如叉车、救护车和城市运输车辆。

尽管电力在道路车辆上的使用减少了，但作为火车动力的一种手段，它的重要性却稳步上升。例如，瑞士很快就发展了电气化火车系统，这无疑是受到了其自身没有煤炭或石油资源的事实的鼓励。

如今，人们重新对电力作为道路车辆动力的一种手段产生了兴趣。为什么会这样？毫无疑问，经济原因是相当重要的。石油价格上涨如此之快，以至于在财政上迫切需要寻

找替代能源。然而，也有环境方面的动机。汽车排放在很大程度上是造成臭氧层破坏和极地地区气温上升的原因之一。不让情况变得更糟的愿望也鼓励了设计有效电力运输的研究。

参考答案：

While electric cars were actually more popular than cars at the beginning of the twentieth century, the use of electric cars declined as cars fueled by petrol increased in importance and electricity steadily grew in importance as a means of powering trains, but nowadays there is renewed interest in electricity as a means of powering road vehicles because of economic reasons and environmental motivations.

130. Is language natural? 语言是先天能力吗? #091130

When people start thinking about language, the first question which often occurs to them is this: is language natural to humans? - in the same way that grunting is natural to pigs, and barking comes naturally to dogs. Or is it just something we happen to have learned? - in the same way that dogs may learn to beg, or elephants may learn to waltz, or humans may learn to play the guitar.

Clearly, in one sense, children 'learn' whatever language they are exposed to, be it Chinese, Nootka or English. So no one would deny that 'learning' is very important. But the crucial question is whether children are born with 'blank sheets' in their head as far as language is concerned - or whether humans are 'programmed' with an outline knowledge of the structure of languages in general.

This question of whether language is partly due to nature or wholly due to learning or nurture is often referred to as the nature-nurture controversy, and has been discussed for centuries. For example, it was the topic of one of Plato's dialogues, the Cratylus. Controversies which have been going on for literally ages tend to behave in a characteristic fashion. They lie dormant for a while, then break out fiercely. This particular issue resurfaced in linguistics in 1959 when the linguist Noam Chomsky wrote a devastating and witty review of Verbal Behavior, a book by the Harvard psychologist B.F. Skinner (Skinner 1957; Chomsky 1959). This book claimed to 'explain' language as a set of habits gradually built up over the years. According to Skinner, no complicated innate or mental mechanisms are needed. All that is necessary is the systematic observation of the events in the external world which prompt the speaker to utter

sounds.

原文翻译:

当人们开始思考语言的时候，他们经常会想到的第一个问题是:语言是人类与生俱来的吗?——就像猪很自然地发出呼噜声，狗很自然地吠叫一样。或者这只是我们碰巧学到的东西?就像狗学会乞求，大象学会跳华尔兹，人类学会弹吉他一样。

显然，在某种意义上，孩子们“学习”了他们接触到的任何语言，无论是汉语、诺特卡语还是英语。所以没有人会否认“学习”是非常重要的。但关键的问题是，就语言而言，孩子们的大脑是天生就有一张“白纸”，还是人类天生就对语言结构有大致地了解。

语言的部分原因是天生的，还是完全是后天习得的，这个问题经常被称为先天-后天的争论，已经讨论了几个世纪。例如，这是柏拉图的一篇对话录《克拉特拉斯》的主题。争论已经持续了很长一段时间，其行为往往有其特有的方式。它们蛰伏一段时间，然后猛烈地爆发出来。1959年，语言学家诺姆·乔姆斯基(Noam Chomsky)就哈佛大学心理学家 B.F.斯金纳(B.F. Skinner)的《言语行为》(Verbal Behavior)撰写了一篇颇具感染力、诙谐幽默的评论，这一问题在语言学领域重新浮出水面。这本书声称，“解释”语言是一套逐渐建立起来的习惯。根据斯金纳的说法，不需要复杂的先天或心理机制。所有需要做的就是系统地观察外部世界的事件，这些事件促使说话者发出声音。

参考答案:

When people start thinking about language, the first question is whether language is natural to humans, referred to as the nature-nurture controversy and has been discussed for centuries, which resurfaced in linguistics in 1959 when the linguist Noam Chomsky wrote a devastating and witty review of Skinner's book that claimed to 'explain' language as a set of habits gradually built up over the years.

131. Family dinners 家庭晚餐 #091131

As a family therapist, I often have the impulse to tell families to go home and have dinner together rather than spending an hour with me. And 20 years of research in North America, Europe, and Australia back up my enthusiasm for family dinners. It turns out that sitting down for a nightly meal is great for the brain, the body, and the spirit. And that nightly dinner doesn't have to be a gourmet meal that took three hours to cook, nor does it need to be made

748

with organic arugula and heirloom parsnips. For starters, researchers found that for young children, dinnertime conversation boosts vocabulary even more than being read aloud to. The researchers counted the number of rare words – those not found on a list of 3,000 most common words – that the families used during dinner conversations. Young kids learned 1,000 rare words at the dinner table, compared to only 143 from parents reading storybooks aloud. Kids who have a large vocabulary read earlier and more easily. Older children also reap intellectual benefits from family dinners. For school-age youngsters, regular mealtime is an even more powerful predictor of high achievement scores than time spent in school, doing homework, playing sports or doing art. Other researchers reported a consistent association between family dinner frequency and teen academic performance.

Adolescents who ate family meals 5 to 7 times a week were twice as likely to get an A in school as those who ate dinner with their families fewer than two times a week.

原文翻译：

作为一名家庭治疗师，我经常有让家人回家一起吃饭的冲动，而不是花一个小时和我在一起。在北美、欧洲和澳大利亚进行了 20 年的研究，这支持了我对家庭晚餐的热情。事实证明，坐下来吃一顿晚餐对大脑、身体和精神都有好处。而且，他们的晚餐不一定非得是花三个小时烹制的美食，也不需要有机芝麻菜和祖传的防风草来做。首先，研究人员发现，对于年幼的孩子来说，晚餐时间的交谈比大声朗读更能提高词汇量。研究人员统计了这些家庭在晚餐交谈中使用的生僻词的数量，生僻词是指那些在 3000 个常用词列表中没有找到的词。年幼的孩子在餐桌上学会了 1000 个生僻字，相比之下，通过父母大声朗读故事书，他们只能学会 143 个生僻字。词汇量大的孩子阅读得更早，也更容易。大一点的孩子也能从家庭晚餐中获得智力上的好处。对于学龄儿童来说，有规律的用餐时间比花在学校、做作业、运动或艺术上的时间更能预示高分。其他研究人员报告称，家庭晚餐频率与青少年的学习成绩之间存在一致的联系。

与每周与家人共进晚餐少于两次的青少年相比，每周与家人共进晚餐 5 到 7 次的青少年在学校得 A 的可能性要高出一倍。

参考答案：

It turns out that sitting down for a nightly meal is great for the brain, the body, and the spirit because researchers found that for young children, dinnertime conversation boosts vocabulary even more than being read aloud to and older children also reap intellectual benefits from

family dinners as other researchers reported a consistent association between family dinner frequency and teen academic performance.

132. Wright Brothers [V2] 暂无原文 #091132

第1段：这两兄弟小时候家庭背景。（Wilbur and Orville Wright were two of seven children born to Milton Wright (1828–1917), of English and Dutch ancestry, and Susan Catherine Koerner (1831–1889), of German and Swiss ancestry. – Wikipedia）第一句话和这有点像。然后又说他俩后来开了个 bikeshop，最后造出了飞机。

第2段：大致是小时候受他俩父亲给他们买的一个 toy helicopter 的影响。

(In 1878 when the family lived in Cedar Rapids, Iowa, their father brought home a toy helicopter for his two younger sons. . – Wikipedia)

第3段：开店挣钱后开始研究飞机

第4段：展示他们的成果（出现过 display），好像还说了其中一位因病早逝(death)。

部分词：German the wright brothers bike-shop toy helicopter father money flight

133. Prior knowledge 先验知识 #091133

What is known (prior knowledge or pre-existing knowledge) is the knowledge, skill or ability that a learner brings to a new learning encounter. This includes all knowledge that is available before the learning event, and which has been gathered or developed by any means, and in any situation, including both formal and, quite often, informal learning situations. Learners need enough previous knowledge and understanding to enable them to learn new things; they also need help making links with new and previous knowledge explicit.

It is considered to be valuable to go through a process of what has been called 'activating prior knowledge'. Teachers often go through this process at the beginning of a new topic. They also use introductory strategies at the beginning of lessons which are continuations from previous lessons. In terms of the practicalities of teaching, this is a process of making children think about the topic or remember what has been covered already. In terms of theory, it is to do with activating particular schemas.

原文翻译：

已知的（先验知识或预先存在的知识）是指学习者新的学习过程中所具备的知识、技能或能力。这包括所有在学习活动之前可以获得的知识，以及在任何情况下以任何方式收集或开发的知识，包括正式的和通常是非正式的学习情况。学习者需要足够的知识和理解来学习新事物；他们还需要帮助，将新的和以前的知识联系起来。

人们认为，经历“激活先验知识”这个过程是值得的。教师在开始一个新话题时，经常要带学生走一遍这个过程。在一些延续性课程中，他们还会在课程开始时使用介绍性的策略。就教学的实用性而言，这是一个让孩子思考这个话题的过程，或者说，是让孩子记住已经讲过的内容的过程。就教学理论而言，这个过程与激活特定模式（图式）有关。

参考答案：

Prior knowledge or pre-existing knowledge is the knowledge, skill or ability that a learner brings to a new learning encounter, which enables them to learn new things and to make links with new and previous knowledge explicit, so it is valuable to go through a process called 'activating prior knowledge' because it is to do with activating particular schemas in terms of theory.

134. Rosling's discoveries 罗斯林的两大发现 #091134

A medical doctor and professor for international health at Stockholm's Karolinska Institute, Rosling became famous as the public educator who used statistics to show how the world is changing.

He chose this public role after making two significant discoveries.

Rosling's first discovery was that many people are not aware of even the most basic facts about global health and global development. Through surveys he conducted, Rosling found that at a time when poverty is falling faster than ever before, the majority of people think that the proportion of the world population living in extreme poverty is rising. Similarly, he found that many underestimate global life expectancy widely, and are not aware of the success of delivering healthcare services—for example, vaccines—globally. He found that people's worldviews often do not have much grounding in facts, even long before the “post-fact” era. Rosling was convinced that this unawareness of global progress matters.

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

751

He made it his mission to fight this “devastating ignorance” that turns us into cynics, as we falsely believe that global development must be a mirage.

Rosling’s second discovery was that this lack of factual knowledge was not because people are not interested in global development, but because it is too hard for those that want to know about global development to access this knowledge. Neither the experts nor the media were presenting how global development changes the world.

Based on these two insights, Hans Rosling made it his mission to bridge this gap and present the evidence that global development is a reality.

His approach to communicating research on global development was through public talks and the use of data visualisation.

原文翻译：

罗斯林是斯德哥尔摩卡罗林斯卡学院(Karolinska Institute)的一名医生和国际卫生教授，她以公共教育家的身份而闻名，她用统计数据来展示世界是如何变化的。

他在做出两项重大发现后选择了这个公众角色。

罗斯林的第一个发现是，许多人甚至不知道关于全球健康和全球发展的最基本的事实。通过他进行的调查，罗斯林发现，在贫困人口下降速度比以往任何时候都要快的时候，大多数人认为世界上生活在极端贫困中的人口比例正在上升。同样，他发现许多人普遍低估了全球的预期寿命，也不知道在全球范围内提供医疗保健服务(例如疫苗)的成功。他发现，人们的世界观往往没有多少事实依据，甚至早在“后事实”时代之前。

罗斯林确信，这种对全球进步的无知很重要。

他把与这种“毁灭性的无知”作斗争作为自己的使命，这种无知使我们变成了愤世嫉俗者，因为我们错误地认为全球发展必定是海市蜃楼。

罗斯林的第二个发现是，事实知识的缺乏并不是因为人们对全球发展不感兴趣，而是因为那些想了解全球发展的人很难获得这些知识。无论是专家还是媒体都没有介绍全球发展如何改变世界。

基于这两个观点，汉斯·罗斯林将弥合这一差距作为自己的使命，并拿出证据证明全球发展是现实。

他传播全球发展研究的方法是通过公开演讲和使用数据可视化。

参考答案：

While Rosling used statistics to show how the world is changing, his discoveries were that many people are not aware of the basic facts about global health and global development and that this lack of factual knowledge was because it is too hard to access this knowledge, so he made it his mission to fight this devastating ignorance, bridge this gap and present the evidence that global development is a reality.

135. Near Infra-Red Wavelengths 近红外波长 #091135

The colours that we see are a result of the light reflected within a narrow range of wavelengths – what we call the visible spectrum. But sunlight also spans wavelengths that we cannot see.

Humans can't see ultraviolet wavelengths, which many other animals can see.

But there's one set of wavelengths that elude all of us – these are near infra-red (NIR) wavelengths. And understanding how bird feathers interact with these wavelengths is important, not just for birds, but also for humans through the potential for improvements in thermal efficiency.

Our research in the School of BioSciences at the University of Melbourne suggests that some Australian birds can control their temperature and avoid overheating by reflecting near-infrared wavelengths of sunlight.

We collected information on 90 species of Australian birds and found a very strong link between living in hot, arid regions and reflecting a higher proportion of near-infrared light.

Researchers in the field of animal colouration have largely ignored near-infrared light, because it isn't easy to measure and there's no evidence that animals can see these wavelengths.

Because these wavelengths are invisible, they don't affect camouflage or sexual attractiveness, which are very important in the animal world. This means that many animals can control their temperature by altering reflection of near-infrared light without compromising their ability to hide or attract a mate.

原文翻译：

我们看到的颜色是光在一个狭窄的波长范围内反射的结果，我们称之为可见光谱。但阳光也可以跨越我们看不到的波长。人类看不到其他许多动物能看到的紫外线波长。

753

但是有一种波长是我们所有人都看不到的，那就是近红外波长。了解鸟类羽毛如何与这些波长相互作用是很重要的，这不仅对鸟类来说很重要，而且对人类来说也很重要，因为这可能会提高鸟类的热效率。我们在墨尔本大学生物科学学院的研究表明，一些澳大利亚鸟类可以通过反射阳光的近红外波长来控制体温，避免过热。我们收集了90种澳大利亚鸟类的信息，发现生活在炎热干旱地区和反射更高比例的近红外光之间有很强的联系。动物颜色研究领域的研究人员在很大程度上忽视了近红外光，因为它不容易测量，而且没有证据表明动物可以看到这些波长。因为这些波长是看不见的，它们不会影响到伪装或性吸引力，而这在动物世界中是非常重要的。这意味着许多动物可以通过改变近红外光的反射来控制它们的体温，而不影响它们隐藏或吸引配偶的能力。

参考答案：

While near infra-red (NIR) wavelengths elude all of us, understanding how bird feathers interact with these wavelengths is important for humans through the potential for improvements in thermal efficiency, and we found a very strong link between living in hot, arid regions and reflecting a higher proportion of near-infrared light, so many animals can control their temperature by altering reflection of near-infrared light without compromising their ability to hide or attract a mate.

136. South Africa 南非 #091136

The area that is now South Africa has been inhabited by humans for millennia. The San, the original inhabitants of this land, were migratory people who lived in small groups of about 15 to 20 people. They survived by fishing and hunting and by gathering roots and other wild foods. They did not build permanent dwellings but used rock shelters as temporary dwellings. Around 2,000 years ago Khoikhoi pastoralists migrated to the coast. In the eastern part of present-day South Africa, iron-working societies date from about 300 AD. The Sotho-Tswana and Nguni peoples arrived in this region around 1,200 AD. They lived by agriculture and stock farming, mined gold, copper and tin and hunted for ivory and built stone-walled towns. Over the centuries, these societies had diverse contacts with the Khoisan. Strife between the San and the Khoikhoi developed over competition for game; eventually the Khoikhoi became dominant. These peoples lived in the western part of present-day South Africa and are known collectively as the Khoisan.

原文翻译：

这片现在是南非的地区，人类居住了上千年。San 是这片土地的原始居民，他们是迁徙的人，生活在大约 15 到 20 人的小群体中。他们靠捕鱼、打猎、采集树根和其他野生食物为生。他们不建造永久住所，而是用岩石作为临时住所。大约两千年前，科伊科伊牧民迁移到海岸。在今天南非的东部，铁工社会可以追溯到公元 300 年左右。索托-茨瓦纳人和恩古尼人在公元 1200 年左右来到这一地区。他们以农业和畜牧业为生，开采黄金、铜和锡，狩猎象牙，建造石壁城镇。几个世纪以来，这些社会与科伊桑人有各种各样的联系。San 和科伊科伊人因争夺猎物而发生冲突；最终科伊科伊人占据了统治地位。这些人生活在今天的南非西部，被统称为科伊桑人。

参考答案：

While South Africa has been inhabited by humans for millennia, The San was the original inhabitants who lived in small groups, and around 2000 years ago Khoikhoi pastoralists migrated to the coast before the Sotho-Tswana and Nguni peoples arrived in this region around 1,200 AD, so strife between the San and the Khoikhoi developed over competition for game, but eventually the Khoikhoi became dominant who are known collectively as the Khoisan.

137. Independent workforce 独立工作 #091137

Working nine to five for a single employer bears little resemblance to the way a substantial share of the workforce makes a living today. Millions of people assemble various income streams and work independently, rather than in structured payroll jobs. This is hardly a new phenomenon, yet it has never been well measured in official statistics—and the resulting data gaps prevent a clear view of a large share of labor-market activity.

To better understand the independent workforce and what motivates the people who participate in it, the McKinsey Global Institute surveyed some 8,000 respondents across Europe and the United States. We asked about their income in the past 12 months—encompassing primary work, as well as any other income-generating activities—and about their professional satisfaction and aspirations for work in the future.

The resulting report, Independent work: Choice, necessity, and the gig economy, finds that up to 162 million people in Europe and the United States—or 20 to 30 percent of the working-age population—engage in some form of independent work. While demographically 英澳新三国（同一国家任意三所院校）

diverse, independent workers largely fit into four segments: free agents, who actively choose independent work and derive their primary income from it; casual earners, who use independent work for supplemental income and do so by choice; reluctants, who make their primary living from independent work but would prefer traditional jobs; and the financially strapped, who do supplemental independent work out of necessity.

全文翻译：

为一个雇主朝九晚五的工作与今天相当一部分劳动力的谋生方式几乎没有相似之处。数百万人汇集不同的收入来源，独立工作，而不是从事结构性工资工作。这已经不是什么新现象了，然而官方统计数据从来没有很好地衡量过这一现象——由此产生的数据差距使人们无法清楚地看到劳动力市场活动的很大一部分。

为了更好地了解独立劳动力以及参与其中的人的动机，麦肯锡全球研究所(McKinsey Global Institute)调查了欧洲和美国的约 8000 名受访者。我们询问了他们在过去 12 个月的收入情况——包括主要的工作，以及其他产生收入的活动——以及他们的职业满意度和对未来工作的渴望。

这份名为《独立工作:选择、需要和零工经济》的报告发现，在欧洲和美国，多达 1.62 亿人——即工作年龄人口的 20%到 30%——从事某种形式的独立工作。尽管在人口统计学上是多元化的，但独立工作者基本上可以分为四个部分：自由职业者，他们积极选择独立工作，并从中获得主要收入;选择独立工作以补充收入的临时工;不情愿的人，以独立工作为生，但更喜欢传统的工作;还有经济拮据的人，出于需要而做一些补充性的独立工作。

参考答案：

While millions of people assemble various income streams and work independently, the McKinsey Global Institute surveyed respondents across Europe and the United States, so the resulting report finds that up to 162 million people in Europe and the United States engage in some form of independent work, and independent workers largely fit into four segments: free agents, casual earners, reluctants, and the financially strapped.

138. Straw as building material “稻草房” #091138

Many technologies have promised these qualities, but few have been commercially viable. What's been lacking is the performance data needed to demonstrate that these technologies are durable, genuinely environmentally beneficial, and suitable to be insured. Over the past 13 years, our Department of Architecture & Civil Engineering has led on research into straw as a low-impact building material. This work, which has included developing a unique straw bale panel as well as scientific monitoring and testing, has now culminated in crucial industry certifications. The BM TRADA's Q-Mark certification guarantees a straw building's energy efficiency, fire safety, durability and weather-resilience and means that developers and homebuyers can now get insurance and mortgages for straw homes and buildings.

The innovative straw walls in the new houses provide two times more insulation than required by current UK building regulations. Based on monitoring a residential straw-bale development in Leeds, fuel bill reductions up to 90% can be expected. The walls have been built using ModCell technology; prefabricated panels consisting of a wooden structural frame infilled with straw bales or hemp and rendered with either a breathable lime-based system or ventilated timber or brick cladding. This technology combines the lowest carbon footprint and the best operational CO₂ performance of any system of construction currently available. In fact, as an agricultural co-product, straw buildings can be carbon negative as straw absorbs CO₂ when it grows.

全文翻译：

许多技术已经承诺了这些品质，但很少有商业上可行的。目前缺乏的是所需的性能数据来证明这些技术是持久的，并真正有利于环境，且适合投保。在过去的 13 年里，我们的建筑与土木工程系领导了稻草作为一种低影响建筑材料的研究。这项工作包括开发一种独特的稻草捆面板，以及科学的监测和测试，现在已经达到了关键的行业认证。BM TRADA 的 Q-Mark 认证保证了稻草建筑的能效、防火安全、耐久性和耐候性，这意味着开发商和购房者现在可以为稻草房屋和建筑获得保险和抵押贷款。

新房子中创新的稻草墙提供了比目前英国建筑法规要求的两倍多的隔热性能。根据监测利兹的住宅秸秆包发展，燃料费用有望减少 90%。墙壁是使用 ModCell 技术建造的；预制面板由木制结构框架组成，填充稻草包或大麻，并使用透气性的石灰基系统或通风的木材或砖覆层。这种技术结合了目前任何建筑系统中最低的碳足迹和最佳的 CO₂ 性能。事实上，作为一种农业副产品，稻草建筑可以是负碳的，因为稻草在生长过程

中吸收了 CO²。

参考答案：

While we have led on research into straw as a low-impact building material over the past 13 years, this work has now culminated in crucial industry certifications, which means that developers and homebuyers can now get insurance and mortgages for straw homes and buildings because the innovative straw walls in the new houses provide two times more insulation than required by current UK building regulations and straw buildings can be carbon negative

139. Positive mindset 积极心态 #091139

Research shows that when people work with a positive mind-set, performance on nearly every level — productivity, creativity, engagement — improves. Yet happiness is perhaps the most misunderstood driver of performance. For one, most people believe that success precedes happiness. “Once I get a promotion, I’ll be happy,” they think. Or, “Once I hit my sales target, I’ll feel great.” But because success is a moving target — as soon as you hit your target, you raise it again—the happiness that results from success is fleeting.

In fact, it works the other way around: People who cultivate a positive mind-set perform better in the face of challenge. I call this the “happiness advantage” — every business outcome shows improvement when the brain is positive. I’ve observed this effect in my role as a researcher and lecturer in 48 countries on the connection between employee happiness and success. And I’m not alone: In a meta-analysis of 225 academic studies, researchers Sonja Lyubomirsky, Laura King, and Ed Diener found strong evidence of directional causality between life satisfaction and successful business outcomes.

Another common misconception is that our genetics, our environment, or a combination of the two determines how happy we are. To be sure, both factors have an impact. But one’s general sense of well-being is surprisingly malleable. The habits you cultivate, the way you interact with co-workers, how you think about stress — all these can be managed to increase your happiness and your chances of success.

全文翻译：

研究表明，当人们以积极的心态工作时，几乎每个层面的表现——生产力、创造力、英澳新三国（同一国家任意三所院校）

投入度——都会提高。然而，快乐或许是最被误解的业绩驱动因素。一方面，大多数人认为成功先于幸福。“一旦我得到提升，我就会很高兴，”他们想。或者，“一旦我达到了销售目标，我会感觉很好。”但因为成功是一个移动的目标——一旦你达到了目标，你就会再次提高它——所以成功带来的快乐是短暂的。事实上，事实正好相反：培养积极心态的人在面对挑战时表现得更好。我称之为“快乐优势”——当大脑处于积极状态时，每一项业务结果都显示出改善。我曾在48个国家担任研究员工幸福与成功之间关系的研究员和讲师，在此过程中观察到了这种效应。我不是一个人：在对225项学术研究的元分析中，研究人员 Sonja Lyubomirsky、Laura King 和 Ed Diener 发现了生活满意度和成功的商业结果之间的定向因果关系的有力证据。另一个常见的误解是，我们的基因、环境或两者的结合决定了我们有多幸福。可以肯定的是，这两个因素都有影响。但一个人的总体幸福感却具有惊人的可塑性。你养成的习惯，你与同事互动的方式，你如何看待压力——所有这些都能增加你的幸福感和成功的机会。

参考答案：

While performance on nearly every level improves when people work with a positive mind-set, most people believe that success precedes happiness, but people who cultivate a positive mind-set perform better in the face of challenge, and another common misconception is that our genetics, our environment, or a combination of the two determines how happy we are, but the habits you cultivate and the way you interact with co-workers can be managed to increase your happiness.

140. Brain waves 脑电波 #091140

We can't see it, but brains hum with electrical activity. Brain waves created by the coordinated firing of huge collections of nerve cells pinball around the brain. The waves can ricochet from the front of the brain to the back, or from deep structures all the way to the scalp and then back again.

Called neuronal oscillations, these signals are known to accompany certain mental states. Quiet alpha waves ripple soothingly across the brains of meditating monks. Beta waves rise and fall during intense conversational turns. Fast gamma waves accompany sharp insights. Sluggish delta rhythms lull deep sleepers, while dreamers shift into slightly quicker theta rhythms.

Researchers have long argued over whether these waves have purpose, and what those

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

759

purposes might be. Some scientists see waves as inevitable but useless by-products of the signals that really matter — messages sent by individual nerve cells. Waves are simply a consequence of collective neural behavior, and nothing more, that view holds. But a growing body of evidence suggests just the opposite: Instead of by-products of important signals, brain waves are key to how the brain operates, routing information among far-flung brain regions that need to work together.

MIT's Earl Miller is among the neuro-scientists amassing evidence that waves are an essential part of how the brain operates. Brain oscillations deftly route information in a way that allows the brain to choose which signals in the world to pay attention to and which to ignore, his recent studies suggest.

Other research supports this view, too. Studies on people with electrodes implanted in their brains suggest brain waves, and their interactions, help enable emotion, language, vision and more.

全文翻译：

我们看不见它，但大脑充满了电活动。脑电波是由大量神经细胞在大脑周围的协调放电产生的。脑波可以从大脑前部反弹到后部，或者从深层结构一路反弹到头皮，然后再反弹回来。

这些信号被称为神经元振荡，已知伴随某些精神状态。安静的 α 波在冥想的僧侣的大脑中荡漾着抚慰人心的涟漪。Beta波在激烈的对话回合中起起落落。快速的伽马波伴随着敏锐的洞察力。缓慢的 δ 节律使深度睡眠者入睡，而做梦者则进入稍快的 δ 节律。

长期以来，研究人员一直在争论这些电波是否有目的，以及这些目的可能是什么。一些科学家认为，波是真正重要的信号(由单个神经细胞发送的信息)不可避免但无用的副产品。这种观点认为，波只是集体神经行为的结果，仅此而已。但越来越多的证据表明情况恰恰相反:脑电波不是重要信号的副产品，而是大脑如何运作的关键，它在需要协同工作的遥远大脑区域之间传递信息。

麻省理工学院的厄尔·米勒(Earl Miller)是正在搜集证据的神经科学家之一，这些证据表明，电波是大脑运作的重要组成部分。他最近的研究表明，大脑振荡巧妙地传递信息，使大脑能够选择世界上哪些信号应该注意，哪些应该忽略。

其他研究也支持这一观点。对大脑中植入电极的人的研究表明，脑电波及其相互作用有助于实现情感、语言、视觉等功能。

参考答案：

While brains hum with electrical activity, brain waves created by the coordinated firing of huge collections of nerve cells pinball around the brain, which is known to accompany certain mental states, but researchers have long argued over whether these waves have purpose, and what those purposes might be because waves are an essential part of how the brain operates and other research supports this view, too.

141. A flow state 流动状态 #091141

While in a flow state, people are highly involved and focused on what they are doing.

Flow experiences can occur in different ways for different people. It often happens when you are doing something that you enjoy and in which you are quite skilled.

This state is often associated with the creative arts, such as painting, drawing, or writing. However, it can also occur while engaging in a sport, such as skiing, tennis, soccer, dancing, or running.

全文翻译：

当处于心流状态时，人们高度投入并专注于他们正在做的事情。

心流体验会以不同的方式出现在不同的人身上。它通常发生在你在做你喜欢做的事，并且你很擅长的时候。

这种状态通常与创造性艺术有关，如绘画、素描或写作。然而，它也可能发生在从事运动时，如滑雪、网球、足球、跳舞或跑步。

参考答案：

While people are highly involved and focused on what they are doing in a flow state, flow experiences can occur in different ways for different people and it often happens when you are doing something that you enjoy and in which you are quite skilled, which is often associated with the creative arts, but it can also occur while engaging in a sport.

142. National Oceanography Centre 国家海洋学中心 #091142

The National Oceanography Centre (NOC) is engaged in research into the potential risks and benefits of exploiting deep-sea mineral resources, some of which are essential for low-carbon technology, as well as using ocean robots to estimate the environmental impact of these potential deep-sea mining activities.

The NOC has led an expedition on the RRS James Cook that found enough of the scarce element Tellurium present in the crust of a submerged volcano that, if it were all to be used in the production of solar PV panels, could provide 2/3rds of the UK's annual electricity supply. In addition, the NOC also led an international study demonstrating deep-sea nodule mining will cause long-lasting damage to deep-sea life, lasting at least for decades.

These nodules are potato-sized rocks containing high levels of metals, including copper, manganese and nickel. They grow very slowly on the sea-bed, over millions of years. Although no commercial operations exist to extract these resources, many are planned.

Professor Edward Hill, Executive Director at the NOC commented, "By 2050 there will be nine billion people on earth and attention is increasingly turning to the ocean, particularly the deep ocean, for food, clean supplies of energy and strategic minerals. The NOC is undertaking research related to many aspects and perspectives involved in exploiting ocean resources. This research is aimed at informing with sound scientific evidence the decisions that will need to be taken in the future, as people increasingly turn to the oceans to address some of society's greatest challenges."

全文翻译:

国家海洋学中心(NOC)正在研究开发深海矿物资源的潜在风险和收益, 其中一些对低碳技术至关重要, 并利用海洋机器人来估计这些潜在深海采矿活动对环境的影响。

国家海洋学中心(NOC)在詹姆斯·库克号(RRS James Cook)上领导了一支探险队, 在一座水下火山的地壳中发现了足够多的稀有元素碲, 如果将其全部用于太阳能光伏电池板的生产, 可以提供英国每年 2/3 的电力供应。此外, NOC 还领导了一项国际研究, 证明深海结核开采将对深海生物造成长期损害, 至少持续几十年。

这些结核是土豆大小的岩石, 含有大量的金属, 包括铜、锰和镍。它们在海床上生长

得非常缓慢，经过了数百万年。尽管目前还没有开采这些资源的商业活动，但已经计划了很多。

NOC 执行董事爱德华·希尔教授评论道：“到 2050 年，地球上将有 90 亿人口，人们的注意力越来越多地转向海洋，特别是深海，以获取食物、清洁能源和战略矿产。国家海洋局正在进行与海洋资源开发有关的多个方面和视角的研究。随着人们越来越多地求助于海洋来解决社会面临的一些最大挑战，这项研究旨在为未来需要做出的决定提供可靠的科学证据。”

参考答案：

While the National Oceanography Centre (NOC) is engaged in research into the potential risks and benefits of exploiting deep-sea mineral resources, the NOC has led an expedition and an international study demonstrating deep-sea nodule mining will cause long-lasting damage to deep-sea life, so by 2050 there will be nine billion people on earth and attention is increasingly turning to the ocean, particularly the deep ocean, for food, clean supplies of energy and strategic minerals.

143. Dandelion Seeds 蒲公英的种子 #091143

The extraordinary flying ability of dandelion seeds is possible thanks to a form of flight that has not been seen before in nature, research has revealed.

The discovery confirms the common plant among the natural world's best fliers.

It shows that movement of air around and within its parachute-shaped bundle of bristles enables seeds to travel great distances – often a kilometre or more, kept afloat entirely by wind power.

Researchers from the University carried out experiments to better understand why dandelion seeds fly so well, despite their parachute structure being largely made up of empty space.

Their study revealed that a ring-shaped air bubble forms as air moves through the bristles, enhancing the drag that slows each seed's descent to the ground.

This newly found form of air bubble – which the scientists have named the separated vortex ring – is physically detached from the bristles and is stabilised by air flowing through it.

The amount of air flowing through, which is critical for keeping the bubble stable and directly above the seed in flight, is precisely controlled by the spacing of the bristles.

763

This flight mechanism of the bristly parachute underpins the seeds' steady flight.

It is four times more efficient than what is possible with conventional parachute design, according to the research.

Researchers suggest that the dandelion's porous parachute might inspire the development of small-scale drones that require little or no power consumption.

Such drones could be useful for remote sensing or air pollution monitoring.

全文翻译：

研究表明，蒲公英种子之所以有非凡的飞行能力，是因为自然界中从未见过的一种飞行形式。

这一发现证实了这种普通植物是自然界最好的飞行家之一。

它表明，在其降落伞状的刚毛束周围和内部的空气运动使种子能够传播很远的距离——通常是一公里或更多，完全依靠风力保持漂浮。

该大学的研究人员进行了实验，以更好地理解蒲公英种子为什么能飞得这么好，尽管它们的降落伞结构主要是由空空间组成的。

他们的研究表明，当空气通过刷毛时，会形成一个环形气泡，增强阻力，减缓每颗种子落到地面的速度。

这种新发现的气泡形式——科学家们将其命名为分离的涡流环——与刷毛在物理上分离，并通过流经它的空气保持稳定。

通过的空气量对保持气泡的稳定和种子的正上方飞行至关重要，它由刷毛的间距精确控制。

这种刚毛状降落伞的飞行机制支撑着种子的稳定飞行。

根据研究，它的效率是传统降落伞设计的四倍。

研究人员认为，蒲公英的多孔降落伞可能会激发小型无人机的开发，这种无人机只需要很少或不需要电力消耗。

这种无人机可用于遥感或空气污染监测。

参考答案：

While the discovery confirms the common plant among the natural world's best fliers, it shows that movement of air around and within its parachute-shaped bundle of bristles enables seeds to travel great distances, and the dandelion's porous parachute might inspire the development of small-scale drones that require little or no power consumption, which could

be useful for remote sensing or air pollution monitoring.

144. Women university results 女性学术表现与就业困境 #091144

If women are so far ahead of men, why are they so far behind? Reports from both sides of the Atlantic show that female students dominate university courses, yet women still do not make it to the top.

A report on inequality in the UK said last week that girls had better educational results than boys at 16, went to university in greater numbers and achieved better degrees once they got there. “More women now have higher education qualifications than men in every age group up to age 44,” the report said.

In the US, 57 per cent of college graduates in 2006-07 were women. Women form the majority of all graduates under 45.

Yet few women make it to the boards of companies in either country.

In the UK, the proportion of women on FTSE 100 boards rose fractionally from 11.7 per cent to 12.2 per cent last year, according to the Cranfield University School of Management, but that was only because of a fall in the size of the boards.

In the US, women accounted for 15.2 per cent of board seats on Fortune 500 companies, according to Catalyst, the research organisation, which said the numbers had barely budged for five years.

The hopeful way of looking at this is that the rising generation of female graduates has yet to reach director age. Give it 10 years and they will dominate boards as they do universities.

If that were true, however, we would surely see the number of women director numbers moving up by now. The first year that women college graduates outnumbered men in the US was 1982. These graduates must be entering their 50s – prime director age.

全文翻译：

既然女人远比男人优秀，为什么她们落后男人那么多？来自大西洋两岸的报告均表明，尽管女生在大学课堂上占尽优势，但女人依旧没有攀上顶尖位置。

英国上周发表的一份有关两性差异的报告称，女生在 16 岁时的学习成绩优于男生；考上大学的人数多于男生；在大学取得的学位也好于男生。报告称：“在 45 岁前的各个年龄组，拥有高等教育学历的女性都多于男性。”

在美国，2006-07 届大学毕业生中，57% 是女性。在低于 45 岁的所有大学毕业生中，女英澳新三国（同一国家任意三所院校）

765

性也占大部分。

然而，不管在哪个国家，成功跻身公司董事会的女性都属凤毛麟角。在英国，据克兰菲尔德管理学院表示，去年在富时 100 指数成分股公司中，女性在董事会所占的比例从 11.7% 微升至 12.2%。但究其原因，完全是因为董事会规模有所缩小。

在美国，据研究机构 Catalyst 的数据，在“财富 500 强”企业中，只有 15.2% 的董事是女性。该机构还表示，这一比例 5 年来几乎毫无变化。

对此，一种乐观的想法是，“新生代”的女性大学毕业生尚未达到当董事的年龄。再过 10 年，她们就将会成为董事会中的多数，像在大学里一样。

然而，如果真的是这样，我们现在就应当看到，女性董事的人数在逐渐增多。在美国，女性大学毕业生人数超过男性，最早是在 1982 年。这批大学毕业生现在即将跨入 50 岁门槛——这正是当董事的黄金年龄。

参考答案：

More women now have higher education qualifications than men in every age group up to age 44, but few women make it to the boards of companies in either country, and the hopeful way of looking at this is that the rising generation of female graduates has yet to reach director age, but we would surely see the number of women director numbers moving up by now if that were true.

145. Biomimicry 仿生学 #091145

Biomimicry (from bios, meaning life, and mimesis, meaning to imitate) is a new discipline that studies nature's best ideas and then imitates these designs and processes to solve human problems. Studying a leaf to invent a better solar cell is an example. I think of it as “innovation inspired by nature.”

The core idea is that nature, imaginative by necessity, has already solved many of the problems we are grappling with. Animals, plants, and microbes are the consummate engineers. They have found what works, what is appropriate, and most important, what lasts here on Earth. This is the real news of biomimicry: After 3.8 billion years of research and development, failures are fossils, and what surrounds us is the secret to survival.

Like the viceroy butterfly imitating the monarch, we humans are imitating the best adapted organisms in our habitat. We are learning, for instance, how to harness energy like a leaf,

grow food like a prairie, build ceramics like an abalone, self-medicate like a chimp, create color like a peacock, compute like a cell, and run a business like a hickory forest.

The conscious emulation of life's genius is a survival strategy for the human race, a path to a sustainable future. The more our world functions like the natural world, the more likely we are to endure on this home that is ours, but not ours alone.

翻译：

生物模仿（源自希腊词根 bios，意为生命，和 mimesis，意为模仿）是一门研究自然界最佳设计和过程，然后模仿这些设计和过程以解决人类问题的新学科。以叶子为例来发明更好的太阳能电池就是一个示例。我将其视为“受自然启发的创新”。

核心思想是，自然界，出于必要性，已经解决了我们正在努力解决的许多问题。动物、植物和微生物是完美的工程师。它们找到了什么有效，什么合适，最重要的是，什么能在地球上持久存在。这就是生物模仿的真正意义：在经过 38 亿年的研究和发展后，失败已经化为化石，而我们周围的一切都是生存的秘诀。

就像维修蝴蝶在模仿王蝶一样，我们人类在模仿我们生存环境中最适应的生物。我们正在学习如何像叶子一样利用能源，像草原一样种植食物，像鲍鱼一样制作陶瓷，像黑猩猩一样自我医疗，像孔雀一样创造颜色，像细胞一样计算，以及像山核桃林一样经营企业。

有意识地模仿生命的天才是人类的生存策略，是通往可持续未来的途径。我们的世界越像自然界，我们在这个地球上生存的可能性就越大，虽然这个地球是我们的，但不仅仅是我们的。

参考答案：

Biomimicry is a new discipline that studies nature's best ideas and then imitates these designs and processes to solve human problems, and the core idea is that nature has already solved many of the problems we are grappling with, and we humans are imitating the best adapted organisms in our habitat, and the conscious emulation of life's genius is a survival strategy for the human race, a path to a sustainable future.

146. Immune system 免疫系统 #091146

What is the Immune System?

The immune system is a complex network of different organs, cells, and proteins that work together.

There are 2 main parts of the immune system: the innate immune system - you are born with this, and the adaptive immune system - you develop this when your body is exposed to microbes or chemicals released by microbes. These two immune systems work together.

The Innate Immune System

This is your child's rapid response system. It is the first to respond when it finds an invader. It is made up of the skin, the eye's cornea, and the mucous membrane that lines the respiratory, gastrointestinal, and genitourinary tracts. These all create physical barriers to help protect your child's body. They protect against harmful germs, parasites (such as worms), or cells (such as cancer). The innate immune system is inherited. It is active from the moment your child is born. When this system recognizes an invader, it goes into action right away. The cells of this immune system surround and cover the invader. The invader is killed inside the immune system cells (called phagocytes).

The Acquired Immune System

The acquired immune system, with help from the innate system, makes special proteins (called antibodies) to protect your body from a specific invader. These antibodies are developed by cells called B lymphocytes after the body has been exposed to the invader. The antibodies stay in your child's body. It can take several days for antibodies to form. But after the first exposure, the immune system will recognize the invader and defend against it. The acquired immune system changes during your child's life. Immunizations train your child's immune system to make antibodies to protect them from harmful diseases.

中文翻译:

什么是免疫系统?

免疫系统是一个复杂的网络, 由不同的器官、细胞和蛋白质共同作用。

免疫系统有两个主要部分:先天免疫系统——你生来就有, 以及适应性免疫系统——当你的身体暴露于微生物或微生物释放的化学物质时, 你就会形成适应性免疫系统。这

768

两个免疫系统协同工作。

先天免疫系统

这是你孩子的快速反应系统。当它发现入侵者时，它是第一个做出反应的。它是由皮肤、眼角膜和呼吸道、胃肠道和泌尿生殖道的粘膜组成的。这些都创造了物理屏障来帮助保护孩子的身体。它们可以防止有害的细菌、寄生虫(如蠕虫)或细胞(如癌症)。先天免疫系统是遗传的。从孩子出生的那一刻起，它就开始活跃。当这个系统识别出入侵者时，它会立即采取行动。免疫系统的细胞包围并覆盖入侵者。入侵者在免疫系统细胞(称为吞噬细胞)内被杀死。

获得性免疫系统

获得性免疫系统在先天系统的帮助下，产生特殊的蛋白质(称为抗体)来保护你的身体免受特定入侵者的侵害。这些抗体是由 B 淋巴细胞在人体暴露于入侵者后产生的。抗体会留在孩子体内。抗体的形成可能需要几天的时间。但在第一次接触后，免疫系统会识别入侵者并防御它。在孩子的一生中，获得性免疫系统会发生变化。免疫可以训练孩子的免疫系统产生抗体，保护他们免受有害疾病的侵害。

参考答案：

The immune system is a complex network of different organs, cells, and proteins that work together, and there are 2 main parts: the innate immune system and the adaptive immune system, and the innate immune system is your child's rapid response system and the first to respond when it finds an invader, but the acquired immune system makes special proteins (called antibodies) to protect your body from a specific invader.

147. Bank Overdraft 银行透支 #091147

Banks provide short-term finance to companies in the form of an overdraft on a current account. The advantage of an overdraft is its flexibility. When the cash needs of the company increase with seasonal factors, the company can continue to write cheques and watch the overdraft increase. When the goods and services are sold and cash begins to flow in, the company should be able to watch the overdraft decrease again. The most obvious example of a business which operates in this pattern is farming. The farmer uses the overdraft to finance the acquisition of seed for arable farming, or feed through the winter for stock farming and to

英澳新三国（同一国家任意三所院校）

769

cover the period when the crops or animals are growing and maturing. The overdraft is reduced when the crops or the animals are sold.

The main disadvantage of an overdraft is that it is repayable on demand. The farmer whose crop fails because of bad weather knows the problem of being unable to repay the overdraft. Having overdraft financing increases the worries of those who manage the company. The other disadvantage is that the interest payable on overdrafts is variable. When interest rates increase, the cost of the overdraft increases. Furthermore, for small companies there are often complaints that the rate of interest charged is high compared with that available to larger companies. The banks answer that the rates charged reflect relative risk and it is their experience that small companies are more risky.

中文翻译：

银行通过在活期账户上提供透支的形式，为公司提供短期融资。透支的优点在于其灵活性。当公司因季节性因素导致资金需求增加时，仍可以继续开支票，并看到透支额增加。当商品和服务售出，现金开始流入时，公司应能看到透支额再次减少。最明显的例子是农业企业。农民使用透支来为农作物种植购置种子，或为畜牧业在冬季购买饲料，并覆盖农作物或牲畜生长成熟的期间。当农作物或牲畜售出时，透支额会减少。

透支的主要缺点是它可以被随时要求偿还。由于恶劣天气导致农作物歉收的农民了解无法偿还透支的困境。透支融资增加了公司管理者的担忧。另一个缺点是透支的利息是浮动的。当利率上升时，透支的成本也会增加。此外，小公司常常抱怨，与大公司相比，所收取的利率较高。银行的回应是，收取的利率反映了相对的风险，并且根据他们的经验，小公司风险更大。

参考答案：

Banks provide short-term finance to companies in the form of an overdraft on a current account, and the advantage of an overdraft is its flexibility, and main disadvantage of an overdraft is that it is repayable on demand.

148. Education Technology 教育技术 #091148

In 1953 B.F. Skinner visited his daughter's maths class. The Harvard psychologist found every pupil learning the same topic in the same way at the same speed. A few days later he built his first "teaching machine", which let children tackle questions at their own pace. By the mid-1960s similar gizmos were being flogged by door-to-door salesmen. Within a few years, though, enthusiasm for them had fizzled out.

Since then, education technology (EdTech) has repeated the cycle of hype and flop, even as computers have reshaped almost every other part of life. One reason is the conservatism of teachers and their unions. But another is that the brain-stretching potential of edtech has remained unproven.

Today, however, Skinner's heirs are forcing the sceptics to think again. Backed by billionaire techies such as Mark Zuckerberg and Bill Gates, schools around the world are using new software to "personalize" learning. This could help hundreds of millions of children stuck in dismal classes—but only if edtech boosters can resist the temptation to revive harmful ideas about how children learn. To succeed, edtech must be at the service of teaching, not the other way around.

The conventional model of schooling emerged in Prussia in the 18th century. Alternatives have so far failed to teach as many children as efficiently. Classrooms, hierarchical year-groups, standardized curriculums and fixed timetables are still the norm for most of the world's nearly 1.5bn schoolchildren.

中文翻译：

1953年，B.F. 斯金纳参观了他女儿的数学课。这位哈佛心理学家发现每个学生都以相同的方式、相同的速度学习同一个主题。几天后，他制造了第一台“教学机器”，这台机器让孩子们可以按照自己的节奏回答问题。到20世纪60年代中期，类似的小工具已经由推销员挨家挨户地出售了。然而，几年后，人们对这些设备的热情逐渐消退。自那以后，教育技术（EdTech）不断重复着炒作和失败的循环，即使计算机已经重塑了几乎生活的其他各个方面。一个原因是教师及其工会的保守性。但另一个原因是教育技术的智力开发潜力仍未得到证实。然而，今天，斯金纳的继承者们正在迫使怀疑者重新思考。在马克·扎克伯格和比尔·盖茨等亿万富翁科技人士的支持下，世界各地的学校正在使用新的软件来“个性化”学习。这可能有助于数亿陷入低效课堂的孩子——

英澳新三国（同一国家任意三所院校）

771

但前提是教育技术的支持者能抵制住复兴有关儿童学习的有害理念的诱惑。要取得成功，教育技术必须服务于教学，而不是相反。18 世纪在普鲁士，传统的学校模式开始出现。迄今为止，其他替代方案都未能以同样高效的方式教育同样多的孩子。课堂、分年级教学、标准化课程和固定时间表仍然是全球近 15 亿学童中的大多数人的常态。

参考答案：

In 1953 B.F. Skinner built his first "teaching machine", which let children tackle questions at their own pace, and since then, education technology (EdTech) has repeated the cycle of hype and flop, but today Skinner's heirs are forcing the sceptics to think again, and the conventional model of schooling emerged in Prussia in the 18th century.

149. Differences in intelligence 智力差异 #091149

People differ greatly in all aspects of what is casually known as intelligence. The differences are apparent not only in school, from kindergarten to college, but also in the most ordinary circumstances: in the words people use and comprehend, in their differing abilities to read a map or follow directions, or in their capacities for remembering telephone numbers or figuring change. The variations in these specific skills are so common that they are often taken for granted.

Yet what makes people so different? It would be reasonable to think that the environment is the source of differences in cognitive skills --- that we are what we learn. It is clear, for example, that human beings are not born with a full vocabulary; they have to learn words. Hence, learning must be the mechanism by which differences in vocabulary arise among individuals. And differences in experience --- say, in the extent to which parents' model and encourage vocabulary skills or in the quality of language training provided by schools --- must be responsible for individual differences in learning.

Earlier in this century, psychology was in fact dominated by environmental explanations for variance in cognitive abilities. More recently, however, most psychologists have begun to embrace a more balanced view: one in which nature and nurture interact in cognitive development. During the past few decades, studies in genetics have pointed to a substantial role for heredity in molding the components of intellect, and researchers have even begun to track down the genes involved in cognitive function. These findings do not refute the notion that environmental factors shape the learning process. Instead, they suggest that differences in

英澳新三国（同一国家任意三所院校）

people's genes affect how easily they learn.

中文翻译:

人们在所谓的智力方面存在巨大差异。这些差异不仅在学校里，从幼儿园到大学都很明显，在最日常的情境中也有所体现：例如人们使用 and 理解的词汇、阅读地图或遵循指示的能力，或记住电话号码或算出找零的能力。这些具体技能的差异如此普遍，以至于经常被认为理所当然。然而，是什么让人们如此不同呢？

合理的推测是，环境是认知技能差异的来源——我们就是我们所学到的东西。例如，很明显，人类并不是天生就拥有丰富的词汇，他们必须学习单词。因此，学习必定是导致个人词汇差异的机制。而经验的差异——例如父母在多大程度上为孩子树立和鼓励词汇技能的榜样，或学校提供的语言训练的质量差异——必然是造成个人学习差异的原因。

在本世纪早期，心理学事实上主要通过环境来解释认知能力的差异。然而，最近大多数心理学家开始接受一种更加平衡的观点：自然和培养在认知发展中相互作用。在过去的几十年里，遗传学研究指出，遗传在智力构成中的作用相当重要，研究人员甚至开始追踪与认知功能相关的基因。这些发现并不否定环境因素对学习过程的塑造作用。相反，它们表明，基因差异会影响人们学习的难易程度。

参考答案:

People differ greatly in all aspects of what is casually known as intelligence, and the environment is the source of differences in cognitive skills, and most psychologists have begun to embrace a more balanced view: nature and nurture interact in cognitive development, and studies in genetics have pointed to a substantial role for heredity in molding the components of intellect, and they suggest that differences in people's genes affect how easily they learn.

150. Sustainable Development 可持续发展 #091150

The Brundtland Report, Our Common Future (1987), defines sustainable development as "development which meets the needs of the present without compromising the ability of future generations to meet their own needs". Implicit in this definition is the idea that the old

英澳新三国（同一国家任意三所院校）

免收服务费申请 扫码咨询

773

pattern of development could not be sustained. Is this true? Development in the past was driven by growth and innovation. It led to new technologies and huge improvements in living standards. To assume that we know what the circumstances or needs of future generations will be is mistaken and inevitably leads to the debilitating sense that we are living on borrowed time.

Only if we assume that society will remain static can we understand the needs of the future. The way we live today could not have been predicted twenty years ago. The sustainability paradigm fails to recognize this. It is a static view and thus places limits on human ingenuity. Similarly, a whole host of false assumptions dominate environmental thought; the scale of problems is exaggerated, the amount of resources is underestimated and spurious links are made between areas such as green policies and profit, poverty and environmental degradation. Those of us who want a better future need to question these assumptions.

中文翻译:

布伦特兰报告《我们共同的未来》（1987年）将可持续发展定义为“既满足当代需求，又不损害后代满足自身需求能力的发展”。这一定义隐含着观点：过去的旧发展模式无法持续下去。这是真的吗？过去的发展是由增长和创新推动的，带来了新技术和生活水平的大幅提升。

假设我们能够准确预知未来几代人的需求和处境，这是错误的。这种假设不可避免地会让人觉得我们现代的生活像是“借来的时间”，充满不确定性。

只有在假设社会将保持静止不变的情况下，我们才能理解未来的需求。然而，二十年前的我们根本无法预见到今天的生活方式。可持续发展的理论没有意识到这一点。它是一种静态的视角，从而限制了人类的创造力。同样，一系列错误的假设主导了环境思维：问题的严重性被夸大，资源的数量被低估，绿色政策与利润、贫困与环境退化之间被强行建立不可靠的关联。对于那些希望未来变得更美好的人来说，我们需要质疑这些假设。

参考答案:

The Brundtland Report defines sustainable development as "development which meets the needs of the present without compromising the ability of future generations to meet their own needs", and to assume that we know what the circumstances of future generations will be is mistaken, and only if we assume that society will remain static can we understand the needs

of the future, and those of us who want a better future need to question these assumptions.

151. Public Speaking 公共演讲 #091151

Many insecurities, fears, and doubts stem from lack of understanding or lack of knowledge about something. The more you understand and know about a situation, the more comfortable you will be and thus the less power your shyness will have over you.

Let's take for example the subject of public speaking. This is an activity that terrifies most people half to death, but only because most people don't have much knowledge about it. If you do some research and investigation, you'll come to learn that it's perfectly natural to be terrified of public speaking, and that almost every single person has the same fears and insecurities that you do.

When you take it further and ask yourself why you are so terrified of this, you'll come to learn that you are scared of being judged, or of being laughed at. From there, you can go and read and learn about people who are good at public speaking—learn their tips and strategies.

This way you are much more prepared because your knowledge on the subject is vast. As a result of this, your confidence will already be much higher than before, which might allow you to attempt public speaking when you join a club like Toastmasters. As you practice more, you will naturally become even more confident.

This rule applies to any area where you feel insecure. Read and research as much about the topic as possible. This will help increase your confidence enough to give the activity a try to see if you might be able to become better at it. And that initial confidence to take action is all you need to get the ball rolling and overcome your shyness.

中文翻译:

许多不安全感、恐惧和怀疑源于对某事缺乏理解或缺乏知识。你对一种情况了解得越多，你就会越舒服，这样你的羞怯就会越少。

让我们以公开演讲为例。这是一项把大多数人吓得半死的活动，但只是因为大多数人对它知之甚少。如果你做一些研究和调查，你会发现害怕公开演讲是很自然的，几乎每个人都有和你一样的恐惧和不安全感。

当你更进一步，问自己为什么你如此害怕这个，你就会知道你害怕被评判，或者被嘲笑。从那里，你可以去阅读和学习那些擅长公开演讲的人——学习他们的技巧和策略。这样你就准备得更充分了，因为你在主题上的知识是丰富的。这样做的结果是，英澳新三国（同一国家任意三所院校）

你的信心会比以前高得多，这可能会让你在加入像 Toastmasters 这样的俱乐部时尝试公开演讲。当你练习得越多，你自然会变得更加自信。

这条规则适用于任何你感到不安全的地方。尽可能多地阅读和研究这个主题。这将有助于增加你的信心，让你试着去做这件事，看看你是否能做得更好。你所需要的就是采取行动的最初的自信，让你开始行动，克服害羞。

参考答案：

Many insecurities, fears, and doubts stem from lack of understanding or lack of knowledge about something, and reading and researching as much about the topic as possible will help increase your confidence, and that initial confidence to take action is all you need to get the ball rolling and overcome your shyness.
